Flagged for repair - Set 9

79 questions held back from set 9

DIRECTIONS (Q. 1)
In the following question a part of the sentence is given in bold, it is then followed by four sentences which try to explain the meaning of the idiom/phrase given in bold. Choose the alternative from the four given below each question which explains the meaning of the phrase correctly without altering the meaning of the sentence given as question. If none of the sentence explains the meaning of the highlighted phrase, choose option (e) i.e., “none of these” as your answer choice. 10 A publishing house

1. Some pundits are advising European politicians to keep a stiff upper lip and take on Trump’s challenge to take more responsibility for their own defense.

(a) Some pundits are advising European politicians to be aghast and take on Trump’s challenge to take more responsibility for their own defense
(b) Some pundits are advising European politicians to be valiant and take on Trump’s challenge to take more responsibility for their own defense
(c) Some pundits are advising European politicians to be restrained and take on Trump’s challenge to take more responsibility for their own defense
(d) Some pundits are advising European politicians to remain hushed and take on Trump’s challenge to take more responsibility for their own defense
(e) None of these

DIRECTIONS (Q. 2-3)
Study the following table chart carefully to answer the question given below: The table graph shows the monetary policy statement issued by the RBI in different quarters. Quarters Q-1 Q-2 Q-3 Q-4 Q-5 Q-6 Rate Repo Rate 7.50% 6.25% 7.25% 7.75% 7.75% 8.50% Reverse Repo Rate 6.50% 5.25% 6.25% 6.75% 6.75% 7.50% CRR 4.25% 4.00% 4.50% 4.75% 4.25% 4.50% SLR 22.50% 23.00% 22.50% 23.50% 22.00% 23.50% MSF 9.50% 9.75% 8.25% 8.75% 8.25% 9.50% Bank Rate 9.50% 9.75% 8.25% 8.75% 8.25% 9.50%

2. The difference between the average of the rates of the sixth quarter and that of the third quarter is

(a) 0.25
(b) 0.50
(c) 0.75
(d) 1.00
(e) None of these

FLAGGED - asks about a graph/table that has no usable image

3. The ratio of the sum of the Repo Rates in all the given quarters to that of the Reverse Repo Rates in all the given quarters is

(a) 17:13
(b) 17:15
(c) 15:13
(d) 13:15
(e) None of these

FLAGGED - asks about a graph/table that has no usable image

DIRECTIONS (Q. 4)

Read the following passage and answer the given questions. Living in a warm, dry, and healthy home is declared by the Chief Human Rights Commissioner of New Zealand, Paul Hunt, to be as fundamental a human right as the presumption of innocence or freedom of expression. However, an alarming "accountability deficit" in ensuring the upkeep of such homes poses a threat to New Zealand's democratic ideals. Despite being ranked the second freest nation globally in 2021, issues arise from property being the primary source of wealth for New Zealanders, a widening equality gap, and the challenging living conditions for approximately 600,000 households residing in non-owned properties. The disparity is evident in the poor state of many rental homes, with an estimated 30% to 50% of the rental stock being in suboptimal condition. To address this, the government introduced healthy homes standards in 2019, aiming to make rental properties warmer and drier. Landlords were given deadlines to comply, with significant penalties for non-compliance, reflecting a shift in the system from an unregulated environment to one with minimum standards. However, issues of accountability persist, with the complia

4. Before the introduction of deadlines and penalties, what can be stated about the regulatory environment for landlord?

(a) Landlords operated in an environment marked by a deficiency of regulation or established standards
(b) Charges were imposed on landlords for providing subpar housing conditions to their tenants before the introduction of deadlines and penalties
(c) Landlords resisted the strict regulations implemented by the government in the pre-penalty era
(d) The regulatory framework did not foster compliance among landlords; instead, it encouraged non-compliance
(e) The regulatory environment for landlords was stringent, with clearly defined regulations and standards in place

6. Ten persons sit in two parallel rows and face each other. In row 1: A, B, C, D and E sit and all of them face south and in row 2: P, Q, R, S ad T sit and all of them face north. The consecutive alphabetical named persons didn’t sit adjacent to each other. R sits second from one of the ends. Only one person sits between R and the one who faces B. C sits second to the right of E who faces the one who sits immediate left of S. Only one person sits between Q and P. Who among the following faces A?

(a) The one who sits adjacent to Q
(b) The one who sits to the right of P
(c) P
(d) The one who sits immediate right of T
(e) None of these

FLAGGED - refers to an arrangement/set that was never extracted

DIRECTIONS (Q. 7-10)
In the given questions, two statements are given Statement (I) and statement (II). You have to determine which statement/s is/are necessary/sufficient to find out the answer of the question.

7. The ratio of the marked price of article Q to the selling price of article P is 5:4, respectively. Find the profit (in Rs) earned after selling article P. Statement
I. The profit percent earned on article Q is 16.67%, and the markup percentage on article Q is 66.67%. Statement
II. The discount percent on article P is 20% while total profit earned on both the articles together is 66.67%.

(a) Neither statement (I) nor statement (II) by itself is sufficient to answer the question
(b) Statement (II) alone is sufficient to answer the question but statement (I) alone is not sufficient to answer the question
(c) Either statement (I) or statement (II) by itself is sufficient to answer the question
(d) Both the statements taken together are necessary to answer the questions, but neither of the statements alone is sufficient to answer the question
(e) Statement (I) alone is sufficient to answer the question but statement (II) alone is not sufficient to answer the questions

FLAGGED - option text still carries the next question

8. Set P and set Q contains four consecutives odd number and four consecutives even number respectively. Find the sum of the largest numbers from both the sets. Statement
I. Largest number of set P is one less than the smallest number of set Q. Statement
II. The sum of the smallest number of both the sets together is 29.

(a) Neither statement (I) nor statement (II) by itself is sufficient to answer the question
(b) Statement (II) alone is sufficient to answer the question but statement (I) alone is not sufficient to answer the question
(c) Either statement (I) or statement (II) by itself is sufficient to answer the question
(d) Both the statements taken together are necessary to answer the questions, but neither of the statements alone is sufficient to answer the question
(e) Statement (I) alone is sufficient to answer the question but statement (II) alone is not sufficient to answer the questions

FLAGGED - option text still carries the next question

9. What is the length of platform? Statement
I. Train ‘A’ can cross the platform in 20 seconds and it can cross another train ‘B’ coming from opposite direction in 12 seconds. Statement
II. Train ‘B’ can cross the same platform in 15 seconds and it can cross a man walking towards it in 4 seconds

(a) Neither statement (I) nor statement (II) by itself is sufficient to answer the question
(b) Statement (II) alone is sufficient to answer the question but statement (I) alone is not sufficient to answer the question
(c) Either statement (I) or statement (II) by itself is sufficient to answer the question
(d) Both the statements taken together are necessary to answer the questions, but neither of the statements alone is sufficient to answer the question
(e) Statement (I) alone is sufficient to answer the question but statement (II) alone is not sufficient to answer the questions

FLAGGED - option text still carries the next question

10. Total 24 balls are in a bag. If one ball is drawn at random from the bag, then find the probability that drawn ball is of red color? Statement

I. Probability of getting a ball that is not red is twice the probability of getting a red color ball. Statement

II. Blue balls in the bag is 6

(a) Neither statement (I) nor statement (II) by itself is sufficient to answer the question

(b) Statement (II) alone is sufficient to answer the question but statement (I) alone is not sufficient to answer the question

(c) Either statement (I) or statement (II) by itself is sufficient to answer the question

(d) Both the statements taken together are necessary to answer the questions, but neither of the statements alone is sufficient to answer the question

(e) Statement (I) alone is sufficient to answer the question but statement (II) alone is not sufficient to answer the questions

FLAGGED - option text still carries the next question

DIRECTIONS (Q. 11)

The pie chart shows percentage distribution of total officers (Government and Private) working in four (P, Q, R and S) different cities. The table shows number of private officers working in these cities. Read the following pie chart and table carefully and answer the questions given below. Note: (i) Average number of private officers working in cities P, R and S is 400. (ii) The ratio of number of private officers working in cities S and P is 3:7 respectively. 25

11. 80% of the total officers in P work in the banking sector, and 60% of the private officers in P work in the banking sector. Find the government officers working in the non-banking sector.

(a) 30

(b) 25

(c) 20 26

(d) 10

(e) 15

FLAGGED - asks about a graph/table that has no usable image

DIRECTIONS (Q. 12)

The table shows total students who opted two different courses (Traditional and Professional) in two (Amber and Dhara) different institute in three (2019, 2020 and 2021) different years. (Each student opted for only one course). Read the following table carefully and answer the questions given below. Note: Students who opted for professional courses in Dhara institute in 2019, 2020 and 2021 are 60, 85 and 40 respectively.

12. Find the difference between the total students in Amber Institute who opted for the traditional courses in 2021 and the total students in Dhara Institute who opted for the professional courses in 2020.

(a) 3x+5

(b) 2.5x+10

(c) 4.5x-15

(d) 4x+20

(e) 6x-20 28

DIRECTIONS (Q. 13-14)
The pie chart shows the percentage distribution of total cost of a firm to make a unit of an article. The total revenue of the firm is Rs 78125 to sell all the articles. Read the following pie chart carefully and answer the questions given below. Note:

13. Find the difference between total cost of 12 units and total advertisement cost of 18 units (in Rs). 35

(a) 24200
(b) 22400
(c) 27300
(d) 28400
(e) 20200

FLAGGED - asks about a graph/table that has no usable image

14. If selling price per unit is increased by 20% and gross profit remains same, then find the difference between new advertisement cost of four article and the previous advertisement cost of four articles (in Rs).

(a) 30
(b) 25
(c) 35
(d) 37.5
(e) 40 Solutions S1. Ans.(c) Sol. The term "jumble" implies a disorderly mixture or collection. In the context of tectonic plates, the idea is that they are not neatly arranged but rather in a state of disarray, akin to a puzzle. "Jostling" fits well here, meaning the plates are moving or pushing against each other in a chaotic manner. S2. Ans.(e) Sol. The word "stabilize" is incorrect in this context because it suggests a sense of maintaining stability or balance, which doesn't align with the idea that the plates are actually destroyed. The sentence talks about the conventional wisdom that sugges

17. What is the number of ball pens sold by C?

(c) 59 : 47 C
(d) 60 : 53
(a) 450
(e) 60 : 57 6-10: Answer the questions based on the information
(b) 300 given below. Three shopkeepers, namely A, B and C, each sold different number of two types of pens i.e. ball and gel. Number of ball pens sold by A is

FLAGGED - option text still carries the next question

18. What is the ratio of number of ball pens to 200 more than the number of gel pens sold by number of gel pens sold by B? him, and total number of pens sold by A is

(a) 1 : 2 of number of ball to gel pens sold by him is 3:2
(b) 3 : 2 Number of ball pens and gel pens sold by B is
(c) 2 : 3 20% less and 60 less respectively than the same
(d) 4 : 3 sold by C. Note: Total number of pens sold = Number of (ball + gel) pens sold
(e) None of these

FLAGGED - a stacked fraction collapsed into loose digits

19. Sol. c) 50 40 30 20 10 0 Population in 2017 45 38 33 20 1815 A B 40 28 35 25 D E C Cities Percent increase in population of city D from year 2007 to year 2017 is what percent less than percent increase in population of city A from year 2007 to year 2017?

(a) 57.67%
(b) 55.67%
(c) 51.67%
(d) 61.67%
(e) 63.67% Percent increase in population of city D = (%=) × 100 = % Percent increase in population of city A = 1 60 × 500 30 × 500 60 × 500 0 × 500 = + + + 5 100 100 100 100 40 × 500 + 100 1 = × {300 + 150 + 300 + 0 + 200} = 190 5 Q11-15. Given bar diagram shows the population of five cities in year 2007 and

FLAGGED - option text still carries the next question

20. × 100 ( )× 126 × 1000 = 31500 4 Find difference between the total population of cities A and D in year 2017 and total population of cities B and C in 2007? For

(a) 12000
(b) 14000
(c) 8000
(d) 10000
(e) 16000 Sol. d) Required difference = [(33 + 40) − (18 + 45)] × 1000 = 10 × 1000 = 10000

FLAGGED - stem ends mid-sentence

21. 110 = 22000 100 Population of city D in 2017 is what percent of population of city E in 2007?

(a) 111 %
(b) 114 %
(c) 121 %
(d) 91 %
(e) 101 % By Arun Sir Table below shows different items sold by shopkeeper; Quantity of items sold in kg. Discount offered on list price, percentage markup price/kg and list price/kg. Some values are missing. You need to calculate these values if required

FLAGGED - option text still carries the next question

22. List price per kg of wheat is what percent less than the list price per kg of tea if selling price of 2.5 kg of tea is 900 Rs. and discount offered on list price is 400

(a) 80%
(b) 83%
(c) 93%
(d) 90%
(e) 85% Sol. d) Selling price per kg of Tea = . = 360 Rs. Let cost price per kg of Tea of x Selling price of tea per kg × 100 = × 100 = 114 % Directions: Study the given graph carefully to answer the question that follow: 4 7 × x = 360 49 6 x = 336 List price of Tea = x 7 = × 336 = 392 6 Required % = × 100 350 = × 100 ≈ 90% 392 = 1− Sol. b) Required percent = 7

FLAGGED - option text still carries the next question

23. What is the ratio of percentage discount offered on wheat to the percentage discount offered on rice if shopkeeper gains 1330 Rs. on selling whole quantity of wheat and % markup price of wheat For

(a) 15 : 28
(b) 18 : 23
(c) 24 : 29
(d) 23 : 21
(e) None of these Total quantity = = 6 kg Quantity of coffee = 8 kg Required average = = = 35.2 kg Sol. a) Profit per kg on wheat = = 19 Rs. × Cost price of wheat = = 20 Rs. Per kg % discount offered on wheat = × 100 = % % discount offered on Rice = % Required ratio = × = 15 : 28

FLAGGED - stem ends mid-sentence; option text still carries the next question

24. Sedan cars in bad condition is what percent of sum of ford cars in good condition and Audi cars in bad condition?

(a) 54 %
(b) 47 %
(c) 36 %
(d) 30 %
(e) 57 % Sol. d) Sedan cars in bad condition Sol. a) = List price of Honey = 1500 Selling price of Honey = 100 − % 1500 = Rs. 1100 per kg Given (list price – selling) : (Selling price – cost price) ( ) ( ) 20 × 60000 = 12000 100 Ford cars in good condition = 75 × 48000 = 36000 100 Audi cars in bad condition 10 × 32000 = 3200 100 Required percentage = × 100 1500 30 = % = 30 % 49 49 = = 1200=1400 – 4x 4x = 3200 x = 800 (cost price) So profit per kg = 300 8

36. 22% D Speed : Speed on Monday on Tuesday 2 : 3 3 : 4 4 : 6 4 : 4 6 : 9 4 : 5 8% E F : Speed on Wednesday : 2 : 5 : 5 : 7 : 5 : 3 On Wednesday, train ‘B’ crosses train ‘D’ coming from opposite direction in 6 seconds. If speed of train ‘B’ on Monday is 97.2 km/hour then in how much time train ‘F’ can cross train ‘D’ on Monday if train ‘D’ is coming from opposite direction and speed of train ‘F’ on Monday is 20 m

(a) 6 seconds
(b) 8 seconds
(c) 10 seconds
(d) 12 seconds
(e) 14 seconds Sol. b) Directions: Bar graph given below shows length of six different trains and table given below shows ratio between speed of six trains on three different days. Study the data carefully and answer the following questions

FLAGGED - a stacked fraction collapsed into loose digits; option text still carries the next question

37. Let speed of train ‘C’ on Monday, Tuesday and Wednesday be 4x, 6x and 5x respectively. Train ‘C’ travel 5 hours on Monday and 15 hours on Tuesday. ∴ Total distance = 5 × 4x + 15 × 6x = 110x On the same day i.e, Tuesday, train ‘C’ start from Kanpur. It travels 6 hours on Tuesday and 17.8 hours on Wednesday. ∴ total distance travel = 6 × 6x + 17.8 × 5x 36x + 89x = 125x ATQ, 125x = 110x + 180 => 15x = 180 => x = 12 speed of train ‘C’ on Monday = 12 × 4 = 48 km/hour = m/sec Length of train ‘C’ = × 1600 = 384 Required time = × 3 = 28.8 sec On Monday, train ‘A’ takes 2.5 hours more to cover 900 km distance than train ‘C’. If train ‘A’ can cross a platform of length 128 in 12.8 seconds on Tuesday then find in how much time (in seconds) train ‘C’ can cross two poles 66 m apart from each other on Tuesday?

(a) 12 seconds
(b) 16 seconds
(c) 20 seconds
(d) 24 seconds
(e) 30 seconds

FLAGGED - an equation lost its exponent and no longer matches the key

38. Interest earned by Prakash on CI = P x [(1 + r/100)t - 1] = 2/3 x 60000 x [(1 + 6/100)2 - 1] = 40000 x 106/100 x 106/100 - 40000 = 44944 - 40000 = Rs.4944 Interest earned by Prakash on SI = (P x r x t)/100 = (1/3 x 60000 x 6 x 5)/100 = Rs.6000 Total interest earned by him = 4944 + 6000 = Rs.10944 Find the respective ratio of the interest earned by Dinesh and Nilesh, if Dinesh invested his amount on simple interest for 8 years and Nilesh invested his amount on simple interest for 5 years.

(a) 3:2
(b) 2:3
(c) 3:1

DIRECTIONS (Q. 47)
Given below is the table showing the investment of five persons in a business, time for which investment made, share of profit and percentage of profit. Some values are missing in the table, you have to calculate this value if necessary to answer the questions. For .

47. Total of C and E = 49000 Profit of A is what % of profit of C if profit of C is % of more than profit of A.

(a) 72%
(b) 75%
(c) 60%
(d) 48%
(e) 55% Sol. a) Let profit of A = x, x = 10000 x = 7200 = 7200 Sum of profit of A & C = 7200 + 10000 = 17200 What is the total profit of all 5 person if profit percentage of E is 50% more than profit % of D

FLAGGED - option text still carries the next question

DIRECTIONS (Q. 48-50)
Line graph given below shows the distance between Delhi to five different cities in kilometer and Table given below shows the speed of five different cars in km

48. Distance travel by car P = 1500 + 3000 = 4500 km Total Time taken = 4500/40 = 112.5 hour Time taken by car R from Delhi to City A =1000/60 = 50/3 hours Time taken from city A to city B = 112.5 – 50/3 = 287.5/3 Distance from between City A to city B = 287.5/3 × 60 = 5750 km Find the approximate time car ‘T’ takes to reach city ‘E’ from city ‘A’ if city ‘A’ and city ‘E’ is north and east direction of Delhi respectively.\

(a) 24 hours
(b) 27 hours
(c) 20 hours
(d) 36 hours

(e) 42 hours For

FLAGGED - asks about a graph/table that has no usable image

49. Distance between city A and city E =√10002 +15002 = √1000000 + 2250000 = √3250000 = 500 √13km Approximate time taken by car 'T' = 500√13/75 ≈ 24 hours Car Q and Car S start from Delhi for city B and city C respectively and they reached in equal time. If Car Q and Car S starts from city B and city D respectively at same time and move towards each other, then time taken by car Q to cross car S is what percent of the time taken by car Q to reach city B from Delhi. Distance between city B and city D is 1500 km.

(a) 25%
(b) 20%
(c) 30%
(d) 35%
(e) 16% a policeman started to catch him in a car R. Due to this, thief increases the speed of his car by 100%. By this, the policeman is able to catch him at 3/5 th of the distance of city E from Delhi. Find the initial speed of car 'S'

FLAGGED - option text still carries the next question; asks about a graph/table that has no usable image

50. A thief runs in a car S from Delhi to city E and after 6 hours of running, 48 SOL. 1500×3/5 = 900 km Time taken by car R to cover this distance = 900/60 = 15 hour Let initial speed of car S = x km/hr So, ATQ 6x + 15(2x) = 900 6x + 30x = 900 36x = 900 => x = 25 km/hr Car P and Car Q start from Delhi for city A. Car Q first reaches at city A and meets car P in between the way, 200 km from city 'A'. Find after how much time they will meet second time after first time meeting if they continue their to and fro motion.

(a) 24 hours
(b) 15 hours
(c) 16 hours
(d) 25 hours
(e) None of these Distance between Delhi and city A = 1000 km Distance covered by Car Q before first meeting = 1200 km Distance covered by Car P before first meeting = 800 km Speed of car P = 40 km/hr For

FLAGGED - an equation lost its exponent and no longer matches the key; option text still carries the next question; asks about a graph/table that has no usable image

51. Speed of Boat C in still water = 40 × 110% = 44 km/h Speed of stream = 15 × 120% = 18 km/h Time taken by Boat C to cover the distance of 91 km upstream = 91/ (44 – 18) = 91/ 26 = 3.5 hours Find the ratio of the speed of Boats A and B together in still water to the speed of Boats D and E together in still water.

(a) 48:55
(b) 48:65
(c) 43:33
(d) 46:34
(e) 44:34 By Arun Sir Sol. c) Sol. Ratio = (24 + 24): (25 + 40)= 48: 65 Direction: Table given below shows profit percentage earned on selling two different items X and Y and discount percentage offered by five retailers on these items. Mark price of each article sold by each retailer is same while cost price of article for each retailor may vary. Study the data carefully & answer the following question

FLAGGED - option text still carries the next question

52. Sol. e) Monthly income of C in April be Rs. x Monthly income of C in November be Rs. y Monthly expenditure of C in April = x*60/100 Monthly savings of C in April = x*40/100 Monthly expenditure of C in November = y*75/100 Monthly expenditure of C in November = y*25/100 Statement I: The difference between the monthly savings of C in April and November is 12000. X*40/100 – y*25/100 = 12000 40x – 25y = 1200000 --- (1) Statement II: The difference between the monthly expenditure of C in April and November is 10000. X*60/100 – y * 75/100 = 10000 60x – 75y = 1000000 ---- (2) From the statement I and II, we can find the monthly income of C in April and November. If D spends 30% of monthly income in November in mutual funds, then find the amount spend by D in November in mutual funds Statement I: D’s income in November is 30% more than the C’s income in April. Statement II: C’s monthly savings in April is Rs.4800 which is 40% of his monthly income.

(a) Statement I is sufficient to answer the question
(b) Statement II is sufficient to answer the question
(c) Either Statement I or statement II is sufficient to answer the question
(d) Neither Statement I nor statement II is sufficient to answer the question
(e) Both Statements I and II are necessary to answer the question. Statement I: D’s income in November is 30% more than the C’s income in April. D’s income in November = 130/100 * C’s income in April Statement II: C’s monthly savings in April is Rs.4800 which is 40% of his monthly income. C’s monthly savings in April = 4800 C’s monthly income in April = 4800/40 * 100 = 12000 From Statement I and II, we can find the savings of D in November For

(a) None
(b) One
(c) Two
(d) Three
(e) Five

FLAGGED - stem ends mid-sentence

DIRECTIONS (Q. 56)

Read the following passage and answer the given questions. Nuclear power and hydropower are crucial components of global low-carbon electricity generation, collectively supplying three-quarters of the world's low-carbon energy. Over the last 50 years, nuclear power alone has prevented over 60 gigatonnes of CO2 emissions, equating to nearly two years' worth of global energy-related emissions. Despite this significant contribution, nuclear power is facing a decline in advanced economies, where plants are closing, and new investments are scarce. This comes at a time when the world urgently needs more low-carbon energy sources to meet international climate goals. The decline of nuclear power could have serious implications for both electricity security and the cost of energy. Projections suggest that nuclear power in advanced economies could drop by as much as two-thirds by 2040 if no significant actions are taken. This would hinder efforts to reduce global CO2 emissions, as outlined in the Paris Agreement and modeled in scenarios like the Sustainable Development Scenario, which calls for rapid cuts in emissions.

56. What is one of the major consequences of the decline in nuclear power?

(a) A growing global dependence on nuclear energy, leading to a shift away from other energy sources and increasing the demand for nuclear power in the energy mix

(b) Strengthened electricity security across various regions, resulting in improved stability and reliability of energy supplies despite the reduced reliance on nuclear power

(c) Increased cost efficiency within the energy sector, allowing for more affordable energy production and distribution due to the decline in nuclear energy investments

(d) Significant impacts on both electricity security and the overall cost of energy, as the decline of nuclear power undermines the stability of energy supplies and increases energy-related expenses

(e) A higher dependence on fossil fuels in advanced economies, causing a shift back to more carbon-intensive energy sources to compensate for the decline of nuclear power

FLAGGED - option text still carries the next question

---

57. Statement: As global labor shortages, particularly in sectors like construction, persist, companies are increasingly turning to immersive training environments. These technologies aim to enhance workers' skills efficiently, reduce onboarding time, and help close the gap between the demand for skilled labor and the available workforce. Which of the following course of action is in-line with the statement?

I. Focus on increasing tax incentives for large corporations to promote economic growth.

II. Collaborate with tech providers to introduce VR-based simulations for on-site construction training. III. Implement immersive training environments to quickly upskill workers in sectors facing shortages.

(a) Only II
(b) Only I
(c) Both II and III
(d) Only III
(e) Both I and II

FLAGGED - refers to an arrangement/set that was never extracted

58. Statement: To combat climate change, many countries are accelerating investments in renewable energy and sustainable technologies. A recent focus is on developing hydrogen fuel cells for clean energy production and storage, aiming to reduce reliance on fossil fuels and decrease greenhouse gas emissions. Which of the following courses of action is the most suitable to support the statement's objective of advancing hydrogen fuel cell technology as a solution to climate change?

(a) Governments should provide tax incentives and grants to companies investing in hydrogen fuel cell technology to encourage faster adoption

(b) Encourage immediate investments in nuclear energy plants, as they provide a steady power supply, which could help bridge current energy gaps

(c) Limit the production of electric vehicles until a more efficient energy source than lithium-ion batteries are available

(d) Increase subsidies for coal mining companies to keep energy prices low and ensure energy availability during the transition to renewable sources

(e) Prioritize funding for urban transportation projects over renewable energy initiatives, focusing on improving road and rail infrastructure instead

FLAGGED - option text still carries the next question

59. Seven persons – M, N, O, P, Q, R and S go to mall (but not necessarily in the same order) on seven different days of the week starting from Monday to Sunday. S goes to mall after P but immediately after O. More than three persons go to mall between Q and O. Q goes to mall immediately after M but M doesn't go to the mall on Friday. Two person goes between P and N. N doesn't go to the mall on Monday. Who among the following persons goes to the mall on Thursday?

(a) O
(b) P
(c) N
(d) M
(e) R

FLAGGED - refers to an arrangement/set that was never extracted

DIRECTIONS (Q. 60-64)

Read the following pie chart and table carefully and answer the questions given below. The pie chart shows the percentage distribution of total number of unsold toys (metallic and plastic) by four (A, B, C and D) different companies. The table shows the difference between the metallic and plastic toys sold by these four companies. Note: (i) Total toys (metallic and plastic) manufactured by A, B, C and D are 40, 33, 25, and 38 respectively. (ii) Metallic sold are more than plastic toys sold by each company. (iii) Total toys manufactured = Total toys (metallic and plastic) sold + total toys unsold (metallic and plastic) 35 | Test Prime Unsold Toys = 30 20% A 40% B 10% C D 30% Companies Difference between the metallic and plastic toys sold A 2 B 12 C 3 D 5

60. Find the difference between the total number of metallic toys sold by A and C together and the total number of unsold toys by B and D together.

(a) 11

DIRECTIONS (Q. 65-68)
Read the following table carefully and answer the questions given below. The table shows the ratio of the number of pens to the number of sharpeners in three boxes and the difference between the probability of picking a pen and the probability of picking an eraser in these boxes. The table also shows the total number of sharpeners and erasers in these boxes. Boxes Pens: Difference between the probability of picking Total number of Sharpeners a pen and the probability of picking an eraser sharpeners and erasers A 4:3 2/9 10 B 3:4 3/17 11 C 3:2 1/11 13 Note: Number of pens in each box is more than the number of erasers. 38 | Test Prime

65. Find the ratio between the total number of erasers in C and B together to the number of pens in A.

(a) 1:3
(b) 4:5
(c) 5:4
(d) 3:2
(e) 5:3

FLAGGED - asks about a graph/table that has no usable image

66. The number of sharpeners in A is P times that of erasers, and the number of pens in B is Q times that of erasers. Find which of the following statement/s is/are correct.
I. P > Q
II. 4P = 3Q III. Q : P = 4 : 3

(a) Both I & II
(b) All I, II & III
(c) Only II
(d) Both II & III
(e) Only I

FLAGGED - asks about a graph/table that has no usable image

67. Find the total number of sharpeners in all the boxes together.

(a) 22
(b) 14
(c) 18
(d) 15
(e) 20

FLAGGED - asks about a graph/table that has no usable image

68. If the average number of pens, sharpeners and erasers in A is X, then find which of the option is correct about X.

(a) X is an even number
(b) X is a perfect number
(c) Both
(d) X > 8
(e) X is an odd number

FLAGGED - asks about a graph/table that has no usable image

DIRECTIONS (Q. 69-74)
Read the following bar graph carefully and answer the questions given below. The bar graph shows the total number of people who votes in two different years in four different cities. 700 600 500 400 300 200 100 0 A B C D 2013 2018

69. In 2013, 20% of the total number of people who vote in city C were invalid, and the ratio of total invalid votes in city D to city C was 7:4, respectively. Find the difference between the total number of people who vote in cities C and D which are valid votes.

(a) 456
(b) 452
(c) 432
(d) 413
(e) 409

FLAGGED - asks about a graph/table that has no usable image

70. In 2018, the ratio of total males to total females who vote in city A was 5:7, respectively. 3/8th of the total number of people who vote in city A were invalid. If the total number of females valid votes is 50% of the total number of valid votes, then find the difference between the total number of male valid and invalid votes in city A.

(a) 50
(b) 25
(c) 75
(d) 10
(e) 80 44

FLAGGED - asks about a graph/table that has no usable image

71. If the difference between the total number of people who vote in city B in 2018 and the total number of people who vote in 2013 in city D is X, then find which of the following statement/s is/are correct about X.
I. X > 120
II. X < 150 III. X = Total number of people who votes in city A in 2018

(a) Both I & III
(b) All I, II & III
(c) Both I & II
(d) Only I
(e) None

FLAGGED - asks about a graph/table that has no usable image

72. The total number of people who vote in city E in 2013 was 25% more than the average number of people who votes in cities C and A in 2018. If 66.67% of the total number of people who vote in city E in 2013 are valid, then find the total number of invalid votes in city E in 2013.

(a) 135
(b) 120
(c) 125
(d) 150

(e) 105

FLAGGED - asks about a graph/table that has no usable image

73. The total number of people who vote in city A in 2020 is 3/5th of the total number of people who votes in 2013 in city D. If the ratio of males to females who vote in city A in 2020 is 5:4, respectively, then the total number of females who vote in city A in 2020 is what percentage of the total number of people who vote in 2018 in city D?

(a) 15%
(b) 12%
(c) 20%
(d) 24%
(e) 16%

---

75. How many foreign banks operating under the wholly owned subsidiary (WOS) model have been appointed as agency banks by the

(a) None
(b) One
(c) Two
(d) Three
(e) Five

FLAGGED - stem ends mid-sentence

DIRECTIONS (Q. 76)

Read the following table carefully and answer the questions given below. The table shows the ratio of the number of pens to the number of sharpeners in three boxes and the difference between the probability of picking a pen and the probability of picking an eraser in these boxes. The table also shows the total number of sharpeners and erasers in these boxes. Pens: Difference between the probability of picking Total number of Boxes Sharpeners a pen and the probability of picking an eraser sharpeners and erasers A 4:3 2/9 10 B 3:4 3/17 11 C 3:2 1/11 13 Note: Number of pens in each box is more than the number of erasers. 38 | Test Prime

76. If the average number of pens, sharpeners and erasers in A is X, then find which of the option is correct about X.

(a) X is an even number
(b) X is a perfect number
(c) Both
(d) X > 8
(e) X is an odd number
