Flagged for repair - Set 7

204 questions held back from set 7

1. Selling price of each plain books and lined books sold by store B is Rs. 250 and Rs. 175 respectively. Then, find the total amount earned by store B on selling these books if 60% of lined books are sold by the store? Ö
   - (a) Rs. 2.5 lac
   - (b) Rs. 3.6 lac
   - (c) Rs. 3.5 lac
   - (d) Rs. 3.8 lac
   - (e) Rs. 4.1 lac Number of total books sold by store B 40 100= 2000 = 5000 × 60 Number of lined books sold = 2000 × 100= 1200 Total amount earned = Rs. (800 × 250 + 1200 × 175) = Rs 4.1 lac Q. 6-10 Line graph shows the percentage of females participating in the yoga event out of total participant in five different months

   FLAGGED - option text still carries the next question

2. Male participant in January is 20% more than that in February. Female participant in February is what percent of that in January.
   - (a) 291 3%
   - (b) 131 3%
   - (c) 290 %
   - (d) 190%
   - (e) 295 3% Let male participant in February = 100x So male participant in January = 120x 120□ Female participant in January = 60× 40 = 80x 100□ 700 Female participant in February = 3x 30× 70 = 700□ 2 Required % = 3% 3×80□× 100 = 291

   FLAGGED - a stacked fraction collapsed into loose digits; characters survive from a broken font mapping; option text still carries the next question

3. Male and female child participant in March is in ratio 2 : 1. If adult male to adult female ratio is 4 : 3 then find the percentage of adult male participant in same month.
   - (a) 30%
   - (b) 50%
   - (c) 35%
   - (d) 40%
   - (e) 44% Let, male child and female child participant in march is 2x and x respectively And, Adult male and adult female is 4y and 3y respectively 100 (□□3□) Now, (2x+ 4y) × 100 60= 40 Solving =>x = y 4 Percentage of adult male participant = (2□4□1□3) × 100 = 40%

   FLAGGED - characters survive from a broken font mapping; option text still carries the next question

4. No. of participant increase in April by 20% from previous month. Find the percentage increase in female participant.
   - (a) 300%
   - (b) 200%
   - (c) 100%
   - (d) 250%
   - (e) 400% Let, total participant in march = 100x 100□×120 Participant in April = = 120x 100 Female participant in march = 40x Female participant in April = 120x (120□□40□) Required % = × 100 = 200% 40□

8. Find difference between the total population of cities A and D in year 2017 and total population of cities B and C in 2007? 1500 Questions E -Book for

(a) 12000
(b) 14000
(c) 8000
(d) 10000
(e) 16000 Required difference = [(33 + 40) −(18 + 45)] × 1000 = 10 × 1000 = 10000

FLAGGED - stem ends mid-sentence

9. Population of city D in 2017 is what percent of population of city E in 2007?

(a) 111 7 %
(b) 114 7%
(c) 121 7%
(d) 91 7%
(e) 101 7 % 40 2 Required percent = 7% 35× 100 =87× 100 = 114 Directions: Study the given graph carefully to answer the question that follow: For

FLAGGED - a stacked fraction collapsed into loose digits; option text still carries the next question

DIRECTIONS (Q. 10)
Study the given graph carefully to answer the question that follow: Table below shows different items sold by shopkeeper; Quantity of items sold in kg. Discount offered on list price, percentage markup price/kg and list price/kg. Some values are missing. You need to calculate these values if required.

10. List price per kg of wheat is what percent less than the list price per kg of tea if selling price of 2.5 kg of tea is 900 Rs. and discount offered on list price is 400

(a) 80%
(b) 83%
(c) 93%
(d) 90%
(e) 85% 900 Selling price per kg of Tea = 2.5 = 360 Rs. Let cost price per kg of Tea of x Selling price of tea per kg = □1 −4 49□× 7 6 x= 360 x= 336 7 7 List price of Tea = 6× 336 = 392 6x= 392□ 350 Required % = 392× 100 ≈90% × 100 = 392

DIRECTIONS (Q. 35-37)
Read the following table and the graph carefully and answer the following questions. Following table shows the time taken by five persons to complete a work on Monday and Ratio of Time taken by these five persons For . Line graph shows the efficiency (as a percentage) of these five persons on Tuesday with respect to that on Monday.

35. Gaurav, Abhishek and Neeraj work in a rotation to complete the job on Tuesday with only 1 person working in a minute. Who should start the job so that the job is completed in the least possible time?

(a) Gaurav
(b) Abhishek
(c) Neeraj
(d) Any one of three
(e) Can't determine 1500 Questions E -Book for

FLAGGED - asks about a graph/table that has no usable image

36. On Tuesday, Gaurav and Arunoday started the work and they worked for 5 minutes then Gaurav is replaced by Abhishek. In how many minutes Abhishek and Arunoday complete the remaining work?

(a) 20 7 min
(b) 21 21 min
(c) 21 21 min
(d) 20 17 min
(e) None of these On Tuesday Gaurav = 50 minutes 150×100 Arunoday = = 500 minutes 30 Abhishek = 25 minutes 5 5 1 (Gaurav + Arunoday)'s 5 minutes work = 50+ 500= 10+ 1 11 100 100= 11 9 Remaining work = 1 − 100 100= □□ 4 Required time = 21 minutes □□□ = 21 □ □□□□□ □□

FLAGGED - characters survive from a broken font mapping; two or more options are identical after cleaning; option text still carries the next question; asks about a graph/table that has no usable image

37. On Tuesday, Aman who is half as efficient as Shailesh, worked for 50 minutes on the same day then he left. In how many minutes Neeraj and Abhishek together will complete the remaining work?

(a) 5 9 mins
(b) 4 7 mins
(c) 5 7 mins
(d) 4 7 mins
(e) 5 7 mins On Tuesday- Aman = 125 × 2 = 250 min Neeraj = 10 min Abhishek = 25 min 50 1 Aman’s 50 min work = 5 250= 1 4 Remaining Work = 1 − 5 5= □ 5 Required time = 7 minutes □ = 5 □ □□□□ □□

FLAGGED - characters survive from a broken font mapping; two or more options are identical after cleaning; option text still carries the next question; asks about a graph/table that has no usable image

DIRECTIONS (Q. 38-40)

Given below is the table which shows the ratio of distance travelled on Monday to Tuesday by five persons and ratio of speed of these persons on Monday to Tuesday. There is also a line graph which shows the time taken by these persons to cover the given distance on Tuesday with the speed of Tuesday.

38. If distance travelled on Tuesday by Shyam is 45 11% more than the distance travelled by meena on Tuesday, then find the ratio of speed of Shyam on Monday to speed of Meena on Tuesday.

(a) 4 : 11
(b) 11 : 4
(c) 5 : 12
(d) 12 : 5
(e) 6 : 7 Time taken by shyam on Tuesday = 4h Let distance covered by shyam on Monday and Tuesday be 5x and 4x respectively. And speed of shyam on Monday and Tuesday be y and 4y respectively. 4□ So, 4□= 4 x = 4y Let distance covered by Meena on Monday and Tuesday be 13m and 11m And speed of Meena on Monday and Tuesday be 13n and 22n 11□ 22□= 4 m = 8n According to question 5 11□11m 4x = □1 + 16 11× 11m 4x = x = 4m Or x = 4 × 8n x = 32n □ □ Required ratio = y :22n = □ 4□: □22 × 32□ = x 4 : 11x 16 = 4 :11

FLAGGED - a stacked fraction collapsed into loose digits; characters survive from a broken font mapping; option text still carries the next question; asks about a graph/table that has no usable image

39. If Ram and Tinku are 600 km apart and they start moving towards each other with the speed of Tuesday, then they meet after 4 hours. If Ram covered 300 km on Monday, then find the distance covered by Tinku on Monday.

(a) 2700 km
(b) 300 km
(c) 360 km
(d) 450 km
(e) 500 km 1500 Questions E -Book for

FLAGGED - asks about a graph/table that has no usable image

40. Time taken by Tina on Monday is what percent more or less than time taken by Meena on Monday.

(a) 33 3%
(b) 66 3%
(c) 14 7%
(d) 12 2%
(e) 15 5% Let distance covered by Tina on Monday & Tuesday = 7x and 9x And speed of tina on Monday and Tuesday be 2y and 3y 9□ So 3□= 6 x = 2y 7□ 7×2□ Time taken by tina on Monday = 2□= 7 hours 2□= Similarly, time taken by Meena on Monday = 8 hours 78× 100 = 1008% =>12 1 Required percentage = 2%

44. What is the monthly income of A in the month of November? Statement I: The difference between monthly savings of A in November and April is 20% of A’s monthly income in April Statement II: Monthly savings of B in November is 40% of monthly savings of A in April

(a) Statement I is sufficient to answer the question
(b) Statement II is sufficient to answer the question
(c) Either Statement I or statement II is sufficient to answer the question
(d) Neither Statement I nor statement II is sufficient to answer the question
(e) Both Statements I and II are necessary to answer the question. Statement I: The difference between monthly savings of A in November and April is 20% of A’s monthly income in April Monthly income of A in April be Rs. a & Monthly income of A in November be Rs. b Monthly savings of A in April = a × 70/100 = 7a/10 Monthly savings of A in November = b × 40/100 = 4b/10 (7a/10 – 4b/10) = 20/100×a Statement II: Monthly savings of B in November is 40% of monthly savings of A in April Monthly income of A in April be Rs. a Monthly income of B in November be Rs. c Monthly savings of A in April = a×70/100

FLAGGED - option text still carries the next question

45. If D spends 30% of monthly income in November in mutual funds, then find the amount spend by D in November in mutual funds Statement I: D's income in November is 30% more than the C's income in April. Statement II: C's monthly savings in April is Rs.4800 which is 40% of his monthly income.

(a) Statement I is sufficient to answer the question
(b) Statement II is sufficient to answer the question
(c) Either Statement I or statement II is sufficient to answer the question
(d) Neither Statement I nor statement II is sufficient to answer the question
(e) Both Statements I and II are necessary to answer the question. Statement I: D's income in November is 30% more than the C's income in April. D's income in November = 130/100 * C's income in April Statement II: C's monthly savings in April is Rs.4800 which is 40% of his monthly income. C's monthly savings in April = 4800 C's monthly income in April = 4800/40 * 100 = 12000 From Statement I and II, we can find the savings of D in November 1500 Questions E -Book for

46. If total watches sold in February is 3300, then find average number of watches sold in last six months of year 2017?

(a) 2000
(b) 2250
(c) 1550
(d) 1600
(e) 1750 Watches sold in February = 3300 =>27.5% →3300 =>100% →12000 Watches sold in first six months = 12000 Watches sold in last six months = 22500 −12000 = 10500 1 Required average = 6× [10500] = 1750

FLAGGED - option text still carries the next question

47. If ratio between watches sold in first six months to last six months is 2 : 3, then find watches sold in April are how much more than watches sold in march, May and June together ?

(a) 2025
(b) 1550
(c) 1350
(d) 3375
(e) 1450 2 Watches sold in first six months of 2017 = 5× 22500 = 9000 37.5 Watches sold in April = 100× 9000 = 3375 Watches sold in march, May and June together = (7% + 7.5% + 8%) × 900 = 22.5 100 × 9000 = 2025 Required difference = 3375 −2025 = 1350

FLAGGED - option text still carries the next question

48. In 2018, total number of watches sold are 10% more than total 1 watches sold in 2017. Find watches sold in June 2018 if 33 3% of total watches sold in 2018 is sold in last six months of 2018? 2018

(a) 1320
(b) 1470
(c) 1250
(d) 1520
(e) 1650 1500 Questions E -Book for

FLAGGED - a stacked fraction collapsed into loose digits

49. If watches sold in May 2017 were 3 3% of total watches sold in 2017, then find total number of watches sold in last six months of 2017?

(a) 13500
(b) 15000
(c) 12500
(d) 14500
(e) 15750 10 Watches sold in May 2017 = 3×100× 22500 = 750 =>7.5% →750 100% →10000 Watches sold in first six months of 2017 = 10000 Watches sold in last six months of 2017 = 22500 −10000 = 12500

FLAGGED - a stacked fraction collapsed into loose digits; option text still carries the next question

50. Watches sold in February 2017 were 3000 more than watches sold in January 2017. Total number of watches sold in last six months of 2017 is what percent of total watches sold in 2017?

(a) 7 7%
(b) 11 9%
(c) 12 2%
(d) 9 11%
(e) 6 3% ATQ Watches sold in February – watches sold in January = 3000 =>27.5% −12% →3000 =>15% →3000 =>100% →20000 Watches sold in first six months = 20000 Watches sold in last six months = 22500 −20000 = 2500 For

FLAGGED - a stacked fraction collapsed into loose digits; option text still carries the next question

51. If number of TV sold by big Bazar on Sunday is increased by 1 2% then what will be the average no. of TV sold on Sunday, 37 Tuesday and Thursday by Big Bazar. 1

(a) 70
(b) 60
(c) 86
(d) 98
(e) 80 38+ 64 = 88 TV sold on Sunday by Big Bazar = 64 × TV sold on Tuesday by Big Bazar = 100 TV sold on Thursday by Big Bazar = 70 Average no. of TV sold on Sunday, Tuesday and Thursday sold by Big Bazar □100□70 258 3= 86 = = 3 If 2/5th of Big bazar customer on Tuesday and 5/8th of customer

FLAGGED - a stacked fraction collapsed into loose digits; characters survive from a broken font mapping; option text still carries the next question

52. from Apna Bazar on same day are Indian. Then find the Indian TV buyer percentage on Tuesday considering both the stores together. (Note: 1 buyer buys only 1 TV)

(a) 50%
(b) 20%
(c) 80%
(d) 25%
(e) 80% Total Big Bazar customer on Tuesday = 100 Total Indian Big Bazar customer on Tuesday = 100 × 2 5 = 40 Total Apna Bazar customer on Tuesday = 80 Total Indian Apna Bazar customer on Tuesday 58= 50 = 80 × Total buyer on Tuesday = 100 + 80 = 180 Total India buyer on Tuesday = 50 + 40 = 90 So required% = 50%

FLAGGED - option text still carries the next question

53. If one Friday 25% more TV were sold than that on Thursday by both stores together but 5% was returned due to damaged TV. How many undamaged TV were sold by both the stores on Friday?

(a) 170
(b) 190
(c) 210
(d) 240
(e) 165 Total no. of TV sold by both stores on Thursday = 70 +90 = 160 125 Total no. of TV sold on Friday = 160 × 100= 200 Total no. of undamaged TV sold on Friday by both stores = 95 100= 190 200 ×

FLAGGED - option text still carries the next question

54. Find the ratio of Total TV sold by Big Bazar on Monday and Tuesday together to TV sold by Apna Bazar on Tuesday and Wednesday together.

(a) 93: 110
(b) 80: 107
(c) 117: 86
(d) 8: 9
(e) 31: 20 6□108 186 31 Required Ratio = 20 = 120= 0□4 Directions: Given below are the 2 pie-chart, pie chart I shows the percentage distribution of all students in different department of a college. Pie chart 2 shows the percentage distribution of girls in different department of the same college

FLAGGED - characters survive from a broken font mapping; option text still carries the next question

55. Find the ratio of male students in computer and IT department together to male students in civil and electrical department together.

(a) 7: 3
(b) 7: 17
(c) 7: 23
(d) 29: 11
(e) 3: 17 (□□□□□□) (□□□□□□) × 7500 × 3000 Required ratio = □□□×3000 □□□ □□□ (□□) (□□□□) × 7500 □□□ = 2625 −2100 1875 −600 = 525 1275 = 21 51 = 7 17

FLAGGED - characters survive from a broken font mapping; option text still carries the next question

56. Boys studying in civil are how much percent more/less than girls studying in same department.

(a) 300%
(b) 225%
(c) 140%
(d) 180%
(e) 125% 5 Girls' students in Civil = 100× 3000 = 150 10 Total student in Civil = 100× 7500 = 750 Boys' student in Civil = 750 −150 = 600 600□15 Required % = × 100 = 300% 150 For

FLAGGED - characters survive from a broken font mapping; option text still carries the next question

57. Find the average of boys studying in computer, electrical and civil department together?

(a) 385
(b) 525
(c) 448
(d) 568
(e) 552 Total students studying in computer, electrical and civil department together (20 + 10 + 15) × 7500 = 3375 = 100 Girls' student studying in computer, electrical and civil department together (40 + 5 + 15) × 3000 = 1800 = 100 So, average of boy's student studying in computer, electrical and civil department together = 3375 −1800 = 525 3

FLAGGED - option text still carries the next question

58. Find the difference of boys studying in mechanical department and boys studying in civil department?

(a) 2370
(b) 1550
(c) 2760
(d) 2100
(e) 2700 Boys studying in mechanical department = 40 100 × 7500 −3000 × 10 100 = 2700 Boys studying in civil department = 10 100 × 7500 −3000 × 5 100 = 600 Required difference = 2700 −600 = 2100

FLAGGED - option text still carries the next question

59. Boys studying in computer and IT department together are what percent of total students in these department?

(a) 17%
(b) 28 3%
(c) 20%
(d) 46%
(e) 25% 1500 Questions E -Book for

FLAGGED - a stacked fraction collapsed into loose digits

60. If total population of state was 80000 in 2017 then total population of city D was how much percent more than female population of city B.

(a) 59%
(b) 152 11%
(c) 132%
(d) 108 3%
(e) 87% So, we will now use 80000 Let total population of state is 100x Total population of D = 25x 60 Female population of B = 20x × 100= 12x 25□□1 1 Required % = 3% × 100 = 108 12

FLAGGED - a stacked fraction collapsed into loose digits; characters survive from a broken font mapping; option text still carries the next question

61. If total population of state in 2017 is 250000 then find the average female population of city A, C and E in 2017.

(a) 17083 3
(b) 22600 2
(c) 17376 3
(d) 24378
(e) None of these Total female population of A, B and C city 15 30 10 40 = 250000 × 100× 100+ 250000 × 100× 100+ 250000 × 30 40 100 100× = 11250 + 10000 + 30000 = 51250 So average female population of A, C and E. 51250 1 3 = = 17083 3

FLAGGED - option text still carries the next question

62. Find the ratio of male population of city B and city D together to female population of city E and city C together.

(a) 17: 37

DIRECTIONS (Q. 94)

Given below is a paragraph consisting of blanks against each number. Identify the correct option among the five alternative pairs that perfectly fits into the given blank against the respective number to make the paragraph contextually meaningful and grammatically correct. On October 29, 1929, Black Tuesday hit Wall Street as investors ___ (1) some 16 million shares on the New York Stock Exchange in a single day. Billions of dollars were lost, (2) out thousands of investors. In the aftermath of Black Tuesday, America and the rest of the industrialized world _(3) downward into the Great Depression (1929- 39), the deepest and longest-lasting economic_______ (4) in the history of the Western industrialized world up to that time. During the 1920s, the U.S. stock market underwent rapid expansion, reaching its peak in August 1929, after a period of wild speculation. By then, production had already declined and unemployment had risen, leaving stocks in great excess of their real value. Among the other causes of the eventual market collapse were low wages, the___________ (5) of debt, a struggling agricultural sector and an excess of large bank loans that A Complete Guid

94. Double Blanks Ex. You have thanked him for his help.

(a) must ………… Negligible
(b) would ………… Needful
(c) should ………… Timely
(d) better ………… Immense
(e) often ………… Great but keeping in mind the second blank we select the option accordingly. Now understand the context of question. Negligible cannot be a possibility so we will eliminate it. Now option (E) cannot be considered for its first option similarly D & B can not be considered. So the left out option is C

DIRECTIONS (Q. 96-97)

In the following questions, a paragraph is divided into five parts with one of the parts been omitted. You must choose the most suitable alternative among the five that should fill the omitted part making the paragraph grammatically correct and contextually meaningful. If none of the given alternatives are appropriate to fill the blank, choose option (e) i.e. “none of these” as your answer choice.

96. Recently, the National Human Rights Commission (NHRC) conducted the first-ever nationwide survey

(a) / of the transgender community in India and found that (B)/ _____________________________. (C)/ It is profoundly absurd that we think of ourselves as inhabiting a “modern” world, (D)/ and yet there exists a sizeable community of people who are structurally ostracized and denied the fundamental right to a livelihood. (E) accepted gender
(b) 92% of the people belonging to the community are subjected to economic exclusion
(c) it defined a transgender person: as neither a man nor a woman
(d) what counts as discrimination against a transgender person
(e) None of these

FLAGGED - option text still carries the next question

97. ________________________________ (A)/ as their currencies resume their prolonged slide against the U.S. dollar.

(b) / The Indian rupee weakened past the 71 mark for the first time ever on Friday, (C)/ registering a loss of about 10% of its value against the dollar since the beginning of the year. (D)/ This makes the rupee the worst-performing currency in Asia. (E)

(a) Investors who earlier put their money in emerging markets Turkish lira have suffered much larger losses owing

(c) Emerging market economies continue to be in the spotlight for the wrong reasons

(d) Emerging market countries, which earlier benefited from the easing of monetary conditions

(e) None of these

FLAGGED - option text still carries the next question

DIRECTIONS (Q. 98)

Five statements are given below, labelled a, b, c, d and e. Among these, four statements are in logical order and form a coherent paragraph. From the given options, choose the option that does not fit into the theme of the paragraph.

98. (a) Regular, moderate exercise, including authentic yoga, holds the key.

(b) Urban planning must provide for open spaces and facilities for such mass exercise to take place

(c) Changes in lifestyle and diet can prevent Non communicable diseases

(d) This is more than a personal choice

(e) So, dealing with Non communicable diseases needs novel thinking and innovative responses. sentences of the paragraph talks about the verdict of Supreme Court and its consequences on O. Panneerselvam

(a) is talking about the focus in development across states which fails to connect with other sentences. Hence option (a) is the correct choice

FLAGGED - option text still carries the next question

---

99. Within water also, more money is going to rural water, large hydropower projects, and water resource management in poorer states. Which of the following statements generates the most appropriate inference of the above paragraph?

(a) The World Bank assistance to India for developing water resources has increased more than 4 times for 2005-08 as compared to the prior period

(b) India's water resources are depleting

(c) Poorer states of India require a larger fund for water resource management projects such as rural water, large hydropower projects

(d) The two World Bank studies on India have caused a stir

(e) Water conservation and water management processes have stirred the greater demand in allocation of fund in the recent past

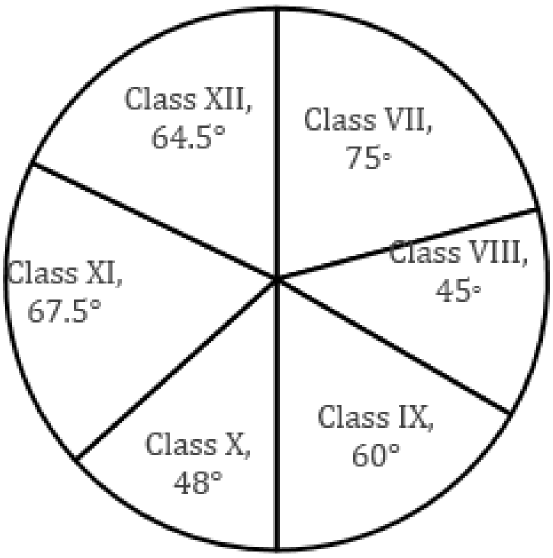
DIRECTIONS (Q. 111)

Given Pie chart shows the degree wise distribution of students of six classes who attended a public seminar. Note: - These students are from 3 different schools. Total schools => D.A.V. schools + J.N.V. School + D.P.S. School



111. Ratio between Girls in class X to boys in class XII who attended seminar is 4 : 5 and girls in class 2 XII is 66 3 % of total strength of class, then find the number of Boys in class X is what percent of total strength of class X? 1

(a) 63 6 %
(b) 69 6 %
(c) 67 3 %
(d) 65 3 %
(e) 64 6 %

FLAGGED - a stacked fraction collapsed into loose digits

DIRECTIONS (Q. 112-116)

In the table, the total number of eligible voters of 5 villages with % valid votes out of total casted votes are given . Answer the question based on following data. Note: In each village, 10% eligible voters did not cast their votes and only two person stand in the election Village Total voters Valid votes A 10000 60% B 15000 55% C 8000 80% D 12000 90% E 13500 80%

112. Find ratio b/w number of invalid votes casted in village C to the number of valid votes casted in village B.

(a) 7 : 33
(b) 32 : 165
(c) 31 : 163
(d) 17 : 154
(e) None of these

FLAGGED - a stacked fraction collapsed into loose digits

113. If the winner got 52% of valid votes in village B. Find the no. of votes got by the person who lost?

(a) 4500
(b) 5578
(c) 3200
(d) 3564
(e) 4578

FLAGGED - a stacked fraction collapsed into loose digits

114. Find the average number of valid votes of village A and village D together?

(a) 7560
(b) 5500
(c) 6400
(d) 6760
(e) None of these

FLAGGED - a stacked fraction collapsed into loose digits

115. Find the number of votes by which the winner won in the election if the person who lose got 40% of valid votes in village E?

(a) 2140
(b) 1780
(c) 1944
(d) 1550
(e) 1850

FLAGGED - a stacked fraction collapsed into loose digits

116. Find how much more/less percent were the valid votes casted in village C in comparison to village A? 2

(a) 16 3 %
(b) 7 7 %
(c) 3 3 %
(d) 5 3 %
(e) 6 3 %

FLAGGED - a stacked fraction collapsed into loose digits

DIRECTIONS (Q. 117-121)

Given table shows the number of Cars manufactured and percentage of Cars sold by six companies in 2017. Answer the following questions based on given data– In year 2017 Companies Cars manufactured Percentage of Cars sold (out of total manufactured) A 620 40% B 275 64% C 320 37.5% D 520 55% E 485 60% F 280 67.5% the publishing house | No. 1 APP for Banking & SSC Preparation 45 Website: | Email:

117. Total number of Cars sold by Companies C and D together is what percent more/less than Cars that remain unsold by Companies B and E together? (rounded off to nearest integer).

(a) 52%
(b) 39%
(c) 48%
(d) 35%
(e) 25%

FLAGGED - a stacked fraction collapsed into loose digits; asks about a graph/table that has no usable image

118. 66 3% of Cars sold by Company F were diesel cars and ratio between number of diesel and petrol cars manufactured in 2017 was 3 : 4, find number of petrol cars that remain unsold by F in 2017? (Consider only diesel and petrol cars were manufactured).

(a) 97
(b) 62
(c) 117
(d) 78
(e) 107

FLAGGED - a stacked fraction collapsed into loose digits; asks about a graph/table that has no usable image

119. In 2016, total cars manufactured by six companies together is 44% less than total cars manufactured by six companies together in 2017. If ratio of total cars sold to total cars manufactured in 2016 is 13: 20. Then, find total number of cars remains unsold in 2016?

(a) 200
(b) 250
(c) 300
(d) 350
(e) 490

FLAGGED - a stacked fraction collapsed into loose digits; asks about a graph/table that has no usable image

120. Company ‘C’ gets Rs. 2 lakh profit on selling each car and suffers a loss of Rs. 80,000 on every unsold car, find overall profit of Company C in 2017?

(a) 45 lakh
(b) 92 lakh
(c) 80 lakh
(d) 65 lakh
(e) 75 lakh

FLAGGED - a stacked fraction collapsed into loose digits; asks about a graph/table that has no usable image

121. Cars manufactured by Companies B, C and F together in 2016 was 40% more than the cars manufactured in year 2017 and car sold by B, C and F together are 80% more than cars sold by same companies in 2017.Find number of cars that remain unsold by given companies together in 2016?

(a) 476
(b) 628
(c) 712
(d) 532
(e) 352

FLAGGED - a stacked fraction collapsed into loose digits; asks about a graph/table that has no usable image

---

DIRECTIONS (Q. 122-126)

Table given below shows the total number of players in different sports Academy and percentage of Football players in each Academy. Study the following table carefully and answer the questions based on it. Note: There are only two games played in each Academy i.e., Football and Cricket and each player plays only one game Sports Academy Total Players Percentage of Football players K 360 45% L 350 70% 33 1 M 660 3 % 62 1 N 640 2 % X 480 40% Y 440 55%

122. Number of cricket players in ‘L’ and ‘M’ sports Academy together is what percent of the number of Football players in ‘N’ sports Academy?

(a) 152%
(b) 147 4 %
(c) 132%
(d) 136 4 %
(e) 142 3 %

FLAGGED - a stacked fraction collapsed into loose digits; asks about a graph/table that has no usable image

123. Average number of cricket players in ‘N’ and ‘X’ sports Academy together is how much more/less than the average number of Football players in ‘K’ and ‘Y’ sports Academy together?

(a) 54
(b) 62
(c) 72
(d) 68
(e) 84

FLAGGED - a stacked fraction collapsed into loose digits; asks about a graph/table that has no usable image

124. Number of males playing cricket in ‘N’ sports Academy is 40% more than the number of females playing same game in same sports Academy & males playing cricket in ‘X’ sports Academy is 240.Find total number of females playing cricket in ‘N’ and ‘X’ sports Academy together?

(a) 154
(b) 168
(c) 142
(d) 148
(e) 164

FLAGGED - a stacked fraction collapsed into loose digits; asks about a graph/table that has no usable image

125. 14 7 % of football players left sports Academy ‘L’ & joined sports Academy ‘M’. Find the new ratio of cricket players in sports Academy ‘M’ to Football players in sports Academy ‘M’?

(a) 88 : 51
(b) 51 : 88
(c) 83 : 53
(d) 53 : 83
(e) 81 : 53

FLAGGED - a stacked fraction collapsed into loose digits; asks about a graph/table that has no usable image

126. If ratio of male to Female players in sports Academy ‘X’ playing cricket is 1 : 2 and ratio of female to male playing same game in sports Academy ‘L’ is 3 : 4 then, males players playing cricket in sports Academy ‘X’ are what percent of females playing cricket in sports Academy ‘L’?

(a) 207%
(b) 231 3 %
(c) 223%
(d) 217 3 %
(e) 213 1 3 %

FLAGGED - a stacked fraction collapsed into loose digits; asks about a graph/table that has no usable image

DIRECTIONS (Q. 127-131)

Study the pie-chart carefully and answer the questions. Pie-chart given below shows the percentage distribution of students in different class of school 'RPM' Note → Ratio of total student of school RPM to school SVM is 2 : 3 and both school has 5 class only i.e. class 6 to class 10 Number of students in 10th class of RPM school is 360 10th, 9th, 24% 15% 8th, 25% 6th, 16% 7th, 20% the publishing house | No. 1 APP for Banking & SSC Preparation 48 Website: | Email:

127. If total student in 6th class in school SVM is 20% of total student then find difference of student in 6th class in both school?

(a) 120
(b) 310
(c) 230
(d) 210
(e) 180

FLAGGED - asks about a graph/table that has no usable image

128. If boys in school RPM in 8th class is 125 then girls in 8th class are what percent of total student in same school?

(a) 16 2 3 %
(b) 14 7 %
(c) 12 1 2 %
(d) 16 3 %
(e) 12%

FLAGGED - a stacked fraction collapsed into loose digits; asks about a graph/table that has no usable image

129. If ratio of students in class 10th of school SVM to that of school RPM is 1 : 2 then students in class 10th in SVM is what percent total student in school?

(a) 9%
(b) 6%
(c) 8%
(d) 4%
(e) 12%

FLAGGED - asks about a graph/table that has no usable image

130. Find the average no. of students in class 8th and 9th of school SVM if percentage distribution is same as school RPM?

(a) None of these
(b) 425
(c) 400
(d) 250
(e) 450

FLAGGED - asks about a graph/table that has no usable image

131. If total girls in school RPM is 600 then total boys in school RPM is what percent of total student in SVM?

(a) 40%
(b) 30%
(c) 35%
(d) None of these
(e) 50%

FLAGGED - asks about a graph/table that has no usable image

DIRECTIONS (Q. 132-136)

The given bar graph shows the total number of students in five different schools in two different years. Read the data carefully and answer the questions. Total Students =Number of Boys +Number of Girls 450 400 350 300 250 200 A B C D E 2014 2016

132. Total number of students in school A and C together in year 2014 is what percent more or less than the total number of students in school A and E together in year 2016.

(a) 25%
(b) 20%
(c) 13 3%
(d) 16 3%
(e) 15%

FLAGGED - a stacked fraction collapsed into loose digits; asks about a graph/table that has no usable image

133. What is the ratio of average number of shirts sold by A and B together in year 2014 to average number of shirts sold by same stores together year 2016.

(a) 73 : 75
(b) 71 : 75
(c) 71 : 73
(d) 69 : 73
(e) 75 : 73

FLAGGED - asks about a graph/table that has no usable image

134. In school D, there are 55% girls in year 2014 and 62 2% girls in year 2016. Number of boys in school D in both the year is approximately what percent of the total number of girls in same school in both the year.

(a) 65%
(b) 60%
(c) 68%
(d) 72%
(e) 75%

FLAGGED - a stacked fraction collapsed into loose digits; asks about a graph/table that has no usable image

135. Find the difference between the average of the number of students in school A, B and C in year 2016 and the average of the number of students in school B, C and D in year 2014.

(a) 20
(b) 30
(c) 25
(d) 15
(e) 10

FLAGGED - asks about a graph/table that has no usable image

136. Find the average of the number of students in both the years in school B, C and D.

(a) 680
(b) 720
(c) 750
(d) 700
(e) 650

FLAGGED - asks about a graph/table that has no usable image

DIRECTIONS (Q. 137-141)

Study the bar-graph carefully & answer the following questions. Bar-graph given below shows the percentage of total defective cars sold out of total cars sold by four different shops. Total cars sold by four shops = 1200. Ratio between cars sold by X : Y : Z : K = 1 : 3 : 2 : 4 50 % of defective cars sold → 45 40 35 30 25 20 15 X Y Z K Shops→ the publishing house | No. 1 APP for Banking & SSC Preparation 51 Website: | Email:

137. Defective cars sold by shops Y & K together are how much more/less than total non-defective cars sold by shop Z?

(a) 124
(b) 178
(c) 194
(d) None of these
(e) 168

FLAGGED - a stacked fraction collapsed into loose digits; asks about a graph/table that has no usable image

138. Non-defective cars sold by shop X is approximately what percent of defective cars sold by shop K?

(a) 52%
(b) 44%
(c) 36%
(d) 64%
(e) 58%

FLAGGED - a stacked fraction collapsed into loose digits; asks about a graph/table that has no usable image

139. Find the average number of defective cars sold by all the shops together?

(a) 128
(b) 112
(c) 108
(d) 132
(e) 106 2

FLAGGED - a stacked fraction collapsed into loose digits; asks about a graph/table that has no usable image

140. Find the ratio between rd of cars sold by shop X & K together to total non-defective cars sold by 3 shop Y & Z together?

(a) None of these
(b) 60 : 61
(c) 55 : 56
(d) 50 : 51
(e) 20 : 21

FLAGGED - a stacked fraction collapsed into loose digits; asks about a graph/table that has no usable image

141. If 25% of defective cars sold by shop Y are returned back to the same shop, then find total cars which are sold (defective and non-defective) by shop Y?

(a) 388
(b) None of these
(c) 288
(d) 324
(e) 333

FLAGGED - a stacked fraction collapsed into loose digits; asks about a graph/table that has no usable image

DIRECTIONS (Q. 142-146)

Given below bar graph shows total number of calls (in hundred) received by five mobile network companies and percentage of calls received by female. Read the data carefully and answer the questions. Total calls Percentage of calls received by female 85 80 75 70 65 60 55 50 45 40 A B C D E

142. Find the sum of total calls received by male in company A & D together and calls received by female in company B & E together?

(a) 9900
(b) 10880
(c) 11260
(d) 10650
(e) 9580

FLAGGED - asks about a graph/table that has no usable image

143. Find difference between total calls received by male in company C & E together and total calls received by female in company D?

(a) 40
(b) 20
(c) 50
(d) 30
(e) 60

FLAGGED - asks about a graph/table that has no usable image

144. Find ratio between total calls received by female in company A to total calls received by male in company B?

(a) 2 : 1
(b) 3: 1
(c) 4 : 1
(d) 5 : 1
(e) 1: 1

FLAGGED - asks about a graph/table that has no usable image

145. Total calls received in company F is 60 % more than total calls received by female in company A. If out of total calls received in company F, 75% calls received by female, then find average number of calls received by male in company F & D?

(a) 2020
(b) 2060
(c) 2040
(d) 2080
(e) 2100

FLAGGED - asks about a graph/table that has no usable image

146. Find total number of calls received by male in company A, C & E together?

(a) 7940
(b) 7930
(c) 7910
(d) 7980
(e) 7950

FLAGGED - asks about a graph/table that has no usable image

DIRECTIONS (Q. 147-151)
Given bar graph shows the ratio of marked price to selling price of five articles sold by a shopkeeper. Read the information carefully and answer the following questions. 3 2.5 2 1.5 1 0.5 0 A B C D E Articles

147. What is the discount% on article B.

(a) 205
(b) 16 ⅔%
(c) 40%
(d) 8 ⅓%
(e) 50%

FLAGGED - asks about a graph/table that has no usable image

148. If mark price of article C is 200% above cost price then find the profit % an selling article C.

(a) 33 ⅓%
(b) 16 ⅔%
(c) 66 ⅔%
(d) 48 ½%
(e) 50%

FLAGGED - asks about a graph/table that has no usable image

149. On article E shopkeeper earn 50 Rs. which is 20% of C.P. what is the difference between cost price and mark price of article.

(a) 240 Rs
(b) 210 Rs
(c) 245 Rs
(d) 230 Rs
(e) 235 Rs

FLAGGED - asks about a graph/table that has no usable image

150. Mark price of article D is 264 Rs. If profit is 30 Rs. then find the profit % on it.

(a) 32%
(b) 37.5%
(c) 12.25%
(d) 25%
(e) 27%

FLAGGED - asks about a graph/table that has no usable image

151. Article A has cost of 200 Rs. if mark price is 80% above cost price then find value of discount on it.

(a) 200 Rs
(b) 150 Rs
(c) 120 Rs
(d) 110 Rs
(e) 140 Rs

FLAGGED - asks about a graph/table that has no usable image

DIRECTIONS (Q. 152-155)
Pie-chart given below shows number of persons come to watch movies in five different theaters. Study the data carefully and answer the following questions. Total person = 4400 Live 14% Cinema 24% PVR DT 28% 18% Inox 16% the publishing house | No. 1 APP for Banking & SSC Preparation 55 Website: | Email:

152. If Ratio of male and female come in PVR theatre to watch movies is 4 : 7. Then find the difference between number of male to number of female come in PVR theatre to watch movie.

(a) 448
(b) 784
(c) 224
(d) 336
(e) 360 100

FLAGGED - asks about a graph/table that has no usable image

153. 'Cinema' theatre shows three movies. 25% of person watch Padmavat, 3 % of person watch padman and remaining watch 'College Diaries'. Find the average number of person who watch Padmavat and College Diaries.

(a) 340
(b) 352
(c) 368
(d) 374
(e) 382 50 200

FLAGGED - asks about a graph/table that has no usable image

154. 3 % of the person came in DT cinema bought popcorn. 3 % of the person bought pepsi and remaining person bought both the items. Find the total number of person who bought atmost one item?

(a) 726
(b) 583
(c) 440
(d) 550
(e) 660

FLAGGED - asks about a graph/table that has no usable image

155. Find the difference between the person who visit Cinema and DT theatre together to the person who visit LIVE & INOX theatre together?

(a) 462
(b) 484
(c) 506
(d) 352
(e) 528

FLAGGED - asks about a graph/table that has no usable image

DIRECTIONS (Q. 156-160)

Given below line graph shows number of food packets (in hundred) distibributed by Kerala government in 5 cities which are flood affected and graph also shows percentage of packets counsumed by people in these five cities. Read the data carefully and answer the questions. Note- Total packet in any city= Consumed packets + Unconsumed packets Food packets Percentage of consumed packets 65 60 55 50 45 40 35 30 25 20 A B C D E 1

156. If total number of packets distributed in city X is 33 3 % more than that of total unconsumed packets in the city C and total 35% people consumed packets in city X, then find difference between total unconsumed packets in city X and A?

(a) 300
(b) 320
(c) 360
(d) 716
(e) 240

FLAGGED - a stacked fraction collapsed into loose digits; asks about a graph/table that has no usable image

157. Find the ratio of difference between consumed food packets in city A & E to the difference between consumed food packets in the city B & D?

(a) 144 : 115
(b) 144 : 125
(c) 144 : 119
(d) 144 : 109
(e) 144 : 135

FLAGGED - asks about a graph/table that has no usable image

158. 55% of total consumed food packets in city C are consumed by male, then find total food packets consumed by female in same city is approximately what percent of total unconsumed food packets in city A?

(a) 42%
(b) 44%
(c) 46%
(d) 38%
(e) 48%

FLAGGED - asks about a graph/table that has no usable image

159. Find the sum of number of unconsumed food packets in city A, B, C & E?

(a) 13045
(b) 12315
(c) 13040
(d) 12055
(e) 13025

FLAGGED - asks about a graph/table that has no usable image

160. If total food packets distributed by Kerala government in all cities including these five cities is 925% more than total food packet consumed in city C, then find total food packets distributed in other cities except these five cities?

(a) 5040
(b) 5060
(c) 5020
(d) 5080
(e) 5000

FLAGGED - asks about a graph/table that has no usable image

DIRECTIONS (Q. 161-164)

Given line graph shows the interest offered by 6 banks on Home loans 10 9 8 7 6 5 SBI ICICI HDFC YES AXIS PNB Note: All loans on S.I. unless mentioned in the question. the publishing house | No. 1 APP for Banking & SSC Preparation 58 Website: | Email:

161. A man took loan from ICICI and HDFC loan offers in the ratio of 6 : 5 respectively . If he pay total Rs.14640 as interest at the end of 2 year. Then find the total amount he borrowed.

(a) 50000
(b) 110000
(c) 60000
(d) 90000
(e) None of these

FLAGGED - asks about a graph/table that has no usable image

162. Ram compare the interest rate of HDFC and Axis bank and then choose the lower rate for its 7 loan. But by mistake he confused in bank name and at end of loan term he pay 11 13 % more than he expected. Find the time of his loan term.

(a) 4 years
(b) 6 years
(c) 5 years
(d) 8 years
(e) None of these

FLAGGED - a stacked fraction collapsed into loose digits; asks about a graph/table that has no usable image

163. If loan borrowed from PNB and SBI is same then what is the ratio of amount paid at the end of 3 years to banks.

(a) 310 : 291
(b) 313 : 301
(c) 310 : 298
(d) 313 : 297
(e) 313 : 298

FLAGGED - asks about a graph/table that has no usable image

164. What is the difference of the Interest paid by a borrower when he borrowed Rs 80000 from ICICI and Axis both to that from SBI and HDFC after 2 years ?

(a) Rs. 6080
(b) Rs. 7650
(c) Rs. 6400
(d) Rs. 5040
(e) None of these

FLAGGED - asks about a graph/table that has no usable image

DIRECTIONS (Q. 165-169)

Study the following line graph carefully and answer the following questions. The line graph shows the no. of questions asked from different topics of quantitative aptitude in two shifts of SBI clerk prelims exam. Shift 1 Shift 2 90 85 80 75 No. of question 70 65 60 55 50 45 40 Percentage Profit & Loss SI & CI Time & Work DI

165. No. of questions asked in shift 1 from SI & CI is what percent of no. of questions asked from time and work in the same shift?

(a) 60%
(b) 50%
(c) 55%
(d) 64%
(e) 75%

FLAGGED - asks about a graph/table that has no usable image

166. Find the average no. of questions asked from all the given sections in shift 2.

(a) 46
(b) 64
(c) 48
(d) 68
(e) 74

FLAGGED - asks about a graph/table that has no usable image

167. What is the ratio of no. of questions asked from profit & loss and percentage together in shift 1 to the questions asked from profit & loss and time & work together in shift-2?

(a) 6 : 5
(b) 5 : 7
(c) 7 : 5
(d) 5 : 6
(e) 8 : 7

FLAGGED - asks about a graph/table that has no usable image

168. What is the difference between total no. of questions asked in both shifts from all the given sections together?

(a) 45
(b) 40
(c) 35
(d) 30
(e) 60

FLAGGED - asks about a graph/table that has no usable image

169. Total no. of questions asked from DI in shift 2 are what percent less than that of DI in shift 1? 2

(a) 5 3 %
(b) 6 3 %
(c) 4 3 %
(d) 8%
(e) 3 2 3 %

FLAGGED - a stacked fraction collapsed into loose digits; asks about a graph/table that has no usable image

DIRECTIONS (Q. 170-174)

Bar chart given below shows number of males in four different departments in a company. Table given below shows percentage of females out of total employees in these departments. Study the data carefully and answer the following questions 60 50 40 30 20 10 0 HR Marketing Finance Accounts Department Percentage of females out of total employees HR 76% Marketing 30% Finance 37.5% Account 40% the publishing house | No. 1 APP for Banking & SSC Preparation 61 Website: | Email:

170. Total number of females in HR and Marketing department together is how much more/less than total number of females in Finance and Accounts department together.

(a) 16
(b) 14
(c) 12
(d) 10
(e) 8

FLAGGED - asks about a graph/table that has no usable image

171. Total number of employees in Accounts department is what percent more/less than total number of employees in HR department?

(a) 60%
(b) 20%
(c) 40%
(d) 80%
(e) 50%

FLAGGED - asks about a graph/table that has no usable image

172. Total number of males in Content department is 25% more than total number of males in Marketing department, while total number of females in Content department is 40% more than total number of employees in Finance department. Find total number of employees in Content department?

(a) 147
(b) 105
(c) 162
(d) 120
(e) 117

FLAGGED - asks about a graph/table that has no usable image

173. Total number of employees in Accounts department is how much more than total number of females in HR and Marketing department together?

(a) 30
(b) 20
(c) 25
(d) 35
(e) 15

FLAGGED - asks about a graph/table that has no usable image

174. There is one typist per five employees in a department. Find total number of typist in all four departments together?

(a) 240
(b) 48
(c) 220
(d) 44
(e) 46

FLAGGED - asks about a graph/table that has no usable image

DIRECTIONS (Q. 175-176)

The given line graphs show the total number of applicants who have applied for IBPS PO examination from four different cities and the table shows the ratio between number of male and female applicants. Read the data carefully and answer the following questions. 2500 Number of applicants 2300 2100 1900 1700 1500 P Q R S Cities Male : Female P 6 : 5 Q 5 : 4 R 3 : 5 S 3 : 2

175. The difference of the number of male applications from city P and female applications from city R is what percent more or less than the difference of the number of male and female applicants of city S. 1

(a) 3 3 %
(b) 6 2 %
(c) 4%
(d) 6 4 %
(e) 5%

FLAGGED - a stacked fraction collapsed into loose digits

176. The number of applicants from another city T is 37 2 % more than the average number of applicants from these four cities and the ratio of male to female applicants in this city is 11 : 14. Find the ratio of difference of the number of male and female applicants from city R to the difference of the male and female applicants from city T?

(a) 20 : 9
(b) 11 : 9
(c) 20 : 11
(d) 11 : 20
(e) 9 : 20

FLAGGED - a stacked fraction collapsed into loose digits

DIRECTIONS (Q. 177-181)

Pie chart given below shows distribution of people based on a survey on their favorite type of movies. Note: - No two persons have liked same type of movie. Favorite type of Movie Sci fi 16% Comedy 24% Drama 13% Action Romance 25% 22% Total People = 18,000 the publishing house | No. 1 APP for Banking & SSC Preparation 64 Website: | Email:

177. 40% people who like comedy movies are female which is 20% less than the females who like Romantic movies, then find the number of males who like romantic movies.

(a) 1500
(b) 2160
(c) 1728
(d) 1800
(e) 1900

FLAGGED - asks about a graph/table that has no usable image

178. What is the difference in the number of people who like comedy and Action movies together to the people who like Sci fi and Drama movies together?

(a) 3600
(b) 7200
(c) 4200
(d) 3800
(e) 4000

FLAGGED - asks about a graph/table that has no usable image

179. Find the average number of people who likes Scifi, Drama and Action movies together?

(a) 3040
(b) 3140
(c) 3240
(d) 3340
(e) 3440

FLAGGED - asks about a graph/table that has no usable image

180. 35% of people who like Sci fi movies are males which is equal to the number of females who like Drama movies, then find the ratio of females who like Sci fi movies to the males who like Drama movies.

(a) 37 : 52
(b) 3 : 2
(c) 2 : 3
(d) 34 : 53
(e) 52 : 37

FLAGGED - asks about a graph/table that has no usable image

181. Number of people who like Comedy and Scifi movies together is what percent of the people who don’t like Romantic movies.

(a) 2000 39 %
(b) 175%
(c) 39% 1000
(d) 39 %
(e) 75%

FLAGGED - a stacked fraction collapsed into loose digits; asks about a graph/table that has no usable image

DIRECTIONS (Q. 182-186)

Read the given information carefully and answer the following questions. 5 Population of a village is 8192. Number of males is 27 9% more than number of females in that village. 45% females and 75% of males speak local language. Females who speak Hindi are 337 more than males who do not speak local language. Ratio of male to female speaking Hindi is 7 : 11. Every people of this village speak one of the three languages i.e. local language, Hindi and Dogri.

182. Total people speaking Hindi in that village is what percent of number of females in that village?

(a) 60%
(b) 62 2%
(c) 70%
(d) 67 2%
(e) 75%

FLAGGED - a stacked fraction collapsed into loose digits

183. Find the difference between average number of females speaking Hindi and Dogri together and the females speaking local language?

(a) 610
(b) 630
(c) 615
(d) 625
(e) 635

FLAGGED - a stacked fraction collapsed into loose digits

184. 75% of males speaking local language are doing agriculture while remaining of males are doing job and business in the ratio of 4 : 3. Then number of males doing job are what percent of total male population ?

(a) 25%
(b) 20%
(c) 22 ½%
(d) 17 ½%
(e) 30%

FLAGGED - a stacked fraction collapsed into loose digits

185. Find ratio between females speaking local language to the total number of males speaking Hindi and females speaking Dogri together ?

(a) 6 : 5
(b) 7 : 6
(c) 8 : 7
(d) 10 : 9
(e) 9 : 8

FLAGGED - a stacked fraction collapsed into loose digits

186. Find the average of females speaking Hindi and Dogri language together and the males who do not speak local language?

(a) 1484
(b) 1464
(c) 1564
(d) 1494
(e) 1524

FLAGGED - a stacked fraction collapsed into loose digits

DIRECTIONS (Q. 187-188)

Read the data carefully and answer the questions. There are 900 students in school 'X' and they like two Indian cricket players, i.e. either Virat Kohli or M.S. Dhoni. The ratio of boys to girls like M.S. Dhoni is 13 : 7 and total number of boys like Virat Kohli is 30 less than total number of girls like M.S. Dhoni. Total number of girls like Virat Kohli is 60 less than boys like Virat Kohli.

187. Total number of boys like M.S. Dhoni & Virat Kohli together is what percent more than total number of girls like M.S. Dhoni & Virat Kohli together? 8

(a) 63 11 %
(b) 65 11 %
(c) 71 11 %
(d) 72 11%
(e) 75 11 %

FLAGGED - a stacked fraction collapsed into loose digits

188. In school 'Y' number of boys like M.S. Dhoni and Virat Kolhi is 133 3 % & 175% more than total number of girls like M.S. Dhoni & Virat Kolhi in school 'X' respectively. Find difference between total number of boys like M.S. Dhoni & Virat Kohli together in school 'X' to total number of boys like M.S. Dhoni & Virat Kohli together in school 'Y'?

(a) 225
(b) 220
(c) 230
(d) 250
(e) 260

FLAGGED - a stacked fraction collapsed into loose digits

---

189. Shyam goes to his office which is 96 km away from his home. He walks 12 2% of total journey and remaining distance covered by running. He walks at the speed of 8 km/hr and run at the speed of 12 km/hr. Find the time to cover the whole journey?

(a) 6 hr
(b) 8.5 hr
(c) 7.5 hr
(d) 8 hr
(e) 9 hr

FLAGGED - a stacked fraction collapsed into loose digits

190. A train A moving with a speed of 80 m/s crosses another train B moving with speed of 65 m/s 2 in same direction in 36 3 sec. At the same time, train A crosses a man sitting in one of the compartment of train B in 20 sec. Find ratio of length of train A and train B?

(a) 5:6
(b) 4:3
(c) 6:5
(d) 3:4
(e) 2:3

FLAGGED - refers to an arrangement/set that was never extracted

191. Milk and Mango Juice are mixed in the ratio of 2 : 3. Naturally there is 90% water in milk and 80% water in mango juice. Now 10 liters of water is poured into the mixture and percent of water becomes 86 2 3%. Find the initial quantity of water in milk.

(a) 18 liters
(b) 20 liters
(c) 22 liters
(d) 24 liters
(e) None of these

FLAGGED - a stacked fraction collapsed into loose digits

192. A vessel contains 240 l mixture of milk & water in the ratio of 5 : 3. 64l of mixture taken out from vessel and 14 l water is added to the remaining mixture. If again 76l of mixture taken out from vessel then, find milk percentage in final mixture ? 17

(a) 52 19 %
(b) 55 19 %
(c) 57 19 %
(d) 53 17 19 %
(e) 54 19 %

FLAGGED - a stacked fraction collapsed into loose digits

193. A shopkeeper sells every item at the profit of Rs. 42. If the SP of a bat is Rs. 322 & cost price of a ball is Rs.105. Find the overall profit% earned on selling a ball and a bat.

(a) 40%
(b) 15%
(c) 21 11%
(d) 35%
(e) None of these

FLAGGED - a stacked fraction collapsed into loose digits

194. A shopkeeper wants to sell one article at a profit of 20% and another article at a profit of 14 7 % such that selling price of both the article is same. Find the ratio of cost price of both the articles?

(a) 20 : 21
(b) 10 : 9
(c) 11 : 10
(d) 8 : 7
(e) 10 : 7

FLAGGED - a stacked fraction collapsed into loose digits

195. Anurag buys an old laptop for Rs. 17500 and spends Rs. 2,500 for its repair. He is not satisfied from his laptop and sells the laptop at Rs. 22,500. Find his profit percent?

(a) 20%
(b) 12.5%
(c) 15%
(d) 14 2 7 %
(e) 25%

FLAGGED - a stacked fraction collapsed into loose digits

196. The selling price of 8 articles is equal to cost price of 12 article. Find the profit percent on selling one article?

(a) 67%
(b) 25%
(c) 50%
(d) 42 6 7%
(e) 55%

FLAGGED - a stacked fraction collapsed into loose digits

197. P and Q each sold an article at equal price. P sold article at 10% profit and Q sold at 16 3 % loss. P calculates profit percent on selling price whereas Q calculates it on cost price and there by both makes an overall loss of Rs. 1800. Find the average of cost price of P’s article and Q’s article ?

(a) Rs.16,800
(b) Rs. 18,900
(c) Rs. 20,400
(d) Rs. 22,600

(e) Rs. 24,200

FLAGGED - a stacked fraction collapsed into loose digits

198. A and B together can complete a piece of work in 36 days but the efficiency of B is 33 3% less than efficiency of A. Find in how many days 'B' alone can complete the whole work?

(a) 80 days
(b) 108 days
(c) 54 days
(d) 90 days
(e) 72 days

FLAGGED - a stacked fraction collapsed into loose digits

199. Sri invested Rs 650 more than Rimi in scheme A for the same time period and Sri got 62 2 % more profit than Rimi from that scheme. Then find the sum of amount invested by both in that scheme?

(a) Rs. 2910
(b) Rs. 2850
(c) Rs. 2570
(d) Rs. 3000
(e) Rs. 2730

FLAGGED - a stacked fraction collapsed into loose digits

200. A invested 22 1 2% more than Z and B invested 20% less than Z. If the time period of investment is same for all and the difference of profit shares of A and B is Rs. 765. Then find the profit share of A is how much more than that of Z.

(a) Rs. 405
(b) Rs. 385
(c) Rs. 418
(d) Rs. 425
(e) Rs. 400

FLAGGED - a stacked fraction collapsed into loose digits

201. A man invested an amount of Rs. 12000 in a scheme offering compound interest at rate of 10% 1 for first year, 12 2% for second year and 20% for remaining time. Find the C.I. offered to him at the end of 2 year and 4 months?

(a) Rs. 3840
(b) Rs. 5420
(c) Rs. 4500
(d) Rs. 4400
(e) Rs. 3600 3th

FLAGGED - a stacked fraction collapsed into loose digits

202. A man invested 4 of his saving at 16 2 3 % p.a. simple interest, half of remaining savings at 8% p.a. C.I for 2 years and the remaining amount of savings of Rs. 1500 is kept uninvested. Find the amount of total money he had after 2 years in his savings?

(a) Rs. 15000
(b) Rs. 14500.25
(c) Rs. 16245.6
(d) Rs. 15249.6
(e) Rs. 1486.65

FLAGGED - a stacked fraction collapsed into loose digits

203. An amount of (P + 3000) is invested on C.I. at the rate (R + 2)% for two years. If total interest obtained on principal is 56 1 4% then find the value of R.

(a) 25%
(b) 23%
(c) 28%
(d) 30%
(e) 18%

FLAGGED - a stacked fraction collapsed into loose digits

DIRECTIONS (Q. 204)

In the following questions two quantities are given for each question. Compare the numeric value of both the quantities and answers accordingly

204. A train of length 360 m is travelling at a speed of 54 km/hr Quantity I : Find the time take by train to cross a pole the publishing house | No. 1 APP for Banking & SSC Preparation 95 Website: | Email: 2 Quantity II : If its speed is increased by 16 3 % then find the time in which it can cross a platform of length 130 m

(a) Quantity I > Quantity II
(b) Quantity II > Quantity I
(c) Quantity I ≥ Quantity II
(d) Quantity II ≥ Quantity I
(e) Quantity I = Quantity II or relation can’t be established

FLAGGED - a stacked fraction collapsed into loose digits
