

Flagged for repair - Set 6

93 questions held back from set 6

DIRECTIONS (Q. 1-2)

Given below is the bar graph which shows the total number of persons who are visiting Taj Mahal in 5 different months of years. Line graph shows the percentage of foreigners in number of visitors in different months. Note → total visitors = Indian Visitors + Foreign visitors
18500 17800 18000 17500 Number of visitors 17000 16500 16000 15500 15000 15000 14500 14000 13500 Jan Feb 30 25 % of visitors who are 25 18 20 foreigner 15 10 5 0 Jan Feb 1 2 % then expenditure on bill (c) 12.5% 18000 16800 15400 March April May 23 20 15 March April May

1. Total foreign visitors in Feb and March month together are how much more/less than total Indian visitors in month of Jan and April together.
(a) 18528
(b) 17268
(c) 14548
(d) 12500
(e) 16544 2 24 50% of Indian visitors and 16 3 % of foreign visitors in Feb month are married couples. If 50% of remaining Indian visitor are 2 females and 66 3 % of remaining foreign visitors are males then find the total number of males who visited Taj Mahal in February
2. Foreign visitors in Feb month are what percent more or less than foreign visitors of May month. 2 2 2
(a) 14 7 %
(b) 18 3 %
(c) 16 3 % 2 2
(d) 15 3 %
(e) 14 3 %

FLAGGED - a stacked fraction collapsed into loose digits; option text still carries the next question; asks about a graph/table that has no usable image

DIRECTIONS (Q. 3-6)

Given below is the pie chart which shows the percentage distribution of females in 6 villages out of total female population in these 6 villages and table shows the percentage of males out of total population in each village
T 14% 20% Total females = x Villages % of males in villages P Q R S T U

3. Total population of village U is what percent of total population of village T?
(a) 100%
(b) 120%
(d) 80%
(e) 90%
(c) 75%
4. What is the ratio of total females from village S and T together to the total of males from village R and U together?
(a) 17 : 14
(b) 21 : 23
(c) 13 : 17
(d) 14 : 15
(e) 12 : 17 5

FLAGGED - asks about a graph/table that has no usable image

5. If number of males in village P is equal to 17850 then what is the total number of males and females in village T and U together?
- 36500
 - 46750
 - 48250
 - 42300
 - 54200

FLAGGED - asks about a graph/table that has no usable image

6. Total females in village R is 27200 and 30% of females in village R and 20% of males in village R are not registered in voter list. In an election, votes polled in village R is 60% of total population of village R. What is the difference in total registered voters who did not cast vote and total persons who are not registered in voter list?
- 4120
 - 5150
 - 5530
 - 4250
 - 5440

FLAGGED - asks about a graph/table that has no usable image

DIRECTIONS (Q. 7)

Given below is the pie chart which shows the percentage distribution of books of publisher 'X' sold by 7 different books store in year 2016. Table shows the ratio of books sold of publisher X to publisher Y in these seven book stores. Some values are missing in the table. You have to calculate these values if required to answer the questions. 9% F 22% E 13% Total books sold of Publisher X = 25,700 Book Ratio of books sold of store publisherX to publisher Y A B C D E F G

7. What is the total number of books sold by store A and B together if books sold by store A of publisher Y is 33 publisher X and Books sold by store B of publisher X is 20% less than that of publisher Y.
- 22359
 - 21257
 - 23244
 - 22556
 - 20256

FLAGGED - asks about a graph/table that has no usable image

DIRECTIONS (Q. 8)

Given below is the line graph which shows the percentage of male out of total population in 6 villages in year 2016. Table shows the total illiterate females and percentage of females who are literate in the given villages in year 2016 Total females = Total literate females + Total illiterate females Village Illiterate females A 6000 B 4500 C – D 3500 E 1000 F 2000 60 (600/11)% 55 percentage of male 50 (400/9)% 45 40 (300/7)% 35 30 A B C Note : In table some data are missing. If these data are required in any question then find them first and then proceed. % of females who are literates 40% 55% 35% – 80% 60% (175/3)% (1100/21)% (600/11)% D E F Village

8. If the illiterate female from village C decreases by literate female from same village increases by but total person (Male + female) remains same in village C in year 2017 then number of male in village C is decreased or increased by what percent. 23
- 3 31 %
 - 9 3
 - 33 4 %
 - None of these
 - 16 3 % 2 7 % 1 3 % more than total males 4 9 % more than total 200 13 % and 100 13 % in year 2017 29 6 39 % 7 %

FLAGGED - a stacked fraction collapsed into loose digits; asks about a graph/table that has no usable image

DIRECTIONS (Q. 9-10)

The following line graph shows the total no. of students who are preparing for three different exam viz. SSC, Bank and Railway who participated in a seminar organized by A publishing house in five different years. The table shows the ratio of male to female who participated in seminar. Study both the graph carefully and answer the questions that follows. Year Ratio of male to female who participated Bank(M:F) 2013 4:1 2014 5:3 2015 7:3 2016 3:2 2017 2:1 Railway in Seminar (in thousands) 60 No. of students who 50 participated 40 30 20 10 0 2013 2014 41. The total no. of male students in 2014 from all exam who are participating in seminar is what percent of total no. of female students from all exam who are participating in seminar in 2013?

9. What is the average no. of male students preparing for Railway exam who participated in seminar throughout all the five years ?

- (a) 22 thousands
- (b) 25 thousands
- (c) 20.5 thousands
- (d) 21.5 thousands
- (e) 19.5 thousands

FLAGGED - asks about a graph/table that has no usable image

10. In 2012 the A publishing house had organized the seminar in which the total no. of student participating in seminar who are preparing for bank, SSC and Railway exam is 10%, 20% and 25% less than that in 2013 respectively and total no. of boys who participated in the seminar in year 2012 preparing for Bank,

- (a) 6,850
- (b) 5,670
- (c) 7,650
- (d) 6,750
- (e) 7,550

FLAGGED - stem ends mid-sentence; asks about a graph/table that has no usable image

DIRECTIONS (Q. 11)

Given below is the line graph showing the profit percentage of 2 manufacturing firms, Reliance and Wipro from year 2006 to 2010. The pie charts show the percentage distribution of total income of each company in different years. Study the data carefully and answer the following questions. {Note:

11. The total income of Reliance in years 2006, 2007 and 2008 together is what percent more than the total income of Wipro for the same years ? (Calculate up to two decimal points)

- (a) 16.66%
- (b) 18.51%
- (d) 20.4%
- (e) 22.22%
- (c) 5%

FLAGGED - asks about a graph/table that has no usable image

DIRECTIONS (Q. 12)

Study the following line graph and table carefully to answer the given questions.

12. If 20% of the supply in open market in 2011 is retained and stored, then calculate the approximate percent decrease/increase in supply in open market in 2011 as compared to 2010 ?

- (a) 10%
- (b) 13%
- (d) 15%
- (e) 8%
- (c) 170%

FLAGGED - asks about a graph/table that has no usable image

DIRECTIONS (Q. 13-17)

Study the following charts carefully and answer the questions given below: Discipline wise breakup of number of candidates appeared in interview and Total no. of candidates selected after interview by the organization. Total No. of candidates appeared in the interview=25750(in thousands) Percentage of students in different discipline commerce Science Engineering 30 25 20 15 10 Total No. of candidates selected after interview=7300(in thousands) Percentage of students in different discipline 14% 16% 7% 20% 11% Management Agriculture others commerce Science Engineering Management Agriculture 32% others

13. The number of candidates who were selected after interview from commerce is what percent of number of candidates who were not selected after interview from Agriculture ? (Rounded off to two decimal points)
- (a) 37.75%
 - (b) 46.43%
 - (c) 42.5%
 - (d) 52.5%
 - (e) 55.55%
- FLAGGED - asks about a graph/table that has no usable image**
14. Calculate the average number of candidates who got selected after interview from Science, Engineering and Agriculture as a percentage of the number of candidates who did not get selected from same three disciplines ? (Rounded off to two decimal points)
- (a) 35.16%
 - (b) 32.34%
 - (c) 30.46%
 - (d) 37.42%
 - (e) 33.43%
- FLAGGED - asks about a graph/table that has no usable image**
15. The average number of candidates selected after interview from 'others' and Management is what percent of the number of candidates who appeared in interview from Engineering ? (Rounded off to two decimal points)
- (a) 24.26%
 - (b) 28.18%
 - (c) 30.12%
 - (d) 34.17%
 - (e) 29.14%
- FLAGGED - asks about a graph/table that has no usable image**
16. What percent of the total appeared candidates is the sum of the students who were selected after interview from Science and those who were not selected from others ? (Rounded off to two decimal points)
- (a) 25.45%
 - (b) 21.26%
 - (c) 12.74%
 - (d) 17.10%
 - (e) 17.89%
- FLAGGED - asks about a graph/table that has no usable image**
17. What is the ratio of students appeared in interviews from Management and those who got selected in interview from Commerce, others and Engineering together ?
- (a) 3017 : 2747
 - (b) 3015 : 2991
 - (c) 3090 : 2993
 - (d) 3417 : 2817
 - (e) None of these

DIRECTIONS (Q. 18-22)

Study the bar graph given below and answer the following questions: Class X Class XI Class XII 70 60 50 40 30 20 10 0 Half-girlfriend Begum Jaan Raabta(250) Baahubali 2 Meri Pyari Bindu (150) (200) (350) (200) Note: no Student went to watch more than one movie. The bar graph shows the percentage break-up of number of students for different films in a theatre. The table below shows total number of students in classes X, XI and XII. Class No. of students X 420 XI 480 XII 400

18. If the ratio of girls and boys, who went to watch 'Raabta' from class X, was 7 : 8, then what percent of the total number of students from class X who went to watch a movie is the number of girls who went to watch Raabta ? (approximate)

(a) 19%
(b) 23%
(c) 25%
(d) 15%
(e) 21%

FLAGGED - asks about a graph/table that has no usable image

19. What is the difference between the number of students from class XI who did not go to watch any movie and that of the number of students from class XII ?

(a) 19
(b) 41
(c) 27
(d) 21
(e) None of these

FLAGGED - asks about a graph/table that has no usable image

20. If all the students from class XII who did not go to watch any movie, later changed their mind and went to watch 'Meri Pyari Bindu', then calculate the % mark-up in the number of students who watched 'Meri Pyari Bindu' ?

(a) 30%
(b) 25.5%
(c) 35.5%
(d) 42.6%
(e) None of these

FLAGGED - asks about a graph/table that has no usable image

21. The number of students from class XI and XII who watched Raabta is what percent of the number of students from class X who watched Begum Jaan, Half girlfriend and Meri Pyari Bindu ? (approximate)

(a) 81%
(b) 72%
(c) 75%
(d) 77%
(e) 70%

FLAGGED - asks about a graph/table that has no usable image

22. Number of student who not go to watch movie from all the three classes is what percent of the total student. 1 7 2

(a) 12 2 %
(b) 11 13 %
(c) 13 5 % 7 1
(d) 14 13 %
(e) 5 13 %

DIRECTIONS (Q. 23-26)

Study the graphs given below & answer the questions that follow. Production of wheat in different Total Production = 50 lakhs Tonne USA (America) 18% China 20% Percentage of export and consumed within the country out of total production is also given- export consumed within the country 90 80 73 66 70 60 60 50 40 40 34 27 30 20 10 0 Sri Lanka Japan Belgium (c) 30% countries Sri Lanka 13% Japan 10% Belgium 9% Germany India 8% 22% 80 75 70 50 50 30 25 20 Germany India China USA

- 23.** If out of the amount consumed in India, 91/11% was wasted due to bad storage, then find the difference between actual amount consumed in India and the amount exported by Srilanka ? (in tonnes)
- (a) 90000
 - (b) 100000
 - (c) 10000
 - (d) 80000
 - (e) None of these

FLAGGED - asks about a graph/table that has no usable image

- 24.** If the production in USA includes the production in Mexico and 4 production in Mexico was 44 9% of the total given production under the head 'USA (America)', then production in Mexico is equal to the production in which % of the given countries ?
- (a) Belgium
 - (b) Germany
 - (c) Sri Lanka
 - (d) Japan
 - (e) None of these

FLAGGED - a stacked fraction collapsed into loose digits; asks about a graph/table that has no usable image

- 25.** If Germany and USA donate 30% of their export to financially backward countries, then what percent of their total production do these two countries donate together ? (calculate up to two decimal points)
- (a) 19.41%
 - (b) 18.64%
 - (c) 21.46%
 - (d) 17.42%
 - (e) 17.17%

FLAGGED - asks about a graph/table that has no usable image

- 26.** What is the difference between the quantity exported by Sri lanka, Japan and USA to the quantity consumed within these countries?
- (a) 3.3 lakh ton
 - (b) 2.2 lakh ton
 - (c) 8.3 lakh ton
 - (d) 8.1 lakh ton
 - (e) 10 lakh ton

FLAGGED - asks about a graph/table that has no usable image

DIRECTIONS (Q. 27-29)

Study the following pie chart and answer the following questions. Percentage-wise distribution of teachers in six different universities Total number of teachers = 50000 University F 18% University E 29% University D 6% Percentage of male and female in different universities F 100 80 60 40 20 0 A B 41 If one-thirty sixth of the number of teachers from university F is professors and the salary of each professor is Rs.

27. Difference between the total number of teachers in university A, university B and university C together and the total number of teachers in university D, university E and university F together is exactly equal to the number of teachers of which university ?

- (a) University A
- (b) University B
- (c) University C
- (d) University D
- (e) University F

FLAGGED - asks about a graph/table that has no usable image

28. Number of female teachers in university D is approximately what per cent of the total number of male teachers in university B together ?

- (a) 55%
- (b) 59%
- (c) 27%
- (d) 45%
- (e) 35%

FLAGGED - asks about a graph/table that has no usable image

29. Total number of male teachers from university B and C together are what percent more/less than the total number of female teachers from university D and E together ? (calculate upto two decimal points)

- (a) 9.18%
- (b) 9.38%
- (c) 9.47%
- (d) 9.31%
- (e) 10.31%

FLAGGED - asks about a graph/table that has no usable image

DIRECTIONS (Q. 30-34)

Study the following graphs carefully and answer the questions given below: Survey Conducted on 10500 People to find out six various professional in the town and percentage of female among those six professional. Graph shows the percentage of various professional out of total professional (Consider every person has a profession from these 6 profession) Percentage of Professionals amongst various professions 23 21 19 17 percentage 15 13 11 9 7 5 Designer Doctors Lawyers Percentage of female professionals Doctors Engineers Architects Teachers Lawyers Designers Teachers Architects Engineer 20% 60% 40% 80% 40% 35%

30. What is the ratio of the male Engineers and male designers together to the same occupation female professionals together in the town?

- (a) 44: 41
- (b) 55: 53
- (c) 31: 35
- (d) 44: 35
- (e) None of these

FLAGGED - asks about a graph/table that has no usable image

31. The total number of lawyers in town is approximately what percent of the total number of doctors in town?
- (a) 95
 - (b) 98
 - (c) 90
 - (d) 85
 - (e) 81

FLAGGED - asks about a graph/table that has no usable image

32. What is the difference between the total number of male and female professionals in the town?
- (a) 1284
 - (b) 1134
 - (c) 1054
 - (d) 1164
 - (e) 1124

FLAGGED - asks about a graph/table that has no usable image

33. Female Doctors are what percent of the female teachers in the town?
- (a) 42
 - (b) 28
 - (c) 15
 - (d) 35
 - (e) 32

FLAGGED - asks about a graph/table that has no usable image

34. What is the ratio of the number of male architects to the number of male teachers in the town?
- (a) 11: 5
 - (b) 3 : 2
 - (c) 5: 11
 - (d) 2 : 3
 - (e) 6:11

FLAGGED - asks about a graph/table that has no usable image

DIRECTIONS (Q. 35-36)

The graph here shows a car following a linear path. Study the graph and answer the questions that follow.

Time (in hours)	Distance (in kms.)
0	0
1	12
2	24
3	36
4	48
5	60
6	72
7	84
8	96
9	108

35. What is the average speed of car for the duration 3rd and 4th hours?

- (a) 6 km/hr
 - (b) 9 km/hr
 - (d) 12 km/hr
 - (e) None of these
- Total time taken = 2 hours
Total Distance = 36 - 24 = 12 km
Average speed = $\frac{12}{2} = 6$ km/hr

FLAGGED - asks about a graph/table that has no usable image

36. If the car travels another 28 kms in 4 hours after the fifth hour, then what is the ratio of average speed of car for 4th to 8th hour to that of 6th to 9th hour?
- (a) 35 : 31
 - (b) 42 : 31
 - (d) Can not determined
 - (e) None of these
- But, distance covered for 6th, 7th or 8th hour individually is unknown. Hence the average speed of car for hours 4th to 8th can not be calculated. Hence we can't determine the desired ratio
- (c) 3 km/hr
- $\frac{22 \times 3}{20 \times 3} = \frac{28 \times 4}{28 \times 4} = 7$ km/hr

FLAGGED - option text still carries the next question; asks about a graph/table that has no usable image

DIRECTIONS (Q. 37-38)

Refer the following line graph and answer the questions based on it. The line graph shows the percentages of markup on CP and discount offered on MP of six different articles sold by a shopkeeper. Markup 70 60 50 40 30 20 10 0 A B

37. Selling price of article C is Rs.528 and the marked prices of articles C and E are the same. What is the average selling price of both the articles?

- (a) Rs.534.5
- (b) Rs.544.5
- (d) Rs.524.5
- (e) Rs.527.5

(c) 6 hrs 72 20 2 10.8 = 3 = 6 3 hrs. Discount C D E F Then, marked price of article E = Rs.660 Selling price of article E = $660 \times (528 +$

FLAGGED - asks about a graph/table that has no usable image

38. If the cost price of article E is double to that of article A, the marked price of article E is how much percent more than that of article A?

- (a) 50%
- (b) 40%
- (d) 30%

(e) 45% Then, the cost price of article E = Rs.200 Marked price of article A = $100 + 60\%$ of $100 = 160$ Marked price of article E = $200 + 20\%$ of $200 = 240$ (240 –

(c) 3 : 5 (100 +

FLAGGED - option text still carries the next question; asks about a graph/table that has no usable image

DIRECTIONS (Q. 39-41)

Read the given data carefully and answer the given question Pie chart shows percentage distribution of total quantity of milk and water in five different vessel namely A, B, C, D and E

39. With the intention of cheating a shopkeeper sells mixture of vessel-D showing that he is taking only 4% profit over cost price. Find his actual profit. If he professes to sell pure milk and cost price is due to milk only

- (a) 40%
- (b) 30%
- (d) 35%
- (e) None of these

(c) 2 : 1 15 100 = 75 Lt 20 100 = 100 250×10 = 25 100 250×25 = 62.5 100 10 100 = 50 Quantity of Water in D = $250 \times$ Total quantity = $50 + 12.5 = 62.5$ Let CP of 1 Lt = Rs. 10 Total cost for customer = $62.5 \times 10 = 625$ 26 SP = $625 \times 25 = 650$ Actual cost = $50 \times 10 = 500$ 650–500 Profit% = () $\times 100 = 30\%$

FLAGGED - option text still carries the next question; asks about a graph/table that has no usable image

40. What will be the final ratio of milk and water if all the vessels are poured into the bigger vessel except from vessel C only 50% of mixture is taken out

- (a) 2 : 1
- (b) 66 : 31
- (d) 55 : 21
- (e) None of these = 412.5 : 193.75 $\Rightarrow 66 : 31$

(c) 27.50 = 25 Lt. 50 100 = 10 + 18.75 = 500×35 1 45 1

FLAGGED - asks about a graph/table that has no usable image

41. Find profit% after selling mixture at cost price from vessel B, C and D together. If one professes to sell pure milk and cost price is due to milk only (approximately)
- 54%
 - 60%
 - 63%
 - 58%
 - 62% $500 \times 100 = 325$ Lt. 75 Water in B, C and D together = $250 \times 100 = 187.5$ Lt. Total mixture = 512.5 Lt 187.5% profit = $325 \times 100 \approx 57.6\% = 58\%$

FLAGGED - option text still carries the next question; asks about a graph/table that has no usable image

DIRECTIONS (Q. 42)

The following data shows the working hours for three employees in week days to complete a task. The working hours also indicates the time taken by them to complete the same task alone. Read the following questions and answer carefully. A B C 9 8 7 6 5 4 3 2 1 0 Monday Tuesday Wednesday Thursday Friday Saturday

42. On Thursday, A was supposed to complete the task in time. Due to illness, he stopped when only one-third of the task was complete. Half of the remaining work was completed by B alone and rest by C alone. Find the total time taken by them to complete the task. 1
- 8 days
 - 7 3 days
 - 7 days 2 3
 - 7 3 days
 - 7 4 days 1 8 By A $\rightarrow 3$ (24) = 8 units in 3hrs 24-8 8 By B $\rightarrow = 8$ units in 4hrs 2 8 By C $\rightarrow 8$ units in 3hrs 8 8 1 Total time taken = $3 + 2 + 3 = 7$ 3 days

FLAGGED - two or more options are identical after cleaning; option text still carries the next question

DIRECTIONS (Q. 43-47)

- Study the following bar-graph and data given in the table carefully and answer the questions asked. Bar-graph shows Time taken to travel (in hours) by six vehicle on two different days. Day 1 20 Time (in hours) 15 10 5 0 A B Distance covered (in km) by six vehicle on each day. Vehicle Day One Day Two A B C D E F

43. What is difference between the average speed of A on day one and day two together to the average of speed of F on Day one and Day two together? (in km/hr)
- 4.5
 - 6.5
 - 2.5
 - 3.5 total distance total time $1690 = 20 = 84.5\text{km/hr}$ Average speed of F on Day one and Day two together = $800 = 10 = 80\text{km/hr}$ $\therefore$ Difference = $84.5 - 80 = 4.5 \text{ km/hr}$
 - 5.5 total distance total time
44. Which of the following vehicles travelled at the same speed on both the days?
- Vehicle A
 - Vehicle E
 - Vehicle C
 - Vehicle D
 - Vehicle F 320 Speed of F on day one = $4 = 80\text{km/hr}$ 480 Speed of F on day two = $6 = 80\text{km/hr}$ $\therefore$ Speed on both days is same by vehicle F

FLAGGED - asks about a graph/table that has no usable image

45. What is the ratio of average speed of vehicle D on day one and day two together to the average speed of vehicle E on day one and day two together?
- (a) 65 : 53
 (b) 5 : 4
 (c) 4 : 5
 (d) 50 : 63
 (e) 7 : 8 total distance 200 together = = 3 km/hr total tme Average speed by vehicle E on day one and day two together = total distance total tme 640+320 960 160 = = 18 km/hr = 3 km/hr 18 ∴ Ratio = 200 :160 = 5/4

FLAGGED - option text still carries the next question; asks about a graph/table that has no usable image

46. Which vehicle have maximum speed on day two?

- (a) Vehicle D
 (b) Vehicle F
 (c) Vehicle C
 (d) Vehicle A
 (e) None of these maximum speed on day two

FLAGGED - asks about a graph/table that has no usable image

47. The distance travelled on day two by vehicle A, D and F is what percent more than that of the distance travelled on day one by vehicle A and D?

- (a) 69.6%
 (b) 62.6%
 (c) 65.6%
 (d) 59.6%
 (e) 67.5% + 800+ 480 = 2120 km Distance travelled on day one by vehicle A and D = 850 + 400 = 1250 km 2120-1250 ∴ percentage= × 100 = 1250

FLAGGED - asks about a graph/table that has no usable image

DIRECTIONS (Q. 48-50)

The table given below shows the number of days taken by six workers to complete five different tasks in a field individually. Study the table carefully to answer the questions based on it. Workers Digging Watering Ploughing Seeding Leveling Mayank 15 8 Faisal 12 20 Rakesh 20 10 Jatin 10 15 Lokesh 8 24 Ashfaq 30 12

48. If Ashfaq started digging alone and was coordinated by Mayank and Jatin respectively on alternate days from next day, find the number of days taken by them to complete the work? 2

- (a) 10 3days
 (b) 11 3
 (d) 9 4days
 (e) None of these Day1 → A : 1 unit Day 2 + Day 3 work = (A + M) + (A + J) = (1 + 2) + (1 + 3) = 7 unit 2 Days → 7 unit
 (c) 9 3day 8 Days → 28 unit Total required days = 1 + 8 +

FLAGGED - asks about a graph/table that has no usable image

49. What is the difference in the number of days taken by Rakesh and Mayank together for seeding and that of by Faisal and Jatin together for watering? 3

- (a) 3 4days
 (b) 4 27
 (d) 3 35days
 (e) None of these Total time for watering = 20+ 1 So, required difference = 3
 (c) 8 days 82+16 8+6 = 7 days 27 27 35days 31days 1 24 = 5 days 1 12+1 8 1 60 = 7 days 1 15 27 35 days

FLAGGED - asks about a graph/table that has no usable image

50. Mayank, Faisal and Rakesh together started ploughing while at the same time Jatin, Lokesh and Ashfaq started watering. What is the time difference in the completion of the two works? 31
- (a) 3 67days
(b) 3 31
(d) 1 67days
(e) 1 1 Time for watering = $1 \frac{15}{24} + 1 \frac{24}{31} \therefore$ Required difference = 1 69 days
(c) $17 : 18 \frac{3}{3} \frac{7}{7} \text{days} \frac{7}{7} \frac{31}{69} \text{days} \frac{1}{20} = 3 \text{ days } 1 \frac{14}{35} + 1 \frac{20}{120} = 23 \text{ days}$

FLAGGED - asks about a graph/table that has no usable image

DIRECTIONS (Q. 51-53)

Read the following bar chart carefully and answer the following questions – Following bar chart indicates the no. of days taken by six boys to complete a work 16 15 14 12 12 10 10 8 6 4 2 0 Saurabh Prashant Gopal Following chart shows the no. of days taken by six girls to complete the same work. 30 24 25 20 15 10 10 5 0 Swati Charu Mansi

51. If Neeraj and Abhimanyu started working and after 2 days they were replaced by Charu, Anshul and Nipa and then they worked for 2 days together. How much work is still left?
- (a) $\frac{1}{10}$
(b) $\frac{1}{6}$
(d) $\frac{1}{12}$
(e) None of these
(c) $\frac{1}{9}$ 2 days work of Charu, Anshul and Nipa = $\frac{28}{72} = \frac{7}{18}$ Total work done in 4 days = $\frac{15}{18}$ Remaining work = $1 - \frac{15}{18} = \frac{3}{18} = \frac{1}{6}$
52. How many days will it take to complete the work if saurabh does the 25% of the work alone, 10% is done by Gopal alone, the remaining work is done by Sonakshi and only one of them is working at a time?
- (a) 19 days
(b) 16 days
(d) 17days
(e) None of these $25\% \times 60$ Time taken by Saurabh = Time taken by Gopal = $10\% \times 60 = 6$ days
(c) 13 days = 3 days $5 \frac{60}{6} = 1$ days Time taken by Sonakshi = $65\% \times 20$ days = 13 days
Or Time taken by saurabh to do 25% of work = $25\% \times 12$ days = 3 days Time taken by Gopal to do 10% of work = $10\% \times 10$ days = 1 day Time taken by Sonakshi to do 65% of work = $65\% \times 20$ days = 13 days
Total time taken = $3 + 1 + 13 = 17$ days

FLAGGED - option text still carries the next question; asks about a graph/table that has no usable image

53. Prashant started working alone but after 5 days of working he found that he has done only 25% work so to complete the remaining work on time he was expected to complete the work, by how much percentage he should increase his efficiency?
- (a) 52.5%
(b) 55%
(d) 45%
(e) None of these be done in 20 days. 1 Efficiency/day = 20 Remaining 75% of the work has to be done in 10 days (15 – 5 days). Total work will be done in $10 \times \text{efficiency}$. 1 New Efficiency/day = $10 \times \text{Percentage increase in efficiency}$ to do the work in time = $\frac{1}{100} = \frac{1}{40} \times 100 = 25\%$
(c) 50% $100 \frac{75}{75} \text{days with the same } 100 \frac{3}{75} = 40 \frac{3}{40} - 1 \times 20 = 1 \frac{20}{40} = \frac{1}{2}$

FLAGGED - option text still carries the next question; asks about a graph/table that has no usable image

DIRECTIONS (Q. 54-57)

Study the following table carefully to answer the questions that are based on it. The table shows the dimensions of various shapes of iron blocks. Blocks Length (cm) Cube 20 Cuboid 12 Sphere — Cylinder Cone —

54. Find the cost of painting 630 conical blocks of given dimension provided that only the curved surface area is to be painted at Rs. 5 per m². (approx.)

- (a) Rs. 777
- (b) Rs. 727
- (d) Rs. 725
- (e) Rs. 790 ∴ Required cost of painting = $630 \times \approx 727$
- (c) $250 \times 4 \times 3 \times \pi \times 353 \times 22 \times 5 \times 7 \times 21 \times 35 \times 1002$

FLAGGED - asks about a graph/table that has no usable image

55. Find the total number of cubical blocks of given dimension required to raise the water level to the brim of a cylindrical container having dimensions 10 times than that of the given cylinder. Initially container is half filled.

- (a) 176
- (b) 80
- (c) 220
- (d) 128
- (e) $180 \times 22 \times 7 \times 802 \times 140 = 2816000 \text{ cm}^3$ ∴ Volume of required number of cubical blocks should be equal to half the volume of container So, $x \times 203 = 2816000 \Rightarrow x = 1762$

FLAGGED - option text still carries the next question; asks about a graph/table that has no usable image

56. Find the ratio of total surface area of cylinder, cone and sphere.

- (a) 88 : 294 : 1225
- (b) 575 : 352 : 89
- (c) 18:119 : 54
- (d) 2 : 8 : 13
- (e) $5 : 17 : 7 \times 352 = 352 : 1176 : 4900 = 88 : 294 : 1225$

FLAGGED - asks about a graph/table that has no usable image

57. By what percent the total surface area of cuboid is more or less than the lateral surface area of cube ?

- (a) 70.5%
- (b) 65%
- (c) 75.5%
- (d) 80%
- (e) None of these L.S.A. of cube = $4 \times 202 = 1600 \text{ cm}^2$ 1208 ∴ Required percentage = $1600 \times 100 = 75.5\%$ PREVIOUS YEAR QUESTIONS

FLAGGED - asks about a graph/table that has no usable image

DIRECTIONS (Q. 58)

In the following table, the Investment and profit of three persons from different states is given. Investment (in Rs.) State A B UP 15000 — Rajasthan — 7000 Gujarat 4000 5000 Tamil Nadu 9000 10000 West Bengal — — Note : Some values are missing. You have to calculate these values as per data given in the questions:

58. Average Investment made by all of them in Tamil Nadu is 10,000 Rs. and average profit earned by all of them from the same state is 6000 Rs. , then profit earned by C in the same state is what percent more/less than the amount invested by C in the same state ? 1 6 7

- (a) 35 3 %
- (b) 37 7 %
- (c) 32 11 % 7 9
- (d) 33 11 %
- (e) 31 11 %

DIRECTIONS (Q. 59-60)

Study the data given below and answer the following questions. The pie charts shown below shows the distance covered by a boat moving upstream and downstream on different days of a week. And the table shows the speed of stream in km/hr. on different days of a week. Total distance covered upstream = 4800 km

Day	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday	Sunday
Upstream Distance (%)	10%	12%	18%	16%	14%	20%	10%
Downstream Distance (%)	10%	12%	18%	16%	14%	20%	10%

59. If the speed of boat in still water on Saturday was 27 km/hr and 2 the speed of boat in still water on Wednesday was 66 3% more than that of Saturday and time taken to travel upstream on Wednesday 16 is 13 times than time taken by it to travel downstream on Saturday, then find the speed of stream (in kmph) on Saturday?

- (a) 2
- (b) 4
- (c) 9
- (d) 8
- (e) 7

FLAGGED - a stacked fraction collapsed into loose digits

60. The speed of boat in still water on Saturday was 21 km/hr. and 4 that on Sunday was 28 7% more than that on Saturday and if the 1 time taken by boat to travel upstream on Saturday is 2 2 times of the time taken to travel downstream on Sunday, then find the time taken by the boat to cover a distance of 125 km upstream on Saturday?

- (a) 6 hrs. 45 min
- (b) 2 hrs. 45 min
- (c) 4 hrs. 30 min
- (d) 6 hrs. 15 min
- (e) None of these

FLAGGED - a stacked fraction collapsed into loose digits

DIRECTIONS (Q. 61)

P, Q, R, S and T are five persons employed to complete a job A. Line graph shows the data regarding the time taken by these persons to complete the job A. Table 2 shows the actual time for which every one of them worked on the job A. 70 60 50 40 30 20 P Q 10 20 15 0 P Q Person P Q R S T Note 1: Q and S worked on the job A for 'whole number' days. Note 2: Two jobs B and C are similar to job A and require same effort as required by job A.

61. If P and R worked on job B with they are assisted by Q every 3rd day ,then find the time taken by both of them to complete the job B together?

- (a) 13 days
- (b) 22
- (d) 3 days
- (e) 22 days
- (c) 37.5% 4 3 times their given efficiency and 1 1 6 days 2 days

FLAGGED - asks about a graph/table that has no usable image

DIRECTIONS (Q. 62)

Read the following table and the graph carefully and answer the following questions. Following table shows the time taken by five persons to complete a work on Monday and Ratio of Time taken by these five persons For . Line graph shows the efficiency (as a percentage) of these five persons on Tuesday with respect to that on Monday.

62. On Wednesday, all of them started the work together. After working for 2 minutes Gaurav left. All except Gaurav worked for another 3 minutes and then all left except Arunoday. In how much time Arunoday will complete the remaining work? (Find the approximate value) 1500 Questions E -Book for

- (a) 86 minutes
- (b) 81 minutes
- (c) 96 minutes
- (d) 56 minutes

(e) 79 minutes Let arunoday worked for x minutes $2 \frac{5}{5} \times 250 = 1 \therefore 20 + 25 + 35 + 26 + \square 578 \frac{910}{250} = 1 - x \approx 91$ minutes $\therefore$ Required time = $91 - 5 = 86$ minutes

FLAGGED - stem ends mid-sentence; characters survive from a broken font mapping; option text still carries the next question; asks about a graph/table that has no usable image

DIRECTIONS (Q. 63-64)

Study the given graph carefully to answer the question that follow: Table below shows different items sold by shopkeeper; Quantity of items sold in kg. Discount offered on list price, percentage markup price/kg and list price/kg. Some values are missing. You need to calculate these values if required.

63. What is the ratio of percentage discount offered on wheat to the percentage discount offered on rice if shopkeeper gains 1330 Rs. on selling whole quantity of wheat and % markup price of wheat is 110% and percentage of discount offered on rice is half the percentage discount offered on Honey.
- (a) 15 : 28
 - (b) 18 : 23
 - (c) 24 : 29
 - (d) 23 : 21
 - (e) None of these For

FLAGGED - asks about a graph/table that has no usable image

64. What is the average of all quantities (in kg) sold by the shopkeeper if total profit in selling honey is Rs. 1800 and ratio of difference between list price and selling price to the difference between selling price and cost price of Honey is 4 : 3 and quantity 1 of coffee sold is 33 3% less than quantity of tea sold.

- (a) 35.2
- (b) 36.4
- (c) 28.2
- (d) 32.2

(e) 30.5 List price of Honey = 1500 0 Selling price of Honey = $\square 100 - 3 \square \% 1500 = \text{Rs. } 1100$ per kg Given (list price – selling) : (Selling price – cost price) $(1500 \square 1100) \frac{4}{3} = (110 \square 1200) \frac{1400}{4x} \frac{4x}{4x} = 3200 x = 800$ (cost price) So profit per kg = $300 \frac{1800}{300} = 6$ kg Quantity of coffee = 8 kg $12 \square 8 \square 70 \square 80 \square 6$ Required average = $5 \frac{176}{5} = 35.2$ kg = Directions: The bar graph given below shows the distance covered by Arun in five different races – A, B, C, D & E

FLAGGED - a stacked fraction collapsed into loose digits; characters survive from a broken font mapping; option text still carries the next question; asks about a graph/table that has no usable image

65. Which of the following is the output of step 4 of the second statement of the given input?

- (a) #rt hn%
- (b) #oh tr%
- (c) #hn rt%
- (d) #tr oh%
- (e) None of these

FLAGGED - refers to an arrangement/set that was never extracted

DIRECTIONS (Q. 78)

Italian super - luxury sports car manufacturer Lamborghini has spread its wings in India. And it, has just opened a dealership in Bengaluru, the IT capital of the country. At a price tag of over Rs. 1 Crore, in addition high import duty barriers. Who will buy a Lamborghini car? Rather, what gives the Italian car maker the confidence to not only drive into India but also expand its presence? If super - luxury brand like Lamborghini is sensing an unfolding big opportunity in a New India, other traditional global luxury car makers have turned very ambitious with new launches.

78. Which statement negates the Italian car maker confidence?

- (a) Two years back, BMW has launched their premium cars in India, and they faced huge loss
- (b) Before India, Lamborghini had launched their car in France, and they make a 800-million-dollar profit annually
- (c) After launch, there is a huge demand and query by Indian people
- (d) Both
- (e) Both

FLAGGED - two or more options are identical after cleaning

DIRECTIONS (Q. 79)

Study the following information carefully and answer the questions given below: Nine persons live on different floors in a thirteen-story building. The bottommost floor is numbered as 1 and so on till the topmost floor is numbered as 13. Four floors are vacant. A lives on a prime-numbered floor above floor 5. Four floors gap between A and G. One floor gap between G and H. H lives above G. Five floors gap between H and C. C lives below H. D lives on an even-numbered floor. Number of floors above D is same as the number of floors between J and B. E lives on an even-numbered floor just above B. No vacant floor between C and B. F lives two floors above D.

79. Four of the following five are alike in a certain way and hence form a group. Which of the following does not belong to that group?

- (a) Floor
- (b) Floor
- (c) Floor
- (d) Floor
- (e) Floor

FLAGGED - two or more options are identical after cleaning

80. Read the following statements and answer the question. (I) Finally, the government has decided to sell off its sick industrial units, which have become a burden to it. (II) Corruption, inefficiency and red-tapism have led to heavy losses to the government-owned industrial units. Which of the following is true with respect to the above statements?

- (a) Statement I is the cause and Statement II is its effect
- (b) Statement II is the cause and Statement I is its effect
- (c) Both statement I and II are independent causes
- (d) Both statements I and II are effects of independent causes
- (e) None of these

FLAGGED - refers to an arrangement/set that was never extracted

81. Statement: Fair glow in one week otherwise money will be returned. This is Ayurveda cream and there is no side effect—Use 'X' brand cream. —An advertisement in the newspaper A. Which of the following statements can be assumed from the above sentence?

I. Normally people like Ayurveda cream.

II. Very few people read advertisement in a newspaper. III. Very few people read the newspaper A.

- (a) None is implicit
- (b) Only I and II are implicit
- (c) Only I, and either II or III are implicit
- (d) All are implicit
- (e) None of the above

FLAGGED - refers to an arrangement/set that was never extracted

82. Statement: At least 80 people have been killed and over 350 wounded in a suicide car bombing in Kabul's diplomatic quarter this morning, a few hundred metres from the Indian embassy. The area where the explosion took place is close to the presidential palace and several foreign embassies. External Affairs Minister Sushma Swaraj has tweeted that Indian officials are safe. Which of the following is an appropriate course of action as a fallout of the above terrorist attack?

- (a) India should call back its diplomats and officials immediately
- (b) India should proceed to International Court of Justice against the Afghan government
- (c) India should ask the Afghanistan Government to ramp up the security of its officials
- (d) Officials in Afghanistan should be advised to remain indoors as far as possible
- (e) None of these

FLAGGED - refers to an arrangement/set that was never extracted

DIRECTIONS (Q. 83-85)

The following questions are accompanied by two statements i.e. statement (I) and statement (II). You have to determine which statement (s) is/are sufficient/necessary to answer the questions.

- 83.** Vessel A contains the mixture of milk and water. Find the quantity of milk in the initial solution.
Statement (I): When we extract 25 liters of mixture from the vessel for three times then the vessel gets empty. Statement (II): When 15 liters of mixture is replaced by pure milk for the two times, then the ratio of milk to water in the final mixture becomes 17: 8
- (a) Neither statement (I) nor statement (II) by itself is sufficient to answer the question
 - (b) Statement (II) alone is sufficient to answer the question but statement (I) alone is not sufficient to answer the question
 - (c) Either statement (I) or statement (II) by itself is sufficient to answer the question
 - (d) Both the statements taken together are necessary to answer the questions, but neither of the statements alone is sufficient to answer the question
 - (e) Statement (I) alone is sufficient to answer the question but statement (II) alone is not sufficient to answer the questions

- 84.** The marked price of articles P is 33 $\frac{1}{3}$ % more than the marked price of Q. Article P is mark up by above its cost price and allowed 50% of a discount on article Q. What is the cost price of P (in Rs)?
Statement I: On article Q seller makes a profit of 20%. Statement II: Difference between the cost price of P and selling price of Q is Rs. 200
- (a) Neither statement (I) nor statement (II) by itself is sufficient to answer the question
 - (b) Statement (II) alone is sufficient to answer the question but statement (I) alone is not sufficient to answer the question
 - (c) Either statement (I) or statement (II) by itself is sufficient to answer the question
 - (d) Both the statements taken together are necessary to answer the questions, but neither of the statements alone is sufficient to answer the question
 - (e) Statement (I) alone is sufficient to answer the question but statement (II) alone is not sufficient to answer the questions

FLAGGED - option text still carries the next question

- 85.** Find the sum of the ages of P and D two years ago. Statement (I): Present age of P is twice the present age of Q and the ratio of the present age of R and Q is 3: 1 respectively. Statement (II): Ratio of the present ages of A to D is 3: 5 and the age of A and R is same.
- (a) Neither statement (I) nor statement (II) by itself is sufficient to answer the question
 - (b) Statement (II) alone is sufficient to answer the question but statement (I) alone is not sufficient to answer the question
 - (c) Either statement (I) or statement (II) by itself is sufficient to answer the question
 - (d) Both the statements taken together are necessary to answer the questions, but neither of the statements alone is sufficient to answer the question
 - (e) Statement (I) alone is sufficient to answer the question but statement (II) alone is not sufficient to answer the questions

FLAGGED - option text still carries the next question

- 86.** A shopkeeper has 800 kg of sugar, a part of which he sells at 10% profit and remaining at 15% loss thus, he incurred overall loss of 5.625%. What would be the profit/loss percentage, if he interchanges the quantity he sold initially
- (a) 1.5 %
 - (b) 0.375%
 - (c) 1.125%
 - (d) 2.125%
 - (e) 0.625% Total sugar = 800 kg By using allegation method Profit loss +10% -15% -5.625% 9.375
15.625 3 : 5 800 Sugar sold at 10% profit = $8 \times 3 = 300$ kg 800 Sugar sold at 15% loss = $8 \times 5 = 500$ kg

Let cost price = x Rs/kg When quantity interchanged $\rightarrow$ Selling price of that quantity which is sold at loss
 $85 \times 100 = 225x = 300 \times$ Selling price of that quantity which is sold at $500 \times x \times 100$ profit = 550×100 Total
cost price = $800x$ Total selling price = $255x + 550 \times x = 805x$ $805x - 800x$ Profit% = $\frac{x}{100} \times 100 = 0.625\%$ 100 43. 4
years ago, the ratio of $\frac{1}{2}$ of Neha's age at that time and fo

87. Which of the following option can fill both the blanks?

- (a) 12
- (b) 8
- (c) 6
- (d) 4

(e) None of these SOL. Total sum = 10000 From option (A): Case 1: When B borrowed Rs.10000 from A. Rate = 12%, time = 12 years SI = $10000 \times 12 \times 12/100 = \text{Rs.}14400$ Total amount after 12 years = $10000 + 14400 = \text{Rs.}24400$ Case 2: When A invested Rs.24400. SI = $24400 \times 12 \times 12/100 = \text{Rs.}35136$ Difference between SI = $35136 - 14400 = \text{Rs.}20736 \neq \text{Rs.}4096$ Hence, this option is not possible. From option (B): Case 1: When B borrowed Rs.10000 from A. Rate = 8%, time = 8 years SI = $10000 \times 8 \times 8/100 = \text{Rs.}6400$ Total amount after 8 years = $10000 + 6400 = \text{Rs.}16400$ Case 2: When A invested Rs.16400. SI = $16400 \times 8 \times$

88. A sold his motorbike at a profit of 20% to B who spent Rs. 800 for repairing it and then sold it to C at profit of Rs. 1550 for Rs. 7750. Find the cost price of the motorbike for A. A

- (a) Rs. 4500
- (b) Rs. 3500
- (c) Rs. 4800
- (d) Rs. 5400
- (e) None of these

FLAGGED - stem ends mid-sentence

89. Present ages of A and B are in the ratio 4:3 respectively. After 12 years the ratio of their ages becomes 6:5. Find the age of C who is 20 years elder than B? A

- (a) 36 years
- (b) 34 years
- (c) 32 years
- (d) 38 years
- (e) None of these

FLAGGED - stem ends mid-sentence

90. The number of plain books sold by store A and store B was 30% and 40% respectively then find number of lined books sold by store A and store B together is what percent of total books available at store A ? Ö

- (a) 22 7%
- (b) 23 7%
- (c) 25 7%
- (d) 25%

(e) None of these 20 Total books sold by store A = $3500 \times 100 = 700$ Total plain books sold by store A $30 \times 100 = 600 = 2000 \times$ Total lined books sold by store A = $700 - 600 = 100$ Total books sold by store B $40 \times 100 = 2000 = 5000 \times$ For

FLAGGED - a stacked fraction collapsed into loose digits; option text still carries the next question

91. Average of total books sold by stores B and C together is how much more than total unsold books of stores A. Ö

- (a) 1125
- (b) 1075
- (c) 1055
- (d) 1175

(e) 1225 1 40 Average of total books sold by stores B and C = $2 \times 50 \times 100 \times 30 \times 100 \times 100 \div 100 + 45 \times = 1675$ 0 Unsold books of store A = $3500 \times 100 = 2800$ Required difference = $2800 - 1675 = 1125$
