IBPS PO Mains 2016

31 questions

1. Apart from year 2015, they invested the amounts for same period.

(no options)

2. Some values are missing. You have to calculate these value per given data.

(no options)

There are five shops P, Q, R, S and T and they sell two different items - item A and item B. Following pie- chart shows the total no. of items sold by different shops in a particular month. Total Number of Items sold = 500 P 18% T 24% Q 16% S 22% R 20%

51. What is the central angle corresponding to the total number of items sold by shop S ?

- (a) 87.8°
- (b) 71.2°
- (c) 79.2°
- (d) 77.8°
- (e) None of these

52. Total number of items sold by shop P is equal to 36% of the total items purchased by shop P, then what is total number of unsold items of shop P ?

- (a) 320
- (b) 160
- (c) 140
- (d) 360
- (e) None of these

53. If the total number of items sold by shop S are 10% more and that of T are 20% more in the next month, than what is the total number of items sold by shop S and T together in the next month ?

- (a) 265
- (b) 355
- (c) 255
- (d) 365
- (e) None of these

54. If the total no. of item B sold by shop Q and that of R are equal and the ratio between the item A sold by shop Q to the item A sold by shop R is 2 : 3, then find the total number of item B sold by shop Q and R together ?

- (a) 80
- (b) 90
- (c) 70
- (d) 100
- (e) None of these

55. If the total number of item B sold by all of the shops together are 58% of the total items sold by all of the shops, then find the difference between the item A sold by all of the shops together and the item B sold by all of the shops together ?

- (a) 60
- (b) 70
- (c) 85
- (d) 95
- (e) None of these

56. The average age of Sheela, Ram and Mona is 38 years . 2 year ago, average age of Sheela and Ram is 39 year. 2 year hence, average age of Hema and Mona is 45. Find the present age of Hema ?

- (a) 52 years

- (b) 54 years
 - (c) 50 years
 - (d) 48 years
 - (e) None of these
-

57. Total distance between A and B is d kms. If the distance travelled along the stream is three times of the total distance and the distance travelled against the stream is two times of the total distance. If the time taken to cover the distance along the stream is 10% less than the time taken to cover the distance against the stream. If a person covers a distance of 21 km in 1 hr 24 min along the stream, then find the rate of current ?

- (a) 2 km/hr
 - (b) 3 km/hr
 - (c) 1 km/hr
 - (d) 4 km/hr
 - (e) None of these
-

58. In a bag there are 3 magenta balls, 5 green balls and 7 blue balls. 2 balls are drawn one by one without replacement. If the first ball comes out to be of magenta colour, then 8 more magenta coloured balls are added to bag. Find the probability that both the balls drawn are of magenta colour.

- (e) None of these
-

59. A started a business, and C joined him in the 1st year, they invested in the ratio of 5:4:7 respectively and the period for

- (d) which they invested was in the ratio of 4:3:2 respectively. In the 2nd year, A doubled the investment, B and C continued with the same investment as they invested for the same no. of months as they did in 1st year. The total profit in 2 years was 14000. What is B's share of profit? (a) Rs 2500 (b) Rs 3000 (c) Rs 3500 (d) Rs 4000 (e) none of these
-

60. A man invested Rs X in simple interest at a rate of interest of 15% for 5 yrs. then he invested $X+300$ at compound interest at 10% rate for 2 years. The total interest obtained in 2 years is Rs 4383. Find the total amount (in Rs) invested by the man. (a) 9000 (b) 8700

- (c) 8500 (d) 9300 (e) none of these
-

find the wrong term in the following series-

70. 3 (a) 45 (b) 15 (c) 157 (d) 2835 (e) 630

(no options)

71. Two jars A and B. Both contain 20% milk. The quantity of jar A is 4 times that of quantity of jar B. Both jar mixtures are mixed and form new mixture C and 15 litres of water is added. The final ratio of water to milk is now 19:4. Find the initial quantity (in litres) of milk in jar B. (a) 5 (b) 4 (c) 10 (d) 8 (e) none of these

(no options)

72. The ratio of work done by 30 women to the work done by 25 men, in the same time is 5:6. If 9 women and 10 men can finish a work in 3 days. Then how many women can finish the work in 4.5 days? (a) 18 (b) 16 (c) 20 (d) 25 (e) none of these

(no options)

73. Out of a total 85 children playing badminton or table tennis or both, total number of girls in the group is 70% of the total number of boys in the group. The number of boys playing only badminton is 50% of the number of boys and the total number of boys playing badminton is 60% of the total number of boys. The number of children playing only table tennis is 40% of the total number of children and a total of 12 children play badminton and table tennis both. What is the number of girls playing only badminton ?

- (a) 16
 - (b) 14
 - (c) 17
 - (d) Data inadequate
 - (e) None of these
-

74. A laptop costs 15 times as compared to cost of a mouse. On each laptop there is a profit of 25%. While the total profit on selling a mouse and a laptop is 30%. If there is a profit of Rs 2100 on selling the mouse then find the cost price of a laptop? (a)Rs30000 (b)Rs2000 (c)Rs32000 (d)Rs35000 (e)none of these

(no options)

75. The marked price of a shirt and a trouser are in the ratio 1 : 2. The shopkeeper gives 40% discount on the shirt. If the total discount on the shirt and trousers is 30%, the discount offered on the trousers is

- (a) 15%
- (b) 20%
- (c) 25%
- (d) 30% (e)none of these

81. Quantity I: x° Quantity II: 55°

- (a) Quantity I > Quantity II
- (b) Quantity I < Quantity II
- (c) Quantity I ? Quantity II
- (d) Quantity I = Quantity II
- (e) No relation

82. () () () () Quantity I = b Quantity II = d

- (a) Quantity I > Quantity II
- (b) Quantity I < Quantity II
- (c) Quantity I ? Quantity II
- (d) Quantity I = Quantity II
- (e) No relation

83. $a > 0 < b$ For all the integer value of a and b () () Quantity I: x Quantity II: 1.5

- (a) Quantity I > Quantity II
- (b) Quantity I < Quantity II
- (c) Quantity I ? Quantity II
- (d) Quantity I = Quantity II
- (e) No relation

84. A box contains 4 Red balls, 6 white balls, 2 orange balls and 8 black balls. Quantity I: Two balls are drawn at random probability that both balls are either red or white. Quantity II: Three balls are drawn. The probability that all are different.

- (a) Quantity I > Quantity II
- (b) Quantity I < Quantity II
- (c) Quantity I ? Quantity II
- (d) Quantity I = Quantity II
- (e) No relation

85. The cost price of 2 items A and B is same. The shopkeeper decided to mark the price 40% more than the CP of each item. A discount of 25% was given an item A and discount of 20% was given on item B. total profit earn on both item was Rs.34 Quantity I: CP of the items Quantity II: CP of any item which was sold at 12.5% profit and profit earned on it was sold for Rs. 50

- (a) Quantity I > Quantity II
- (b) Quantity I < Quantity II
- (c) Quantity I ? Quantity II
- (d) Quantity I = Quantity II
- (e) No relation

What should come in place of question mark (?) in the following given questions?(Note: You need not to calculate the exact value.)

86. ? ? ()

- (a) 81

- (b) 72
 - (c) 169
 - (d) 121
 - (e) 144
-

87. () () () ()

- (a) 170
 - (b) 230
 - (c) 150
 - (d) 210
 - (e) 160
-

90. (333% of 856) 49.95=?

- (a) 43 (b)41
 - (c) 47 (d)39
 - (e) 57
-

91. A trader sells a homogeneous mixture of A and B at the rate of Rs 32 per kg. What is the profit earned by the trader? (I) He bought B at the rate of Rs 29 per kg (II)He bought per kg of A at Rs 8 higher than the rate of B per kg. (III)He bought A at the rate of Rs 34 per kg (a)Only I and II

- (b) Only I and III
 - (c) I, II and III together are not sufficient
 - (d) Either
-

92. 12 men and 8 women can complete a piece of work in 10 days. How many days will it take for 15 men and 4 women to complete the same work? (I) 15 men can complete the work in 12 days (II) 15 women can complete the work in 16 days (III) The amount of work done by a woman is three-fourth of the work done by a man in one day.

- (a) Only I and II or III
 - (b) Only II or III
 - (c) Only III
 - (d) Any two of the three (e)Only II
-

93. What will be the sum of the ages of father and the son after five years? I. Father?s present age is twice son?s present age II. After ten years the ratio of father?s age to the son?s age will become 12 : 7 III. The difference between the father?s age and son?s age was equal to the son?s present age

- (a) Only I or II
 - (b) Only II or III
 - (c) Only I or III
 - (d) Only III (e)Any two of the three
-

94. What is the amount saved by Sahil per month from his salary? (I) Sahil spends 25% of his salary on food, 35% on medicine and education. (II) Sahil spends Rs 4000 per month on food and 35% on medicine and education and saves the remaining amount. (III) Sahil spends Rs 2500 per month on medicine and education and saves the remaining amount.

- (a) Only II
 - (b) Only III
 - (c) Both II and III
 - (d) either II or III
 - (e) None
-

95. An article is sold at 15% discount. Find the percentage gain. (I) If the article had been sold for Rs 150 less, there would have been no profit no loss (II) Had the article been sold for Rs 50 more, the gain would have been 15% (III) Cost price of the article is Rs 1000

- (a) Only I or III
- (b) Any one of them
- (c) either I or II
- (d) Any two of them
