IBPS PO Prelims 2017

77 questions

1. If vowels are arranged first, of a word ?YOURSELF? in alphabetical order from left to right, then consonant are arranged in alphabetical order from left to right. After this, each of these letter is replaced with next succeeding letter according to alphabetical order then what will be 4th element from right end?

- (a) V
 - (b) G
 - (c) M
 - (d) T
 - (e) F
-

2. From point B, Ramesh walks 18m in west to reach point P then turn left and walks 6m. After that he turns right and walks 16m and again turns left and walks 6m to reach point T. Shreya walks 10m in north direction to reach point A, then she turns left and walk 14m to reach point T, Then what is the direction of point B with respect to A?

- (a) North-east
 - (b) North
 - (c) South-west
 - (d) South-east
 - (e) None of these
-

3. O has only one child. P is the father of M and spouse of B. B has only one daughter. S who is son of O, is married to G. G and M are siblings and O has one grandchild V. E is the son of M. Now what is the relation of M with respect to V?

- (a) Mother
 - (b) Sister
 - (c) Brother
 - (d) Uncle
 - (e) Father
-

7. In the given questions, assuming the given statements to be true. Find which of the given conclusions numbered I, and II is/are definitely true and give your answer accordingly.

- (a) Both I and II are true
 - (b) Only II is true
 - (c) Only I is true.
 - (d) Either I or II is true.
 - (e) None is true.
-

8. In the given questions, assuming the given statements to be true. Find which of the given conclusions numbered I, and II is/are definitely true and give your answer accordingly.

- (a) Only II is true.
 - (b) Either I or II are true.
 - (c) Both I and II are true
 - (d) Only I is true.
 - (e) None is true.
-

9. In the given questions, assuming the given statements to be true. Find which of the given conclusions numbered I, and II is/are definitely true and give your answer accordingly.

- (a) Only I is true.
 - (b) Neither I nor II are true.
 - (c) Both I and II are true
 - (d) Only II is true.
 - (e) None of these.
-

10. In the given questions, assuming the given statements to be true. Find which of the given conclusions numbered I, and II is/are definitely true and give your answer accordingly.

- (a) Only I is true.
 - (b) Only II is true
 - (c) Either I or II are true.
 - (d) Both I and II are true
 - (e) None is true
-

11. In the given questions, assuming the given statements to be true. Find which of the given conclusions numbered I, and II is/are definitely true and give your answer accordingly.

- (a) Only I is true.
 - (b) Only II is true
 - (c) Either I or II are true.
 - (d) Both I and II are true
 - (e) None is true
-

12. Who is sitting third to right of D? Study the following information answer the given questions: A, B, C, D, E, F, G & H are eight students and all of them are sitting around a circular table but not necessarily in same order. Some of them are facing inside and some of them are facing outside. A sits third to left of H. F sits third to left of A. Three students sit between F and D. B sits second to right of G who is not immediate neighbor of A and H. Immediate neighbors of H faces opposite to center. C sits third to right of E. C and D faces same direction as H. Immediate neighbors of B faces opposite

(no options)

13. Who is facing towards the center? Study the following information answer the given questions: A, B, C, D, E, F, G & H are eight students and all of them are sitting around a circular table but not necessarily in same order. Some of them are facing inside and some of them are facing outside. A sits third to left of H. F sits third to left of A. Three students sit between F and D. B sits second to right of G who is not immediate neighbor of A and H. Immediate neighbors of H faces opposite to center. C sits third to right of E. C and D faces same direction as H. Immediate neighbors of B faces opposite

(no options)

14. Who sits opposite to C? Study the following information answer the given questions: A, B, C, D, E, F, G & H are eight students and all of them are sitting around a circular table but not necessarily in same order. Some of them are facing inside and some of them are facing outside. A sits third to left of H. F sits third to left of A. Three students sit between F and D. B sits second to right of G who is not immediate neighbor of A and H. Immediate neighbors of H faces opposite to center. C sits third to right of E. C and D faces same direction as H. Immediate neighbors of B faces opposite

(no options)

15. How many people are sitting between C and D, when counted from right of C? Study the following information answer the given questions: A, B, C, D, E, F, G & H are eight students and all of them are sitting around a circular table but not necessarily in same order. Some of them are facing inside and some of them are facing outside. A sits third to left of H. F sits third to left of A. Three students sit between F and D. B sits second to right of G who is not immediate neighbor of A and H. Immediate neighbors of H faces opposite to center. C sits third to right of E. C and D faces same direction as H. Immediate neighbors of B faces opposite

(no options)

16. Who is sitting exactly between B and G when counted from right of G? Study the following information answer the given questions: A, B, C, D, E, F, G & H are eight students and all of them are sitting around a circular table but not necessarily in same order. Some of them are facing inside and some of them are facing outside. A sits third to left of H. F sits third to left of A. Three students sit between F and D. B sits second to right of G who is not immediate neighbor of A and H. Immediate neighbors of H faces opposite to center. C sits third to right of E. C and D faces same direction as H. Immediate neighbors of B faces opposite

(no options)

31. Who will attend the meeting in December? Study the information and answer the given questions: Eight persons A, B, C, D, E, F, G, H have to attend the meeting in the months of March, April, November and December. In each month, the meeting will be conducted on either 15th or 24th of the month. Not more than two have a meeting on same month. B will attend the meeting on 15th of the month which has only 30 days. Three persons will attend the meeting between B and C. No one is attended the meeting after F. Two persons will attend the meeting between C and H. A and D will attend the meeting in the same month. Only one person will attend the meeting between B and G. G will not attend the meeting on 15th of March. A will attend the meeting after D.

- (a) D,F
 - (b) E,C
 - (c) A,C
 - (d) A,H
 - (e) F,C
-

32. How many person(s) will attend the meeting between F and B? Study the information and answer the given questions: Eight persons A, B, C, D, E, F, G, H have to attend the meeting in the months of March, April, November and December. In each month, the meeting will be conducted on either 15th or 24th of the month. Not more than two have a meeting on same month. B will attend the meeting on 15th of the month which has only 30 days. Three persons will attend the meeting between B and C. No one is attended the meeting after F. Two persons will attend the meeting between C and H. A and D will attend the meeting in the same month. Only one person will attend the meeting between B and G. G will not attend the meeting on 15th of March. A will attend the meeting after D.

- (a) One
 - (b) Three
 - (c) None
 - (d) Two
 - (e) More than three
-

33. B will attend the meeting on which date and month? Study the information and answer the given questions: Eight persons A, B, C, D, E, F, G, H have to attend the meeting in the months of March, April, November and December. In each month, the meeting will be conducted on either 15th or 24th of the month. Not more than two have a meeting on same month. B will attend the meeting on 15th of the month which has only 30 days. Three persons will attend the meeting between B and C. No one is attended the meeting after F. Two persons will attend the meeting between C and H. A and D will attend the meeting in the same month. Only one person will attend the meeting between B and G. G will not attend the meeting on 15th of March. A will attend the meeting after D.

- (a) 15th-April
 - (b) 24th- April
 - (c) 24th- March
 - (d) 15th-November
 - (e) None of these
-

34. Who among the following will attend the meeting immediately before F? Study the information and answer the given questions: Eight persons A, B, C, D, E, F, G, H have to attend the meeting in the months of March, April, November and December. In each month, the meeting will be conducted on either 15th or 24th of the month. Not more than two have a meeting on same month. B will attend the meeting on 15th of the month which has only 30 days. Three persons will attend the meeting between B and C. No one is attended the meeting after F. Two persons will attend the meeting between C and H. A and D will attend the meeting in the same month. Only one person will attend the meeting between B and G. G will not attend the meeting on 15th of March. A will attend the meeting after D.

- (a) A
 - (b) C
 - (c) G
 - (d) H
 - (e) B
-

35. Who among the following will attend the meeting on November? Study the information and answer the given questions: Eight persons A, B, C, D, E, F, G, H have to attend the meeting in the months of March, April, November and December. In each month, the meeting will be conducted on either 15th or 24th of the month. Not more than two have a meeting on same month. B will attend the meeting on 15th of the month which has only 30 days. Three persons will attend the meeting between B and C. No one is attended the meeting after F. Two persons will attend the meeting between C and H. A and D will attend the meeting in the same month. Only one person will attend the meeting between B and G. G will not attend the meeting on 15th of March. A will attend the meeting after D.

- (a) H,F
 - (b) G,E
 - (c) A,D
 - (d) H,B
 - (e) G,A
-

36. What is the total students who participate in Quiz from class B, C and E together Given below is the table which shows the total students in 5 classes from which some participate in two cultural activities i.e. Quiz and Painting. It also shows the students who do not participates in cultural activities and ratio of students who participate in Quiz and painting. Note : Students participate only in these two activities.

- (a) 370
 - (b) 394
 - (c) 268
 - (d) 352
 - (e) 270
-

37. What is the ratio of students who participate in Painting from class B and C together to the students who participate in Quiz from class A and D together. Given below is the table which shows the total students in 5 classes from which some participate in two cultural activities i.e. Quiz and Painting. It also shows the students who do not participates in cultural activities and ratio of students who participate in Quiz and painting. Note : Students participate only in these two activities.

- (a) 19 : 35
 - (b) 20 : 37
 - (c) 23 : 34
 - (d) 22 : 35
 - (e) 20 : 33
-

38. Students who participate in Quiz from class B are what percent of students who participate in Painting from Class D Given below is the table which shows the total students in 5 classes from which some participate in two cultural activities i.e. Quiz and Painting. It also shows the students who do not participates in cultural activities and ratio of students who participate in Quiz and painting. Note : Students participate only in these two activities.

- (a) 1925/6%
 - (b) 2042/3%
 - (c) 3376/5%
 - (d) 2244/5%
 - (e) 2025/6%
-

39. What is the average number of students who participate in Quiz from class A, B and C together Given below is the table which shows the total students in 5 classes from which some participate in two cultural activities i.e. Quiz and Painting. It also shows the students who do not participates in cultural activities and ratio of students who participate in Quiz and painting. Note : Students participate only in these two activities.

- (d) (e)
-

40. Students who participate in both cultural activities from class E is what percent more or less than the students who participate in Quiz from class C and D together. Given below is the table which shows the total students in 5 classes from which some participate in two cultural activities i.e. Quiz and Painting. It also shows the students who do not participates in cultural activities and ratio of students who participate in Quiz and painting. Note : Students participate only in these two activities.

- (d) (e)
-

41. If students who do not participate in cultural activities from class A is increased by $\frac{1}{2}\%$ then students who participate in Quiz from class A is decreased by what percent. Ratio of students who participate in Quiz and Painting remains same. Given below is the table which shows the total students in 5 classes from which some participate in two cultural activities i.e. Quiz and Painting. It also shows the students who do not participate in cultural activities and ratio of students who participate in Quiz and painting. Note : Students participate only in these two activities.

(d) (e)

42. Average of present age of A, B, C and D is 19. After 6 years C age will be 18 years more than the sum of present age of A and B. If D's present age is 12 years then find present age of C.

- (a) 30
 - (b) 32
 - (c) 38
 - (d) 36
 - (e) 40
-

43. Sum of length of two train is 540 m and ratio of speed of two trains A and B is 1 : 2. If train A covers 90 m in 5 sec/ Then in what time they will cross each other when they travel in opposite direction.

- (a) 11 s
 - (b) 8 s
 - (c) 12 s
 - (d) 10 s
 - (e) 15 s
-

44. The distance between two trains is 350 km and they approach towards each other on parallel tracks. If speed of one train is 80% of speed of other train and they take 10 hours to meet each other then find the speed of slower train.

(d) (e)

45. From a mixture of 100 litre of milk and water which contain 70% milk and 30% water some amount is taken out and replaced with water. The resultant mixture contains equal amount of milk and water. Find the amount of mixture taken out in first step.

(e) 25 litre

46. Some quantity of Wheat costing 25 Rs./kg is mixed with some quantity of wheat costing 30 Rs./kg. If final mixture costs Rs. 28/kg then find the ratio of quantity in which they are mixed.

- (a) 2 : 3
 - (b) 3 : 5
 - (c) 3 : 2
 - (d) 5 : 3
 - (e) 2 : 5
-

47. A can complete a work in 10 days. B can complete it in 15 days and C in 20 days. A worked alone for 2 days and then left the work remaining work is complete by B and C together in y days. Find the value y.

- (a) $\frac{48}{7}$
 - (b) $\frac{24}{7}$
 - (c) $\frac{23}{6}$
 - (d) $\frac{46}{6}$
 - (e) None of these
-

48. Ratio of diameter and height of a cylinder is 4 : 5. If diameter is increased by 50% then its curved surface area is increased by 160%. Find the volume of cylinder.

- (a) 660%
 - (b) 1280 %
 - (c) 540 %
 - (d) 190 %
 - (e) 220 %
-

49. Tens digit of a three digit number is 6. If the number is written in reverse order then the number formed is 198 less than the original number. The sum of unit digit and hundredth digit is 12. Find the number

- (a) 730
 - (b) 740
 - (c) 765
 - (d) 640
 - (e) 615
-

50. There are 4 consecutive odd number and difference between the reciprocal of first odd number and reciprocal of the third is ??? Find the sum of last two odd number.

- (a) 51
 - (b) 49
 - (c) 48
 - (d) 50
 - (e) 52
-

51. A sum of money is divided among P, R,T and Z in the ratio 4 : 7 : 9 : 14. If the share of P and R is Rs 4604 more Than T, then what is the total amount of T and Z together.

- (a) 52946
 - (b) 31223
 - (c) 40232
 - (d) 32321
 - (e) 35212
-

52. A boat while travelling upstream covers a distance of 18 km at the speed of 3 km/h, whereas while travelling downstream it covers the same distance at a speed of 9 km/h. What is the speed of the boat in still water?

- (a) 3 km/h
 - (b) 5 km/h
 - (c) 7 km/h
 - (d) Cannot be determined
 - (e) None of these
-

53. A started some business with Rs. 26,000. After 3 months B joined him with Rs. 16,000. After some more time C joined them with Rs. 25,000. At the end of the year, out of a total profit of Rs. 15,453, C gets Rs. 3825 as his share. How many months after B joined the business, did C join?

- (a) 3
 - (b) 4
 - (c) 5
 - (d) 6
 - (e) None of these
-

54. What approximate value will come in place of (x) in the following questions ?

- (a) $\frac{1}{16}$
 - (b) $\frac{1}{9}$
 - (c) $\frac{1}{25}$
 - (d) $\frac{1}{4}$
 - (e) $\frac{1}{36}$
-

55. What approximate value will come in place of (x) in the following questions ?

- (a) 6
 - (b) 7
 - (c) 8
 - (d) 10
 - (e) 12
-

56. What approximate value will come in place of (x) in the following questions ?

- (a) 8

- (b) 6
 - (c) 13
 - (d) 5
 - (e) 11
-

57. What approximate value will come in place of (x) in the following questions ?

- (a) 900
 - (b) 2500
 - (c) 1600
 - (d) 400
 - (e) 3600
-

58. What approximate value will come in place of (x) in the following questions ?

- (a) 24
 - (b) 23
 - (c) 20
 - (d) 18
 - (e) 26
-

59. What approximate value will come in place of (x) in the following questions ?

- (a) 3200
 - (b) 3100
 - (c) 3400
 - (d) 2800
 - (e) 2100
-

60. What should come in place of the question mark (?) in the following series ?

- (a) 222
 - (b) 262
 - (c) 244
 - (d) 272
 - (e) None of these
-

61. What should come in place of the question mark (?) in the following series ?

- (a) 9981
 - (b) 8281
 - (c) 7321
 - (d) 9876
 - (e) 9978
-

62. What should come in place of the question mark (?) in the following series ?

- (a) 18
 - (b) 20
 - (c) 21
 - (d) 24
 - (e) 26
-

63. What should come in place of the question mark (?) in the following series ?

- (a) 83
 - (b) 88
 - (c) 94
 - (d) 97
 - (e) 100
-

64. What should come in place of the question mark (?) in the following series ?

- (a) 480
- (b) 256

- (c) 216
 - (d) 512
 - (e) 420
-

71. The author contrasts the 1930's with the present in order to show that **Read the following passage carefully and answer the questions given below it. Certain words/phrases have been printed in bold to help out locate them while answering some of the questions. How many really suffer as a result of labor market problems? This is one of the most critical yet contentious social policy questions. In many ways, our social statistics exaggerate the degree of hardship. Unemployment does not have the same dire consequences today as it did in the 1930's when most of the unemployed were primary breadwinners, when income and earnings were usually much closer to the margin of subsistence, and when there were no countervailing social programs for those failing in the labor market. Increasing affluence, the rise of families with more than one wage earner, the growing predominance of secondary earners among the unemployed, and improved social welfare protection have unquestionably mitigated the consequences of joblessness. Earnings and income data also overstate the dimensions of hardship. Among the millions with hourly earnings at or below the minimum wage level, the overwhelming majority are from multiple-earner, relatively affluent families. Most of those counted by the poverty statistics are elderly or handicapped or have family responsibilities which keep them out of the labor force, so the poverty statistics are by no means an accurate indicator of labor market pathologies. Yet there are also many ways our social statistics underestimate the degree of labor-market-related hardship. The unemployment counts exclude the millions of fully employed workers whose wages are so low that their families remain in poverty. Low wages and repeated or prolonged unemployment frequently interact to undermine the capacity for self-support. Since the number experiencing joblessness at some time during the year is several times the number unemployed in any month, those who suffer as a result of forced idleness can equal or exceed average annual unemployment, even though only a minority of the jobless in any month really suffer. For every person counted in the monthly unemployment tallies, there is another working part-time because of the inability to find full-time work, or else outside the labor force but wanting a job. Finally, income transfers in our country have always focused on the elderly, disabled, and dependent, neglecting the needs of the working poor, so that the dramatic expansion of cash and in-kind transfers does not necessarily mean that those failing in the labor market are adequately protected. As a result of such contradictory evidence, it is uncertain whether those suffering seriously as a result of labor market problems number in the hundreds of thousands or the tens of millions, and, hence, whether high levels of joblessness can be tolerated or must be countered by job creation and economic stimulus. There is only one area of agreement in this debate—that the existing poverty, employment, and earnings statistics are inadequate for one their primary applications, measuring the consequences of labor market problems**

(a) more people were unemployed in the 1930's
(b) unemployment now has less severe effects
(c) social programs are more needed now

- (d) there now is a greater proportion of elderly and handicapped people among those in poverty
 - (e) poverty has increased since the 1930's
-

72. Which of the following proposals best responds to the issues raised by the author? Read the following passage carefully and answer the questions given below it. Certain words/phrases have been printed in bold to help out locate them while answering some of the questions. How many really suffer as a result of labor market problems? This is one of the most critical yet contentious social policy questions. In many ways, our social statistics exaggerate the degree of hardship. Unemployment does not have the same dire consequences today as it did in the 1930's when most of the unemployed were primary breadwinners, when income and earnings were usually much closer to the margin of subsistence, and when there were no countervailing social programs for those failing in the labor market. Increasing affluence, the rise of families with more than one wage earner, the growing predominance of secondary earners among the unemployed, and improved social welfare protection have unquestionably mitigated the consequences of joblessness. Earnings and income data also overstate the dimensions of hardship. Among the millions with hourly earnings at or below the minimum wage level, the overwhelming majority are from multiple-earner, relatively affluent families. Most of those counted by the poverty statistics are elderly or handicapped or have family responsibilities which keep them out of the labor force, so the poverty statistics are by no means an accurate indicator of labor market pathologies. Yet there are also many ways our social statistics underestimate the degree of labor-market-related hardship. The unemployment counts exclude the millions of fully employed workers whose wages are so low that their families remain in poverty. Low wages and repeated or prolonged unemployment frequently interact to undermine the capacity for self-support. Since the number experiencing joblessness at some time during the year is several times the number unemployed in any month, those who suffer as a result of forced idleness can equal or exceed average annual unemployment, even though only a minority of the jobless in any month really suffer. For every person counted in the monthly unemployment tallies, there is another working part-time because of the inability to find full-time work, or else outside the labor force but wanting a job. Finally, income transfers in our country have always focused on the elderly, disabled, and dependent, neglecting the needs of the working poor, so that the dramatic expansion of cash and in-kind transfers does not necessarily mean that those failing in the labor market are adequately protected. As a result of such contradictory evidence, it is uncertain whether those suffering seriously as a result of labor market problems number in the hundreds of thousands or the tens of millions, and, hence, whether high levels of joblessness can be tolerated or must be countered by job creation and economic stimulus. **There is only one area of agreement in this debate: that the existing poverty, employment, and earnings statistics are inadequate for one their primary applications, measuring the consequences of labor market problems.**

(a) Innovative programs using multiple approaches should be set up to reduce the level of unemployment.
 (b) A compromise should be found between the positions of those who view joblessness as a evil greater than economic control and those who hold the opposite view.

- (c) New statistical indices should be developed to measure the degree to which unemployment and inadequately paid employment cause suffering.
- (d) Consideration should be given to the ways in which statistics can act as partial causes of the phenomena that they purport to measure.
- (e) The labor force should be restructured so that it corresponds to the range of job vacancies.

73. The author's purpose in citing those who are repeatedly unemployed during a twelve-month period is most probably to show that Read the following passage carefully and answer the questions given below it. Certain words/phrases have been printed in bold to help out locate them while answering some of the questions. How many really suffer as a result of labor market problems? This is one of the most critical yet contentious social policy questions. In many ways, our social statistics exaggerate the degree of hardship. Unemployment does not have the same dire consequences today as it did in the 1930's when most of the unemployed were primary breadwinners, when income and earnings were usually much closer to the margin of subsistence, and when there were no countervailing social programs for those failing in the labor market. Increasing affluence, the rise of families with more than one wage earner, the growing predominance of secondary earners among the unemployed, and improved social welfare protection have unquestionably mitigated the consequences of joblessness. Earnings and income data also overstate the dimensions of hardship. Among the millions with hourly earnings at or below the minimum wage level, the overwhelming majority are from multiple-earner, relatively affluent families. Most of those counted by the poverty statistics are elderly or handicapped or have family responsibilities which keep them out of the labor force, so the poverty statistics are by no means an accurate indicator of labor market pathologies. Yet there are also many ways our social statistics underestimate the degree of labor-market-related hardship. The unemployment counts exclude the millions of fully employed workers whose wages are so low that their families remain in poverty. Low wages and repeated or prolonged unemployment frequently interact to undermine the capacity for self-support. Since the number experiencing joblessness at some time during the year is several times the number unemployed in any month, those who suffer as a result of forced idleness can equal or exceed average annual unemployment, even though only a minority of the jobless in any month really suffer. For every person counted in the monthly unemployment tallies, there is another working part-time because of the inability to find full-time work, or else outside the labor force but wanting a job. Finally, income transfers in our country have always focused on the elderly, disabled, and dependent, neglecting the needs of the working poor, so that the dramatic expansion of cash and in-kind transfers does not necessarily mean that those failing in the labor market are adequately protected. As a result of such contradictory evidence, it is uncertain whether those suffering seriously as a result of labor market problems number in the hundreds of thousands or the tens of millions, and, hence, whether high levels of joblessness can be tolerated or must be countered by job creation and economic stimulus. There is only one area of agreement in this debate: that the existing poverty, employment, and earnings statistics are inadequate for one their primary applications, measuring the consequences of labor market problems.

(a) there are several factors that cause the payment of low wages to some members of the labor force
 (b) unemployment statistics can underestimate the hardship resulting from joblessness
 (c) recurrent inadequacies in the labor market can exist and can cause hardships for individual workers
 (d) a majority of those who are jobless at any one time do not suffer severe hardship
 (e) there are fewer individuals who are without jobs at some time during a year than would be expected on the basis of monthly unemployment figures

74. According to the passage, one factor that causes unemployment and earnings figures to overpredict the amount of economic hardship is the Read the following passage carefully and answer the questions given below it. Certain words/phrases have been printed in bold to help out locate them while answering some of the questions. How many really suffer as a result of labor market problems? This is one of the most critical yet contentious social policy questions. In many ways, our social statistics exaggerate the degree of hardship. Unemployment does not have the same dire consequences today as it did in the 1930's when most of the unemployed were primary breadwinners, when income and earnings were usually much closer to the margin of subsistence, and when there were no countervailing social programs for those failing in the labor market. Increasing affluence, the rise of families with more than one wage earner, the growing predominance of secondary earners among the unemployed, and improved social welfare protection have unquestionably mitigated the consequences of joblessness. Earnings and income data also overstate the dimensions of hardship. Among the millions with hourly earnings at or below the minimum wage level, the overwhelming majority are from multiple-earner, relatively affluent families. Most of those counted by the poverty statistics are elderly or handicapped or have family responsibilities which keep them out of the labor force, so the poverty statistics are by no means an accurate indicator of labor market pathologies. Yet there are also many ways our social statistics underestimate the degree of labor-market-related hardship. The unemployment counts exclude the millions of fully employed workers whose wages are so low that their families remain in poverty. Low wages and repeated or prolonged unemployment frequently interact to undermine the capacity for self-support. Since the number experiencing joblessness at some time during the year is several times the number unemployed in any month, those who suffer as a result of forced idleness can equal or exceed average annual unemployment, even though only a minority of the jobless in any month really suffer. For every person counted in the monthly unemployment tallies, there is another working part-time because of the inability to find full-time work, or else outside the labor force but wanting a job. Finally, income transfers in our country have always focused on the elderly, disabled, and dependent, neglecting the needs of the working poor, so that the dramatic expansion of cash and in-kind transfers does not necessarily mean that those failing in the labor market are adequately protected. As a result of such contradictory evidence, it is uncertain whether those suffering seriously as a result of labor market problems number in the hundreds of thousands or the tens of millions, and, hence, whether high levels of joblessness can be tolerated or must be countered by job creation and economic stimulus. There is only one area of agreement in this debate?that the existing poverty, employment and earnings statistics are inadequate for one their primary applications, measuring the consequences of labor market problems.

(a) recurrence of periods of unemployment for a group of low-wage workers
 (b) possibility that earnings may be received from more than one job per worker
 (c) fact that unemployment counts do not include those who work for low wages and remain poor
 (d) Establishment of system of record-keeping that makes it possible to compile poverty statistics
 (e) Prevalence, among low-wage workers and the unemployed, of members of families in which other are employed

75. The author uses 'labour market problems' in passage to refer to which of the following? Read the following passage carefully and answer the questions given below it. Certain words/phrases have been printed in bold to help out locate them while answering some of the questions. How many really suffer as a result of labor market problems? This is one of the most critical yet contentious social policy questions. In many ways, our social statistics exaggerate the degree of hardship. Unemployment does not have the same dire consequences today as it did in the 1930's when most of the unemployed were primary breadwinners, when income and earnings were usually much closer to the margin of subsistence, and when there were no countervailing social programs for those failing in the labor market. Increasing affluence, the rise of families with more than one wage earner, the growing predominance of secondary earners among the unemployed, and improved social welfare protection have unquestionably mitigated the consequences of joblessness. Earnings and income data also overstate the dimensions of hardship. Among the millions with hourly earnings at or below the minimum wage level, the overwhelming majority are from multiple-earner, relatively affluent families. Most of those counted by the poverty statistics are elderly or handicapped or have family responsibilities which keep them out of the labor force, so the poverty statistics are by no means an accurate indicator of labor market pathologies. Yet there are also many ways our social statistics underestimate the degree of labor-market-related hardship. The unemployment counts exclude the millions of fully employed workers whose wages are so low that their families remain in poverty. Low wages and repeated or prolonged unemployment frequently interact to undermine the capacity for self-support. Since the number experiencing joblessness at some time during the year is several times the number unemployed in any month, those who suffer as a result of forced idleness can equal or exceed average annual unemployment, even though only a minority of the jobless in any month really suffer. For every person counted in the monthly unemployment tallies, there is another working part-time because of the inability to find full-time work, or else outside the labor force but wanting a job. Finally, income transfers in our country have always focused on the elderly, disabled, and dependent, neglecting the needs of the working poor, so that the dramatic expansion of cash and in-kind transfers does not necessarily mean that those failing in the labor market are adequately protected. As a result of such contradictory evidence, it is uncertain whether those suffering seriously as a result of labor market problems number in the hundreds of thousands or the tens of millions, and, hence, whether high levels of joblessness can be tolerated or must be countered by job creation and economic stimulus. There is only one area of agreement in this debate: that the existing poverty, employment, and earnings statistics are inadequate for one their primary applications, measuring the consequences of labor market problems.

- (a) The overall causes of poverty
- (b) Deficiencies in the training of the work force
- (c) Trade relationships among producers of goods
- (d) Shortage of jobs providing adequate income
- (e) Strikes and inadequate supplies of labour

76. Which of the following is the principle topic of the passage? Read the following passage carefully and answer the questions given below it. Certain words/phrases have been printed in bold to help out locate them while answering some of the questions. How many really suffer as a result of labor market problems? This is one of the most critical yet contentious social policy questions. In many ways, our social statistics exaggerate the degree of hardship. Unemployment does not have the same dire consequences today as it did in the 1930's when most of the unemployed were primary breadwinners, when income and earnings were usually much closer to the margin of subsistence, and when there were no countervailing social programs for those failing in the labor market. Increasing affluence, the rise of families with more than one wage earner, the growing predominance of secondary earners among the unemployed, and improved social welfare protection have unquestionably mitigated the consequences of joblessness. Earnings and income data also overstate the dimensions of hardship. Among the millions with hourly earnings at or below the minimum wage level, the overwhelming majority are from multiple-earner, relatively affluent families. Most of those counted by the poverty statistics are elderly or handicapped or have family responsibilities which keep them out of the labor force, so the poverty statistics are by no means an accurate indicator of labor market pathologies. Yet there are also many ways our social statistics underestimate the degree of labor-market-related hardship. The unemployment counts exclude the millions of fully employed workers whose wages are so low that their families remain in poverty. Low wages and repeated or prolonged unemployment frequently interact to undermine the capacity for self-support. Since the number experiencing joblessness at some time during the year is several times the number unemployed in any month, those who suffer as a result of forced idleness can equal or exceed average annual unemployment, even though only a minority of the jobless in any month really suffer. For every person counted in the monthly unemployment tallies, there is another working part-time because of the inability to find full-time work, or else outside the labor force but wanting a job. Finally, income transfers in our country have always focused on the elderly, disabled, and dependent, neglecting the needs of the working poor, so that the dramatic expansion of cash and in-kind transfers does not necessarily mean that those failing in the labor market are adequately protected. As a result of such contradictory evidence, it is uncertain whether those suffering seriously as a result of labor market problems number in the hundreds of thousands or the tens of millions, and, hence, whether high levels of joblessness can be tolerated or must be countered by job creation and economic stimulus. There is only one area of agreement in this debate: that the existing poverty, employment, and earnings statistics are inadequate for one their primary applications, measuring the consequences of labor market problems.

(a) What causes labour market pathologies that result in suffering
 (b) Why income measures are imprecise in measuring degrees of poverty
 (c) Which of the currently used statistical procedures are the best for estimating the incidence of hardship that is due to unemployment
 (d) Where the areas of agreement are among poverty, employment and earnings figures
 (e) How social statistics give an unclear picture of the degree of hardship caused by low wages and insufficient employment opportunities

77. Choose the word/group of words which is most similar in meaning to the word/group of words printed in bold as used in the passage. **Dire** Read the following passage carefully and answer the questions given below it. Certain words/phrases have been printed in bold to help out locate them while answering some of the questions. How many really suffer as a result of labor market problems? This is one of the most critical yet contentious social policy questions. In many ways, our social statistics exaggerate the degree of hardship. Unemployment does not have the same **dire** consequences today as it did in the 1930's when most of the unemployed were primary breadwinners, when income and earnings were usually much closer to the margin of subsistence, and when there were no countervailing social programs for those failing in the labor market. Increasing affluence, the rise of families with more than one wage earner, the growing predominance of secondary earners among the unemployed, and improved social welfare protection have unquestionably mitigated the consequences of joblessness. There is only one area of agreement in this debate—that the existing poverty, employment and earnings statistics are inadequate for one their primary applications, measuring the consequences of labor market problems.

(a) agreeable
(b) ineffective
(c) conservative
(d) factious
(e) fierce

81. (1) If Rajeshwari /(A) would have come (B)/ to me I would have/(C) given her the/(D) help she needed./ (E) No error. In each of the questions given below a sentence is given which is divided into 5 parts. The first part which is numbered (1) and is grammatically correct. You have to find the error in the other numbered part of the sentence and if you find the error in any part of the sentence apart from (1) then that part of the sentence is the correct choice for the given question. If all the parts are grammatically correct choose option (E) as your choice.

(a) A
(b) B
(c) C
(d) D
(e) No error

82. (1) I bade him /(A) to submit all (B)/ the important documents/ (C) before he left /(D) for the meeting./ (E) No error. In each of the questions given below a sentence is given which is divided into 5 parts. The first part which is numbered (1) and is grammatically correct. You have to find the error in the other numbered part of the sentence and if you find the error in any part of the sentence apart from (1) then that part of the sentence is the correct choice for the given question. If all the parts are grammatically correct choose option (E) as your choice.

(a) A
(b) B
(c) C
(d) D
(e) No error

83. (1) When we /(A)reached the station /(B) we found /(C) that there was /(D) no place to stand./ (E) No error. In each of the questions given below a sentence is given which is divided into 5 parts. The first part which is numbered (1) and is grammatically correct. You have to find the error in the other numbered part of the sentence and if you find the error in any part of the sentence apart from (1) then that part of the sentence is the correct choice for the given question. If all the parts are grammatically correct choose option (E) as your choice.

- (a) A
 - (b) B
 - (c) C
 - (d) D
 - (e) No error
-

84. (1) All the pupils /(A) stood up respectively/(B) as soon as /(C) the guru /(D) entered the room/ (E) No error. In each of the questions given below a sentence is given which is divided into 5 parts. The first part which is numbered (1) and is grammatically correct. You have to find the error in the other numbered part of the sentence and if you find the error in any part of the sentence apart from (1) then that part of the sentence is the correct choice for the given question. If all the parts are grammatically correct choose option (E) as your choice.

- (a) A
 - (b) B
 - (c) C
 - (d) D
 - (e) No error
-

85. (1) When the father /(A) in him/ (B) took charge of the/(C) situation, all the children /(D) shook in their shoes./(E) No error. In each of the questions given below a sentence is given which is divided into 5 parts. The first part which is numbered (1) and is grammatically correct. You have to find the error in the other numbered part of the sentence and if you find the error in any part of the sentence apart from (1) then that part of the sentence is the correct choice for the given question. If all the parts are grammatically correct choose option (E) as your choice.

- (a) A
 - (b) B
 - (c) C
 - (d) D
 - (e) No error
-

86. (1) I had just /(A)reached a hotel which/(B) was inaugurated by the Prime Minister /(C) when my mother called me to bring some mangoes/(D) while coming back home./ (E) No error. In each of the questions given below a sentence is given which is divided into 5 parts. The first part which is numbered (1) and is grammatically correct. You have to find the error in the other numbered part of the sentence and if you find the error in any part of the sentence apart from (1) then that part of the sentence is the correct choice for the given question. If all the parts are grammatically correct choose option (E) as your choice.

- (a) A
 - (b) B
 - (c) C
 - (d) D
 - (e) No error
-

87. (1) If people get /(A)recurring opportunities for /(B)independent thinking they /(C)would better /(D) prepare for it. /(E)No Error. In each of the questions given below a sentence is given which is divided into 5 parts. The first part which is numbered (1) and is grammatically correct. You have to find the error in the other numbered part of the sentence and if you find the error in any part of the sentence apart from (1) then that part of the sentence is the correct choice for the given question. If all the parts are grammatically correct choose option (E) as your choice.

- (a) A
 - (b) B
 - (c) C
 - (d) D
 - (e) No error
-

88. (1) When I first visited Mexicali, /(A)I had heard/(B) rumors about "La Chinesca," a network of basement tunnels/(C) where the city's Chinese immigrants had/(D) created their own underground Chinatown./(E) No error. In each of the questions given below a sentence is given which is divided into 5 parts. The first part which is numbered (1) and is grammatically correct. You have to find the error in the other numbered part of the sentence and if you find the error in any part of the sentence apart from (1) then that part of the sentence is the correct choice for the given question. If all the parts are grammatically correct choose option (E) as your choice.

- (a) A
 - (b) B
 - (c) C
 - (d) D
 - (e) No error
-

89. (1) The deepest ocean blue/ (A) rolls with earth green, /(B) each hue primordial /(C) in the force they /(D) exerts on the other./(E) No error. In each of the questions given below a sentence is given which is divided into 5 parts. The first part which is numbered (1) and is grammatically correct. You have to find the error in the other numbered part of the sentence and if you find the error in any part of the sentence apart from (1) then that part of the sentence is the correct choice for the given question. If all the parts are grammatically correct choose option (E) as your choice.

- (a) A
 - (b) B
 - (c) C
 - (d) D
 - (e) No error
-

90. (1) The school district's policy change /(A) comes at a time when the state isn't really sure/ (B) how it can enforce the /(C)bathroom law, which requires people to use the bathroom /(D) according to the gender of their birth certificate./ (E) No error In each of the questions given below a sentence is given which is divided into 5 parts. The first part which is numbered (1) and is grammatically correct. You have to find the error in the other numbered part of the sentence and if you find the error in any part of the sentence apart from (1) then that part of the sentence is the correct choice for the given question. If all the parts are grammatically correct choose option (E) as your choice.

- (a) A
 - (b) B
 - (c) C
 - (d) D
 - (e) No error
-

91. We should realize that the chance of accident _____ in a train or on the road. (I) may be at least as great in our home as (II) was at least as great as in homes (III) may be as great or greater in our homes than Which of the following phrases (I), (II), and (III) given below each sentence will fit into the blank to make the sentence grammatically correct? Choose the best option among the five given alternatives that reflect the correct use of phrase in the context of the grammatically correct sentence.

- (a) Only (I) is correct
 - (b) Only (III) is correct
 - (c) Both (I) and (II) are correct
 - (d) Both (I) and (III) are correct
 - (e) None is correct
-

92. Primitive man _____ an imbalance which could be rectified only by punishing the wrongdoer. (I) believes that a crime created (II) believed that a crime created (III) believed that a criminal created Which of the following phrases (I), (II), and (III) given below each sentence will fit into the blank to make the sentence grammatically correct? Choose the best option among the five given alternatives that reflect the correct use of phrase in the context of the grammatically correct sentence.

- (a) Only (I) is correct
 - (b) Only (II) is correct
 - (c) Only (III) is correct
 - (d) Both (I) and (II) are correct
 - (e) All are correct
-

93. Calamities and indigence in the past _____ than at present. (I) was afflicted more (II) were more afflict (III) may afflict more Which of the following phrases (I), (II), and (III) given below each sentence will fit into the blank to make the sentence grammatically correct? Choose the best option among the five given alternatives that reflect the correct use of phrase in the context of the grammatically correct sentence.

- (a) Only (I) is correct
 - (b) Only (II) is correct
 - (c) Both (I) and (III) are correct
 - (d) Both (II) and (III) are correct
 - (e) None is correct
-

94. _____ to keep his promise, he will earn the distrust of all the voters. (I) If the candidate has failed (II) Since the candidate has failed (III) If the candidate fails Which of the following phrases (I), (II), and (III) given below each sentence will fit into the blank to make the sentence grammatically correct? Choose the best option among the five given alternatives that reflect the correct use of phrase in the context of the grammatically correct sentence.

- (a) Only (I) is correct
 - (b) Only (II) is correct
 - (c) Both (II) and (III) are correct
 - (d) Both (I) and (II) are correct
 - (e) All are correct
-

95. It is difficult to prevent assault against environment as _____ animals. (I) those against (II) it is against (III) preventing those against Which of the following phrases (I), (II), and (III) given below each sentence will fit into the blank to make the sentence grammatically correct? Choose the best option among the five given alternatives that reflect the correct use of phrase in the context of the grammatically correct sentence.

- (a) Only (I) is correct
 - (b) Only (II) is correct
 - (c) Only (III) is correct
 - (d) Both (I) and (II) are correct
 - (e) All are correct
-

96. Top managers are often stymied by the _____ conflict. (I) difficulties of managing (II) difficulty for managing (III) management of difficult Which of the following phrases (I), (II), and (III) given below each sentence will fit into the blank to make the sentence grammatically correct? Choose the best option among the five given alternatives that reflect the correct use of phrase in the context of the grammatically correct sentence.

- (a) Only (I) is correct
 - (b) Only (II) is correct
 - (c) Both (I) and (III) are correct
 - (d) Both (II) and (III) are correct
 - (e) None is correct
-

97. Reaching collective decisions _____ individual preferences is an imperfect science. (I) belonging to (II) based on (III) concerning Which of the following phrases (I), (II), and (III) given below each sentence will fit into the blank to make the sentence grammatically correct? Choose the best option among the five given alternatives that reflect the correct use of phrase in the context of the grammatically correct sentence.

- (a) Only (I) is correct
 - (b) Only (II) is correct
 - (c) Both (I) and (III) are correct
 - (d) Both (II) and (III) are correct
 - (e) All are correct
-

98. _____, I could not accept his statement that supernatural beings had caused the disturbance. (I) A realist that I am (II) Being a realist (III) Being that I am a realist Which of the following phrases (I), (II), and (III) given below each sentence will fit into the blank to make the sentence grammatically correct? Choose the best option among the five given alternatives that reflect the correct use of phrase in the context of the grammatically correct sentence.

- (a) Only (II) is correct

- (b) Only (III) is correct
 - (c) Both (I) and (II) are correct
 - (d) Both (II) and (III) are correct
 - (e) All are correct
-

99. Taking good decisions and _____ are the hallmarks of high performing companies. (I) implement those quickly (II) implementing those quickly (III) quick implementing those Which of the following phrases (I), (II), and (III) given below each sentence will fit into the blank to make the sentence grammatically correct? Choose the best option among the five given alternatives that reflect the correct use of phrase in the context of the grammatically correct sentence.

- (a) Only (I) is correct
 - (b) Only (II) is correct
 - (c) Only (III) is correct
 - (d) Both (I) and (II) are correct
 - (e) None is correct
-

100. Innovation _____ the top corporate agenda.
