IBPS PO Prelims 2019

68 questions

1. Which of the following colour box is kept at the top? Study the given information carefully to answer the given question. A, B, C, D, E and F are six different boxes of different colours i.e. Blue, Black, Green, Orange, Yellow and White but not necessarily in the same order. Two boxes are placed between box A and box B. Black box is placed immediately above box B. Two boxes are placed between Black and yellow coloured boxes. Green coloured box is placed immediately above yellow coloured box. There are two boxes between box C and box D. Box F is placed immediately above box D. More than three boxes are placed between yellow and orange coloured boxes. Blue coloured box is placed above White coloured box. E likes Blue coloured box.

- (a) Orange
 - (b) Yellow
 - (c) Green
 - (d) Black
 - (e) White
-

2. How many boxes are kept below box E? Study the given information carefully to answer the given question. A, B, C, D, E and F are six different boxes of different colours i.e. Blue, Black, Green, Orange, Yellow and White but not necessarily in the same order. Two boxes are placed between box A and box B. Black box is placed immediately above box B. Two boxes are placed between Black and yellow coloured boxes. Green coloured box is placed immediately above yellow coloured box. There are two boxes between box C and box D. Box F is placed immediately above box D. More than three boxes are placed between yellow and orange coloured boxes. Blue coloured box is placed above White coloured box. E likes Blue coloured box.

- (a) One
 - (b) Two
 - (c) Three
 - (d) More than three
 - (e) None
-

3. Four of the following five are alike in a certain way and hence belong to the group, which of the following does not belong to the group? Study the given information carefully to answer the given question. A, B, C, D, E and F are six different boxes of different colours i.e. Blue, Black, Green, Orange, Yellow and White but not necessarily in the same order. Two boxes are placed between box A and box B. Black box is placed immediately above box B. Two boxes are placed between Black and yellow coloured boxes. Green coloured box is placed immediately above yellow coloured box. There are two boxes between box C and box D. Box F is placed immediately above box D. More than three boxes are placed between yellow and orange coloured boxes. Blue coloured box is placed above White coloured box. E likes Blue coloured box.

- (a) C- White
 - (b) B- Green
 - (c) E- Black
 - (d) A-Blue
 - (e) F-Black
-

4. Which of the following statement is not true regarding box B? Study the given information carefully to answer the given question. A, B, C, D, E and F are six different boxes of different colours i.e. Blue, Black, Green, Orange, Yellow and White but not necessarily in the same order. Two boxes are placed between box A and box B. Black box is placed immediately above box B. Two boxes are placed between Black and yellow coloured boxes. Green coloured box is placed immediately above yellow coloured box. There are two boxes between box C and box D. Box F is placed immediately above box D. More than three boxes are placed between yellow and orange coloured boxes. Blue coloured box is placed above White coloured box. E likes Blue coloured box.

- (a) Box B is of white colour
- (b) Three boxes are placed above box B
- (c) Yellow coloured box is placed immediately below box B
- (d) All are true
- (e) One box is placed between box B and Blue coloured box

8. Who among the following is sitting third to the left of W? Study the given information carefully to answer the given question. Eight persons P, Q, R, S, T, O, V and W are sitting around a square table. Four of them are sitting at the corners and faces towards the center and the rest are sitting on the middle sides of the table and faces away from the center. P sits second to the left of V. R and V are immediate neighbors of O. V sits opposite to Q. S sits second to the right of W. T is sitting at the corner of the table. S faces O.

- (a) O
 - (b) T
 - (c) P
 - (d) R
 - (e) None of these
-

9. How many persons are sitting between R and W when counting from the right of W? Study the given information carefully to answer the given question. Eight persons P, Q, R, S, T, O, V and W are sitting around a square table. Four of them are sitting at the corners and faces towards the center and the rest are sitting on the middle sides of the table and faces away from the center. P sits second to the left of V. R and V are immediate neighbors of O. V sits opposite to Q. S sits second to the right of W. T is sitting at the corner of the table. S faces O.

- (a) None
 - (b) More than three
 - (c) Three
 - (d) One
 - (e) Two
-

10. Four of the following five are alike in a certain way and hence belong to the group, which of the following does not belong to the group? Study the given information carefully to answer the given question. Eight persons P, Q, R, S, T, O, V and W are sitting around a square table. Four of them are sitting at the corners and faces towards the center and the rest are sitting on the middle sides of the table and faces away from the center. P sits second to the left of V. R and V are immediate neighbors of O. V sits opposite to Q. S sits second to the right of W. T is sitting at the corner of the table. S faces O.

- (a) O
 - (b) R
 - (c) P
 - (d) Q
 - (e) V
-

11. Which of the following statement is true regarding S? Study the given information carefully to answer the given question. Eight persons P, Q, R, S, T, O, V and W are sitting around a square table. Four of them are sitting at the corners and faces towards the center and the rest are sitting on the middle sides of the table and faces away from the center. P sits second to the left of V. R and V are immediate neighbors of O. V sits opposite to Q. S sits second to the right of W. T is sitting at the corner of the table. S faces O.

- (a) S sits immediate right of P.
 - (b) S faces outside the table.
 - (c) S sits third to the right of R when counting from right of R
 - (d) Two persons are sitting between S and O.
 - (e) S is an immediate neighbour of W.
-

17. Statements: $A \geq B < D = E > F$; $D \geq G > I$; $A < J \geq K$ Conclusions: I. $B > K$ II. $B = K$ In each of the question, relationships between some elements are shown in the statements. These statements are followed by conclusions numbered I and II. Read the statements and give the answer.

- (a) If only conclusion I follows.
 - (b) If only conclusion II follows.
 - (c) If either conclusion I or II follows.
 - (d) If neither conclusion I nor II follows.
 - (e) If both conclusions I and II follow
-

18. Statements: $P \geq Q \geq R = S$; $Q \geq T > U$; $P = L \geq M$ Conclusions: I. $M \geq Q$ II. $U < S$ In each of the question, relationships between some elements are shown in the statements. These statements are followed by conclusions numbered I and II. Read the statements and give the answer.

- (a) If only conclusion I follows.
 - (b) If only conclusion II follows.
 - (c) If either conclusion I or II follows.
 - (d) If neither conclusion I nor II follows.
 - (e) If both conclusions I and II follow
-

19. Statements: $G > H$? $D = F$; $M < F < N$ Conclusions: I. $H > M$ II. $G > N$ In each of the question, relationships between some elements are shown in the statements. These statements are followed by conclusions numbered I and II. Read the statements and give the answer.

- (a) If only conclusion I follows.
 - (b) If only conclusion II follows.
 - (c) If either conclusion I or II follows.
 - (d) If neither conclusion I nor II follows.
 - (e) If both conclusions I and II follow
-

24. How many persons are sitting to the right of G?

- (a) Four
 - (b) Three
 - (c) Six
 - (d) One
 - (e) Five
-

25. Which of the following is odd one out?

- (a) ZUSX
 - (b) JECH
 - (c) QLGK
 - (d) MHFK
 - (e) WRPU
-

36. The average age of Megha and Ritu is 18 years. Six years hence, Megha's age will be two times of Ritu's age. Find present age of Megha.

- (a) 24 years
 - (b) 26 years
 - (c) 10 years
 - (d) 32 years
 - (e) 18 years
-

37. Sidhu purchased 100 articles at rate Rs 10 per article. If he sold 50% articles at 20% profit while 50% of remaining at 10% profit, 20% of remaining at 10% loss and rest at 20% loss. Find his loss or profit percent in entire transaction.

- (a) 8%
 - (b) 9%
 - (c) 5%
 - (d) 0%
 - (e) None of these
-

38. What is probability of drawing 2 red balls from a bag containing 4 red, 5 yellow and some green balls such that green balls are twice the average of red and yellow color balls?

- (a) $\frac{6}{91}$
 - (b) $\frac{2}{117}$
 - (c) $\frac{1}{6}$
 - (d) $\frac{2}{51}$
 - (e) $\frac{1}{9}$
-

39. In how many ways 10 girls be arranged in a row all facing north such that 4 girls always sit together?

- (a) 4320
- (b) 15120
- (c) 5040

- (d) 17280
 - (e) 120960
-

40. A boat covers $x+20$ km downstream or $x-5$ km upstream in 5 hours. If speed of boat in still water is 300% more than speed of stream. find x .

- (a) 42.5
 - (b) 40
 - (c) 45
 - (d) 37.5
 - (e) 35
-

46. Solve the given quadratic equations and mark the correct option based on your answer?

- (a) $x > y$
 - (b) $x \geq y$
 - (c) $x < y$
 - (d) $x \leq y$
 - (e) $x = y$ or no relation can be established between x and y .
-

47. Solve the given quadratic equations and mark the correct option based on your answer?

- (a) $x > y$
 - (b) $x \geq y$
 - (c) $x < y$
 - (d) $x \leq y$
 - (e) $x = y$ or no relation can be established between x and y .
-

48. Solve the given quadratic equations and mark the correct option based on your answer?

- (a) $x > y$
 - (b) $x \geq y$
 - (c) $x < y$
 - (d) $x \leq y$
 - (e) $x = y$ or no relation can be established between x and y .
-

49. Solve the given quadratic equations and mark the correct option based on your answer?

- (a) $x > y$
 - (b) $x \geq y$
 - (c) $x < y$
 - (d) $x \leq y$
 - (e) $x = y$ or no relation can be established between x and y .
-

50. Solve the given quadratic equations and mark the correct option based on your answer?

- (a) $x > y$
 - (b) $x \geq y$
 - (c) $x < y$
 - (d) $x \leq y$
 - (e) $x = y$ or no relation can be established between x and y .
-

51. Solve the given quadratic equations and mark the correct option based on your answer?

- (a) $x > y$
 - (b) $x \geq y$
 - (c) $x < y$
 - (d) $x \leq y$
 - (e) $x = y$ or no relation can be established between x and y .
-

52. Find the volume of a cylinder having radius 7 cm while its height is equal to diagonal of square of area 64 sq.cm.

- (d) (e)
-

53. An amount becomes twice when invested for 3 years at simple interest. What would be the interest received if Rs 5000 invested at same rate for 2 years at compound interest.(approx.)

- (a) Rs 3245
 - (b) Rs 4257
 - (c) Rs 3672
 - (d) Rs 3889
 - (e) Rs 4567
-

54. A work can be completed by 7 men or 10 women in 10 days. If the work is to be completed in 4 days then how many men will be required to assist 15 women?

- (a) 6
 - (b) 9
 - (c) 8
 - (d) 7
 - (e) None of these
-

55. Dinesh's monthly salary is 50% more than that of Chappu. Chappu's salary is 20% less than Guthi. Guthi earns 30% more than Rajesh. Salary of Dinesh is what percent more or less than that of Rajesh?

- (a) 50%
 - (b) 56%
 - (c) 54%
 - (d) 48%
 - (e) 62%
-

61. 2, 3, 7, 25, 121, ? What will come in the place of the question mark (?) in the following number series?

- (a) 719
 - (b) 721
 - (c) 723
 - (d) 725
 - (e) 726
-

62. 5, 19, 45, 95, ?, 387 What will come in the place of the question mark (?) in the following number series?

- (a) 187
 - (b) 189
 - (c) 191
 - (d) 193
 - (e) 195
-

63. 2, 8, 20, 56, 200, ? What will come in the place of the question mark (?) in the following number series?

- (a) 880
 - (b) 890
 - (c) 900
 - (d) 910
 - (e) 920
-

64. 32, 32, 16, 48, 12, ? What will come in the place of the question mark (?) in the following number series?

- (a) 60
 - (b) 55
 - (c) 72
 - (d) 66
 - (e) 54
-

65. 6, 10, 19, 27, 54, ? What will come in the place of the question mark (?) in the following number series?

- (a) 66
- (b) 68
- (c) 70

- (d) 72
 - (e) 74
-

66. 1, 0, 1, 16, 81, ?, 625 What will come in the place of the question mark (?) in the following number series?

- (a) 196
 - (b) 121
 - (c) 256
 - (d) 100
 - (e) 225
-

67. A certain amount was distributed among A, B and C in the ratio 1 : 3 : 5 but it was actually distributed in ratio 2 :

(no options)

68. A train crosses a man, who is running in the same direction of train at the speed of 2m/sec. in 10 seconds. The same train crosses a tunnel in 54 seconds. If speed of train is 72 km/h then what is the length of tunnel?

- (a) 850 m
 - (b) 800 m
 - (c) 900 m
 - (d) 750 m
 - (e) 650 m
-

69. Neeraj and Arun started a business by making investment in the ratio of 3 : 5. After four months, Arun withdraws one fifth of his initial investment. If total annual profit was Rs. 880, find profit share of Neeraj.

- (a) Rs. 480
 - (b) Rs. 360
 - (c) Rs. 420
 - (d) Rs. 520
 - (e) Rs. 320
-

70. A boat can travel with the speed of 17 kmph in upstream. If the speed of river is 3 kmph, then find the speed of boat in downstream in the same river.

- (a) 23 kmph
 - (b) 20 kmph
 - (c) 25 kmph
 - (d) 19 kmph
 - (e) 21 kmph
-

71. In the following question, four sentences are given which may or may not be grammatically and contextually correct. You need to find the one which has no error and mark that as your answer. If all the given sentences are correct/incorrect then mark option (E) i.e. ?all are correct/none is correct? as your answer.

- (a) The report said India?s growth decelerate for the second consecutive year.
 - (b) The fares are higher but there is hard any change in the running time.
 - (c) Also tickets are available only online which are contrary to the rule book.
 - (d) The train charges ?2,450 for AC Executive Class and ?1,565 for the AC Chair Car including GST and catering.
 - (e) None is correct
-

72. In the following question, four sentences are given which may or may not be grammatically and contextually correct. You need to find the one which has no error and mark that as your answer. If all the given sentences are correct/incorrect then mark option (E) i.e. ?all are correct/none is correct? as your answer.

- (a) We must know of what we speak when we speak of categories that allow us to challenge and remake our worlds.
 - (b) Tikri Kalan has a legal PVC market on DDA land who deals with scrap plastic.
 - (c) The party said strong steps need to taken to stop crime in the Capital.
 - (d) The law and order situation in Delhi is deterioration rapidly.
 - (e) None is correct
-

73. In the following question, four sentences are given which may or may not be grammatically and contextually correct. You need to find the one which has no error and mark that as your answer. If all the given sentences are correct/incorrect then mark option (E) i.e. ?all are correct/none is correct? as your answer.

- (a) Scrap plastic from these markets is take to the agricultural fields in Haryana and burnt there.
 - (b) It needs to be worked out how is the police is going to control crime when a large number of illegal immigrants are living here.
 - (c) Shyam Sundar, a tailor, believes that the BJP candidate will easily sail through as he had delivered on development work.
 - (d) The fires detected by satellites don?t give a clear picture of the stubble burning incidents.
 - (e) All are correct.
-

74. In the following question, four sentences are given which may or may not be grammatically and contextually correct. You need to find the one which has no error and mark that as your answer. If all the given sentences are correct/incorrect then mark option (E) i.e. ?all are correct/none is correct? as your answer.

- (a) The number of farm fires in Punjab at present is almost negligible.
 - (b) Clearing the trucks took time due to continuous landslides and shooting stones from hills overlooking the highway.
 - (c) The study found that exclusion due to Aadhaar linking is more prevalent in tribal areas.
 - (d) The protesters raised slogans against the Deputy CM and the State government for not draining out the water.
 - (e) All are correct
-

75. Pests are any organisms that are considered, from the (75) of humans, to be undesirable in some ecological context. For example, pests could be insects that compete with humans for some common resource, such as agricultural production or timber. Other pests might be (76) with diseases of humans, livestock, or agricultural plants. Pests could also be unwanted weeds that compete with agricultural plants for necessary resources. Or pests may merely have aesthetics that are viewed as undesirable, as is the case of weeds in a lawn. When pests are abundant enough to cause damage that is considered to be (77), the abundance of the pests may be managed in some way. For example, if wolves are considered to be an important predator of livestock or wild ungulates, they may be killed by shooting them or using poisons. The most important reason for plowing in agriculture is to reduce the (78) of weeds. Often pesticides are used, for example, to protect crops and livestock from diseases and depredations by fungi, insects, mites, nematodes, or rodents, to protect crop plants from competition with weeds, or to protect humans against the insect vectors of disease-causing pathogens. There are (79) benefits to humans of the use of most pest-management strategies. It is important to understand, however, that the very species that are considered pests may have desirable attributes in other contexts, or their values may at least be neutral. Therefore, whether an organism is viewed as a pest is entirely a matter of (80), and the criteria generally focus on the needs and perspectives of humans. In the following passage, there are blanks, each of which has been numbered. These numbers are printed below the passage and against each, four words are suggested, one of which fits the blank appropriately. Find out the appropriate word in each case.

- (a) Perspective
 - (b) Scenario
 - (c) Scenario
 - (d) Outrage
 - (e) None of these.
-

76. Pests are any organisms that are considered, from the (75) of humans, to be undesirable in some ecological context. For example, pests could be insects that compete with humans for some common resource, such as agricultural production or timber. Other pests might be (76) with diseases of humans, livestock, or agricultural plants. Pests could also be unwanted weeds that compete with agricultural plants for necessary resources. Or pests may merely have aesthetics that are viewed as undesirable, as is the case of weeds in a lawn. When pests are abundant enough to cause damage that is considered to be (77), the abundance of the pests may be managed in some way. For example, if wolves are considered to be an important predator of livestock or wild ungulates, they may be killed by shooting them or using poisons. The most important reason for plowing in agriculture is to reduce the (78) of weeds. Often pesticides are used, for example, to protect crops and livestock from diseases and depredations by fungi, insects, mites, nematodes, or rodents, to protect crop plants from competition with weeds, or to protect humans against the insect vectors of disease-causing pathogens. There are (79) benefits to humans of the use of most pest-management strategies. It is important to understand, however, that the very species that are considered pests may have desirable attributes in other contexts, or their values may at least be neutral. Therefore, whether an organism is viewed as a pest is entirely a matter of (80), and the criteria generally focus on the needs and perspectives of humans. In the following passage, there are blanks, each of which has been numbered. These numbers are printed below the passage and against each, four words are suggested, one of which fits the blank appropriately. Find out the appropriate word in each case.

- (c) Revived
- (d) Associated
- (e) None of these.

77. Pests are any organisms that are considered, from the (75) of humans, to be undesirable in some ecological context. For example, pests could be insects that compete with humans for some common resource, such as agricultural production or timber. Other pests might be (76) with diseases of humans, livestock, or agricultural plants. Pests could also be unwanted weeds that compete with agricultural plants for necessary resources. Or pests may merely have aesthetics that are viewed as undesirable, as is the case of weeds in a lawn. When pests are abundant enough to cause damage that is considered to be (77), the abundance of the pests may be managed in some way. For example, if wolves are considered to be an important predator of livestock or wild ungulates, they may be killed by shooting them or using poisons. The most important reason for plowing in agriculture is to reduce the (78) of weeds. Often pesticides are used, for example, to protect crops and livestock from diseases and depredations by fungi, insects, mites, nematodes, or rodents, to protect crop plants from competition with weeds, or to protect humans against the insect vectors of disease-causing pathogens. Therefore, whether an organism is viewed as a pest is entirely a matter of (80), and the criteria generally focus on the needs and perspectives of humans. In the following passage, there are blanks, each of which has been numbered. These numbers are printed below the passage and against each, four words are suggested, one of which fits the blank appropriately. Find out the appropriate word in each case.

- (a) Procurement
- (b) Evasion
- (c) Procurement
- (d) Evasion
- (e) None of these.

81. Which of the following statements support the current scenario regarding 5G technology in China? (i) A reasonable number of Chinese firms own Intellectual Property in 5G (ii) Huawei is one of the largest revenue generators among the Chinese firms in field of 5G. (iii) The Chinese President has spent huge resources and encouraged research for the development of this technology. Read the following passage and answer the following questions. Some words are highlighted to help you answer some of the questions. There was something pathetic about Union Communications Minister's wishful thinking as he addressed the Mobile Congress last month. He said his vision of 5G for the country was not just a rollout of services, but the creation of country's intellectual property (IP) and patents in 5G technology. This may be possible in a couple of decades, but right now we might as well be crying for the moon. While companies around the world, notably the Chinese, have secured thousands of patents in this revolutionary technology that will provide the platform for inventing a host of new products, technologies and services, the companies of Country ?X? are yet to start field trials of 5G spectrum for which permission was granted just recently. Equipment for these trials, needless to say, will be provided by foreign vendors. Most people assume that 5G will provide faster speeds than 4G ? which bypasses the hinterland and works only patchily in urban areas of country ?X? ? but that would be a gross simplification. 5G will empower the invention of thousands of new products, technologies and services, increase productivity and allow for new industries to emerge. A global 5G network will unify mobile communication and connect people and devices to everything through the Internet of Things. Given that 3G and 4G patent holders have controlled the use of mobile technologies in the smartphone industry, those who own the intellectual property (IP), primarily the SEPs or the standard essential patents, will become the market leaders in a technology that will reshape the future. Remember that companies here or anywhere will have to use SEPs when implementing standardised 5G technology. This means the clutch of companies that own these will rake in billions from licensing the SEPs. Country ?X? may be sending missions to the moon but in the area where technological prowess matters most the country stands nowhere. Not a single telecom firm from country ?X? is in the list of 303 deployment of 5G technology worldwide. This industry list has 20 operators in 294 locations. Worse, although the domestic firms are expected to start their three-month long trial shortly, it is worth remembering that the industry is in dire straits with huge debts and has indicated that it would be in no position to bid for 5G spectrum. Nor does Country ?X? has the kind of resources that President Xi Jinping is investing in 5G apart from the sharp research effort on it. No wonder Chinese firms command the lion's share of patents among the clutch of global firms that own IP in 5G. Its star performer Huawei, blacklisted by the Trump Administration, continues to surge ahead with revenues soaring by 23 per cent. Country ?X? has to decide if Huawei's with which the initial 5G sortie was made in a lab run is a security threat or not. Can Country ?X? ever catch up? (a) Both (i) and (ii) (b) Both (ii) and (iii) (c) Only (i) (d) All (i), (ii), (iii)

82. How the author has defined Country X's position in terms of development of 5G Technology? Read the following passage and answer the following questions. Some words are highlighted to help you answer some of the questions. There was something pathetic about Union Communications Minister's wishful thinking as he addressed the Mobile Congress last month. He said his vision of 5G for the country was not just a rollout of services, but the creation of country's intellectual property (IP) and patents in 5G technology. This may be possible in a couple of decades, but right now we might as well be crying for the moon. While companies around the world, notably the Chinese, have secured thousands of patents in this revolutionary technology that will provide the platform for inventing a host of new products, technologies and services, the companies of Country ?X? are yet to start field trials of 5G spectrum for which permission was granted just recently. Equipment for these trials, needless to say, will be provided by foreign vendors. Most people assume that 5G will provide faster speeds than 4G ? which bypasses the hinterland and works only patchily in urban areas of country ?X? ? but that would be a gross simplification. 5G will empower the invention of thousands of new products, technologies and services, increase productivity and allow for new industries to emerge. A global 5G network will unify mobile communication and connect people and devices to everything through the Internet of Things. Given that 3G and 4G patent holders have controlled the use of mobile technologies in the smartphone industry, those who own the intellectual property (IP), primarily the SEPs or the standard essential patents, will become the market leaders in a technology that will reshape the future. Remember that companies here or anywhere will have to use SEPs when implementing standardised 5G technology. This means the clutch of companies that own these will rake in billions from licensing the SEPs. Country ?X? may be sending missions to the moon but in the area where technological prowess matters most the country stands nowhere. Not a single telecom firm from country ?X? is in the list of 303 deployment of 5G technology worldwide. This industry list has 20 operators in 294 locations. Worse, although the domestic firms are expected to start their three-month long trial shortly, it is worth remembering that the industry is in dire straits with huge debts and has indicated that it would be in no position to bid for 5G spectrum. Nor does Country ?X? has the kind of resources that President Xi Jinping is investing in 5G apart from the sharp research effort on it. No wonder Chinese firms command the lion's share of patents among the clutch of global firms that own IP in 5G. Its star performer Huawei, blacklisted by the Trump Administration, continues to surge ahead with revenues soaring by 23 per cent. Country ?X? has to decide if Huawei's with which the initial 5G sortie was made in a lab run is a security threat or not. Can Country ?X? ever catch up? Field trials are just the starting point; it merely allows operators and equipment makers to prove that the network they have designed in a laboratory (a) is the only route to a commercial rollout. As Country ?X? obsesses about its technological expertise in a mythical past, the future is looking decidedly distant.

- (d) 5G technology introduced within country ?X? will offer host of features and give a boost to economy
- (e) none of these

83. What will be the benefits of introducing 5G technology in the countries? (A) Internet economy in world will help double each country's income (B) It will give a boost to development of new products and services (C) It will lead to enhanced efficiencies and new industries Read the following passage and answer the following questions. Some words are highlighted to help you answer some of the questions. There was something pathetic about Union Communications Minister's wishful thinking as he addressed the Mobile Congress last month. He said his vision of 5G for the country was not just a rollout of services, but the creation of country's intellectual property (IP) and patents in 5G technology. This may be possible in a couple of decades, but right now we might as well be crying for the moon . While companies around the world, notably the Chinese, have secured thousands of patents in this revolutionary technology that will provide the platform for inventing a host of new products, technologies and services, the companies of Country 'X' are yet to start field trials of 5G spectrum for which permission was granted just recently. Equipment for these trials, needless to say, will be provided by foreign vendors. Most people assume that 5G will provide faster speeds than 4G ? which bypasses the hinterland and works only patchily in urban areas of country 'X' ? but that would be a gross simplification. 5G will empower the invention of thousands of new products, technologies and services, increase productivity and allow for new industries to emerge. A global 5G network will unify mobile communication and connect people and devices to everything through the Internet of Things. Given that 3G and 4G patent holders have controlled the use of mobile technologies in the smartphone industry, those who own the intellectual property (IP), primarily the SEPs or the standard essential patents, will become the market leaders in a technology that will reshape the future. Remember that companies here or anywhere will have to use SEPs when implementing standardised 5G technology. This means the clutch of companies that own these will rake in billions from licensing the SEPs. Country 'X' may be sending missions to the moon but in the area where technological prowess matters most the country stands nowhere. Not a single telecom firm from country 'X' is in the list of 303 deployment of 5G technology worldwide. This industry list has 20 operators in 294 locations. Worse, although the domestic firms are expected to start their three-month long trial shortly, it is worth remembering that the industry is in dire straits with huge debts and has indicated that it would be in no position to bid for 5G spectrum. Nor does Country 'X' has the kind of resources that President Xi Jinping is investing in 5G apart from the sharp research effort on it. No wonder Chinese firms command the lion's share of patents among the clutch of global firms that own IP in 5G. Its star performer Huawei, blacklisted by the Trump Administration, continues to surge ahead with revenues soaring by 23 per cent. Country 'X' has to decide if Huawei's with which the initial 5G sortie was made in a lab run is a security threat or not. (a) Only Country 'X' ever catch up? Field trials are just the starting point; it merely allows operators and equipment makers to prove (b) that the network they have designed in a laboratory _____ (l) _____. Then there is the long haul to (c) commercial rollout. As Country 'X' obsesses about its technological expertise in a mythical past, the future is (d) looking decidedly dim.

(e) Only (C)

84. Which of the following phrase implies the correct meaning of the phrase 'Dire Straits', as highlighted in the above passage? Read the following passage and answer the following questions. Some words are highlighted to help you answer some of the questions. There was something pathetic about Union Communications Minister's wishful thinking as he addressed the Mobile Congress last month. He said his vision of 5G for the country was not just a rollout of services, but the creation of country's intellectual property (IP) and patents in 5G technology. This may be possible in a couple of decades, but right now we might as well be crying for the moon. While companies around the world, notably the Chinese, have secured thousands of patents in this revolutionary technology that will provide the platform for inventing a host of new products, technologies and services, the companies of Country 'X' are yet to start field trials of 5G spectrum for which permission was granted just recently. Equipment for these trials, needless to say, will be provided by foreign vendors. Most people assume that 5G will provide faster speeds than 4G which bypasses the hinterland and works only patchily in urban areas of country 'X' but that would be a gross simplification. 5G will empower the invention of thousands of new products, technologies and services, increase productivity and allow for new industries to emerge. A global 5G network will unify mobile communication and connect people and devices to everything through the Internet of Things. Given that 3G and 4G patent holders have controlled the use of mobile technologies in the smartphone industry, those who own the intellectual property (IP), primarily the SEPs or the standard essential patents, will become the market leaders in a technology that will reshape the future. Remember that companies here or anywhere will have to use SEPs when implementing standardised 5G technology. This means the clutch of companies that own these will rake in billions from licensing the SEPs. Country 'X' may be sending missions to the moon but in the area where technological prowess matters most the country stands nowhere. Not a single telecom firm from country 'X' is in the list of 303 deployment of 5G technology worldwide. This industry list has 20 operators in 294 locations. Worse, although the domestic firms are expected to start their three-month long trial shortly, it is worth remembering that the industry is in dire straits with huge debts and has indicated that it would be in no position to bid for 5G spectrum. Nor does Country 'X' has the kind of resources that President Xi Jinping is investing in 5G apart from the sharp research effort on it. No wonder Chinese firms command the lion's share of patents among the clutch of global firms that own IP in 5G. Its star performer Huawei, blacklisted by the Trump Administration, continues to surge ahead with revenues soaring by 23 per cent. Country 'X' has to decide if Huawei's with which the initial 5G sortie was made in a lab run is a security threat or not. Can Country 'X' ever catch up? Field trials are just the starting point; it merely allows operators and equipment makers to prove that the network they have designed in a laboratory is a workable one. Then there is the long haul to a commercial rollout. As Country 'X' obsesses about its technological expertise in a mythical past, the future is looking decidedly dim.

(a) a situation in which it is unknown what happened

(b) a situation in which it is unknown what happened

(c) a situation in which it is unknown what happened

(d) a situation in which it is unknown what happened

(e) none of these

85. Which of the following statements is true as per the information given in the passage? Read the following passage and answer the following questions. Some words are highlighted to help you answer some of the questions. There was something pathetic about Union Communications Minister's wishful thinking as he addressed the Mobile Congress last month. He said his vision of 5G for the country was not just a rollout of services, but the creation of country's intellectual property (IP) and patents in 5G technology. This may be possible in a couple of decades, but right now we might as well be crying for the moon. While companies around the world, notably the Chinese, have secured thousands of patents in this revolutionary technology that will provide the platform for inventing a host of new products, technologies and services, the companies of Country 'X' are yet to start field trials of 5G spectrum for which permission was granted just recently. Equipment for these trials, needless to say, will be provided by foreign vendors. Most people assume that 5G will provide faster speeds than 4G which bypasses the hinterland and works only patchily in urban areas of Country 'X' but that would be a gross simplification. 5G will empower the invention of thousands of new products, technologies and services, increase productivity and allow for new industries to emerge. A global 5G network will unify mobile communication and connect people and devices to everything through the Internet of Things. Given that 3G and 4G patent holders have controlled the use of mobile technologies in the smartphone industry, those who own the intellectual property (IP), primarily the SEPs or the standard essential patents, will become the market leaders in a technology that will reshape the future. Remember that companies here or anywhere will have to use SEPs when implementing standardised 5G technology. This means the clutch of companies that own these will rake in billions from licensing the SEPs. Country 'X' may be sending missions to the moon but in the area where technological prowess matters most the country stands nowhere. Not a single telecom firm from Country 'X' is in the list of 303 deployment of 5G technology worldwide. This industry list has 20 operators in 294 locations. Worse, although the domestic firms are expected to start their three-month long trial shortly, it is worth remembering that the industry is in dire straits with huge debts and has indicated that it would be in no position to bid for 5G spectrum. Nor does Country 'X' have the kind of resources that President Xi Jinping is investing in 5G apart from the sharp research effort on it. No wonder Chinese firms command the lion's share of patents among the clutch of global firms that own IP in 5G. Its star performer Huawei, blacklisted by the Trump Administration, continues to surge ahead with revenues soaring by 23 per cent. Country 'X' has to decide if Huawei, with which the initial 5G sortie was made in a lab run, is a security threat or not. Can Country 'X' ever catch up? Field trials are just the starting point; it merely allows operators and equipment makers to prove that the network they have designed in a laboratory _____ (I) _____. Then there is the long haul to mass commercial rollout. As Country 'X' observes about its technological expertise in a mythic past, the future is looking decidedly dim.

- (a) the future of technological expertise in Country 'X' appears to be bright
- (b) the Union Communications Minister expects introduction of 5G in Country 'X' to be largely rolling out of an innovative service
- (c) the future of technological expertise in Country 'X' appears to be bright
- (d) the Union Communications Minister expects introduction of 5G in Country 'X' to be largely rolling out of an innovative service
- (e) none of the given statements is true

86. Which of the following phrases can fill in the blank (I), to make the statement grammatically and contextually meaningful? Read the following passage and answer the following questions. Some words are highlighted to help you answer some of the questions. There was something pathetic about Union Communications Minister's wishful thinking as he addressed the Mobile Congress last month. He said his vision of 5G for the country was not just a rollout of services, but the creation of country's intellectual property (IP) and patents in 5G technology. This may be possible in a couple of decades, but right now we might as well be crying for the moon. While companies around the world, notably the Chinese, have secured thousands of patents in this revolutionary technology that will provide the platform for inventing a host of new products, technologies and services, the companies of Country 'X' are yet to start field trials of 5G spectrum for which permission was granted just recently. Equipment for these trials, needless to say, will be provided by foreign vendors. Most people assume that 5G will provide faster speeds than 4G which bypasses the hinterland and works only patchily in urban areas of country 'X' but that would be a gross simplification. 5G will empower the invention of thousands of new products, technologies and services, increase productivity and allow for new industries to emerge. A global 5G network will unify mobile communication and connect people and devices to everything through the Internet of Things. Given that 3G and 4G patent holders have controlled the use of mobile technologies in the smartphone industry, those who own the intellectual property (IP), primarily the SEPs or the standard essential patents, will become the market leaders in a technology that will reshape the future. Remember that companies here or anywhere will have to use SEPs when implementing standardised 5G technology. This means the clutch of companies that own these will rake in billions from licensing the SEPs. Country 'X' may be sending missions to the moon but in the area where technological prowess matters most the country stands nowhere. Not a single telecom firm from country 'X' is in the list of 303 deployment of 5G technology worldwide. This industry list has 20 operators in 294 locations. Worse, although the domestic firms are expected to start their three-month long trial shortly, it is worth remembering that the industry is in dire straits with huge debts and has indicated that it would be in no position to bid for 5G spectrum. Nor does Country 'X' has the kind of resources that President Xi Jinping is investing in 5G apart from the sharp research effort on it. No wonder Chinese firms command the lion's share of patents among the clutch of global firms that own IP in 5G. Its star performer Huawei, blacklisted by the Trump Administration, continues to surge ahead with revenues soaring by 23 per cent. Country 'X' has to decide if Huawei's initial 5G sortie was made in a lab run is a security threat or not. Can Country 'X' ever catch up? Field trials are just the starting point; it merely allows operators and equipment makers to prove that the network they have designed in a lab works. (I) Then there is the long haul to a commercial rollout. As Country 'X' obsesses about its technological expertise in a mythical past, the future is looking decidedly dim.

(a) actually works in practice
(b) actually works in practice
(c) actually works in practice
(d) actually works in practice
(e) prolongs wait and is dangerous

87. Which of the following words is the OPPOSITE of ? PATCHILY?, as highlighted in the above passage? Read the following passage and answer the following questions. Some words are highlighted to help you answer some of the questions. There was something pathetic about Union Communications Minister's wishful thinking as he addressed the Mobile Congress last month. He said his vision of 5G for the country was not just a rollout of services, but the creation of country's intellectual property (IP) and patents in 5G technology. This may be possible in a couple of decades, but right now we might as well be crying for the moon . While companies around the world, notably the Chinese, have secured thousands of patents in this revolutionary technology that will provide the platform for inventing a host of new products, technologies and services, the companies of Country ?X? are yet to start field trials of 5G spectrum for which permission was granted just recently. Equipment for these trials, needless to say, will be provided by foreign vendors. Most people assume that 5G will provide faster speeds than 4G ? which bypasses the hinterland and works only patchily in urban areas of country ?X? ? but that would be a gross simplification. 5G will empower the invention of thousands of new products, technologies and services, increase productivity and allow for new industries to emerge. A global 5G network will unify mobile communication and connect people and devices to everything through the Internet of Things. Given that 3G and 4G patent holders have controlled the use of mobile technologies in the smartphone industry, those who own the intellectual property (IP), primarily the SEPs or the standard essential patents, will become the market leaders in a technology that will reshape the future. Remember that companies here or anywhere will have to use SEPs when implementing standardised 5G technology. This means the clutch of companies that own these will rake in billions from licensing the SEPs. Country ?X? may be sending missions to the moon but in the area where technological prowess matters most the country stands nowhere. Not a single telecom firm from country ?X? is in the list of 303 deployment of 5G technology worldwide. This industry list has 20 operators in 294 locations. Worse, although the domestic firms are expected to start their three-month long trial shortly, it is worth remembering that the industry is in dire straits with huge debts and has indicated that it would be in no position to bid for 5G spectrum. Nor does Country ?X? has the kind of resources that President Xi Jinping is investing in 5G apart from the sharp research effort on it. No wonder Chinese firms command the lion's share of patents among the clutch of global firms that own IP in 5G. Its star performer Huawei, blacklisted by the Trump Administration, continues to surge ahead with revenues soaring by 23 per cent. Country ?X? has to decide if Huawei's with which the initial 5G sortie was made in a lab run is a security threat or not. Can Country ?X? ever catch up? Field trials are just the starting point, merely allows operators and equipment makers to prove that the network they have designed in a laboratory is _____ (I) _____. Then there is the long haul to a commercial rollout. As Country ?X? obsesses about its technological expertise in a mythical past, the future is looking decidedly dim.

(a) irregularly
 (b) sporadically
 (c) consistently
 (d) spottily
 (e) intermittently

88. Which of the following phrases implies similar meaning as 'crying for the moon', as highlighted in the above passage? Read the following passage and answer the following questions. Some words are highlighted to help you answer some of the questions. There was something pathetic about Union Communications Minister's wishful thinking as he addressed the Mobile Congress last month. He said his vision of 5G for the country was not just a rollout of services, but the creation of country's intellectual property (IP) and patents in 5G technology. This may be possible in a couple of decades, but right now we might as well be crying for the moon. While companies around the world, notably the Chinese, have secured thousands of patents in this revolutionary technology that will provide the platform for inventing a host of new products, technologies and services, the companies of Country 'X' are yet to start field trials of 5G spectrum for which permission was granted just recently. Equipment for these trials, needless to say, will be provided by foreign vendors. Most people assume that 5G will provide faster speeds than 4G which bypasses the hinterland and works only patchily in urban areas of country 'X' but that would be a gross simplification. 5G will empower the invention of thousands of new products, technologies and services, increase productivity and allow for new industries to emerge. A global 5G network will unify mobile communication and connect people and devices to everything through the Internet of Things. Given that 3G and 4G patent holders have controlled the use of mobile technologies in the smartphone industry, those who own the intellectual property (IP), primarily the SEPs or the standard essential patents, will become the market leaders in a technology that will reshape the future. Remember that companies here or anywhere will have to use SEPs when implementing standardised 5G technology. This means the clutch of companies that own these will rake in billions from licensing the SEPs. Country 'X' may be sending missions to the moon but in the area where technological prowess matters most the country stands nowhere. Not a single telecom firm from country 'X' is in the list of 303 deployment of 5G technology worldwide. This industry list has 20 operators in 294 locations. Worse, although the domestic firms are expected to start their three-month long trial shortly, it is worth remembering that the industry is in dire straits with huge debts and has indicated that it would be in no position to bid for 5G spectrum. Nor does Country 'X' has the kind of resources that President Xi Jinping is investing in 5G apart from the sharp research effort on it. No wonder Chinese firms command the lion's share of patents among the clutch of global firms that own IP in 5G. Its star performer Huawei, blacklisted by the Trump Administration, continues to surge ahead with revenues soaring by 23 per cent. Country 'X' has to decide if Huawei's with which the initial 5G sortie was made in a lab run is a security threat or not. Can Country 'X' ever catch up? Field trials are just the starting point; it merely allows operators and equipment makers to prove that the network they have designed in a laboratory overshadow (I) silence someone or something. The long haul to a commercial rollout. As Country 'X' obsesses about its technological expertise in a mythical past, the future is looking decidedly dim.

(a) To make an impractical or unreasonable request

(b) To make an impractical or unreasonable request

(c) To make an impractical or unreasonable request

(d) To make an impractical or unreasonable request

(e) A critical need for someone or something

89. These doomsday cults have fibbed so many times that no one even listens to them anymore. (I) caught between two stools (II) broken the ice (III) cried wolf In each of the questions given below, a word has been highlighted. Each statement is then followed by five options with possible replacements of the highlighted word. Choose the phrase which successfully replaces the highlighted word without altering the grammatical structure and meaning of the statement.

(a) Only (II)

(b) Only (III)

(c) Only (I)

(d) Only (I) and (II)

(e) All (I) (II) and (III)

90. He says he'll quit his job, but we know that's just pretence. (I) alpha and omega (II) an iron hand (III) an eyewash In each of the questions given below, a word has been highlighted. Each statement is then followed by five options with possible replacements of the highlighted word. Choose the phrase which successfully replaces the highlighted word without altering the grammatical structure and meaning of the statement.

(a) Only (II)

(b) Only (III)

(c) Only (I)

(d) Only (I) and (II)

(e) All (I) (II) and (III)

91. Other television station announcers had been circumlocutory in declaring the result. (I) Beating around the bush (II) making the matter worse (III) getting something out of your system In each of the questions given below, a word has been highlighted. Each statement is then followed by five options with possible replacements of the highlighted word. Choose the phrase which successfully replaces the highlighted word without altering the grammatical structure and meaning of the statement.

- (a) Only (II)
 - (b) Only (III)
 - (c) Only (I)
 - (d) Only (I) and (II)
 - (e) All (I) (II) and (III)
-

92. She'd purchase her expensive jewelry promptly and worry about how she would pay for it later. (I) at large (II) at the drop of a hat (III) dime a dozen In each of the questions given below, a word has been highlighted. Each statement is then followed by five options with possible replacements of the highlighted word. Choose the phrase which successfully replaces the highlighted word without altering the grammatical structure and meaning of the statement.

- (a) Only (II)
 - (b) Only (III)
 - (c) Only (I)
 - (d) Only (I) and (II)
 - (e) All (I) (II) and (III)
-

93. The days of big-time racing at the local velodrome had gone permanently. (I) alpha and omega (II) once and for all (III) for good In each of the questions given below, a word has been highlighted. Each statement is then followed by five options with possible replacements of the highlighted word. Choose the phrase which successfully replaces the highlighted word without altering the grammatical structure and meaning of the statement.

- (a) Only (II)
 - (b) Only (III)
 - (c) Only (I)
 - (d) Only (II) and (III)
 - (e) All (I) (II) and (III)
-

94. The protesters _____ slogans against the Deputy Chief Minister and the State government for not draining out the water. (A) raised (B) shouted (C) chanted In the following question a sentence is given with a blank followed by three words. Choose among the following option which reflects the most suitable word(s) that can be filled in the blank.

- (a) Only (A)
 - (b) Only (B)
 - (c) Only (C)
 - (d) Only (A) and (B)
 - (e) All (A) (B) and (C)
-

95. Chief Minister Nitish Kumar has called a review meeting on Monday to _____ waterlogging issues. (A) tackle (B) discuss (C) redeem In the following question a sentence is given with a blank followed by three words. Choose among the following option which reflects the most suitable word(s) that can be filled in the blank.

- (a) Only (A)
 - (b) Only (B)
 - (c) Only (C)
 - (d) Only (A) and (B)
 - (e) Only (A) and (C)
-

96. The Commission had recently launched 'Jeevan Kaushal', a life skills programme in the _____ for undergraduate courses across the country. (A) preponderance (B) curriculum (C) modules In the following question a sentence is given with a blank followed by three words. Choose among the following option which reflects the most suitable word(s) that can be filled in the blank.

- (a) Only (A)
- (b) Only (B)
- (c) Only (C)

- (d) Only (A) and (B)
 - (e) Only (B) and (C)
-

97. The Odisha government issued show-cause notice to the Sundargarh Collector and the suspended in-charge CDMO for their _____ negligence in implementing 'Mo Sarkar' healthcare initiative. (A) Alleged (B) Purported (C) Ostensible

In the following question a sentence is given with a blank followed by three words. Choose among the following option which reflects the most suitable word(s) that can be filled in the blank.

- (a) Only (A)
 - (b) Only (B)
 - (c) Only (C)
 - (d) Only (A) and (B)
 - (e) All (A) (B) and (C)
-

98. The services that were provided in the Sundargarh district did not _____ to the quality standards prescribed under the government initiative. (A) Conform (B) Comply (C) Meet

In the following question a sentence is given with a blank followed by three words. Choose among the following option which reflects the most suitable word(s) that can be filled in the blank.

- (a) Only (A)
 - (b) Only (B)
 - (c) Only (C)
 - (d) Only (A) and (B)
 - (e) Only (A) and (C)
-

99. In an attempt to discourage the use of plastic, the city corporation is _____ a cup of tea in exchange for four plastic bottles at the canteens. (A) Offering (B) Serving (C) Pouring

In the following question a sentence is given with a blank followed by three words. Choose among the following option which reflects the most suitable word(s) that can be filled in the blank.

- (a) Only (A)
 - (b) Only (B)
 - (c) Only (C)
 - (d) Only (A) and (B)
 - (e) All (A) (B) and (C)
-

100. The Indian government should now be _____ to raise more tax revenues. (A) Desperate (B) Apologetic (C) Itching

In the following question a sentence is given with a blank followed by three words. Choose among the following option which reflects the most suitable word(s) that can be filled in the blank.

- (a) Only (A)
 - (b) Only (B)
 - (c) Only (C)
 - (d) Only (A) and (B)
 - (e) Only (A) and (C)
-
