IBPS RRB Prelims 2025 Shift_1

63 questions

Read the given instructions carefully and answer the related question: Seven boxes J, K, L, M, N, O, P are placed one above the other in a stack, but not in same order as given. Box K is placed three boxes above box P. Box L is placed immediately above box K. Number of boxes placed above box L is same as the number of boxes placed below box N. Three boxes are placed between box M and box O. Box M is not placed at second position from the bottom.

1. How many boxes are placed between box J and box K?

- (a) One
- (b) Two
- (c) Three
- (d) Four
- (e) None

2. Which box is placed immediately above box P?

- (a) Box L
- (b) Box M
- (c) Box N
- (d) Box J
- (e) Box O

3. If box M is interchanged with box K, then how many boxes are placed below box M?

- (a) None
- (b) Four
- (c) Three
- (d) Two
- (e) One

4. If all the boxes are arranged in alphabetical order from bottom to top, then how many boxes will remain same on their position?

- (a) Two
- (b) Three
- (c) One
- (d) None
- (e) Four

5. Which of the following statement is correct?

- (a) Box P is not placed at bottommost position
- (b) Three boxes are placed above box N
- (c) Box O is placed below box P
- (d) One box is placed between box J and box L
- (e) All are correct

6. If we form a four-letter meaningful word by using the first, third, sixth and eighth letter from the left end of the word ?FRAGMENT, then which of the following will be the second letter from left of the meaningful word thus formed. If more than one word is formed mark Z as your answer. If no meaningful word is formed, mark X as your answer?

- (a) F
- (b) T
- (c) E
- (d) Z
- (e) X

In this question, the relationship between different elements is shown in the statements. The statements are followed by two conclusions. Study the conclusions based on the given statements and select the appropriate answer:

7. Statements: $M = T$? $K < P < Q < V$ Conclusions: I. $K > V$ II. $M ? Q$

- (a) If only conclusion I is true
 - (b) If only conclusion II is true
 - (c) If either conclusion I or II is true
 - (d) If both conclusions I and II are true
 - (e) If neither conclusion I nor II is true
-

8. Statements: $W ? E < S < Y ? N = A$ Conclusions: I. $N > E$ II. $S ? A$

- (a) If only conclusion I is true
 - (b) If only conclusion II is true
 - (c) If either conclusion I or II is true
 - (d) If both conclusions I and II are true
 - (e) If neither conclusion I nor II is true
-

9. Statements: $G = J ? X < C < B < M$ Conclusions: I. $G > B$ II. $G ? B$

- (a) If only conclusion I is true
 - (b) If only conclusion II is true
 - (c) If either conclusion I or II is true
 - (d) If both conclusions I and II are true
 - (e) If neither conclusion I nor II is true
-

Read the given instructions carefully and answer the related question: From point P, Rohan walks 10 km towards the East to reach point Q, then takes a left turn and walks 14 km to reach point R. He then takes a right turn and walks 6 km to reach point S. After that, he takes another right turn and walks 11 km to reach point T. Finally, he takes a left turn and walks 9 km to reach point U.

10. In which direction is point T with respect to point Q?

- (a) North-east
 - (b) North
 - (c) South-west
 - (d) South-east
 - (e) West
-

11. What is the total distance covered by Rohan?

- (a) 35km
 - (b) 48km
 - (c) 50km
 - (d) 24km
 - (e) 40km
-

12. Which point is not in north-east of point Q?

- (a) Point S
 - (b) Point P
 - (c) None of these
 - (d) Point T
 - (e) Point U
-

Read the given instructions carefully and answer the related question: Seven persons P, Q, R, S, T, U and V play a game on different days of a week starting from Monday to Sunday. The information of persons is not used in same manner as given. Two persons play game before S. One person plays game between S and Q. R plays game three persons before P. T plays game before P but not on Thursday. V plays game on Sunday.

13. U plays game on which day?

- (a) Tuesday
- (b) Thursday
- (c) Saturday
- (d) Monday
- (e) Friday

14. If all the persons play game in alphabetical order from Monday to Sunday, then how many persons will remain same on their position?

- (a) Four
 - (b) Three
 - (c) One
 - (d) Two
 - (e) None
-

15. Which of the following statement is correct? I. T plays game on Tuesday II. One person lays game between R and S III. Q plays game after U

- (a) Only I
 - (b) Only II
 - (c) Only I and II
 - (d) Only III
 - (e) Only II and III
-

16. Who among the following plays game on Monday?

- (a) R
 - (b) U
 - (c) T
 - (d) P
 - (e) Q
-

17. If R is related to S, in the similar way P is related to U, then who among the following is related to Q?

- (a) T
 - (b) S
 - (c) R
 - (d) P
 - (e) U
-

Read the given instructions carefully and answer the related question: Six persons J, K, L, M, N, P are of different weight but not in same order as given. M is heavier than K but lighter than J. P is heavier than L but lighter than K. Weight of second heaviest person is 80kg. Only one person is heavier than N.

18. Who among the following is third lightest person?

- (a) P
 - (b) L
 - (c) M
 - (d) J
 - (e) K
-

19. If K's weight is 72 kg, then what could be the possible weight of M?

- (a) 84kg
 - (b) 82kg
 - (c) 70kg
 - (d) 75kg
 - (e) 71kg
-

20. How many persons are heavier than P?

- (a) Three
 - (b) Four
 - (c) Two
 - (d) One
 - (e) Five
-

Study the following series carefully and answer the questions given below. O 7 % R K 3 @ E 9 T # S 5 \$ A P 1 ! U 8 ^ M Q 4 & N 6 Z

21. Which element is sixth to the right of the element which is fourth from the left end?

- (a) @
 - (b) 9
 - (c) T
 - (d) E
 - (e) #
-

22. How many vowels are immediately preceded by symbol and immediately followed by digit in the given series?

- (a) Three
 - (b) Four
 - (c) One
 - (d) Two
 - (e) None of these
-

23. If last five elements are dropped from the series, which element will be ninth from right end?

- (a) A
 - (b) !
 - (c) P
 - (d) S
 - (e) \$
-

24. Which element is sixth to the left of the fifth digit from the right end?

- (a) E
 - (b) @
 - (c) R
 - (d) K
 - (e) 7
-

25. How many letters in the series are immediately preceded by a digit and immediately followed by a digit?

- (a) One
 - (b) Two
 - (c) Three
 - (d) Four
 - (e) None
-

31. If the digits of the number ?589421367? are arranged in ascending order from left to right, the position of how many digits remain unchanged?

- (a) Three
 - (b) Four
 - (c) One
 - (d) Two
 - (e) None of these
-

In each question below, some statements are given followed by two conclusions numbered I and II. You have to take the given statements to be true even if they seem to be at variance with commonly known facts. Read all the conclusions and then decide which of the given conclusions logically follows from the given statements, disregarding commonly known facts.

32. Statements: Only a few artists are creative All painters are creative Conclusions: I. Some artists are painters II. Some artists are not creative

- (a) If only conclusion I follows
 - (b) If only conclusion II follows
 - (c) If either conclusion I or II follows
 - (d) If neither conclusion I nor II follows
 - (e) If both conclusions I and II follow
-

33. Statements: Only a few remote are devices. Some devices are portable. Conclusions: I. Some remote are portable
II. No remote are portable
- (a) If only conclusion I follows
 - (b) If only conclusion II follows
 - (c) If either conclusion I or II follows
 - (d) If neither conclusion I nor II follows
 - (e) If both conclusions I and II follow
-

34. Statements: All apples are mango No apples is berry Conclusions: I. Some mango are not berry II. All mango being berry is a possibility
- (a) If only conclusion I follows
 - (b) If only conclusion II follows
 - (c) If either conclusion I or II follows
 - (d) If neither conclusion I nor II follows
 - (e) If both conclusions I and II follow
-

35. In the word ?IMAGINED? each vowel is changed to its immediately succeeding letter in the English alphabet and each consonant is changed to its immediately preceding letter. After the changes, how many vowels are there in the newly formed word?
- (a) None
 - (b) One
 - (c) Two
 - (d) Three
 - (e) Four
-

Read the given information carefully and answer the related questions. Eight persons A, B, C, D, E, F, G and H sit around a square-shaped table in such a way that four persons sit at each corner facing outside and four persons sit at the middle of each side facing inside. B sits third to the right of E. Two persons sit between B and D. H sits immediate right of D. One person sits between H and C. C and D are not immediate neighbours. F sits three places away from

36. Four of the following five are alike in a certain way and thus form a group. Find the one which does not belong to the group.
- (a) B?H
 - (b) A?F
 - (c) D?G
 - (d) E?F
 - (e) A-C
-

37. Who sits fifth to the right of A?
- (a) G
 - (b) B
 - (c) D
 - (d) H
 - (e) E
-

38. How many persons sit between E and D when counted clockwise from D?
- (a) One
 - (b) Two
 - (c) Three
 - (d) Four
 - (e) Five
-

39. If H is related to C and in the same way F is related to G then who is related to D?
- (a) A
 - (b) E
 - (c) C
 - (d) G

(e) F

The table shows the number of workshops (science, economics, social science) attended by four students. Read the table to answer the following questions. Student Science Economic Social science A B C D

41. Find the ratio of science workshops attended by A to Economics workshop attended by C.

- (a) 17:15
 - (b) 12:17
 - (c) 13:11
 - (d) 14:13
 - (e) 15:11
-

42. Find the average number of science workshops attended by A, B and C.

- (a) 110
 - (b) 120
 - (c) 130
 - (d) 140
 - (e) 150
-

43. Find the economics workshops attended by C and D together is what percentage more than the social science workshop attended by A.

- (a) 100
 - (b) 120
 - (c) 130
 - (d) 140
 - (e) 150
-

44. If E attended 25% more economic workshop than that of A. find the difference between economics workshops attended by E and social science workshop attended by B.

- (a) 110
 - (b) 120
 - (c) 130
 - (d) 140
 - (e) 150
-

45. The ratio of science to mathematics workshops attended by C is 3:1, then find the mathematic workshop attended by C is what percentage of social science workshops attended by D.

- (a) 41.67
 - (b) 12.67
 - (c) 33.12
 - (d) 45
 - (e) 49
-

51. A train crosses a vertical pole in 25 seconds while moving at a speed of 72 km/h. If the speed of the train is increased by 18 km/h, find how much less time (in seconds) it will take to cross the same pole.

- (a) 4
 - (b) 5
 - (c) 9
 - (d) 7
 - (e) 12
-

52. A shopkeeper marks an article 40% above its cost price and allows a 20% discount on the marked price. Find the profit percentage earned by the shopkeeper.

- (a) 12%
- (b) 10%
- (c) 15%
- (d) 20%

(e) 18%

53. The ratio of the present ages of Dimpi and Kajal is 2 : 3. The sum of Dimpi's age three years ago and Kajal's age five years hence is 52 years. Find the present age (in years) of Dimpi.

- (a) 25
 - (b) 15
 - (c) 12
 - (d) 20
 - (e) 10
-

54. Tanmay and Ajay started a business with investments of Rs. 5600 and Rs. 4200 respectively. At the end of the year, Tanmay's share of the profit is Rs. 8400. Find the total profit (in Rs) earned by the business.

- (a) 16300
 - (b) 19200
 - (c) 15400
 - (d) 14200
 - (e) 14700
-

55. The weight of A is 200 kg. The weight of B is 25% more than that of C, and the weight of C is 20% more than that of A. Find the sum of the weights (in kg) of A, B, and C.

- (a) 800
 - (b) 770
 - (c) 740
 - (d) 630
 - (e) 690
-

56. The ratio of milk to water in a vessel is

(no options)

57. The length of a rectangle is 8 cm more than its breadth. If the perimeter of the rectangle is 40 cm, find the area of the rectangle (in cm²).

- (a) 84
 - (b) 90
 - (c) 72
 - (d) 68
 - (e) 80
-

58. A man invested Rs P at 20% per annum simple interest for 6 years and earned an interest of Rs 2880. Find the value of P ?

(no options)

59. A number is increased by 40%, and the same number is then decreased by 80%. If the difference between the two results is 360, find the original number.

- (a) 400
 - (b) 100
 - (c) 200
 - (d) 300
 - (e) 250
-

60. A boat can travel 24 km downstream in 3 hours and the same distance upstream in 6 hours. Find the speed of the boat in still water (in km/hr).

- (a) 4
 - (b) 6
 - (c) 5
 - (d) 7
 - (e) 8
-

In each of these questions a number series is given. In each series only one number is wrong. Find out the wrong number.

61. 7, 14, 28, 52, 112,

- (a) 7
 - (b) 52
 - (c) 28
 - (d) 224
 - (e) 112
-

62. 141, 129, 112, 105, 93, 81, 69

- (a) 105
 - (b) 112
 - (c) 93
 - (d) 81
 - (e) 69
-

63. 50, 51, 57, 70, 94, 131, 186

- (a) 51
 - (b) 57
 - (c) 131
 - (d) 186
 - (e) 50
-

64. 212, 228, 253, 289, 338, 400, 483

- (a) 400
 - (b) 212
 - (c) 228
 - (d) 289
 - (e) 483
-

65. 2, 3, 6, 22, 89, 446,

- (a) 2
 - (b) 6
 - (c) 3
 - (d) 89
 - (e) 22
-

What should come in place of question mark (?) in the following questions? 2 % ?? 5 + 37

68. $(444 \div 4) + (625 \div 25) + (2991 \div 3) = ?$

- (a) 1153
 - (b) 1143
 - (c) 1113
 - (d) 1123
 - (e) 1133×7
-

70. $(?7921 ? ?2197 \ 4 = ?$

- (a) 20
 - (b) 19
 - (c) 18
 - (d) 17
 - (e) $16 \ 3 \% ?? \ 153 + 58$
-

71. $266 \ 3 \% 300 = ?$

- (a) 583
- (b) 493
- (c) 575

(d) 543

(e) 549

73. 25% of 124 + 35% of 60 = ?

(a) 52

(b) 57

(c) 62

(d) 67

(e) 72

74. $8557 + 1723 \times 1231 \div 7321 = (?)^3$

(a) 11

(b) 12

(c) 13

(d) 14

(e) 15

75. $(?)^2 = 39 \times 1323 \div$

(a) 19

(b) 21

(c) 24

(d) 27

(e) 18

77. $(98)^2 + (?) = (150)^2 \div (80)^2 \div 737$

(a) 6084

(b) 5759

(c) 5777

(d) 6724

(e) 5658

78. $48 + 8 \times 0.75 \div 5 = ?$

(a) 22

(b) 36

(c) 49

(d) 56

(e) 46

79. $18.657 \div 7.549 \div 4.111 \div 1.630 = ?$

(a) 4.673

(b) 6.893

(c) 6.562

(d) 5.367

(e) 6.367
