

Read the given passage carefully and answer the following questions. Certain parts have been highlighted to help answer the questions. Meanwhile, the impact of mosquitoes carrying these new genes remains largely unknown. One significant worry is that a new breed of mosquito might emerge that is more difficult to control. These new genes could also potentially alter evolutionary pressures on viruses carried by mosquitoes, like dengue fever, in unpredictable ways. This includes potentially increasing their virulence or changing their host-insect interactions. These are hypothetical risks that have been raised by scientists, and reflect the need for further study. Every year, around one million people die of mosquito-borne diseases according to the World Health Organization (WHO). This is why mosquitoes are considered one of the deadliest living creatures on the planet ? not because they are lethal themselves, but because many of the viruses and parasites they transmit are. In the absence of an effective vaccine for dengue fever, Zika fever, chikungunya and other mosquito-borne diseases, researchers have developed genetic strategies to reduce mosquito populations. One such strategy involves the release into the wild of genetically modified (GM) mosquitoes that express a lethal gene ? a strategy believed to have little impact on the overall DNA of wild populations of mosquitoes. The transfer of new genes from GM organisms to wild or domesticated non-GM populations is a key criticism of GM crops like soybean and corn. There are concerns that the introduction of GM genes into non-target species could have negative consequences for both human and environmental health. Oxitec, a company that spun out of research at Oxford University in the early 2000s, developed and trademarked GM Friendly? mosquitoes (also known as strain OX513A of *Aedes aegypti*). These male GM mosquitoes have what the company describes as a ?self-limiting? gene, which means that when these so-called friendly mosquitoes? mate, their offspring inherit the self-limiting gene which is supposed to prevent them surviving into adulthood. In theory, when these mosquitoes are released in high numbers, a dramatic reduction in the mosquito population should follow. According to research published by Oxitec researchers in 2015, field trials involving recurring releases of Friendly? mosquitoes demonstrated a reduction of nearly 95 per cent of target populations in Brazil. In these field trials, experiments were not performed to assess whether GM mosquitoes might persist in the wild. A recent study from the Powell lab at Yale University has since confirmed that some of the offspring of the GM mosquitoes didn't survive to the point of releasing their gene and so died before adulthood. They were able to breed with native mosquitoes and the ability to transmit life-threatening diseases to the wild population.

71. Why are mosquitoes considered as one of the deadliest living creatures on earth?
- (a) They are the source of several genes and survive for a long time.
 - (b) Mosquito bites cause fatal reactions in human beings
 - (c) Mosquitoes cannot be killed easily
 - (d) Both
72. What is one of the methods being developed to control population of mosquitoes?
- (a) Spraying of pesticides using established procedures.
 - (b) Introduction of a lethal gene into wild populations of mosquitoes using genetically modified ones.
 - (c) Not letting any stagnant water build-up near homes
 - (d) Both
73. What can be the potential side effect(s) of genetically modified mosquito offspring?
- (a) Evolution of a breed of mosquitoes which are more difficult to control
 - (b) Increase in the severity of diseases being currently transmitted by mosquitoes.
 - (c) Change in host-insect interactions.
 - (d) Loss of natural populations of mosquitoes
 - (e) (a),
74. Which of the statements can be considered as true with respect to the passage given?
- (a) Field trials on Genetically modified mosquitoes showed reduction of 96% target populations.
 - (b) Oxitec trademarked the GM Friendly mosquitoes in 2015.
 - (c) The female GM mosquito has a self-limiting gene
 - (d) Both
75. What is the desired effect of releasing GM mosquitoes containing the ?Self-limiting Gene??
- (a) A substantial reduction in the population of mosquitoes.
 - (b) Birth of mosquitoes without a biting mechanism

- (c) Decrease in the number of diseases caused due to mosquitoes
 - (d) Increase in the number of male mosquitoes.
 - (e) Both
-

76. Which of the following word is similar to deadliest as mentioned in the passage given?

- (a) fatal
 - (b) demeaning
 - (c) fulfil
 - (d) harmless
 - (e) None of the above
-

77. Which of the statements can be considered as true with respect to the passage given??

- (a) GM mosquitoes are able to introduce some of their genes into the wild population.
 - (b) Mosquitoes having GM genes have been thoroughly researched upon.
 - (c) Oxitec released its friendly mosquitoes in Brazil
-

A word has been given in each question and has been used in the sentences given below. Identify the statements where the word has been used in a contextually and grammatically correct manner. If the word has been used correctly in all the statements, mark (e), ?All of these?, as your answer.

78. HOSTILE (i) He made hostile efficiency a key part of his budget plan. (ii) There has been a hostile reaction to the government's proposed tax increase. (iii) The security forces exercised great restraint by not responding to hostile attacks and threats.

- (a) Only (i)
 - (b) Both (i) and (ii)
 - (c) Both (ii) and (iii)
 - (d) Only (iii)
 - (e) All of these
-

79. VAGUE (i) The judges determined that the law was too vague to be fairly enforced. (ii) The merger of these two companies would vague the world's biggest accounting firm (iii) The president had a vague reception in Ohio this morning.

- (a) Only (i)
 - (b) Both (i) and (ii)
 - (c) Both (ii) and (iii)
 - (d) Only (iii)
 - (e) All of these
-

80. ESCALATE (i) The pedestrian was jaywalking when he escalate the busy street, walking straight into the path of an oncoming vehicle. (ii) We've tried to escalate the most likely problems, but it's impossible to be prepared for every eventuality. (iii) The decision to escalate UN involvement has been made in the hopes of a swift end to the hostilities.

- (a) Only (i)
 - (b) Both (i) and (ii)
 - (c) Both (ii) and (iii)
 - (d) Only (iii)
 - (e) All of these
-

In the following questions, a sentence is divided into four parts consisting of a highlighted word in each part. Choose the option reflecting the word which is either misspelt or grammatically incorrect. If all the highlighted words are correct, choose option

86. The manager balanced (A) the strength (B) of his team against that of their opponent (C) and sighed. (D)

- (a) balanced
 - (b) strength
 - (c) opponent
 - (d) sighed
 - (e) All are correct
-

87. One evening Rohan prepared (A) a nice supper (B) and put it on low heat in the oven to keep it tepid (C) while his wife dressed. (D)

- (a) prepared
 - (b) supper
 - (c) tepid
 - (d) dressed
 - (e) All are correct
-

88. She was able to breathe (A) easier when she stood outside the massive(B) fortress (C) that sat on a clearing the size of two football (D) fields.

- (a) breathe
 - (b) massive
 - (c) fortress
 - (d) football
 - (e) All are correct
-

89. From time to time Jack would looking over(A) Mungo's shoulder, suggesting(B) tactics (C) which invariably proved disastrous.(D)

- (a) looking over
 - (b) suggesting
 - (c) tactics
 - (d) disastrous
 - (e) All are correct
-

90. Horrified (A) passengers saw Olive stumble (B) and fall of (C) a platform as an express roared (D) in.

- (a) Horrified
 - (b) stumble
 - (c) fall of
 - (d) roared
 - (e) All are correct
-

In the following questions, a grammatically correct and meaningful sentence is given which is divided into five parts, where the first part is fixed and highlighted, in the remaining parts of the sentence namely (A),(B),(C) and (D) You have to arrange the four parts to make a contextually and grammatically meaningful sentence. If no such rearrangement is possible mark

91. (A) the merger of Bharti Infratel (B) the world's second largest (C) and Indus Towers will create (D) tower company

- (a) CBDA
 - (b) ACBD
 - (c) DCAB
 - (d) No rearrangement is required
-

92. (A) upcoming visit to India (B) the long-awaited trade agreement (C) during US President Donald Trump's (D) appears to be off the table

- (a) DABC
 - (b) BDCA (C) CDAB
 - (d) ADCB
 - (e) No rearrangement required
-

93. (A) Leaders of the Railway Employees Organization (B) alleged that the government wants to (C) hand over the rail infrastructure (D) to the private operators for financial benefit

- (a) ADCB
 - (b) BACD
 - (c) CDBA
 - (d) DABC
 - (e) No rearrangement required
-

94. (A) China has not yet given (B) India the go-ahead to send an (C) to coronavirus hit Wuhan (D) aircraft with medical supplies

- (a) DACB
 - (b) ABDC
 - (c) CBDA
 - (d) BCDA
 - (e) No rearrangement is required
-

95. (A) mammals and birds move from (B) with a change in season, many (C) one country to another in search of food (D) and shelter, and for breeding

- (a) ACBD
 - (b) CADB
 - (c) DABC
 - (d) BACD
 - (e) No rearrangement is required
-

In the following passage there are blanks, each of which has been numbered. These numbers are printed below the passage and against each, five options are given. Find out the appropriate word which fits the blank appropriately. Bumblebees, among the most important pollinators, are in (96) _____. Fuzzy and buzzy, they excel at spreading pollen and fertilizing many types of wild flora, as well as crucial agricultural crops like tomatoes, blueberries, and squash. But their numbers are (97) _____. New research using a massive dataset found that the insects are far less common than they used to be; in North America, you are nearly 50 percent less likely to see a bumblebee in any given area than you were prior to 1974. Moreover, several once-common species have (98) _____ from many areas they were once found, becoming locally extinct in those places. For example, the rusty patched bumblebee, which used to flourish in Ontario, is no longer found in all of Canada?in the U.S., it's endangered. In a new paper published this week in the journal Science, researchers used a complex modeling process to (99) _____ that their (100) _____ is driven in large part by climate change. Specifically, the scientists found that in areas that have become hotter in the last generation, or have experienced more extreme temperature swings, bumblebees are less abundant. In Europe, they are 17 percent less plentiful than they were in the early 20th century. The scientists examined the abundance of 66 species across the two continents.

96. Select the word that fits blank (96).

- (a) extinct
 - (b) trouble
 - (c) dropped
 - (d) growth
 - (e) difficult
-

97. Select the word that fits blank (97).

- (a) increasing
 - (b) dripped
 - (c) removing
 - (d) dropping
 - (e) generating
-

98. Select the word that fits blank (98).

- (a) multiplied
 - (b) concerning
 - (c) disappeared
 - (d) certain
 - (e) vanish
-

99. Select the word that fits blank (99).

- (a) proposed
 - (b) recommending
 - (c) implying
 - (d) expresses
 - (e) suggest
-

100. Select the word that fits blank (100).

- (a) decline
 - (b) deteriorate
 - (c) rejection
 - (d) lessen
 - (e) reduced
-
