Read the given passage carefully and answer the following questions. Certain parts have been highlighted to help answer the questions. Over the last year, the World Health Organization (WHO) has been busy, in an effort, to calculate the global death toll from COVID-19. This effort, however, has India's health establishment up in arms. Globally from an estimated six million reported deaths, WHO now estimates these deaths to be closer to almost triple the number. India, deeply affected by successive COVID-19 waves, is not delighted with this revision. Several news reports have pointed at a significant gap in India's COVID-19 story ? significantly under-reported mortality figures. The unreleased WHO estimates have been prepared by leading global experts but have left India's health establishment perturbed, with its strong objections to these estimates. Why? Because as in these figures, India would have had close to four times the COVID-19 deaths reported ? a figure that varies highly from India's previously self-reported figures. This would make India's tally of COVID-19 deaths amongst the highest globally. Not surprisingly, India is in serious disagreement with the WHO-prepared COVID-19 mortality estimates. In fact, its continued objections have been holding back the Global WHO Report. The argument being made by India's health establishment through a public clarification is that this is an overestimation, and the methodology employed is incorrect. The new estimates also take into account formerly uncounted deaths, but also deaths resulting from the impact of COVID-19. For example, millions who could not access care, i.e., diagnosis or treatment due to COVID-19 restrictions or from COVID-19 cases overwhelming health services. The methodology for this estimation, led by global experts, is unlikely to be faulty. India's disagreements with the methodology can be easily addressed through consultation.

71. According to the passage, what does WHO's revised estimate of global death toll from Covid-19 entail?

- (a) Proper and timely vaccination is necessary to prevent more deaths from Covid-19
- (b) India had an insignificant number of deaths from Covid-19
- (c) The global death toll from Covid-19 is approximately eighteen million
- (d) In India, the main cause of deaths was lack of proper medical access
- (e) None of these

72. Which of the following is/are the inference(s) from WHO's estimate of India's Covid-19 death toll?

- (b) India is one of the nations having the highest number of Covid-19 death rate
- (c) India could have saved many lives if the medical structure was robust
- (d) All of these
- (e) None of these

73. What is India's response to WHO after the revision of the death toll?

- (a) In its counteraction, India denied the Global WHO report
- (b) India contends that WHO has exaggerated the Covid death toll
- (c) India does not accede to WHO's claim and says that the report is based on erroneous techniques
- (d) All of these
- (e) None of these

74. What is the variation in the WHO new estimate of Covid-19 death in India?
