

1. What is a heat wave? Read the passage to answer the following questions. Heat waves are often assessed by how frequent or intense they are, but vulnerability involves more than that. A key factor in the amount of harm heat waves cause is people's capacity to adapt with measures like cooling technology and the power to run it. It is found that while wealthy countries can buffer their risk by rapidly investing in measures to adapt to climate change, the poorest quarter of the world ? areas likely to be slower to adapt ? will face escalating heat risk. Heat waves are among the deadliest climate and weather-related disasters, and they can be destructive to crops, livestock and infrastructure. Currently, about 30% of the global population lives in areas where heat and humidity levels can be deadly on at least 20 days a year, studies show, and the risk is rising. Adaptation measures, such as cooling centers, home-cooling technology, urban planning and designs focused on reducing heat, can lower a population's heat exposure impact. However, a country's ability to implement adaptation measures generally depends on its financial resources, governance, culture and knowledge. Many developing countries struggle to provide basic services let alone protections from escalating disasters in a warmer future. It is estimated that the poorest quarter of the world lags the wealthiest in adapting to rising temperatures by about 15 years on average. This estimate is based on the pace of preparation and support for adaptation plans described in the U.N. Environment Program's Adaptation Gap Report. The actual lag will vary because of wealth _____, but that estimate provides a broad picture of the rising risks. Heat risk is up globally, but more in poor regions. Looking back over recent decades, there is found a 60% increase in heat wave days in the 2010s compared with the 1980s. We defined a heat wave as extreme daily temperatures above the 97th percentile for the area, for at least three consecutive days. It is also found that heat wave seasons were getting longer, with more frequent early- and late-season heat waves that can increase heat-related deaths. People's average heat wave exposure in the poorest quarter of the world during the 2010s was more than 40% greater than in the wealthiest quarter ? roughly 2.4 billion person- days of heat wave exposure per year compared with 1.7 billion. This heat wave risk in poor countries has often been overlooked by the developed world, in part because heat deaths aren't consistently tracked in many countries.
- (a) A period of temperature above 97 percent of the region's usual temperature that lasts at least three consecutive days.
(b) and
(c) A period which has seen consecutive occurrence of rapid and intense thunderstorms that produce heavy rain due to excessive heat in the region.
(d) Only
(e) All of these

2. Which of the following is the most appropriate theme of the given passage? Read the passage to answer the following questions. Heat waves are often assessed by how frequent or intense they are, but vulnerability involves more than that. A key factor in the amount of harm heat waves cause is people's capacity to adapt with measures like cooling technology and the power to run it. It is found that while wealthy countries can buffer their risk by rapidly investing in measures to adapt to climate change, the poorest quarter of the world ? areas likely to be slower to adapt ? will face escalating heat risk. Heat waves are among the deadliest climate and weather-related disasters, and they can be destructive to crops, livestock and infrastructure. Currently, about 30% of the global population lives in areas where heat and humidity levels can be deadly on at least 20 days a year, studies show, and the risk is rising. Adaptation measures, such as cooling centers, home-cooling technology, urban planning and designs focused on reducing heat, can lower a population's heat exposure impact. However, a country's ability to implement adaptation measures generally depends on its financial resources, governance, culture and knowledge. Many developing countries struggle to provide basic services let alone protections from escalating disasters in a warmer future. It is estimated that the poorest quarter of the world lags the wealthiest in adapting to rising temperatures by about 15 years on average. This estimate is based on the pace of preparation and support for adaptation plans described in the U.N. Environment Program's Adaptation Gap Report. The actual lag will vary because of wealth _____, but that estimate provides a broad picture of the rising risks. Heat risk is up globally, but more in poor regions. Looking back over recent decades, there is found a 60% increase in heat wave days in the 2010s compared with the 1980s. We defined a heat wave as extreme daily temperatures above the 97th percentile for the area, for at least three consecutive days. It is also found that heat wave seasons were getting longer, with more frequent early- and late-season heat waves that can increase heat-related deaths. People's average heat wave exposure in the poorest quarter of the world during the 2010s was more than 40% greater than in the wealthiest quarter ? roughly 2.4 billion person- days of heat wave exposure per year compared with 1.7 billion. This heat wave risk in poor countries has often been overlooked by the developed world, in part because heat deaths aren't consistently tracked in many countries.
- (a) The devastating impact of heat waves.

- (b) The inability of the age-old technologies to sustain and protect humanity from the heat waves.
 - (c) The inability of parts of the world to properly adapt to heat waves owing to a lack of resources.
 - (d) The efforts and measures of the global bodies to protect poor countries from chronic heat waves.
 - (e) None of these
-

3. What is the difference between wealthy and poor countries in managing heat waves? Read the passage to answer the following questions. Heat waves are often assessed by how frequent or intense they are, but vulnerability involves more than that. A key factor in the amount of harm heat waves cause is people's capacity to adapt with measures like cooling technology and the power to run it. It is found that while wealthy countries can buffer their risk by rapidly investing in measures to adapt to climate change, the poorest quarter of the world ? areas likely to be slower to adapt ? will face escalating heat risk. Heat waves are among the deadliest climate and weather-related disasters, and they can be destructive to crops, livestock and infrastructure. Currently, about 30% of the global population lives in areas where heat and humidity levels can be deadly on at least 20 days a year, studies show, and the risk is rising. Adaptation measures, such as cooling centers, home-cooling technology, urban planning and designs focused on reducing heat, can lower a population's heat exposure impact. However, a country's ability to implement adaptation measures generally depends on its financial resources, governance, culture and knowledge. Many developing countries struggle to provide basic services let alone protections from escalating disasters in a warmer future. It is estimated that the poorest quarter of the world lags the wealthiest in adapting to rising temperatures by about 15 years on average. This estimate is based on the pace of preparation and support for adaptation plans described in the U.N. Environment Program's Adaptation Gap Report. The actual lag will vary because of wealth _____, but that estimate provides a broad picture of the rising risks. Heat risk is up globally, but more in poor regions. Looking back over recent decades, there is found a 60% increase in heat wave days in the 2010s compared with the 1980s. We defined a heat wave as extreme daily temperatures above the 97th percentile for the area, for at least three consecutive days. It is also found that heat wave seasons were getting longer, with more frequent early- and late-season heat waves that can increase heat-related deaths. People's average heat wave exposure in the poorest quarter of the world during the 2010s was more than 40% greater than in the wealthiest quarter ? roughly 2.4 billion person- days of heat wave exposure per year compared with 1.7 billion. This heat wave risk in poor countries has often been overlooked by the developed world, in part because heat deaths aren't consistently tracked in many countries.

- (a) Unlike poor countries, developed countries are less likely to get any assistance from other countries.
 - (b) Wealthier countries generally have greater resources and are better equipped with technologies to mitigate the impact of heat waves.
 - (c) Wealthier countries are more responsible to address the climate change and are entitled to help the poor countries.
 - (d) There is no difference in managing the impact of heat waves by any of these countries.
 - (e) None of these
-

4. Which of the following statement is false as per the data given in the passage? Read the passage to answer the following questions. Heat waves are often assessed by how frequent or intense they are, but vulnerability involves more than that. A key factor in the amount of harm heat waves cause is people's capacity to adapt with measures like cooling technology and the power to run it. It is found that while wealthy countries can buffer their risk by rapidly investing in measures to adapt to climate change, the poorest quarter of the world ? areas likely to be slower to adapt ? will face escalating heat risk. Heat waves are among the deadliest climate and weather-related disasters, and they can be destructive to crops, livestock and infrastructure. Currently, about 30% of the global population lives in areas where heat and humidity levels can be deadly on at least 20 days a year, studies show, and the risk is rising. Adaptation measures, such as cooling centers, home-cooling technology, urban planning and designs focused on reducing heat, can lower a population's heat exposure impact. However, a country's ability to implement adaptation measures generally depends on its financial resources, governance, culture and knowledge. Many developing countries struggle to provide basic services let alone protections from escalating disasters in a warmer future. It is estimated that the poorest quarter of the world lags the wealthiest in adapting to rising temperatures by about 15 years on average. This estimate is based on the pace of preparation and support for adaptation plans described in the U.N. Environment Program's Adaptation Gap Report. The actual lag will vary because of wealth _____, but that estimate provides a broad picture of the rising risks. Heat risk is up globally, but more in poor regions. Looking back over recent decades, there is found a 60% increase in heat wave days in the 2010s compared with the 1980s. We defined a heat wave as extreme daily temperatures above the 97th percentile for the area, for at least three consecutive days. It is also found that heat wave seasons were getting longer, with more frequent early- and late-season heat waves that can increase heat-related deaths. People's average heat wave exposure in the poorest quarter of the world during the 2010s was more than 40% greater than in the wealthiest quarter ? roughly 2.4 billion person- days of heat wave exposure per year compared with 1.7 billion. This heat wave risk in poor countries has often been overlooked by the developed world, in part because heat deaths aren't consistently tracked in many countries.

- (a) The vulnerability due to heat waves can be eased through the availability of cooling technologies and power to sustain it.
 - (b) Developing countries are facing hard times to aid their population with cooling measures
 - (c) Poor countries are almost 20 years behind the wealthiest countries in tackling the heat waves
 - (d) For every 1.7 billion of people in wealthiest countries, 2.4 billion people of poor countries are exposed to heat waves.
 - (e) None of these
-

5. Why do heat-related deaths not get the required attention? Read the passage to answer the following questions.

Heat waves are often assessed by how frequent or intense they are, but vulnerability involves more than that. A key factor in the amount of harm heat waves cause is people's capacity to adapt with measures like cooling technology and the power to run it. It is found that while wealthy countries can buffer their risk by rapidly investing in measures to adapt to climate change, the poorest quarter of the world ? areas likely to be slower to adapt ? will face escalating heat risk. Heat waves are among the deadliest climate and weather-related disasters, and they can be destructive to crops, livestock and infrastructure. Currently, about 30% of the global population lives in areas where heat and humidity levels can be deadly on at least 20 days a year, studies show, and the risk is rising. Adaptation measures, such as cooling centers, home-cooling technology, urban planning and designs focused on reducing heat, can lower a population's heat exposure impact. However, a country's ability to implement adaptation measures generally depends on its financial resources, governance, culture and knowledge. Many developing countries struggle to provide basic services let alone protections from escalating disasters in a warmer future. It is estimated that the poorest quarter of the world lags the wealthiest in adapting to rising temperatures by about 15 years on average. This estimate is based on the pace of preparation and support for adaptation plans described in the U.N. Environment Program's Adaptation Gap Report. The actual lag will vary because of wealth _____, but that estimate provides a broad picture of the rising risks. Heat risk is up globally, but more in poor regions. Looking back over recent decades, there is found a 60% increase in heat wave days in the 2010s compared with the 1980s. We defined a heat wave as extreme daily temperatures above the 97th percentile for the area, for at least three consecutive days. It is also found that heat wave seasons were getting longer, with more frequent early- and late-season heat waves that can increase heat-related deaths. People's average heat wave exposure in the poorest quarter of the world during the 2010s was more than 40% greater than in the wealthiest quarter ? roughly 2.4 billion person- days of heat wave exposure per

year compared with 1.7 billion. This heat wave risk in poor countries has often been overlooked by the developed world, in part because heat deaths aren't consistently tracked in many countries.

- (a) Because of low awareness, people cannot figure out the symptoms of heat related illness.
 - (b) Because of poor management of death records
 - (c) As countries do not want to unveil their heat related death toll
 - (d) As heat related deaths are so prevalent, it is almost impossible to keep a track
 - (e) None of these
-

6. Which of the following words can fit into the given blank? Read the passage to answer the following questions. Heat waves are often assessed by how frequent or intense they are, but vulnerability involves more than that. A key factor in the amount of harm heat waves cause is people's capacity to adapt with measures like cooling technology and the power to run it. It is found that while wealthy countries can buffer their risk by rapidly investing in measures to adapt to climate change, the poorest quarter of the world ? areas likely to be slower to adapt ? will face escalating heat risk. Heat waves are among the deadliest climate and weather-related disasters, and they can be destructive to crops, livestock and infrastructure. Currently, about 30% of the global population lives in areas where heat and humidity levels can be deadly on at least 20 days a year, studies show, and the risk is rising. Adaptation measures, such as cooling centers, home-cooling technology, urban planning and designs focused on reducing heat, can lower a population's heat exposure impact. However, a country's ability to implement adaptation measures generally depends on its financial resources, governance, culture and knowledge. Many developing countries struggle to provide basic services let alone protections from escalating disasters in a warmer future. It is estimated that the poorest quarter of the world lags the wealthiest in adapting to rising temperatures by about 15 years on average. This estimate is based on the pace of preparation and support for adaptation plans described in the U.N. Environment Program's Adaptation Gap Report. The actual lag will vary because of wealth _____, but that estimate provides a broad picture of the rising risks. Heat risk is up globally, but more in poor regions. Looking back over recent decades, there is found a 60% increase in heat wave days in the 2010s compared with the 1980s. We defined a heat wave as extreme daily temperatures above the 97th percentile for the area, for at least three consecutive days. It is also found that heat wave seasons were getting longer, with more frequent early- and late-season heat waves that can increase heat-related deaths. People's average heat wave exposure in the poorest quarter of the world during the 2010s was more than 40% greater than in the wealthiest quarter ? roughly 2.4 billion person- days of heat wave exposure per year compared with 1.7 billion. This heat wave risk in poor countries has often been overlooked by the developed world, in part because heat deaths aren't consistently tracked in many countries.

(a) affirmative
(b) inabilities
(c) availability
(d) inequities
(e) insurgencies

7. Which of the following words is the antonym of 'intense' as highlighted in the given passage? Read the passage to answer the following questions. Heat waves are often assessed by how frequent or intense they are, but vulnerability involves more than that. A key factor in the amount of harm heat waves cause is people's capacity to adapt with measures like cooling technology and the power to run it. It is found that while wealthy countries can buffer their risk by rapidly investing in measures to adapt to climate change, the poorest quarter of the world ? areas likely to be slower to adapt ? will face escalating heat risk. Heat waves are among the deadliest climate and weather-related disasters, and they can be destructive to crops, livestock and infrastructure. Currently, about 30% of the global population lives in areas where heat and humidity levels can be deadly on at least 20 days a year, studies show, and the risk is rising. Adaptation measures, such as cooling centers, home-cooling technology, urban planning and designs focused on reducing heat, can lower a population's heat exposure impact. However, a country's ability to implement adaptation measures generally depends on its financial resources, governance, culture and knowledge. Many developing countries struggle to provide basic services let alone protections from escalating disasters in a warmer future. It is estimated that the poorest quarter of the world lags the wealthiest in adapting to rising temperatures by about 15 years on average. This estimate is based on the pace of preparation and support for adaptation plans described in the U.N. Environment Program's Adaptation Gap Report. The actual lag will vary because of wealth _____, but that estimate provides a broad picture of the rising risks. Heat risk is up globally, but more in poor regions. Looking back over recent decades, there is found a 60% increase in heat wave days in the 2010s compared with the 1980s. We defined a heat wave as extreme daily temperatures above the 97th percentile for the area, for at least three consecutive days. It is also found that heat wave seasons were getting longer, with more frequent early- and late-season heat waves that can increase heat-related deaths. People's average heat wave exposure in the poorest quarter of the world during the 2010s was more than 40% greater than in the wealthiest quarter ? roughly 2.4 billion person- days of heat wave exposure per year compared with 1.7 billion. This heat wave risk in poor countries has often been overlooked by the developed world, in part because heat deaths aren't consistently tracked in many countries.

(a) vigorous
(b) mild
(c) turbulent
(d) violent
(e) None of these

8. . Which of the following words is the synonym of 'escalating' as highlighted in the given passage? Read the passage to answer the following questions. Heat waves are often assessed by how frequent or intense they are, but vulnerability involves more than that. A key factor in the amount of harm heat waves cause is people's capacity to adapt with measures like cooling technology and the power to run it. It is found that while wealthy countries can buffer their risk by rapidly investing in measures to adapt to climate change, the poorest quarter of the world ? areas likely to be slower to adapt ? will face escalating heat risk. Heat waves are among the deadliest climate and weather-related disasters, and they can be destructive to crops, livestock and infrastructure. Currently, about 30% of the global population lives in areas where heat and humidity levels can be deadly on at least 20 days a year, studies show, and the risk is rising. Adaptation measures, such as cooling centers, home-cooling technology, urban planning and designs focused on reducing heat, can lower a population's heat exposure impact. However, a country's ability to implement adaptation measures generally depends on its financial resources, governance, culture and knowledge. Many developing countries struggle to provide basic services let alone protections from escalating disasters in a warmer future. It is estimated that the poorest quarter of the world lags the wealthiest in adapting to rising temperatures by about 15 years on average. This estimate is based on the pace of preparation and support for adaptation plans described in the U.N. Environment Program's Adaptation Gap Report. The actual lag will vary because of wealth _____, but that estimate provides a broad picture of the rising risks. Heat risk is up globally, but more in poor regions. Looking back over recent decades, there is found a 60% increase in heat wave days in the 2010s compared with the 1980s. We defined a heat wave as extreme daily temperatures above the 97th percentile for the area, for at least three consecutive days. It is also found that heat wave seasons were getting longer, with more frequent early- and late-season heat waves that can increase heat-related deaths. People's average heat wave exposure in the poorest quarter of the world during the 2010s was more than 40% greater than in the wealthiest quarter ? roughly 2.4 billion person- days of heat wave exposure per year compared with 1.7 billion. This heat wave risk in poor countries has often been overlooked by the developed world, in part because heat deaths aren't consistently tracked in many countries.

(a) soaring
(b) limiting
(c) shuffling
(d) trembling
(e) None of these

9. Indian telecom operators have making (A) the three-year 5G network rollout target and are now surpassed (B) efforts to enhance (C) adoption of 5G applications across various key segments (D). In the question below, four words are given in bold, which may not be arranged in the correct order. Choose the replacement needed between the words to make the sentence correct and meaningful.

(a) Only (A)-(B)
(b) Only (C)-(D)
(c) Only (A)-(C) and (B)-(D)
(d) Only (A)-(D) and (B)-(C)
(e) No interchange needed

10. China claims Taiwan as its own expanding (A) to be brought under its rapidly (B) by force if necessary, and has been control (C) territory (D) its military to meet that challenge. In the question below, four words are given in bold, which may not be arranged in the correct order. Choose the replacement needed between the words to make the sentence correct and meaningful.

(a) Only (A)-(B)
(b) Only (C)-(D)
(c) Only (A)-(C) and (B)-(D)
(d) Only (A)-(D) and (B)-(C)
(e) No interchange needed

11. Pakistan recently launched its first-ever digital population and housing census, (A) to help future (B) planning and efficient utilization (C) of resources (D) In the question below, four words are given in bold, which may not be arranged in the correct order. Choose the replacement needed between the words to make the sentence correct and meaningful.

(a) Only (A)-(B)
(b) Only (C)-(D)
(c) Only (A)-(C) and (B)-(D)
(d) Only (A)-(D) and (B)-(C)
(e) No interchange needed

12. A/an anonymity (A) disadvantage of online discourse (B) is that people can often say whatever (C) they like in complete major (D). In the question below, four words are given in bold, which may not be arranged in the correct order. Choose the replacement needed between the words to make the sentence correct and meaningful.

- (a) Only (A)-(B) and (C)-(D)
 - (b) Only (B)-(C)
 - (c) Only (A)-(C) and (B)-(D)
 - (d) Only (A)-(D)
 - (e) No interchange needed
-

13. In early times clan elders would orally (A) pass down the family's ensure (B) to chronicle (C) clan history would never be forgotten (D). In the question below, four words are given in bold, which may not be arranged in the correct order. Choose the replacement needed between the words to make the sentence correct and meaningful.

- (a) Only (A)-(B) and (C)-(D)
 - (b) Only (B)-(C)
 - (c) Only (A)-(C) and (B)-(D)
 - (d) Only (A)-(D)
 - (e) No interchange needed
-

14. Though negotiating a fair deal (A) / between the two companies was a (B) / challenging process, and they eventually reached (C) /an agreement that satisfied both (D). Read the sentence to find out whether there is any grammatical or idiomatic error in it. The error, if any, will be in one part of the sentence. The corresponding letter of that part is the answer. If the given sentence is correct as it is, then choose option 'No error' as the answer response. (Ignore errors of punctuation, if any).

- (a) A
 - (b) B
 - (c) C
 - (d) D
 - (e) No error
-

15. After attending the workshop(A)/ on digital marketing, she learn (B)/valuable strategies to (C)/enhance her online business (D). Read the sentence to find out whether there is any grammatical or idiomatic error in it. The error, if any, will be in one part of the sentence. The corresponding letter of that part is the answer. If the given sentence is correct as it is, then choose option 'No error' as the answer response. (Ignore errors of punctuation, if any).

- (a) A
 - (b) B
 - (c) C
 - (d) D
 - (e) No error
-

16. It's high time we address (A)/ the environmental issues affecting (B)/our community and took meaningful (C)/ steps towards sustainability (D). Read the sentence to find out whether there is any grammatical or idiomatic error in it. The error, if any, will be in one part of the sentence. The corresponding letter of that part is the answer. If the given sentence is correct as it is, then choose option 'No error' as the answer response. (Ignore errors of punctuation, if any).

- (a) A
 - (b) B
 - (c) C
 - (d) D
 - (e) No error
-

17. His constant tardiness was (A)/ no longer an excuse to (B)/his lack of responsibility in (C)/ meeting project deadlines (D). Read the sentence to find out whether there is any grammatical or idiomatic error in it. The error, if any, will be in one part of the sentence. The corresponding letter of that part is the answer. If the given sentence is correct as it is, then choose option 'No error' as the answer response. (Ignore errors of punctuation, if any).

- (a) A
- (b) B
- (c) C
- (d) D

(e) No error

18. Which of the following sentences will be the third sentence after rearrangement? Five coherent sentences are given which are not necessarily in the correct order. Rearrange these sentences in a meaningful order to answer the questions. (A) It strikes many people as unfair that some people are able to enjoy healthy, wealthy, happy lives whilst others continue to live in ill-health, and poverty. (B) Some places have seen dramatic improvements, while others have not. (C) For them it is the inequality in the outcomes of people's lives that matters. (D) Today's global inequality is the consequence of two centuries of unequal progress. (E) For others it is the inequality in opportunity ? the opportunity to achieve good outcomes ? that is unfair, and not the outcomes themselves.

- (a) A
 - (b) B
 - (c) C
 - (d) D
 - (e) E
-

19. Which of the following sentences will be the first sentence after rearrangement? Five coherent sentences are given which are not necessarily in the correct order. Rearrange these sentences in a meaningful order to answer the questions. (A) It strikes many people as unfair that some people are able to enjoy healthy, wealthy, happy lives whilst others continue to live in ill-health, and poverty. (B) Some places have seen dramatic improvements, while others have not. (C) For them it is the inequality in the outcomes of people's lives that matters. (D) Today's global inequality is the consequence of two centuries of unequal progress. (E) For others it is the inequality in opportunity ? the opportunity to achieve good outcomes ? that is unfair, and not the outcomes themselves.

- (a) A
 - (b) B
 - (c) C
 - (d) D
 - (e) E
-

20. Which of the following sentences will be the last sentence after rearrangement? Five coherent sentences are given which are not necessarily in the correct order. Rearrange these sentences in a meaningful order to answer the questions. (A) It strikes many people as unfair that some people are able to enjoy healthy, wealthy, happy lives whilst others continue to live in ill-health, and poverty. (B) Some places have seen dramatic improvements, while others have not. (C) For them it is the inequality in the outcomes of people's lives that matters. (D) Today's global inequality is the consequence of two centuries of unequal progress. (E) For others it is the inequality in opportunity ? the opportunity to achieve good outcomes ? that is unfair, and not the outcomes themselves.

- (a) A
 - (b) B
 - (c) C
 - (d) D
 - (e) E
-

21. Which of the following sentences will be the second sentence after rearrangement? Five coherent sentences are given which are not necessarily in the correct order. Rearrange these sentences in a meaningful order to answer the questions. (A) It strikes many people as unfair that some people are able to enjoy healthy, wealthy, happy lives whilst others continue to live in ill-health, and poverty. (B) Some places have seen dramatic improvements, while others have not. (C) For them it is the inequality in the outcomes of people's lives that matters. (D) Today's global inequality is the consequence of two centuries of unequal progress. (E) For others it is the inequality in opportunity ? the opportunity to achieve good outcomes ? that is unfair, and not the outcomes themselves.

- (a) A
 - (b) B
 - (c) C
 - (d) D
 - (e) E
-

22. . Which of the following sentences will be the fourth sentence after rearrangement? Five coherent sentences are given which are not necessarily in the correct order. Rearrange these sentences in a meaningful order to answer the questions. (A) It strikes many people as unfair that some people are able to enjoy healthy, wealthy, happy lives whilst others continue to live in ill-health, and poverty. (B) Some places have seen dramatic improvements, while others have not. (C) For them it is the inequality in the outcomes of people's lives that matters. (D) Today's global inequality is the consequence of two centuries of unequal progress. (E) For others it is the inequality in opportunity ? the opportunity to achieve good outcomes ? that is unfair, and not the outcomes themselves.

- (a) A
- (b) B
- (c) C
- (d) D
- (e) E

23. Column (A) (1) The price of the designer handbag was exorbitant (2) The rent for the apartment was affordable (3) The billionaire's house was so extravagant Column (B) (4) and I couldn't afford to buy it (5) missing hiker proved to be fruitless (6) that it flew far from the place In the question two columns are given, each containing three phrases/sentences. Choose the option that will connect the phrases to form meaningful and correct sentences.

- (a) (1-4)
- (b) (2-5)
- (c) (3-5)
- (d) (1-6)
- (e) (3-6)

24. Column (A) (1) Violent storms ripped through the area (2) A President must form a political engine out (3) She stood on the verge of the lake at the Column (B) (4) life she has lived as a gypsy (5) wore a beautiful fluffy mint green frock (6) line where the water met the sand. In the question two columns are given, each containing three phrases/sentences. Choose the option that will connect the phrases to form meaningful and correct sentences.

- (a) (1-5)
- (b) (2-5)
- (c) (3-4)
- (d) (2-6)
- (e) (3-6)

25. Column (A) (1) Although he wasn't a professional cyclist (2) The mechanics tried to align the front end (3) My father will never skip a dentist appointment Column (B) (4) willingness to contravene prison rules (5) the man thoroughly enjoyed riding bicycles (6) of the events organized in my mind In the question two columns are given, each containing three phrases/sentences. Choose the option that will connect the phrases to form meaningful and correct sentences.

- (a) (2-4)
- (b) (3-6)
- (c) (1-5)
- (d) (1-4)
- (e) (2-6)

26. Which of the following words will fit in the given blank (A)? The following passage contains 5 blanks. Choose the most appropriate word from the options given for each blank to make the passage meaningful. In today's fast-paced world, stress has become an inevitable part of life. While some amount of stress is _____ (A) for motivation and productivity, chronic stress can have negative effects on physical and mental health. It is important to _____ (B) strategies to manage stress effectively. These may include regular exercise, meditation, deep breathing exercises, and spending time in nature. Social support from friends and family can also help _____ (C) stress levels. Additionally, maintaining a balanced and nutritious diet, getting adequate sleep, and avoiding _____ (D) substances such as alcohol and tobacco can help in managing stress. Seeking professional help from a therapist or counsellor may also be _____ (E) in some cases.

- (a) dispensable
- (b) harmful
- (c) helpful
- (d) insignificant
- (e) unknown

27. Which of the following words will fit in the given blank (B)? The following passage contains 5 blanks. Choose the most appropriate word from the options given for each blank to make the passage meaningful. In today's fast-paced world, stress has become an inevitable part of life. While some amount of stress is _____ (A) for motivation and productivity, chronic stress can have negative effects on physical and mental health. It is important to _____ (B) strategies to manage stress effectively. These may include regular exercise, meditation, deep breathing exercises, and spending time in nature. Social support from friends and family can also help _____ (C) stress levels. Additionally, maintaining a balanced and nutritious diet, getting adequate sleep, and avoiding _____ (D) substances such as alcohol and tobacco can help in managing stress. Seeking professional help from a therapist or counsellor may also be _____ (E) in some cases.

(a) apply
(b) ignore
(c) devour
(d) develop
(e) prevent

28. Which of the following words will fit in the given blank (C)? The following passage contains 5 blanks. Choose the most appropriate word from the options given for each blank to make the passage meaningful. In today's fast-paced world, stress has become an inevitable part of life. While some amount of stress is _____ (A) for motivation and productivity, chronic stress can have negative effects on physical and mental health. It is important to _____ (B) strategies to manage stress effectively. These may include regular exercise, meditation, deep breathing exercises, and spending time in nature. Social support from friends and family can also help _____ (C) stress levels. Additionally, maintaining a balanced and nutritious diet, getting adequate sleep, and avoiding _____ (D) substances such as alcohol and tobacco can help in managing stress. Seeking professional help from a therapist or counsellor may also be _____ (E) in some cases.

(a) decrease
(b) increase
(c) maintain
(d) control
(e) induce

29. Which of the following words will fit in the given blank (D)? The following passage contains 5 blanks. Choose the most appropriate word from the options given for each blank to make the passage meaningful. In today's fast-paced world, stress has become an inevitable part of life. While some amount of stress is _____ (A) for motivation and productivity, chronic stress can have negative effects on physical and mental health. It is important to _____ (B) strategies to manage stress effectively. These may include regular exercise, meditation, deep breathing exercises, and spending time in nature. Social support from friends and family can also help _____ (C) stress levels. Additionally, maintaining a balanced and nutritious diet, getting adequate sleep, and avoiding _____ (D) substances such as alcohol and tobacco can help in managing stress. Seeking professional help from a therapist or counsellor may also be _____ (E) in some cases.

(a) innocuous
(b) natural
(c) beneficial
(d) necessary
(e) injurious

30. Which of the following words will fit in the given blank (E)? The following passage contains 5 blanks. Choose the most appropriate word from the options given for each blank to make the passage meaningful. In today's fast-paced world, stress has become an inevitable part of life. While some amount of stress is _____ (A) for motivation and productivity, chronic stress can have negative effects on physical and mental health. It is important to _____ (B) strategies to manage stress effectively. These may include regular exercise, meditation, deep breathing exercises, and spending time in nature. Social support from friends and family can also help _____ (C) stress levels. Additionally, maintaining a balanced and nutritious diet, getting adequate sleep, and avoiding _____ (D) substances such as alcohol and tobacco can help in managing stress. Seeking professional help from a therapist or counsellor may also be _____ (E) in some cases.

(a) critical
(b) ineffective
(c) trivial

- (d) redundant
 - (e) detrimental
-

43. What approximate value will come in place of question mark (?) in the following questions? (You are not expected to calculate the exact value)

- (a) 169
 - (b) 199
 - (c) 219
 - (d) 122
 - (e) 84
-

44. $960 + 9.92\%$ of $419 = ? + \frac{1}{5} \times 319$ What approximate value will come in place of question mark (?) in the following questions? (You are not expected to calculate the exact value)

- (a) 15
 - (b) 9
 - (c) 2
 - (d) 34
 - (e) 57
-

45. What approximate value will come in place of question mark (?) in the following questions? (You are not expected to calculate the exact value)

- (a) 29
 - (b) 23
 - (c) 34
 - (d) 10
 - (e) 5
-

46. $\frac{1}{6}$ of $43 + 98\%$ of $12.01 - 3.89$ of $2 = ?$ What approximate value will come in place of question mark (?) in the following questions? (You are not expected to calculate the exact value)

- (a) 4
 - (b) 11
 - (c) 19
 - (d) 26
 - (e) 32
-

47. $(1089.8 + 69.98\%$ of $399) = ?^2 + 73.98$ What approximate value will come in place of question mark (?) in the following questions? (You are not expected to calculate the exact value)

- (a) 36
 - (b) 6
 - (c) 12
 - (d) 18
 - (e) 32
-

48. 156, 40, 21, 22, 45, ? What will come in the place of question (?) mark in following number series:

- (a) 161
 - (b) 171
 - (c) 191
 - (d) 181
 - (e) 182
-

49. 6000, ?, 3000, 4500, 9000, 22500 What will come in the place of question (?) mark in following number series:

- (a) 1000
 - (b) 2000
 - (c) 4000
 - (d) 1500
 - (e) 3000
-

50. 1512, 1524, 1540, 1563, ?, 1642 What will come in the place of question (?) mark in following number series:

- (a) 1596
 - (b) 1594
 - (c) 1523
 - (d) 1591
 - (e) 1556
-

51. 290, ?, 374, 421, 474, 533 What will come in the place of question (?) mark in following number series:

- (a) 181
 - (b) 321
 - (c) 122
 - (d) 331
 - (e) 241
-

52. 1308, 812, 506, ?, 272, 248 What will come in the place of question (?) mark in following number series:

- (a) 312
 - (b) 412
 - (c) 252
 - (d) 342
 - (e) 242
-

53. The average weight of 20 students in a class increased by 5.75 kg when one of the students left the class but when a new class student joined the class then the average weight decreased by 2.75 kg. What is the difference between the weight (in kg) of the new student who joined and the student who left?

- (a) 49.5
 - (b) 50.5
 - (c) 51.5
 - (d) 48.5
 - (e) 42.5
-

54. Ravi travels at a speed of 8 km/hr when it is raining and 6 km/hr when it is not raining. If his average speed for the journey is 7 km/hr, then find the fraction of the distance he covered while it was raining.

- (a) $\frac{7}{15}$
 - (b) $\frac{4}{7}$
 - (c) $\frac{1}{4}$
 - (d) $\frac{3}{5}$
 - (e) none of these
-

55. A and B entered into a business such that the sum invested by A is $\frac{2}{5}$ th of the total sum invested by both of them and A invested his sum for 8 months. The profit received by B is $\frac{3}{7}$ th of total profit received by A and B together. Find the time for which B invested his sum?

- (a) 3
 - (b) 4
 - (c) 6
 - (d) 8
 - (e) 12
-

56. A alone can finish the work in 15 hours and B alone can finish the work in 20 hours while C alone can finish the work in N hours. All three worked for 5 hours, after that A left the work and remaining work gets completed in 3 hours. Find the value of N.

- (a) 30
 - (b) 25
 - (c) 40
 - (d) 35
 - (e) 28
-

57. Three vessels whose volumes are in the ratio of 3:5:7 are full of lime and silica. The ratio of lime to silica in the 1st, 2nd, and 3rd vessels is 5:1, 7:3, and 3:4, respectively. If all three mixtures are mixed in another vessel, then find the ratio of lime and silica in the final mixture.

- (a) 3:2
 - (b) 2:1
 - (c) 1:2
 - (d) 3:7
 - (e) 7:8
-

58. There are three voting booths in a city. The number of voters in the first booth is 52% and in second booth 46%. The difference in the number of voters in the first booth and second booth is 3294, then find the total number of voters in all three booths

- (a) 108706
 - (b) 118808
 - (c) 108808
 - (d) 108802
 - (e) 54900
-

59. A bought the article at a discount of 20% on the Marked price and then sold the article with a 10% loss. What would have been the percentage loss had he bought it at the marked price?

- (a) 24%
 - (b) 22%
 - (c) 28%
 - (d) 30%
 - (e) 32%
-

60. R got married 8 years ago. Her present age is $\frac{6}{5}$ times her age at the time of her marriage. R's brother was 10 years younger than her at the time of her marriage. What is the ratio of R's present age and her brother's age at the time of her marriage?

- (a) 8:5
 - (b) 7:6
 - (c) 5:7
 - (d) 6:7
 - (e) 6:5
-

61. Two boats X and Y start towards each other from two different places, 300 km apart. The speed of the boat X and Y in still water are 8 km/hr and 7 km/hr respectively. If X proceeds down and Y up the stream, they will meet after.

- (a) 18 hours
 - (b) 22 hours
 - (c) 20 hours
 - (d) 24 hours
 - (e) 26 hours
-

62. The average of 20 numbers is x . The average of the first 12 numbers is 72.5, and the average of the last 5 numbers is 84.8. The 13th, 14th, and 15th numbers are $(3x - 49)$, $(x + 52)$, and 183, respectively. Determine the value of the 14th number.

- (a) 112.5
 - (b) 142.5
 - (c) 141.5
 - (d) 134.5
 - (e) 144.5
-

63. In a mixture, there are x liters of juice and $x+20$ liters of water. If $\frac{4}{7}$ liters of water are added to the mixture, then juice becomes 35% of the new mixture. Find the initial quantity of the mixture in liters.

- (a) 62 liters
- (b) 64 liters
- (c) 66 liters

- (d) 68 liters
 - (e) 60 liters
-

64. The hemispherical pot of total surface area 1452π sq.cm is full with milk. The all milk is poured into the cylindrical can of same radius. The cylindrical can is completely filled with milk. Find the height (n cm) of cylindrical can.

- (a) $14/3$
 - (b) $44/3$
 - (c) $21/2$
 - (d) $28/5$
 - (e) $12/7$
-

65. The interest received on a certain sum of money at 20% per annum compounded annually for 2 years is Rs. 4,600 more than compounded half yearly for 1 year. Find the sum of money (in Rs).

- (a) 30000
 - (b) 25000
 - (c) 18000
 - (d) 19000
 - (e) 20000
-

74. How many such pairs of letters are there in the word ?MUNICIPAL? each of which has as many letters between them as in the alphabetical series (both in the forward and backward directions)?

- (a) Four
 - (b) Three
 - (c) None
 - (d) Two
 - (e) One
-

83. If a meaningful word is formed by using the First, Fifth, seventh and twelfth letters (from the left end) of the word ?ENTERTAINMENT?, then which of the following will be the third letter from the right end of the word thus formed. If more than one such word is formed mark Z as your answer. If no meaningful word is formed, mark X as your answer?

- (a) X
 - (b) R
 - (c) N
 - (d) A
 - (e) Z
-

89. Statements: Only a few print is paper All paper is tree No tree is wood Conclusions: I. Some print is not wood II. All paper being print is a possibility In each question below, some statements are given followed by some conclusions. You have to take the given statements to be true even if they seem to be at variance with commonly known facts. Read all the conclusions and then decide which of the given conclusions definitely follows from the given statements, disregarding commonly known facts. Give answer:

- (a) Only conclusion I follows
 - (b) Only conclusion II follows
 - (c) Either conclusion I or II follows
 - (d) Neither conclusion I nor II follows
 - (e) Both conclusions I and II follow
-

90. Statements: All money is bank Some bank is collection Only collection is cheque Conclusions: I. No money is cheque II. All collection being bank is a possibility In each question below, some statements are given followed by some conclusions. You have to take the given statements to be true even if they seem to be at variance with commonly known facts. Read all the conclusions and then decide which of the given conclusions definitely follows from the given statements, disregarding commonly known facts. Give answer:

- (a) Only conclusion I follows
- (b) Only conclusion II follows
- (c) Either conclusion I or II follows
- (d) Neither conclusion I nor II follows
- (e) Both conclusions I and II follow

91. Statements: Only a few blue is red. Some blue is pink. Some pink is not yellow Conclusions: I. Some red is not pink II. All red is pink In each question below, some statements are given followed by some conclusions. You have to take the given statements to be true even if they seem to be at variance with commonly known facts. Read all the conclusions and then decide which of the given conclusions definitely follows from the given statements, disregarding commonly known facts. Give answer:

- (a) Only conclusion I follows
 - (b) Only conclusion II follows
 - (c) Either conclusion I or II follows
 - (d) Neither conclusion I nor II follows
 - (e) Both conclusions I and II follow
-

92. Statements: $J < Q < M = D$; $I < H = G ? D$; $L > O = Q$ Conclusions : I. $Q < H$ II. $L > J$ In these questions, the relationship between different elements is shown in the statements. The statements are followed by conclusions. Study the conclusions based on the given statements and select the appropriate answer:

- (a) If only conclusion I is true
 - (b) If only conclusion II is true
 - (c) If either conclusion I or II is true
 - (d) If both conclusions I and II are true
 - (e) If neither conclusion I nor II is true
-

93. Statements: $S < Q > G = D > H$; $M > T < H$; $S ? E > N < J$ Conclusions : I. $T < G$ II. $D ? E$ In these questions, the relationship between different elements is shown in the statements. The statements are followed by conclusions. Study the conclusions based on the given statements and select the appropriate answer:

- (a) If only conclusion I is true
 - (b) If only conclusion II is true
 - (c) If either conclusion I or II is true
 - (d) If both conclusions I and II are true
 - (e) If neither conclusion I nor II is true
-

94. Statements: $H < I < J = C$; $N ? T ? L$; $P > S ? L = J$ Conclusions : I. $H < P$ II. $N < S$ In these questions, the relationship between different elements is shown in the statements. The statements are followed by conclusions. Study the conclusions based on the given statements and select the appropriate answer:

- (a) If only conclusion I is true
 - (b) If only conclusion II is true
 - (c) If either conclusion I or II is true
 - (d) If both conclusions I and II are true
 - (e) If neither conclusion I nor II is true
-

95. If in the given number ?972569345?, the even digits are increased by two and the odd digits are decreased by one, then the digits are arranged in descending order from left to right, then what will be the product of the digits which are fifth from the left end and second from the right end?

- (a) 36
 - (b) 24
 - (c) 16
 - (d) 20
 - (e) None of these
-
