SBI PO Prelims 2023

65 questions

1. Why has cyber security evolved to be the prime priority for an organisation? Read the passage to answer the following questions. As enterprises, the government and public moving towards digitalization, cybersecurity has become pivotal to their basic functioning nowadays. Cyberattacks have been on the rise over the past 12-18 months, affecting businesses of all nature and sizes, where the safety of the data network is essential to their operations. As a result, cybersecurity has come to occupy a prime position in a company's list of governance priorities. As more companies shifted to work from home, there were database breaches and hackings, leading to loss of revenue opportunity across industries. Even systems believed to be highly secure could be breached in cyberattacks. Reports say almost 26,000 Indian websites were hacked in the 10-month period ended October. The hackers had been operating from different parts of the world with hidden identities. While weak passwords are the common cause for such attacks, systems with unprotected or unchanged passwords are highly vulnerable. Second, different types of malwares in many cases hidden in another type of document only waiting to be executed by the target user. Third, working in unsecured environments such as a common Wi-Fi network to access private emails and USB drives may prove risky. The onus is on the organisation to take steps to prevent and counter potential threats. They should educate their employees to create strong passwords, follow proper protocols in keeping passwords secure. Also, an organisation should regularly ensure that its firewalls are capable to resist any malware attack, by installing regular software updates. This is also why virtual private networks are being insisted upon in organisations. Internal threats could be a result of employee negligence or ignorance, while external threats could be from former employees, competitors, and hackers who steal corporate data and money through spoofing and phishing. These would obviously lead to reputational damage, financial loss, litigation, regulatory probes, and above all, loss of clients and thereby revenue. Ransomware attacks continue to evolve in the market, with the past 8-10 months witnessing the highest number of threats of sensitive data exposure. A leading social network platform suffered a data breach, wherein millions of profiles containing email addresses, names, dates of birth, and phone numbers were sold on the dark Web. There are cyber insurance solutions available in the market to protect against losses caused by cyberattacks, including first-party and third-party losses, and cyber extortion. First-party insurance covers loss caused due to electronic theft, loss of electronic communication, e-vandalism, business interruption (income loss due to fraudulent access causing impairment of operations), and the like. Third-party loss covers disclosure liability (any customer claims due to system security failures resulting in unauthorized access), content liability (for alleged copyright infringement). Cyber extortion occurs when cybercriminals threaten to disable the operations of a target business or compromise its confidential data unless they receive a payment. Companies usually get cyber insurance only if the claim is pre-approved. Cyber insurance covers legal expenses on computerization, cyber security, damages due to cyber attacks. It should be part of the organization's overall business continuity strategy, as it helps quickly recover post an incident.

(c) The potential data theft that resulted from the organizational shift, i.e., to work from home culture, could put the organisation at monetary risk.

(d) Only

2. Which of the following can be listed as the cause of cyber-attack as mentioned in the passage? Read the passage to answer the following questions. As enterprises, the government and public moving towards digitalization, cybersecurity has become pivotal to their basic functioning nowadays. Cyberattacks have been on the rise over the past 12-18 months, affecting businesses of all nature and sizes, where the safety of the data network is essential to their operations. As a result, cybersecurity has come to occupy a prime position in a company's list of governance priorities. As more companies shifted to work from home, there were database breaches and hackings, leading to loss of revenue opportunity across industries. Even systems believed to be highly secure could be breached in cyberattacks. Reports say almost 26,000 Indian websites were hacked in the 10-month period ended October. The hackers had been operating from different parts of the world with hidden identities. While weak passwords are the common cause for such attacks, systems with unprotected or unchanged passwords are highly vulnerable. Second, different types of malwares in many cases hidden in another type of document only waiting to be executed by the target user. Third, working in unsecured environments such as a common Wi-Fi network to access private emails and USB drives may prove risky. The onus is on the organisation to take steps to prevent and counter potential threats. They should educate their employees to create strong passwords, follow proper protocols in keeping passwords secure. Also, an organisation should regularly ensure that its firewalls are capable to resist any malware attack, by installing regular software updates. This is also why virtual private networks are being insisted upon in organisations. Internal threats could be a result of employee negligence or ignorance, while external threats could be from former employees, competitors, and hackers who steal corporate data and money through spoofing and phishing. These would obviously lead to reputational damage, financial loss, litigation, regulatory probes, and above all, loss of clients and thereby revenue. Ransomware attacks continue to evolve in the market, with the past 8-10 months witnessing the highest number of threats of sensitive data exposure. A leading social network platform suffered a data breach, wherein millions of profiles containing email addresses, names, dates of birth, and phone numbers were sold on the dark Web. There are cyber insurance solutions available in the market to protect against losses caused by cyberattacks, including first-party and third-party losses, and cyber extortion. First-party insurance covers loss caused due to electronic theft, loss of electronic communication, e-vandalism, business interruption (income loss due to fraudulent access causing impairment of operations), and the like. Third-party loss covers disclosure liability (any customer claims due to system security failures resulting in unauthorized access), content liability (for alleged copyright infringement). Cyber extortion occurs when cybercriminals threaten to disable the operations of a target business or compromise its confidential data unless they receive a payment. Companies usually get cyber insurance solutions to directly deal with the risk with the system. Cyber insurance helps cover legal expenses as these are easily accessible and highly vulnerable from damages due to a cyber attack. It should be part of the company's overall business continuity strategy, as it helps quickly recover post an incident.

- (a) Data breach could happen with the system. Cyber insurance helps cover legal expenses
- (b) and
- (c) Open or shared networks, such as common Wi Fi, are more entailed cyber attack
- (d) Only
- (e) All of these

3. How organisations can safeguard themselves from malicious cyber threat? Read the passage to answer the following questions. As enterprises, the government and public moving towards digitalization, cybersecurity has become pivotal to their basic functioning nowadays. Cyberattacks have been on the rise over the past 12-18 months, affecting businesses of all nature and sizes, where the safety of the data network is essential to their operations. As a result, cybersecurity has come to occupy a prime position in a company's list of governance priorities. As more companies shifted to work from home, there were database breaches and hackings, leading to loss of revenue opportunity across industries. Even systems believed to be highly secure could be breached in cyberattacks. Reports say almost 26,000 Indian websites were hacked in the 10-month period ended October. The hackers had been operating from different parts of the world with hidden identities. While weak passwords are the common cause for such attacks, systems with unprotected or unchanged passwords are highly vulnerable. Second, different types of malwares in many cases hidden in another type of document only waiting to be executed by the target user. Third, working in unsecured environments such as a common Wi-Fi network to access private emails and USB drives may prove risky. The onus is on the organisation to take steps to prevent and counter potential threats. They should educate their employees to create strong passwords, follow proper protocols in keeping passwords secure. Also, an organisation should regularly ensure that its firewalls are capable to resist any malware attack, by installing regular software updates. This is also why virtual private networks are being insisted upon in organisations. Internal threats could be a result of employee negligence or ignorance, while external threats could be from former employees, competitors, and hackers who steal corporate data and money through spoofing and phishing. These would obviously lead to reputational damage, financial loss, litigation, regulatory probes, and above all, loss of clients and thereby revenue. Ransomware attacks continue to evolve in the market, with the past 8-10 months witnessing the highest number of threats of sensitive data exposure. A leading social network platform suffered a data breach, wherein millions of profiles containing email addresses, names, dates of birth, and phone numbers were sold on the dark Web. There are cyber insurance solutions available in the market to protect against losses caused by cyberattacks, including first-party and third-party losses, and cyber extortion. First-party insurance covers loss caused due to electronic theft, loss of electronic communication, e-vandalism, business interruption (income loss due to fraudulent access causing impairment of operations), and the like. Third-party loss covers disclosure liability (any customer claims due to system security failures resulting in unauthorized access), content liability (for alleged copyright infringement). Cyber extortion occurs when cybercriminals threaten to disable the operations of a target business or compromise its confidential data unless they create employees to Companies safety the get cyber insurance creating strong passwords and following proper protocols. Cyber insurance helps cover legal expenses _____ from damages due to a cyberattack. It should be part of the company's overall business continuity strategy, as it helps quickly recover post an incident.

(c) Organisations should be confided to virtual private network.

(d) Only

(e) All of these

4. Which of the following is/are FALSE as per the given passage? Read the passage to answer the following questions. As enterprises, the government and public moving towards digitalization, cybersecurity has become pivotal to their basic functioning nowadays. Cyberattacks have been on the rise over the past 12-18 months, affecting businesses of all nature and sizes, where the safety of the data network is essential to their operations. As a result, cybersecurity has come to occupy a prime position in a company's list of governance priorities. As more companies shifted to work from home, there were database breaches and hackings, leading to loss of revenue opportunity across industries. Even systems believed to be highly secure could be breached in cyberattacks. Reports say almost 26,000 Indian websites were hacked in the 10-month period ended October. The hackers had been operating from different parts of the world with hidden identities. While weak passwords are the common cause for such attacks, systems with unprotected or unchanged passwords are highly vulnerable. Second, different types of malwares in many cases hidden in another type of document only waiting to be executed by the target user. Third, working in unsecured environments such as a common Wi-Fi network to access private emails and USB drives may prove risky. The onus is on the organisation to take steps to prevent and counter potential threats. They should educate their employees to create strong passwords, follow proper protocols in keeping passwords secure. Also, an organisation should regularly ensure that its firewalls are capable to resist any malware attack, by installing regular software updates. This is also why virtual private networks are being insisted upon in organisations. Internal threats could be a result of employee negligence or ignorance, while external threats could be from former employees, competitors, and hackers who steal corporate data and money through spoofing and phishing. These would obviously lead to reputational damage, financial loss, litigation, regulatory probes, and above all, loss of clients and thereby revenue. Ransomware attacks continue to evolve in the market, with the past 8-10 months witnessing the highest number of threats of sensitive data exposure. A leading social network platform suffered a data breach, wherein millions of profiles containing email addresses, names, dates of birth, and phone numbers were sold on the dark Web. There are cyber insurance solutions available in the market to protect against losses caused by cyberattacks, including first-party and third-party losses, and cyber extortion. First-party insurance covers loss caused due to electronic theft, loss of electronic communication, e-vandalism, business interruption (income loss due to fraudulent access causing impairment of operations), and the like. Third-party loss covers disclosure liability (any customer claims due to system security failures resulting in unauthorized access), content liability (for alleged copyright infringement). Cyber extortion occurs when cybercriminals threaten to disable the operations of a target business or compromise its confidential data unless they receive a payment. Cyber policies usually forget cyber insurance, a reputation to be taken care of with regularity. Cyber insurance helps cover legal expenses _____ from damages due to a cyberattack. It should be part of the company's overall business continuity strategy, as it helps quickly recover post an incident, whereby loss in revenue.
- (a) A cyber threat is any organizational damage, conceivably reputational or financial loss, litigation, whereby loss in revenue.
- (b) Within the span of 10 months, 26000 websites were reportedly being hacked in India.
- (c) Companies mostly get into cyber insurance solutions even though they don't want to
- (d) All are correct.

5. Which of the following does not come under the category of losses that cyber insurance solution covers? Read the passage to answer the following questions. As enterprises, the government and public moving towards digitalization, cybersecurity has become pivotal to their basic functioning nowadays. Cyberattacks have been on the rise over the past 12-18 months, affecting businesses of all nature and sizes, where the safety of the data network is essential to their operations. As a result, cybersecurity has come to occupy a prime position in a company's list of governance priorities. As more companies shifted to work from home, there were database breaches and hackings, leading to loss of revenue opportunity across industries. Even systems believed to be highly secure could be breached in cyberattacks. Reports say almost 26,000 Indian websites were hacked in the 10-month period ended October. The hackers had been operating from different parts of the world with hidden identities. While weak passwords are the common cause for such attacks, systems with unprotected or unchanged passwords are highly vulnerable. Second, different types of malwares in many cases hidden in another type of document only waiting to be executed by the target user. Third, working in unsecured environments such as a common Wi-Fi network to access private emails and USB drives may prove risky. The onus is on the organisation to take steps to prevent and counter potential threats. They should educate their employees to create strong passwords, follow proper protocols in keeping passwords secure. Also, an organisation should regularly ensure that its firewalls are capable to resist any malware attack, by installing regular software updates. This is also why virtual private networks are being insisted upon in organisations. Internal threats could be a result of employee negligence or ignorance, while external threats could be from former employees, competitors, and hackers who steal corporate data and money through spoofing and phishing. These would obviously lead to reputational damage, financial loss, litigation, regulatory probes, and above all, loss of clients and thereby revenue. Ransomware attacks continue to evolve in the market, with the past 8-10 months witnessing the highest number of threats of sensitive data exposure. A leading social network platform suffered a data breach, wherein millions of profiles containing email addresses, names, dates of birth, and phone numbers were sold on the dark Web. There are cyber insurance solutions available in the market to protect against losses caused by cyberattacks, including first-party and third-party losses, and cyber extortion. First-party insurance covers loss caused due to electronic theft, loss of electronic communication, e-vandalism, business interruption (income loss due to fraudulent access causing impairment of operations), and the like. Third-party loss covers disclosure liability (any customer claims due to system security failures resulting in unauthorized access), content liability (for alleged copyright infringement). Cyber extortion occurs when cybercriminals threaten to disable the operations of a target business or compromise its confidential data unless they receive a payment. Companies usually get cyber insurance solutions to eliminate the risk, without willingly. Cyber insurance helps cover legal expenses _____ from damages due to a cyberattack. It should be part of the company's overall business continuity strategy, as it helps quickly the company post an incident.

(a) first party
(b) second party
(c) third party
(d) cyber extortion
(e) None of these

6. What is cyber extortion? Read the passage to answer the following questions. As enterprises, the government and public moving towards digitalization, cybersecurity has become pivotal to their basic functioning nowadays.

Cyberattacks have been on the rise over the past 12-18 months, affecting businesses of all nature and sizes, where the safety of the data network is essential to their operations. As a result, cybersecurity has come to occupy a prime position in a company's list of governance priorities. As more companies shifted to work from home, there were database breaches and hackings, leading to loss of revenue opportunity across industries. Even systems believed to be highly secure could be breached in cyberattacks. Reports say almost 26,000 Indian websites were hacked in the 10-month period ended October. The hackers had been operating from different parts of the world with hidden identities. While weak passwords are the common cause for such attacks, systems with unprotected or unchanged passwords are highly vulnerable. Second, different types of malwares in many cases hidden in another type of document only waiting to be executed by the target user. Third, working in unsecured environments such as a common Wi-Fi network to access private emails and USB drives may prove risky. The onus is on the organisation to take steps to prevent and counter potential threats. They should educate their employees to create strong passwords, follow proper protocols in keeping passwords secure. Also, an organisation should regularly ensure that its firewalls are capable to resist any malware attack, by installing regular software updates. This is also why virtual private networks are being insisted upon in organisations. Internal threats could be a result of employee negligence or ignorance, while external threats could be from former employees, competitors, and hackers who steal corporate data and money through spoofing and phishing. These would obviously lead to reputational damage, financial loss, litigation, regulatory probes, and above all, loss of clients and thereby revenue. Ransomware attacks continue to evolve in the market, with the past 8-10 months witnessing the highest number of threats of sensitive data exposure. A leading social network platform suffered a data breach, wherein millions of profiles containing email addresses, names, dates of birth, and phone numbers were sold on the dark Web. There are cyber insurance solutions available in the market to protect against losses caused by cyberattacks, including first-party and third-party losses, and cyber extortion. First-party insurance covers loss caused due to electronic theft, loss of electronic communication, e-vandalism, business interruption (income loss due to fraudulent access causing impairment of operations), and the like. Third-party loss covers disclosure liability (any customer claims due to system security failures resulting in unauthorized access), content liability (for alleged copyright infringement). Cyber extortion occurs when cybercriminals threaten to disable the operations of a target business or compromise its confidential data unless they receive a payment. Companies usually get cyber insurance solutions to mitigate the risk, deliberately limiting cyber insurance policies to cover legal expenses. _____ from damages due to a cyberattack. It should be part of the company's overall business continuity strategy, as it helps quickly recover post an incident.

- (c) It is a crime involving an attack or threat of an attack coupled with a demand for money in return for stopping or remediating the act.
- (d) Only
- (e) All of these

7. Which of the following can fit into the given blank provided in the passage? Read the passage to answer the following questions. As enterprises, the government and public moving towards digitalization, cybersecurity has become pivotal to their basic functioning nowadays. Cyberattacks have been on the rise over the past 12-18 months, affecting businesses of all nature and sizes, where the safety of the data network is essential to their operations. As a result, cybersecurity has come to occupy a prime position in a company's list of governance priorities. As more companies shifted to work from home, there were database breaches and hackings, leading to loss of revenue opportunity across industries. Even systems believed to be highly secure could be breached in cyberattacks. Reports say almost 26,000 Indian websites were hacked in the 10-month period ended October. The hackers had been operating from different parts of the world with hidden identities. While weak passwords are the common cause for such attacks, systems with unprotected or unchanged passwords are highly vulnerable. Second, different types of malwares in many cases hidden in another type of document only waiting to be executed by the target user. Third, working in unsecured environments such as a common Wi-Fi network to access private emails and USB drives may prove risky. The onus is on the organisation to take steps to prevent and counter potential threats. They should educate their employees to create strong passwords, follow proper protocols in keeping passwords secure. Also, an organisation should regularly ensure that its firewalls are capable to resist any malware attack, by installing regular software updates. This is also why virtual private networks are being insisted upon in organisations. Internal threats could be a result of employee negligence or ignorance, while external threats could be from former employees, competitors, and hackers who steal corporate data and money through spoofing and phishing. These would obviously lead to reputational damage, financial loss, litigation, regulatory probes, and above all, loss of clients and thereby revenue. Ransomware attacks continue to evolve in the market, with the past 8-10 months witnessing the highest number of threats of sensitive data exposure. A leading social network platform suffered a data breach, wherein millions of profiles containing email addresses, names, dates of birth, and phone numbers were sold on the dark Web. There are cyber insurance solutions available in the market to protect against losses caused by cyberattacks, including first-party and third-party losses, and cyber extortion. First-party insurance covers loss caused due to electronic theft, loss of electronic communication, e-vandalism, business interruption (income loss due to fraudulent access causing impairment of operations), and the like. Third-party loss covers disclosure liability (any customer claims due to system security failures resulting in unauthorized access), content liability (for alleged copyright infringement). Cyber extortion occurs when cybercriminals threaten to disable the operations of a target business or compromise its confidential data unless the business receive a payment. Companies usually get cyber insurance solution to eliminate the risk, without willingly. Cyber insurance helps cover legal expenses _____ from damages due to a cyberattack. It should be part of the company's overall business continuity strategy, as it helps quickly recover post an incident.

(a) whittling
(b) insurance
(c) extortion
(d) whittling
(e) None of these

8. Which of the following can act as the antonym of 'infringement'? Read the passage to answer the following questions. As enterprises, the government and public moving towards digitalization, cybersecurity has become pivotal to their basic functioning nowadays. Cyberattacks have been on the rise over the past 12-18 months, affecting businesses of all nature and sizes, where the safety of the data network is essential to their operations. As a result, cybersecurity has come to occupy a prime position in a company's list of governance priorities. As more companies shifted to work from home, there were database breaches and hackings, leading to loss of revenue opportunity across industries. Even systems believed to be highly secure could be breached in cyberattacks. Reports say almost 26,000 Indian websites were hacked in the 10-month period ended October. The hackers had been operating from different parts of the world with hidden identities. While weak passwords are the common cause for such attacks, systems with unprotected or unchanged passwords are highly vulnerable. Second, different types of malwares in many cases hidden in another type of document only waiting to be executed by the target user. Third, working in unsecured environments such as a common Wi-Fi network to access private emails and USB drives may prove risky. The onus is on the organisation to take steps to prevent and counter potential threats. They should educate their employees to create strong passwords, follow proper protocols in keeping passwords secure. Also, an organisation should regularly ensure that its firewalls are capable to resist any malware attack, by installing regular software updates. This is also why virtual private networks are being insisted upon in organisations. These would obviously lead to reputational damage, financial loss, litigation, regulatory probes, and above all, loss of clients and thereby revenue. Ransomware attacks continue to evolve in the market, with the past 8-10 months witnessing the highest number of threats of sensitive data exposure. A leading social network platform suffered a data breach, wherein millions of profiles containing email addresses, names, dates of birth, and phone numbers were sold on the dark Web. There are cyber insurance solutions available in the market to protect against losses caused by cyberattacks, including first-party and third-party losses, and cyber extortion. First-party insurance covers loss caused due to electronic theft, loss of electronic communication, e-vandalism, business interruption (income loss due to fraudulent access causing impairment of operations), and the like. Third-party loss covers disclosure liability (any customer claims due to system security failures resulting in unauthorized access), content liability (for alleged copyright infringement). Cyber extortion occurs when cybercriminals threaten to disable the operations of a target business or compromise its confidential data unless they receive a payment. Companies usually get cyber insurance solution to eliminate the risk, without willingly. Cyber insurance not only helps cover legal expenses _____ from damages due to a cyberattack. It should be part of the company's overall business continuity strategy, as it helps quickly recover post an incident.

(a) compliance
 (b) not helpful
 (c) unresponsive
 (d) sabotage
 (e) None of these

9. Which of the following words can replace 'fraudulent' from the given passage? Read the passage to answer the following questions. As enterprises, the government and public moving towards digitalization, cybersecurity has become pivotal to their basic functioning nowadays. Cyberattacks have been on the rise over the past 12-18 months, affecting businesses of all nature and sizes, where the safety of the data network is essential to their operations. As a result, cybersecurity has come to occupy a prime position in a company's list of governance priorities. As more companies shifted to work from home, there were database breaches and hackings, leading to loss of revenue opportunity across industries. Even systems believed to be highly secure could be breached in cyberattacks. Reports say almost 26,000 Indian websites were hacked in the 10-month period ended October. Internal threats could be a result of employee negligence or ignorance, while external threats could be from former employees, competitors, and hackers who steal corporate data and money through spoofing and phishing. These would obviously lead to reputational damage, financial loss, litigation, regulatory probes, and above all, loss of clients and thereby revenue. Ransomware attacks continue to evolve in the market, with the past 8-10 months witnessing the highest number of threats of sensitive data exposure. A leading social network platform suffered a data breach, wherein millions of profiles containing email addresses, names, dates of birth, and phone numbers were sold on the dark Web. There are cyber insurance solutions available in the market to protect against losses caused by cyberattacks, including first-party and third-party losses, and cyber extortion. First-party insurance covers loss caused due to electronic theft, loss of electronic communication, e-vandalism, business interruption (income loss due to fraudulent access causing impairment of operations), and the like. Third-party loss covers disclosure liability (any customer claims due to system security failures resulting in unauthorized access), content liability (for alleged copyright infringement). Cyber extortion occurs when cybercriminals threaten to disable the operations of a target business or compromise its confidential data unless they receive a payment. Companies usually get cyber insurance solution to eliminate the risk, without willingly. Cyber insurance helps cover legal expenses _____ from damages due to a cyberattack. It should be part of the company's overall business continuity strategy, as it helps quickly recover post an incident.

- (a) Only (I) and (II)
 (b) Only (II) and (III)
 (c) Only (I)
 (d) All of these
 (e) Only (I) and (III)
-

11. India mainly depends on (A)/wheat for its daily meals (B)/ despite of many other kinds (C)/ of cereal available globally. (D) Read the sentence to find out whether there is any grammatical or idiomatic error in it. The error, if any, will be in one part of the sentence. The corresponding letter of that part is the answer. If the given sentence is correct as it is, then choose option ?No error? as the answer response. (Ignore errors of punctuation, if any).

- (a) B
 (b) C
 (c) D
 (d) A
 (e) No error
-

12. He will return back (A)/ to India after (B)/ completing his degree (C)/ this year. (D) Read the sentence to find out whether there is any grammatical or idiomatic error in it. The error, if any, will be in one part of the sentence. The corresponding letter of that part is the answer. If the given sentence is correct as it is, then choose option ?No error? as the answer response. (Ignore errors of punctuation, if any).

- (a) A
 (b) B
 (c) C
 (d) D

(e) No error

13. All the interesting (A)/ employees should (B)/ be invited and (C)/involved in the discussion. (D) Read the sentence to find out whether there is any grammatical or idiomatic error in it. The error, if any, will be in one part of the sentence. The corresponding letter of that part is the answer. If the given sentence is correct as it is, then choose option ?No error? as the answer response. (Ignore errors of punctuation, if any).

- (a) B
 - (b) D
 - (c) A
 - (d) C
 - (e) No error
-

14. If he has come here, (A)/ I would have given (B)/him the amount he (C)/needed to pay his fees. (D) Read the sentence to find out whether there is any grammatical or idiomatic error in it. The error, if any, will be in one part of the sentence. The corresponding letter of that part is the answer. If the given sentence is correct as it is, then choose option ?No error? as the answer response. (Ignore errors of punctuation, if any).

- (a) A
 - (b) B
 - (c) C
 - (d) D
 - (e) No error
-

15. The Chinese produced (A)/ primarily cast coinage, (B)/ and this spread to (C)/ South-East Asia and Japan. (D) Read the sentence to find out whether there is any grammatical or idiomatic error in it. The error, if any, will be in one part of the sentence. The corresponding letter of that part is the answer. If the given sentence is correct as it is, then choose option ?No error? as the answer response. (Ignore errors of punctuation, if any).

- (a) D
 - (b) C
 - (c) B
 - (d) A
 - (e) No error
-

16. (A) one of the oldest of the (B) ayurveda is considered as (C) medicine accepted worldwide (D) traditional systems of In the question below, a grammatically correct and meaningful sentence is given which is divided into four parts namely (A), (B), (C) and (D). Rearrange these four parts to make a contextually and grammatically meaningful sentence. If no such rearrangement is needed, mark 'No rearrangement required' as the answer choice.

- (a) DBAC
 - (b) BADC
 - (c) CDAB
 - (d) ADCB
 - (e) No rearrangement required
-

17. (A) warmth was needed, (B) such as China and Japan (C) wood was the earliest fuel used in (D) places where only moderate In the question below, a grammatically correct and meaningful sentence is given which is divided into four parts namely (A), (B), (C) and (D). Rearrange these four parts to make a contextually and grammatically meaningful sentence. If no such rearrangement is needed, mark 'No rearrangement required' as the answer choice.

- (a) CDBA
 - (b) BCAD
 - (c) CDAB
 - (d) ADCB
 - (e) No rearrangement required
-

18. (A) in medicine to provide (B) to keep abreast of evolving knowledge (C) all practitioners of medicine need (D) competent care to patients In the question below, a grammatically correct and meaningful sentence is given which is divided into four parts namely (A), (B), (C) and (D). Rearrange these four parts to make a contextually and grammatically meaningful sentence. If no such rearrangement is needed, mark 'No rearrangement required' as the answer choice.

- (a) DBAC

- (b) BCAD
 - (c) CDAB
 - (d) CBAD
 - (e) No rearrangement required
-

19. To some, this situation cries out for draconian measures to inject more competition. In the sentence given below, four words have been highlighted which may be misspelt or inappropriate in their usage. Mark the erroneous word as the answer and if all the words are correct, then choose option ?No error? as the answer.

- (a) situation
 - (b) inject
 - (c) draconian
 - (d) competition
 - (e) No error
-

20. The objective of the research is to gain a better insight into labour market processes. In the sentence given below, four words have been highlighted which may be misspelt or inappropriate in their usage. Mark the erroneous word as the answer and if all the words are correct, then choose option ?No error? as the answer.

- (a) objective
 - (b) research
 - (c) insight
 - (d) processes
 - (e) No error
-

21. With parts of the pipes (1) being covered after laying of the canal (2) and construction material and debris strewn (3) along the banks, encroachers (4) are taking over the canal. In the question below four words are given in bold. These four words may not be in their correct position. The sentence is then followed by options with the correct combination of words that should replace each other in order to make the sentence grammatically and contextually correct. Find the correct combination of the words that replace each other.

- (a) 2-4 and 1-3
 - (b) Only 2 - 4
 - (c) No correction required
 - (d) Only 1- 2
 - (e) 1-4 and 2-3
-

22. People thronged the burial families (1) to offer a range of dishes and departed (2) to the deceased members of their ground (3) in a symbolic gesture of love towards the desserts (4) ones . In the question below four words are given in bold. These four words may not be in their correct position. The sentence is then followed by options with the correct combination of words that should replace each other in order to make the sentence grammatically and contextually correct. Find the correct combination of the words that replace each other.

- (a) 1-3 and 2-4
 - (b) Only 1 -3
 - (c) Only 2 -4
 - (d) No correction required
 - (e) 1-2 and 3-4
-

23. Authoritarian regimes, in strength (1), are static regimes where (2) a supreme leader assumes (3) know- it-all power and essence (4). In the question below four words are given in bold. These four words may not be in their correct position. The sentence is then followed by options with the correct combination of words that should replace each other in order to make the sentence grammatically and contextually correct. Find the correct combination of the words that replace each other.

- (a) Only 2 -3
 - (b) 1-3 and 2-4
 - (c) 1 -4 only
 - (d) No correction required
 - (e) Only 2 -4
-

24. Indian news consumers? trust in lower (1) TV news channels is much private (2) than their belief in newspapers and yet source (3) continues to be the dominant news television (4). In the question below four words are given in bold. These four words are may not be in their correct position. The sentence is then followed by options with the correct combination of words that should replace each other in order to make the sentence grammatically and contextually correct. Find the correct combination of the words that replace each other.

- (a) Only 2 -3
 - (b) 1-2 and 3-4
 - (c) 1 -4 only
 - (d) No correction required
 - (e) Only 2 -4
-

25. The Commission for Air Quality Management in NCR and the adjoining (1) areas (2) has developed a framework for the effective (3) prevention and control of stubble burning (4). In the question below four words are given in bold. These four words are may not be in their correct position. The sentence is then followed by options with the correct combination of words that should replace each other in order to make the sentence grammatically and contextually correct. Find the correct combination of the words that replace each other.

- (a) Only 1 and 2
 - (b) Only 1 and 3
 - (c) 1-3 and 2-4
 - (d) 1-4 and 2-3
 - (e) No correction required
-

26. A good percentage of all homeless people suffer of some untreated mental affliction. Which of the following phrases given below the sentence should replace the phrase printed in bold letters to make the sentence grammatically correct? Choose the best option among the five given alternatives that reflect the correct use of phrase in the context of the grammatically correct sentence. If the sentence is correct as it is, mark ?No improvement required? as the answer.

- (a) from some untreated mental
 - (b) from some untreated mind
 - (c) with some untreat mental
 - (d) with untreated mind
 - (e) No improvement required
-

27. Although the government claims the unemployment rate is decreasing, there is still a paucity of jobs available. Which of the following phrases given below the sentence should replace the phrase printed in bold letters to make the sentence grammatically correct? Choose the best option among the five given alternatives that reflect the correct use of phrase in the context of the grammatically correct sentence. If the sentence is correct as it is, mark ?No improvement required? as the answer.

- (a) is decreased, there are still a
 - (b) decreasing, their is still a
 - (c) are decreasing, there is a
 - (d) are decreased, there is still a
 - (e) No improvement required
-

28. My financial advisor was helping me to pay up a massive amount from debt I incurred after medical school. Which of the following phrases given below the sentence should replace the phrase printed in bold letters to make the sentence grammatically correct? Choose the best option among the five given alternatives that reflect the correct use of phrase in the context of the grammatically correct sentence. If the sentence is correct as it is, mark ?No improvement required? as the answer.

- (a) pay a massive amount of
 - (b) paying a massive amount from
 - (c) to pay off a massive amount of
 - (d) to pay with a massive amount of
 - (e) No improvement required
-

29. When the king was accompany with his stalwart bodyguards, he felt safe walking among his people. Which of the following phrases given below the sentence should replace the phrase printed in bold letters to make the sentence grammatically correct? Choose the best option among the five given alternatives that reflect the correct use of phrase in the context of the grammatically correct sentence. If the sentence is correct as it is, mark ?No improvement required? as the answer.

- (a) is accompany with his
 - (b) were accompanied by his
 - (c) was accompanied by their
 - (d) was accompanied by his
 - (e) No improvement required
-

30. Since the prisoner couldn?t coexist by another convicts, he spent a lot of time in solitary confinement. Which of the following phrases given below the sentence should replace the phrase printed in bold letters to make the sentence grammatically correct? Choose the best option among the five given alternatives that reflect the correct use of phrase in the context of the grammatically correct sentence. If the sentence is correct as it is, mark ?No improvement required? as the answer.

- (a) coexists with other convict, he
 - (b) coexisted among other convicts, he
 - (c) coexist with other convicts, he
 - (d) coexist within other convicts, it
 - (e) No improvement required
-

37. A, B, and C together can complete a piece of work in $12\frac{3}{5}$ days, while A and C together can finish it in 14 days. Find in how many days B alone can complete 66.67% of the same work.

- (a) 90 days
 - (b) 84 days
 - (c) 73 days
 - (d) 79 days
 - (e) None of these
-

38. The length and breadth of a rectangle are in the ratio 4:3, respectively. When the length of the rectangle is increased by 30% and the breadth remains the same, the area of the rectangle increases by 360 sq m. Find the original length (in meters) of the rectangle.

- (a) 10
 - (b) 20
 - (c) 40
 - (d) 30
 - (e) 50
-

39. The average cost price of two articles, X and Y is Rs 1600. Article X is sold at a 15% profit, and article Y is sold at a 25% profit. The total selling price of articles X and Y is Rs 3800. If article Y is sold at a 50% profit, find the new selling price of article Y (in Rs).

- (a) 1800
 - (b) 1150
 - (c) 1450
 - (d) 1500
 - (e) 1700
-

40. R and S started a business by investing Rs 20000 and Rs (20000+y), respectively. After six months, S withdrew 30% of his initial investment. At the end of the year, the total profit was Rs 13200, and the profit share of S was Rs 6800. Find the value of 3y.

- (a) 5000
 - (b) 15000
 - (c) 10000
 - (d) 1500
 - (e) 12000
-

47. A woman invested Rs Y in Scheme P and Rs Y+500 in Scheme Q. The rate of interest for Scheme P is 8% p.a., and for Scheme Q is 10% p.a. If the total interest she received after three years from Scheme P and after two years from Scheme Q is Rs 452, find Y. (Both schemes offered Simple interest)

- (a) 1000
 - (b) 1200
 - (c) 700
 - (d) 500
 - (e) 800
-

48. Vessel P contains 200 liters of a mixture of milk and water in which water is 35%. y liters of the mixture are taken out, where the quantity of water in y liters is 21 liters. This y liters are then poured into vessel Q, which already contains y liters of water. Find the difference between the quantity of milk and water in the resultant mixture of vessel Q (in liters).

- (a) 18
 - (b) 54
 - (c) 29
 - (d) 42
 - (e) 37
-

49. A boat takes a total of 35 hours to cover 300 km downstream and 200 km upstream. The downstream speed of the boat is 10 km/hr more than its upstream speed. Find the time taken by the boat to cover 600 km downstream.

- (a) 30 hours
 - (b) 28 hours
 - (c) 33 hours
 - (d) 36 hours
 - (e) 32 hours
-

50. The average weight of 20 boys and 10 girls in a class is 50 kg. If the weight of all the girls is excluded, the average weight of the remaining students decreases by 5 kg. Find the average weight of all 10 girls.

- (a) 60 kg
 - (b) 40 kg
 - (c) 45 kg
 - (d) 75 kg
 - (e) 50 kg
-

51. Train A travels at a speed of 72 km/hr and crosses a 500-meter-long platform in 50 seconds. After crossing the platform, it encounters train B moving in the opposite direction at a speed of 54 km/hr. If both trains completely pass each other in 24 seconds, then find the length of the train B.

- (a) 280
 - (b) 340
 - (c) 420
 - (d) 350
 - (e) 290
-

52. The average of five consecutive even numbers is 8 less than the average of four consecutive odd numbers. If the sum of the smallest odd number and the smallest even number is 33, then find the difference between the second largest odd number and the second smallest even number.

- (a) 5
 - (b) 11
 - (c) 12
 - (d) 14
 - (e) 8
-

53. The population of a village in 2020 is 15,000. If it is increased in 2021 by 15%, decreased in 2022 by 10%, and increased in 2023 by X% and the population in 2023 is 18630, then find X.

- (a) 10
- (b) 15
- (c) 30

(d) 25

(e) 20

54. The average weight of 15 students in a class is 60 kg. The average weight of the first 8 students is 58 kg, and the average weight of the last 5 students is 63 kg. If the ratio of the weights of the 9th and 10th students is

(no options)

55. In each of these questions, two equations (I) and (II) are given. You have to solve both the equations and give answers.

(a) If $x > y$

(b) If $x ? y$

(c) If $x < y$

(d) If $x ? y$

(e) If $x = y$ or no relation can be established between x and y

56. In each of these questions, two equations (I) and (II) are given. You have to solve both the equations and give answers.

(a) If $x > y$

(b) If $x ? y$

(c) If $x < y$

(d) If $x ? y$

(e) If $x = y$ or no relation can be established between x and y

57. In each of these questions, two equations (I) and (II) are given. You have to solve both the equations and give answers.

(a) If $x > y$

(b) If $x ? y$

(c) If $x < y$

(d) If $x ? y$

(e) If $x = y$ or no relation can be established between x and y

58. In each of these questions, two equations (I) and (II) are given. You have to solve both the equations and give answers.

(a) If $x > y$

(b) If $x ? y$

(c) If $x < y$

(d) If $x ? y$

(e) If $x = y$ or no relation can be established between x and y

59. In each of these questions, two equations (I) and (II) are given. You have to solve both the equations and give answers.

(a) If $x > y$

(b) If $x ? y$

(c) If $x < y$

(d) If $x ? y$

(e) If $x = y$ or no relation can be established between x and y

60. The present age ratio of C to D is 4:5. Y years ago, the ratio of their ages was 3:4. The sum of their ages after Y years will be 66. Find the present age of D.

(a) 34 years

(b) 28 years

(c) 24 years

(d) 22 years

(e) 30 years

61. 14.982% of 740.25 - 64.87% of 800.26 = 552.21 - ? ? What approximate value will come in place of question mark (?) in the following questions? (You are not expected to calculate the exact value)

- (a) 31
 - (b) 38
 - (c) 34
 - (d) 39
 - (e) 32
-

62. What approximate value will come in place of question mark (?) in the following questions (You are not expected to calculate the exact value).

- (a) $9/16$
 - (b) $5/16$
 - (c) $3/16$
 - (d) $7/16$
 - (e) $11/16$
-

63. What approximate value will come in the place of question (?) mark in the following given questions?

- (a) 205
 - (b) 300
 - (c) 159
 - (d) 220
 - (e) 196
-

64. 240.012% of $19.99 + 117.23 \div ?81.099 + ? = 220.088$ What approximate value should come in the place of question (?) mark in the following questions.

- (a) 139
 - (b) 128
 - (c) 179
 - (d) 159
 - (e) 239
-

65. $380.380 + 619.99 ? 190.011\%$ of $820.21 = ? ? 120.21 \times ?24.95$ What approximate value should come in the place of question (?) mark in the following questions.

- (a) 42
 - (b) 54
 - (c) 32
 - (d) 24
 - (e) 14
-

71. Statements: Only speech is language Some debate is speech All debate is practice Conclusions: I. Some speech is not practice II. All debate can be language In each question below some statements are given followed by some conclusions. You have to take the given statements to be true even if they seem to be at variance with commonly known facts. Read all the conclusions and then decide which of the given conclusions definitely follows from the given statements, disregarding commonly known facts. Give an answer.

- (a) Only conclusion I follows
 - (b) Only conclusion II follows
 - (c) Either conclusion I or II follows
 - (d) Neither conclusion I nor II follows
 - (e) Both conclusions I and II follow
-

72. Statements: All carrot are beetroot Only a few beetroot is cabbage No cabbage is bean Conclusions: I. All beetroot can be bean II. Some carrot is bean In each question below some statements are given followed by some conclusions. You have to take the given statements to be true even if they seem to be at variance with commonly known facts. Read all the conclusions and then decide which of the given conclusions definitely follows from the given statements, disregarding commonly known facts. Give an answer.

- (a) Only conclusion I follows
- (b) Only conclusion II follows
- (c) Either conclusion I or II follows
- (d) Neither conclusion I nor II follows

(e) Both conclusions I and II follow

73. Statements: Some month is date Only a few year is date All year is day Conclusions: I. All day being month is a possibility II. Some year is not date In each question below some statements are given followed by some conclusions. You have to take the given statements to be true even if they seem to be at variance with commonly known facts. Read all the conclusions and then decide which of the given conclusions definitely follows from the given statements, disregarding commonly known facts. Give an answer.

- (a) Only conclusion I follows
 - (b) Only conclusion II follows
 - (c) Either conclusion I or II follows
 - (d) Neither conclusion I nor II follows
 - (e) Both conclusions I and II follow
-

74. Statements: All browser is app Only a few design is app No design is template Conclusions: I. No browser is template II. All design can never be app In each question below some statements are given followed by some conclusions. You have to take the given statements to be true even if they seem to be at variance with commonly known facts. Read all the conclusions and then decide which of the given conclusions definitely follows from the given statements, disregarding commonly known facts. Give an answer.

- (a) Only conclusion I follows
 - (b) Only conclusion II follows
 - (c) Either conclusion I or II follows
 - (d) Neither conclusion I nor II follows
 - (e) Both conclusions I and II follow
-

80. Find the odd one out.

- (a) ZYW
 - (b) MLJ
 - (c) SRP
 - (d) EDA
 - (e) FEC
-

85. U is nephew of D who is sibling of B. R has two children. B is only son of M who is spouse of R. K is mother of U. Gender of K and M is same. How R is related to U?

- (a) Father
 - (b) Son-in-law
 - (c) Grandfather
 - (d) Son
 - (e) None of these
-

91. Statements: $H > Q > J > L < R$; $F < P < Q > T > U$ Conclusions : I. $H > U$ II. $J < F$ In these questions, the relationship between different elements is shown in the statements. The statements are followed by conclusions. Study the conclusions based on the given statements and select the appropriate answer:

- (a) If only conclusion I is true.
 - (b) If only conclusion II is true.
 - (c) If either conclusion I or II is true.
 - (d) If both conclusions I and II are true.
 - (e) If neither conclusion I nor II is true.
-

92. Statements: $Z > Q > P = E > X < R$; $L > C < O = E > A$ Conclusions : I. $Q > C$ II. $A < Z$ In these questions, the relationship between different elements is shown in the statements. The statements are followed by conclusions. Study the conclusions based on the given statements and select the appropriate answer:

- (a) If only conclusion I is true.
 - (b) If only conclusion II is true.
 - (c) If either conclusion I or II is true.
 - (d) If both conclusions I and II are true.
 - (e) If neither conclusion I nor II is true.
-

93. Statements: $K < C$? $Y = L$? $E; I ? M = Y > F$? W Conclusions : I. $W < L$ II. $C ? I$ In these questions, the relationship between different elements is shown in the statements. The statements are followed by conclusions. Study the conclusions based on the given statements and select the appropriate answer:

- (a) If only conclusion I is true.
 - (b) If only conclusion II is true.
 - (c) If either conclusion I or II is true.
 - (d) If both conclusions I and II are true.
 - (e) If neither conclusion I nor II is true.
-

94. Statements: $A ? P > N$? $G=B; M > N ? I = L < Q$ Conclusions : I. $L ? G$ II. $G < M$ In these questions, the relationship between different elements is shown in the statements. The statements are followed by conclusions. Study the conclusions based on the given statements and select the appropriate answer:

- (a) If only conclusion I is true.
 - (b) If only conclusion II is true.
 - (c) If either conclusion I or II is true.
 - (d) If both conclusions I and II are true.
 - (e) If neither conclusion I nor II is true.
-

95. If a meaningful word is formed by using the second, fourth, eighth and eleventh letters (from the left end) of the word ?PARTICULARLY?, then which of the following will be the third letter from the left end of the word thus formed. If more than one such word is formed mark Z as your answer. If no meaningful word is formed, mark X as your answer?

- (a) X
 - (b) T
 - (c) L
 - (d) A
 - (e) Z
-

100. If in the given number ? 357986258? the digits at the odd position are increased by 1 then the digits are arranged in descending order from left to right then what is the product of the 4th digits from both the ends in the new number thus formed?

- (a) 72
 - (b) 30
 - (c) 42
 - (d) 40
 - (e) 49
-
