

Study the information carefully and answer the questions given below. A person starts his journey from point A. He walks 10m towards the east direction and reaches at point B. Now, turning to the right, he walks 5m to reach point C and then he takes a left turn and walk 10m to reach point D. From point D, he walks 10m in the north direction and reaches at point E.

6. In which direction is point A with respect to the point which is 5m north of point D?

- (a) Northwest
 - (b) West
 - (c) Northeast
 - (d) East
 - (e) None of these
-

7. Find the shortest distance between point E and A?

- (a) 17 ?5m
 - (b) 5 ?17m
 - (c) ?423m
 - (d) ?426m
 - (e) None of these
-

8. In which direction is point E with respect to point C?

- (a) Northwest
 - (b) Southwest
 - (c) Northeast
 - (d) Southeast
 - (e) None of these
-

9. If Point X is 10m west of Point E then, what is the shortest distance between Point X and Point C?

- (a) 5m
 - (b) 10m
 - (c) 15m
 - (d) 12m
 - (e) None of these
-

In each of the questions below some statements are given followed by two conclusions. You have to take the given statements to be true even if they seem to be at variance with commonly known facts. Read all the conclusions and then decide which of the given conclusions logically follows from the given statements disregarding commonly known facts.

10. Statements: Some rat is pat All pat are hak No hak is dak Conclusion I: No pat is dak II: Some rat are not dak

- (a) If only conclusion I is true
 - (b) If only conclusion II is true
 - (c) If either conclusion I or II is true
 - (d) If neither conclusion I nor II is true
 - (e) If both conclusions I and II are true
-

11. Statements: Some 22 are 34. Only a few 34 are 17. Some 17 are 12. Conclusion I: No 22 is 17. II: Some 17 is 22.

- (a) If only conclusion I is true
 - (b) If only conclusion II is true
 - (c) If either conclusion I or II is true
 - (d) If neither conclusion I nor II is true
 - (e) If both conclusions I and II are true
-

12. Statements: Only a few Sky are Blue Some Blue are Black Only a few Black are Sky No Blue is Pink Conclusion I: Some Black are Pink II: All Blue being Pink is a possibility.

- (a) If only conclusion I is true
 - (b) If only conclusion II is true
 - (c) If either conclusion I or II is true
 - (d) If neither conclusion I nor II is true
 - (e) If both conclusions I and II are true
-

13. Statements: All Lily are Sun. All Rose are Lotus No Sun is Lotus Conclusion I: All Lotus are Rose. II: No Lotus is Lily.

- (a) If only conclusion I is true
 - (b) If only conclusion II is true
 - (c) If either conclusion I or II is true
 - (d) If neither conclusion I nor II is true
 - (e) If both conclusions I and II are true
-

14. Statements: All Ear are Nose No Ear is Hand No Nose is Eye Conclusion I: All Eye are Ear II: No Eye is Hand

- (a) If only conclusion I is true
 - (b) If only conclusion II is true
 - (c) If either conclusion I or II is true
 - (d) If neither conclusion I nor II is true
 - (e) If both conclusions I and II are true
-

Study the information carefully and answer the questions given below. Eight persons B, D, F, G, H, K, L and M are sitting around a circular table facing outside the center to take corona vaccine but not necessarily in the same order. Three persons sit between L and D who is an immediate neighbour of G. One person sits between G and M who is not an immediate neighbour of L. F sits 2nd to the right of M. B sits immediate left of K.

15. Who among the following sits immediate right of F?

- (a) B
 - (b) L
 - (c) G
 - (d) H
 - (e) None of these
-

16. Four of the following five pair are alike in a certain way and so form a group. Find the one that does not belong to that group?

- (a) G-F
 - (b) H-K
 - (c) F-B
 - (d) M-B
 - (e) D-L
-

17. How many persons sit between K and F when counted to the right of K?

- (a) Four
 - (b) Two
 - (c) One
 - (d) Three
 - (e) None
-

18. The number of persons sit between H and M when counted to the left of M is the same as the number of persons sit between ____ and B when counted to the left of ____.

- (a) F
 - (b) G
 - (c) L
 - (d) D
 - (e) None of these
-

19. Who among the following sits 3rd to the left of B?

- (a) F

- (b) M
 - (c) G
 - (d) D
 - (e) H
-

Study the alphanumeric symbol series carefully and answer the questions given below: M 3 2 D % N 2 G 2 V # F 3 5 S * 7 B H @ 4 8 U 1 & A \$ * 4 Y 4

20. How many such numbers are there which are immediately preceded by an alphabet and immediately followed by a symbol?

- (a) One
 - (b) Two
 - (c) Three
 - (d) Four
 - (e) None
-

21. Which of the following element is 19th from the right end of the series?

- (a) 5
 - (b) F
 - (c) 3
 - (d) S
 - (e) None of these
-

22. How many such symbols are there which are immediately preceded by a number and immediately followed by a vowel?

- (a) Two
 - (b) None
 - (c) One
 - (d) Four
 - (e) Three
-

23. How many such alphabets are there which are immediately preceded and immediately followed by the same number?

- (a) Three
 - (b) Two
 - (c) One
 - (d) Four
 - (e) None
-

24. If all the numbers are eliminated from the given series, then, which of the following element is 11th from the right end of the series?

- (a) F
 - (b) S
 - (c) B
 - (d) *
 - (e) None of these
-

25. If 2 is subtracted from each odd digit in the given number ?4679758258? and 1 is added to each even digit in the given number, then how many digits of the following number is repeated more than two times in the new number so obtained?

- (a) None
 - (b) One
 - (c) Two
 - (d) Three
 - (e) More than three
-

Study the following information and answer the questions given below: Seven persons live in a building. During the pandemic situation, they go to the market once a week from Monday to Sunday (of the same week). Only one person goes to the market every day. Three persons go to market between F and A. F goes to market one of the days before on which A goes to market. Only one person goes to market between A and G. Two persons go to market between G and

27. Who among the following goes to the market immediately before E?

- (a) C
 - (b) G
 - (c) A
 - (d) F
 - (e) None of these
-

28. G goes to the market on which day of the week?

- (a) Friday
 - (b) Tuesday
 - (c) Monday
 - (d) Sunday
 - (e) None of these
-

29. Which of the following statement is true about A?

- (a) A goes to the market on Saturday
 - (b) E goes immediately before A
 - (c) Only two persons go between A and C
 - (d) A goes immediately after D
 - (e) None is true
-

30. How many persons go between F and E?

- (a) Four
 - (b) Three
 - (c) Two
 - (d) One
 - (e) None of these
-

Study the information carefully and answer the questions given below. There are six persons D, E, F, G, H and J living on six floors building, but not necessarily in the same order. The ground floor is numbered as 1 and the floor just above it is numbered as 2 so on till the topmost floor is numbered as 6. Each of them likes different fruits viz. Apple, Banana, Grapes, Mango, Papaya and Melon but not necessarily in the same order. E and H live on the odd number floor and they like Papaya and Melon respectively. Three persons live between H and D. The one who lives on the 6th floor likes Apple. D lives above the floor of H. The one who lives on the 2nd floor likes Grapes. J likes Mango. G does not live immediate above the floor of H.

33. Which of the following fruit F likes?

- (a) Apple
 - (b) Either apple or banana
 - (c) Grapes
 - (d) Banana
 - (e) None of these
-

34. Who among the following lives on 6th floor?

- (a) F
 - (b) G
 - (c) J
 - (d) D
 - (e) None of these
-

35. The one who likes Mango lives on which of the following floor?

- (a) 3rd floor

- (b) 5th floor
 - (c) 1st floor
 - (d) 4th floor
 - (e) None of these
-

36. Who among the following lives immediately above the floor of J?

- (a) D
 - (b) G
 - (c) F
 - (d) E
 - (e) None of these
-

37. Who among the following likes Banana?

- (a) G
 - (b) F
 - (c) D
 - (d) Either G or D
 - (e) None of these
-

41. If a sum of Rs. X invested at the rate of 20% p.a. on compound interest annually and it becomes Rs. 3456 after two years, then find the value of X.

- (a) 2400 Rs.
 - (b) 2200 Rs.
 - (c) 2000 Rs.
 - (d) 2600 Rs.
 - (e) 2800 Rs.
-

42. The speed of stream is 40% of speed of boat in still water. If the boat covers 140 km in ten hours in downstream, then find the time taken by boat to cover 60 km in upstream?

- (a) 4 hr
 - (b) 6 hr
 - (c) 8 hr
 - (d) 10 hr
 - (e) 12 hr
-

43. A work can be completed by 48 men in 80 days, in how many days 16 men can complete the 200% of the same work?

- (a) 160 days
 - (b) 480 days
 - (c) 300 days
 - (d) 180 days
 - (e) 225 days
-

44. The present age of father is 200% more than his son. If after five years the ratio of age of father to son will become 7:3, then find the father's age three years hence will be?

- (a) 39 years
 - (b) 35 years
 - (c) 31 years
 - (d) 33 years
 - (e) 37 years
-

45. Two person P and Q entered in a business with investments of Rs. 11000 and Rs. 13200 respectively. If Q left the business after ?X? months and at the end of the year P & Q got equal profit share, then find X?

- (a) 10
- (b) 9
- (c) 8
- (d) 11

(e) 7

The table chart given below shows the number of males and females in six (P, Q, R, S, T, and U) different companies. Study the data carefully and answer the question given below.

46. Total number of females in U is what percent more than total number of males in P?

- (a) 40%
 - (b) 50%
 - (c) 60%
 - (d) 45%
 - (e) 65%
-

47. Find the average number of males in R, S, and T together?

- (a) 40
 - (b) 60
 - (c) 80
 - (d) 100
 - (e) 120
-

48. Find the difference between total number of males in T and total number of females in R?

- (a) 40
 - (b) 50
 - (c) 60
 - (d) 30
 - (e) 20
-

49. Find the ratio between total numbers of females in Q to total number of males in U?

- (a) 7:8
 - (b) 3:7
 - (c) 3:8
 - (d) 5:8
 - (e) 4:7
-

50. Total number of females in S is what percent of total number of males in same class?

- (a) 60%
 - (b) 70%
 - (c) 50%
 - (d) 40%
 - (e) 30%
-

56. Gaurav bought a bike for Rs. 26600 and spent Rs. 1400 on its repairing. If he sold it for Rs. 30800, then find the profit percentage of Gaurav?

- (a) 10%
 - (b) 5%
 - (c) 20%
 - (d) 15%
 - (e) 25%
-

57. There are four consecutive even numbers. If sum of first three numbers is 108, then calculate the product of smallest and largest number?

- (a) 1260
 - (b) 1292
 - (c) 1280
 - (d) 1360
 - (e) 1428
-

58. What is the ratio between area of a circle with radius 7cm and perimeter of a circle with diameter 7 cm?

- (a) 2:1

- (b) 3:2
 - (c) 7:5
 - (d) 4:3
 - (e) 7:1
-

59. A train crosses a man, who is running in the same direction of train at the speed of 2m/sec. in 10 seconds. The same train crosses a tunnel in 54 seconds. If speed of train is 72 km/h then what is the length of tunnel?

- (a) 850 m
 - (b) 800 m
 - (c) 900 m
 - (d) 750 m
 - (e) 650 m
-

60. 70% of a number is equal to 30% of another number. If average of both numbers is 48, then find the larger number?

- (a) 28.8
 - (b) 65.2
 - (c) 67.2
 - (d) 57.2
 - (e) 48.4
-

Study the given data carefully and answer the following questions. In a college, 7000 students participated in three sports games i.e. (Tennis, Hockey and Kabaddi). The ratio between boys and girls who participated in games is 9 :5. 30% of the total boys participated in Tennis, which is 125% of the girls who participated in Hockey. Total 2530 students participated in Hockey. number of girls participated in Tennis are 20 more than that of Kabaddi. Note- A student participated in only in a particular sport.

72. Find the total number of students participated in Tennis?

- (a) 2070
 - (b) 2400
 - (c) 2530
 - (d) 2050
 - (e) 2490
-

73. Boys participated in Kabaddi is what percentage more/less than that of girls participated in the same sport?

- (d) (e)
-

74. Find the ratio between number of boys participated in Hockey to the number of girls participated in Kabaddi.

- (a) 27 :14
 - (b) 29 :15
 - (c) 29 :14
 - (d) 15 :28
 - (e) None of these
-

75. Girls participated in Tennis is what percentage of girls participated in Hockey?

- (a) 150%
 - (b) 133 ?%
 - (c) 75%
 - (d) 66 ?%
 - (e) 85%
-

Which number is wrong in the following number series.

76. 9, 14, 29, 54, 89, 134, 179

- (a) 9
- (b) 134
- (c) 179
- (d) 29

(e) 89

77. 1, 3, 7, 22, 89, 446, 2677

(a) 2677

(b) 22

(c) 89

(d) 1

(e) 446

78. 5, 8, 17, 24, 39, 48, 65

(a) 8

(b) 48

(c) 65

(d) 5

(e) 39

79. 32, 64, 16, 96, 12, 120, 8

(a) 64

(b) 96

(c) 8

(d) 120

(e) 32

80. 17, 21, 26, 33, 44, 57, 74

(a) 17

(b) 26

(c) 44

(d) 74

(e) 57
