

SBI Clerk Mains 2025

24 questions

Read the following line graph carefully and answer the questions given below. The line graph shows the total population (males + females) in four different cities in two different years. 900 800 700 600 500 400 300 200 100 0 A B C D 2023 2024

1. The ratio of total males to total females in city A in 2023 is 3:5, respectively. The total number of females in city A in 2024 is twice that in 2023. Find the difference between the total males in city A in 2023 and 2024.

- (a) 300
- (b) 225
- (c) 150
- (d) 175
- (e) 250

2. The total population in city E in 2023 is 20% more than the total population in city B in 2023. If the total population in city E in 2023 and 2024 together is 1080, then find the total population in city E in 2024.

- (a) 670
- (b) 610
- (c) 650
- (d) 620
- (e) 660

3. The total population in city B in 2022 is 10% less than the average of the total population in cities C and A in 2024. Find the ratio of the total population in city B in 2022 to the total population in city D in 2023.

- (a) 9:17
- (b) 11:12
- (c) 13: 8
- (d) 7:11
- (e) 9:19

4. The total males in city D in 2023 is 60% of the total population in city B in 2024. The total number of males in city D in 2024 is half of the total number of males in city D in 2023. Find the total number of females in city D in 2023 and 2024 together.

- (a) 540
- (b) 550
- (c) 520
- (d) 510
- (e) 530

5. The total population in city C in 2020 is 75% of the total population in city A in 2023. If 30% of the total population in city C in 2020 are males and the rest are females, then the total number of females in city C in 2020 is what percentage of the total population in city D in 2024?

- (a) 20%
- (b) 30%
- (c) 35%
- (d) 25%
- (e) 10%

6. $\frac{11}{17}$ th of the total population in city D in 2023 are literate, and $\frac{3}{5}$ th of the total population in city B in 2023 are illiterate. Find the difference between the total literate population in cities B and D together in 2023 and the total illiterate population in cities B and D together in 2023.

- (a) 180
 - (b) 190
 - (c) 120
 - (d) 140
 - (e) 150
-

Read the following information carefully and answer the questions given below. The information about the total number of students (boys and girls) in three (A, B and C) colleges. The total number of students in all three colleges together is 290. The number of boys in A is 75% of the number of girls in B. The number of girls in C is 2.2 times more than the total number of boys in C. The number of girls in A is 5 more than the number of girls in B. The number of girls in C is twice the number of girls in B. The number of boys in B is 25 more than the number of girls in A.

7. Find the difference between the total number of boys in A and B together and the total number of girls in B and C together.

- (a) 30
 - (b) 25
 - (c) 5
 - (d) 10
 - (e) 20
-

8. The total number of boys in A is what percentage of the total number of students in C?

- (a) 6.67%
 - (b) 14.28%
 - (c) 33.33%
 - (d) 28.57%
 - (e) 83.63%
-

9. Find the ratio of the total number of girls in A to the total number of boys in C.

- (a) 9:5
 - (b) 10:9
 - (c) 9:4
 - (d) 4:5
 - (e) 7:12
-

10. The total number of students in D is 20% more than that of A, and the ratio of boys in C to D is 5:7, respectively. Find the total number of girls in D.

- (a) 40
 - (b) 55
 - (c) 60
 - (d) 65
 - (e) 45
-

11. The ratio of milk to water in Jar A is 8:7, respectively. In Jar B, the ratio of milk to water is 5:8, respectively, and the water in Jar B is 3 liters less than the water in Jar A. After mixing both jars in empty jar C, the milk in the new mixture (in jar C) is 7 liters less than the water. What is the quantity of water in the jar C (in liters)?

- (a) 43
 - (b) 67
 - (c) 54
 - (d) 49
 - (e) 72
-

12. I. $6x^2 - 17x + 10 = 0$ II. $5y^2 - 28y + 15 = 0$

- (a) if $x > y$
 - (b) if $x \geq y$
 - (c) if $x < y$
 - (d) if $x \leq y$
 - (e) if $x = y$ or no relation can be established between x and y .
-

13. I. $3x^2 - 5x - 2 = 0$ II. $10y^2 + 7y = -1$

- (a) if $x > y$
 - (b) if $x \geq y$
 - (c) if $x < y$
 - (d) if $x \leq y$
 - (e) if $x = y$ or no relation can be established between x and y .
-

14. I. $6x^2 - 40x + 66 = 0$ II. $14y^2 - 58y + 60 = 0$

- (a) $x < y$
 - (b) $x > y$
 - (c) $x \leq y$
 - (d) $x \geq y$
 - (e) $x = y$ or no relation
-

What approximate value will come in place of question mark (?) in the following questions? (You are not expected to calculate the exact value)

15. $34.971\% \text{ of } 80.13 \times 20.03\% \text{ of } 250.01 - 423.87 = ? + 51.991 \times 8.13$

- (a) 580
 - (b) 550
 - (c) 570
 - (d) 560
 - (e) 590
-

16. $45.0112 \div 64.992 \times 312.211 + 361.11 = ?^2 + 11.09 \times 32.13$

- (a) 15
 - (b) 45
 - (c) 35
 - (d) 55
 - (e) 25
-

17. $? \% \text{ of } (1131.145 - 501.923 - 241.02 - 187.79) = 59.99456$

- (a) 30
- (b) 50
- (c) 40

- (d) 60
- (e) 70

18. $(? - 554.09) - 50.045\% \text{ of } (6450.01 - 42.91) = 35.79 \times 41.12 \div 369.03$

- (a) 647
- (b) 537
- (c) 679
- (d) 511
- (e) None of the above.

Read the bar graph carefully and answer the following questions. The bar graph shows the average number of students in school A and B visiting on five days. Average number of students in A and B 70 60 50 40 30 20 10 0
Monday Tuesday Wednesday Thursday Friday Average number of students in A and B Note: On Monday, students visiting from B is 16 more than A. Ratio of students visiting school on Monday to Friday from B is 10:3:5:4:6.

19. On Monday, the ratio of boy to girls visiting from A is 6:5, and boys visiting from B on Friday is equal to girl visiting from A on Monday. Find the girls visiting from B on Friday is what percentage of students visiting from A on Wednesday.

- (a) 13.33%
- (b) 12.04%
- (c) 11.01%
- (d) 14.44%
- (e) 15.55%

20. In school C total students are 20% more than average number of students visiting from B on Monday, Thursday and Friday. The ratio of students in C to D is 3:5. Find the total students in D.

- (a) 90
- (b) 100
- (c) 110
- (d) 80
- (e) 120

21. Find the average number of students in B visiting all the given days.

- (a) 33.6
- (b) 33.7
- (c) 33.3
- (d) 33.9
- (e) 33.8

22. The students from A visiting on Wednesday participated in two games kho kho and hockey. The students participated in kho-kho is 125% of hockey. Find the difference between total students participating hockey on Wednesday and total students visiting from both the schools on Thursday.

- (a) 10
- (b) 20
- (c) 30
- (d) 40
- (e) 50

23. Total students visiting from A on Monday is what percent more/less of students visiting from B on Friday.

- (a) 12.12%
 - (b) 33.33%
 - (c) 11.11%
 - (d) 22.22%
 - (e) 55.55%
-

24. If 20% and 55% of students not visiting on Monday from A and on Friday from B respectively. Find the sum of total students not visiting on Monday from A and on Wednesday from B.

- (a) 11
 - (b) 22
 - (c) 33
 - (d) 44
 - (e) 55
-
