Question 1: In the question given below, a sentence is given, divided into parts. One of the parts may contain an error. Identify the part that contains the error, and mark it as the answer. Ignore errors of punctuation. In case the sentence is correct as it is, mark option (e), that is, 'No error'. Note - The words in bold are grammatically and contextually correct.

One day, we will look back at the years where people walked down **the street**, staring down at little screens in their hands as an absurdly primitive way to interact **with information**.

- A) One day, we will look back
- B) at the years where people walked down
- C) staring down at little screens in their hands
- D) as an absurdly primitive way to interact
- E) No error

Question 2: In the question given below, a sentence is given, divided into parts. One of the parts may contain an error. Identify the part that contains the error, and mark it as the answer. Ignore errors of punctuation. In case the sentence is correct as it is, mark option (e), that is, 'No error'. Note - The words in bold are grammatically and contextually correct.

Bluetooth is said to borrow its name from ninth century Scandinavian king **Harald Bluetooth Gormsson**, who was known for his blueish-grey dead tooth and also in uniting **Denmark and Norway in 958 AD**.

- A) Bluetooth is said to borrow its name
- B) from ninth century Scandinavian king
- C) who was known for his blueish-grey
- D) dead tooth and also in uniting
- E) No error

Question 3: In the question given below, a sentence is given, divided into parts. One of the parts may contain an error. Identify the part that contains the error, and mark it as the answer. Ignore errors of punctuation. In case the sentence is correct as it is, mark option (e), that is, 'No error'. Note - The words in bold are grammatically and contextually correct.

When once our movie choices were limited by physical availability, **now we have** apparently limitless uncurated **digital content**; the mind reels at its vastness.

- A) When once our movie choices
- B) were limited by physical availability,
- C) apparently limitless uncurated
- D) the mind reels at its vastness.
- E) No error

Question 4: In the question given below, a sentence is given, divided into parts. One of the parts may contain an error. Identify the part that contains the error, and mark it as the answer. Ignore errors of punctuation. In case the sentence is correct as it is, mark option (e), that is, 'No error'. Note - The words in bold are grammatically and contextually correct.

Even though the empire acquired tremendous power and left behind **an incredible legacy**, it has largely left out of Mexican discourse, overshadowed **by the natives**.

- A) Even though the empire acquired
- B) tremendous power and left behind
- C) it has largely left out
- D) of Mexican discourse, overshadowed
- E) No error

Question 5: In the question given below, a sentence is given, divided into parts. One of the parts may contain an error. Identify the part that contains the error, and mark it as the answer. Ignore errors of punctuation. In case the sentence is correct as it is, mark option (e), that is, 'No error'. Note - The words in bold are grammatically and contextually correct.

Despite its pervasiveness, **the wifi technology** is still prone to issues, whether **it's the struggle** to set up a new device to connect with or simply being too far of range to connect.

- A) Despite its pervasiveness,
- B) is still prone to issues, whether
- C) to set up a new device to connect with

- D) or simply being too far of range to connect.
E) No error

Question 6: In the question below, a sentence is given, four words have been highlighted in bold. Find out if the words are appropriate (grammatically and contextually). Only one word will be inappropriate, mark that as your answer. If all are appropriate, mark "All are correct".

Three decades ago, the first group of human subjects **interspersed** with a mixed reality of real and virtual objects by **manually** performing tasks that **required** them to engage both physical and **simulated** objects.

- A) interspersed
B) manually
C) required
D) simulated
E) No error

Question 7: In the question below, a sentence is given, four words have been highlighted in bold. Find out if the words are appropriate (grammatically and contextually). Only one word will be inappropriate, mark that as your answer. If all are appropriate, mark "All are correct".

The P'urhépechas were one of the only **indigenous** groups in Mexico the Aztecs failed to **conquer** but despite that **feat**, they were **nearly** lost to history.

- A) indigenous
B) conquer
C) feat
D) nearly
E) No error

Directions [Set of 8 Questions]: Read the passage given below and answer the questions that follow.

After years, I found my beloved old Blytons calling out to me during the lockdown. The comforting aura of childhood favourites was necessary to tide me over this strange time, and I recalled the rapturous hours I had spent with the books in the past. As I riffled through a few pages, I was **entranced** by the familiar worlds of exploration they opened up. So, I sat and read through the evergreen novels again.

As a young reader, my favourite novels involved secret passageways, majestic palaces, rolling mountains, rushing water, cosy cottages and daring children. **Unfortunately, my reality, then and now, remains quite different.**

Today, I dream of heather, bramble, lakes in the middle of hidden mountains, creepy houses and stark moors, the isolated settings in nature, and kind friends to travel with, while I'm caught in a reality that is defined by its isolation and lack of exploration. And I wonder if I'll still crave the isolation once we return to a state of normality or if I'll be more grateful for the bustling streets I had previously scorned, and appreciative of more people, and yes, even the sun that I cannot even see from the confines of my home on many days.

In the past, reading the book would help me travel with valiant Julian, sensible Dick, scaredy-cat Anne and admirable George and Timmy the dog in their boat to Kirrin Island, thrilling over the hidden well and the clanking dungeon chains. This time, however, I considered how our current existence is similar to life on an isolated island. As we wage our battle against this invisible robber, the virus, my sometimes failing courage was soothed by reading about 12-year-old George sitting paralysed in one spot, hearing the ominous footsteps of the smugglers echo on the cold stone flags. Her determination to dodge or confront her would-be attackers, despite her fear, is something I remind myself of today.

Persistence and pluck in the face of undeniably distressing circumstances is necessary during these times. And **emulating** the qualities that the protagonists in Blyton's mystery and adventure series possess can pay off. Making the best of an unexpected situation has been the hallmark of Blyton's mysteries and adventures, and they have taught me how to overcome them with what is at hand, to keep persevering despite all odds, to leap into uncertainty and trust that one will be delivered. So, while I cannot follow suspects, jangle rusty locks on doors or tap against crumbling brick in real life, I can certainly tap into my intuition and chase leads on topics of interest to ensure that I am better equipped to deal with any new twists life (and the world) might throw my way.

Question 8: Refer to the line from the passage: "*Unfortunately, my reality, then and now, remains quite different.*" What can we infer from the above lines?

- A) The reality the author lives in does not match her dreams.

- B) Author is more aware of reality now than she was as a child.
- C) The reality the author lives in contradicts Blyton's adventures.
- D) The reality the author lives in now is different from her childhood.
- E) More than one option is correct.

Question 9: Which of the following line(s) best describes 12-year-old George's characteristic that inspired the author?

- A) George had a dauntless spirit and that inspired the author to fight her inner monsters.
- B) George was not afraid of any situation and was always ready to confront her would-be attackers.
- C) George fought her attackers even though she was paralysed and that inspired the author to fight her attackers as well.
- D) George was afraid but she chose to fight her fear to confront the ones who were about to attack her.
- E) None of the above

Question 10: The author compares the lockdown with which of the following(s)?

- I. Being trapped in a hidden well with dungeon chains.
 - II. Being trapped on an isolated island.
 - III. Being trapped in a dream that contradicts reality.
- A) Only I
 - B) Only II
 - C) Only III
 - D) Only I and III
 - E) Only II and II

Question 11: As per the author, what has/have been the hallmark of Blyton's mysteries and adventures?

- I. The author was motivated to overcome an unexpected situation with the resources at hand.
 - II. They taught the author to make the best of an unexpected situation.
 - III. The author learnt to keep working hard even if he is in a tight spot.
- A) Only I
 - B) Only II
 - C) Only I and II
 - D) Only II and III
 - E) All I, II and III

Question 12: Which of the following is the main idea of the passage?

- A) The passage discusses the influence of Blyton's books on the children of the current generation.
- B) The passage focuses on the idea of how to spend one's time during the lockdown.
- C) The passage elucidates the idea of how inspiration can be drawn from the characters in Blyton's books to overcome today's harsh realities.
- D) The passage revolves around the correlation between Blyton's mysteries and adventures and the current reality.
- E) The passage depicts the author's love for Blyton's books from her childhood to present.

Question 13: The passage is most likely extracted from:

- A) A journal of paediatrics
- B) A literary magazine
- C) An editorial
- D) A biography
- E) A book review

Question 14: Which of the following is similar in meaning to '**entranced**' as used in the passage?

- A) beguiled
- B) charred
- C) bored
- D) ingested
- E) ramified

Question 15: Which of the following is closest in meaning to the word '**emulating**' as used in the passage?

- A) imitating
- B) ratifying
- C) insinuating
- D) accentuating
- E) exerting

Question 16: In the following question, match the statement opening in column 1 to its appropriate ending in column 2 and choose the option that represents the correctly matched pair.

Column 1	Column 2
A. Swifts live a surprisingly long life of about 20 years	D. because their wings are too long and their legs are too short.
B. Thanks to the strong muscles of the lower jaw,	E. despite their high energy expenditure during flight.
C. Swifts are not even able to fly from the ground	F. the squirrel breaks and chews hard food.

- A) C and D
- B) B and E
- C) A and D
- D) A and F
- E) C and E

Question 17: In the following question, match the statement opening in column 1 to its appropriate ending in column 2 and choose the option that represents the correctly matched pair.

Column 1	Column 2
A. It's reported that the fuel UDMH rained down on the grasslands	D. than all other sources of soot combined, resulting in an enhanced warming climate effect.
B. Researchers found that particles emitted by rockets are almost 500 times more efficient at holding heat in the atmosphere	E. when it spilled out of the used first and second stages of Proton rockets and poisoned the soil for decades to come.
C. While current loss of ozone due to space launches is small, the impact of	F. space tourism launches may undermine the recovery in the ozone layer.

- A) C and F
- B) B and E
- C) A and F
- D) A and D
- E) C and E

Question 18: In the following question, match the statement opening in column 1 to its appropriate ending in column 2 and choose the option that represents the correctly matched pair.

Column 1	Column 2
A. We wanted to look more closely at how social isolation affects brain regions	D. are strongly linked to networks that support cognition.
B. Brain regions consistently involved in diverse social interactions	E. in the outer layer of the brain, consisting of neurons.

C. Social isolation needs to be examined in more detail in future studies

F. to determine the exact mechanisms behind its profound effects on our brains.

- A) C and F
- B) A and D
- C) B and E
- D) C and E
- E) A and F

Question 19: In the following question, match the statement opening in column 1 to its appropriate ending in column 2 and choose the option that represents the correctly matched pair.

Column 1	Column 2
A. Mice adapt well to urban areas and are known	D. and they had no choice but to eat the unloved product.
B. A mouse with its paws around a huge chunk of cheese looks so comical	E. for eating almost all types of food scraps.
C. It turns out that cheese was the only food available to the mice	F. that artists simply can't refuse to use a picture that makes millions of viewers smile.

- A) B and E
- B) A and D
- C) C and E
- D) A and F
- E) C and D

Question 20: In the following question, match the statement opening in column 1 to its appropriate ending in column 2 and choose the option that represents the correctly matched pair.

Column 1	Column 2
A. Choosing between a sandwich or a yogurt for lunch can increase the populations of some types of bacteria and diminish others	D. as well as anxiety, depression, hypertension and a variety of other conditions.
B. Neuroscientists have found that specific types of gut flora help a host animal detect which nutrients are missing in food	E. and then finely measure how much of those nutrients the host really needs to eat.
C. Gut microbes have been shown to influence diet and behaviour	F. and as their relative numbers change, they activate different genes and absorb different nutrients.

- A) A and D
- B) C and F
- C) C and E
- D) A and F
- E) B and F

Question 21: In the following sentence, an incorrect phrase has been highlighted. Replace the phrase in bold with the correct option(s) given below to make it a meaningful sentence.

People who **talks loudly** on their phones during meetings show little respect for their colleagues.

- I. rise their voice
- II. have been talking

III. lash out

A) Only I

B) Only II

C) Only III

D) Only I and II

E) Only II and III

Question 22: In the following sentence, an incorrect phrase has been highlighted. Replace the phrase in bold with the correct option(s) given below to make it a meaningful sentence.

While been a child, he worked in a bookstore to earn his pocket money.

I. As a child

II. As being a child

III. While he was in childhood

A) Only I

B) Only I and II

C) Only III

D) Only II

E) Only II and III

Question 23: In the following sentence, an incorrect phrase has been highlighted. Replace the phrase in bold with the correct option(s) given below to make it a meaningful sentence.

We are happy because we have **three times as many more** chocolates as you.

I. as many

II. three times as many

III. at least as many

A) Only I

B) Only II

C) Only I and II

D) Only I and III

E) All I, II and III

Question 24: In the following sentence, an incorrect phrase has been highlighted. Replace the phrase in bold with the correct option(s) given below to make it a meaningful sentence.

She ate fruits **for regaining** her energy as she was feeling weak.

I. in regaining

II. in order to

III. to regain

A) Only I

B) Only II

C) Only III

D) Only I and II

E) Only II and III

Question 25: In the following sentence, an incorrect phrase has been highlighted. Replace the phrase in bold with the correct option(s) given below to make it a meaningful sentence.

The flat bark beetle **is adapted in** surviving in extremely cold conditions.

I. is adapted to

II. is adept in

III. is adept at

A) Only II

B) Only I

C) Only III

D) Only I and III

E) Only II and III

Question 26: In the following sentence, fill in the blanks using the correct combination of words from the options given below.

Each year, millions of _____ hunters stalk the forests of North America _____ curved blades for dismembering and mesh bags for carrying their defenceless prey.

- A) unflinching, utilise
- B) intrepid, wielding
- C) daunt, plying
- D) fearless, carried
- E) petrified, employing

Question 27: In the following sentence, fill in the blanks using the correct combination of words from the options given below.

Much of modern civilization now _____ on an ever-expanding corpus of open-source code because it _____ talent and makes a lot of work easier.

- A) distrusts, allures
- B) hangs, attracted
- C) counting, draw
- D) relies, entices
- E) hinged, charms

Question 28: In the following sentence, fill in the blanks using the correct combination of words from the options given below.

Much of the world right now is _____ with heat waves but in some parts of Asia, families have _____ their own cooling rituals over generations.

- A) fighting, adopts
- B) liberating, unfolded
- C) grappling, developed
- D) dealt, formed
- E) wrestling, creating

Question 29: In the following sentence, fill in the blanks using the correct combination of words from the options given below.

Lawmakers in the US are considering ways to _____ crypto and crack down on money laundering and other _____ activities.

- A) tame, lawful
- B) check, explicitly
- C) controlling, fraud
- D) regulate, illicit
- E) constrained, unlawful

Question 30: In the following sentence, fill in the blanks using the correct combination of words from the options given below.

There is little evidence to _____ or to support the _____ that there is a direct relationship between open shelf-life dating and the actual freshness of food.

- A) disown, contend
- B) contradict, astute
- C) repudiating, argument
- D) deny, speculate
- E) negate, contention

Directions [Set of 5 Questions]: Answer the questions based on the information given below.

The table given below shows the sum of number of packets of baked goods i.e. bread (brown + white) and biscuit sold, percentage of number of biscuit packets sold out of total number of packets of baked goods sold and ratio of number of brown bread packets sold to that of white bread packets sold, by 4 different bakeries.

Bakery	Total number of packets of baked goods sold	Number of biscuit packets sold as percentage of total number of packets of baked goods sold	Ratio of number of brown bread packets sold to that of white bread packets sold

A	750	40%	5:4
B	800	35%	7:3
C	500	48%	6:7
D	600	45%	3:8

Question 31: How many packets of white bread were sold by bakery 'B'?

- A) 156
- B) 180
- C) 164
- D) 172
- E) 148

Question 32: What is the sum of number of biscuit packets and brown bread packets sold by bakery 'D'?

- A) 350
- B) 410
- C) 360
- D) 420
- E) 320

Question 33: If 32% of total number of brown bread packets sold by bakery 'A' were returned because they were past expiry date, then how many brown bread packets sold by bakery 'A' were returned because they were past expiry date?

- A) 120
- B) 96
- C) 72
- D) 80
- E) 100

Question 34: If all bakeries sell each packet of biscuits for Rs. 15, then the amount earned by bakery 'A' by selling biscuits is how much more than that by bakery 'B'?

- A) Rs. 390
- B) Rs. 300
- C) Rs. 360
- D) Rs. 450
- E) Rs. 320

Question 35: If each packet of brown bread and white bread weighs 75 gram and 50 gram, respectively, then find the total weight of all bread packets sold by bakery 'C'.

- A) 18 kg
- B) 14.5 kg
- C) 16 kg
- D) 15 kg
- E) 17.4 kg

Question 36: In the questions, two equations I and II are given. You have to solve both the equations to establish the correct relation between x and y and choose the correct option.

I. $y^4 = 625$

II. $x^2 - 8x + 15 = 0$

- A) $x > y$
- B) $x < y$
- C) $x = y$ or the relationship cannot be established
- D) $x \geq y$
- E) $x \leq y$

Question 37: In the questions, two equations I and II are given. You have to solve both the equations to establish the correct relation between x and y and choose the correct option.

I. $(x + 5)^2 = 144$

II. $y^2 - 15y + 56 = 0$

- A) $x > y$
- B) $x < y$
- C) $x = y$ or the relationship cannot be established
- D) $x \geq y$
- E) $x \leq y$

Question 38: In the questions, two equations I and II are given. You have to solve both the equations to establish the correct relation between x and y and choose the correct option.

I. $x^2 - 22x + 121 = 0$

II. $(y - 2) = (729)^{(1/3)}$

- A) $x > y$
- B) $x = y$ or the relationship cannot be established
- C) $x < y$
- D) $x \geq y$
- E) $x \leq y$

Question 39: In the questions, two equations I and II are given. You have to solve both the equations to establish the correct relation between x and y and choose the correct option.

I. $2x^2 + 13x + 20 = 0$

II. $y^2 + 11y + 30 = 0$

- A) $x > y$
- B) $x < y$
- C) $x = y$ or the relationship cannot be established
- D) $x \geq y$
- E) $x \leq y$

Question 40: In the questions, two equations I and II are given. You have to solve both the equations to establish the correct relation between x and y and choose the correct option.

I. $y^2 - 16y + 63 = 0$

II. $x^2 - 5x - 14 = 0$

- A) $x > y$
- B) $x < y$
- C) $x = y$ or the relationship cannot be established
- D) $x \geq y$
- E) $x \leq y$

Directions [Set of 5 Questions]: Answer the questions based on the information given below.

Ratio of number of ceiling fans to that of table fans sold by shop 'A' is 7:8 and total number of fans sold by the same shop is 180. Shop 'B' sold 25% more ceiling fans than shop 'A' and 15 less table fans than shop 'C'. Ratio of number of table fans sold by shops 'B' and 'C' is 5:6, respectively. Average number of table fans sold by shops 'C' and 'D' together is 103. Shop 'C' sold 153 fans in total and sum of number of ceiling fans sold by shops 'C' and 'D' is 150.

Note: Total number of fans sold by each of the given shop = Sum of number of ceiling fans and table fans sold by that shop.

Question 41: What is the total number of fans sold by shop 'D'?

- A) 214
- B) 187
- C) 196
- D) 203
- E) 210

Question 42: The number of ceiling fans sold by shop 'C' is how much percent of the number of table fans sold by shop 'B'?

- A) 76%
- B) 84%
- C) 70%

- D) 80%
- E) 82%

Question 43: What is the ratio between the number of table fans sold by shops 'A' and 'C', respectively?

- A) 16:15
- B) 12:11
- C) 9:8
- D) 15:14
- E) 7:6

Question 44: What is the average number of ceiling fans sold by shops 'A', 'B' and 'C' together?

- A) 80
- B) 72
- C) 78
- D) 90
- E) 84

Question 45: If each ceiling fan and each table fan was sold for Rs. 1,000 and Rs. 500, respectively, then difference between the revenue generated by shop 'C' by selling ceiling fans and table fans is:

- A) Rs. 21,000
- B) Rs. 16,500
- C) Rs. 18,000
- D) Rs. 19,500
- E) Rs. 15,800

Question 46: What will come in place of the question mark (?) in the following series?

10, 10.8, 12.6, 15.6, ?, 26

- A) 21.8
- B) 19.2
- C) 20
- D) 21
- E) 20.4

Question 47: What will come in place of the question mark (?) in the following series?

30, ?, 64, 93, 130, 175

- A) 43
- B) 41
- C) 45
- D) 48
- E) 42

Question 48: What will come in place of the question mark (?) in the following series?

84, 120, 71, 135, 54, ?

- A) 128
- B) 154
- C) 160
- D) 175
- E) 136

Question 49: What will come in place of the question mark (?) in the following series?

4, 6, ?, 14, 23, 40

- A) 10
- B) 8
- C) 7
- D) 12
- E) 9

Question 50: What will come in place of the question mark (?) in the following series?

154, 142, ?, 82, 34, -26

- A) 124
- B) 118
- C) 122
- D) 130
- E) 112

Directions [Set of 5 Questions]: Answer the questions based on the information given below.

The line graph given below shows the average of the number of CFL and LED bulbs used and difference between number of CFL bulbs used and number of LED bulbs used, in 5 different offices.

Note: - In all the given offices, number of LED bulbs used is more than number of CFL bulbs used.

Question 51: What is the ratio of number of LED bulbs to number of CFL bulbs, used in office 'E'?

- A) 4:3
- B) 3:2
- C) 5:3
- D) 6:5
- E) 5:4

Question 52: If in office 'A', all the CFL bulbs used are either yellow or white and the ratio of number of yellow to that of white CFL bulbs used is 7:3, respectively, then find the number of yellow CFL bulbs used in office 'A'.

- A) 105
- B) 42
- C) 98
- D) 91
- E) 112

Question 53: The number of LED bulbs used in office 'B' is how much percent of the sum of number of CFL and LED bulbs used in office 'C'?

- A) 55%
- B) 47.5%
- C) 52.5%
- D) 50%
- E) 57.5%

Question 54: The number of LED bulbs used in office 'D' is how much more than the number of CFL bulbs used in office 'B'?

- A) 30
- B) 75
- C) 60
- D) 40
- E) 50

Question 55: In office 'F', if the number of LED bulbs used is 75% of that used in office 'C' and the number of CFL bulbs used is 20% more than that used in office 'D', then find the sum of number of LED and CFL bulbs used in office 'F'.

- A) 360
- B) 400
- C) 350
- D) 320
- E) 420

Question 56: An article having cost price of Rs. 250 is marked 60% above its cost price. 'A' proposes to sell this article after two successive discounts of 20% and Rs. 12 while 'B' proposes to sell it after a single discount of 25%. What is the difference between the selling prices proposed by 'A' and 'B'?

- A) Rs. 20
- B) Rs. 8
- C) Rs. 15
- D) Rs. 12
- E) Rs. 10

Question 57: 'A' alone can complete 60% of a work in 18 days while 'B' takes 15 days more than 'A' to complete it. If 'B' and 'C' together can complete the work in 20 days, then find the time taken by 'C' alone to complete the same work.

- A) 36 days
- B) 40 days
- C) 32 days
- D) 24 days
- E) 30 days

Question 58: 'A' and 'B' together started a business where 'B' invested Rs. 200 more than 'A'. 6 months later, 'A' increased his investment by 50%. Out of the total annual profit of Rs. 2,900, if the profit share of 'A' was Rs. 100 more than that of 'B', then find the investment made by 'A', initially.

- A) Rs. 1,400
- B) Rs. 1,120
- C) Rs. 1,000
- D) Rs. 1,200
- E) Rs. 1,080

Question 59: Anand usually travels from city 'A' to 'B' at 24 km/h. On a certain day he travelled 40% of the distance at 125% of his usual speed and remaining distance at 75% of his usual speed such that he took 1.5 hours more than usual. Find the distance between city 'A' and 'B'.

- A) 300 km
- B) 360 km
- C) 315 km
- D) 280 km
- E) 400 km

Question 60: The area of a playground is 16500 m^2 . The radius and length of a cylindrical roller is 7 metres and 15 metres, respectively. In how many revolutions will the roller level the entire area of the ground once?

- A) 28
- B) 20
- C) 22
- D) 30
- E) 25

Question 61: Mixture 'A' contains only acid and water in the ratio 11:4, respectively. 100 litres of mixture 'B' (acid + water) contains 30 litres more acid than water in it. If mixtures 'A' and 'B' are mixed together, then acid forms 70% of the resultant mixture. Find the quantity of water in mixture 'A'.

- A) 60 litres
- B) 36 litres
- C) 40 litres
- D) 48 litres
- E) 32 litres

Question 62: A boat can travel 77 km in upstream in 165 minutes and the speed of the stream is 12.5% of the speed of the boat in still water. Find the time taken by the boat to travel 81 km in downstream.

- A) 150 minutes
- B) 135 minutes
- C) 130 minutes
- D) 140 minutes
- E) 145 minutes

Question 63: The interest earned on investing Rs. 'Y' for 4 years at simple interest of 15% p.a. is Rs. 160 more than the interest earned on investing Rs. (Y - 500) for 4 years at simple interest of 16% p.a. Find the value of 'Y'.

- A) 4800
- B) 4500
- C) 3800
- D) 4000
- E) 4200

Question 64: At the time of marriage, the ratio of ages of the husband and his wife was 6:7, respectively. 6 years hence from marriage, the husband's age was 50% more than it was 4 years before marriage. What was the age of wife at the time of marriage?

- A) 28 years
- B) 30 years
- C) 35 years
- D) 21 years
- E) 32 years

Question 65: Out of his monthly income of Rs. 25,000, Mukesh spent 32% on rent, 52% of the remaining on other things and saved the rest. Find 75% of his monthly savings.

- A) Rs. 7,120
- B) Rs. 6,600
- C) Rs. 6,480
- D) Rs. 7,200
- E) Rs. 6,120

Directions [Set of 5 Questions]: Answer the questions based on the information given below.

Nine persons (Bina, Bira, Nina, Mina, John, Ali, Era, Amit, and Atul) live on different floors of a nine-floor building such that the bottommost floor is numbered as 1 and the topmost floor is numbered as 9. The person, whose initials start with vowel, lives on prime numbered floor. Some of the persons belong to different countries.

Amit lives two floors above Ali. Era lives below Atul, who belongs to India. Mina lives above Amit. The person, who belongs to China, lives one floor above Mina. Bina, who belongs to Italy, lives two floors above Bira. Nina belongs to Japan. More than one person lives between Atul and John.

Question 66: _____ belongs to China.

- A) Bira
- B) Era
- C) John
- D) Cannot be determined
- E) Ali

Question 67: _____ lives one floor below Amit.

- A) Bira
- B) Nina
- C) John
- D) Bina
- E) None of the above

Question 68: If the person, who lives one floor above Nina, belongs to Nepal, then how many persons live between Bina and the person, who belongs to Nepal?

- A) Four
- B) Three
- C) Two
- D) One
- E) None of the above

Question 69: Which of the following statements is/are definitely correct?

- I. Nina lives on 9th floor
 - II. Era lives on 2nd floor
 - III. Mina lives on 8th floor
- A) Only I and II
 - B) Only II and III
 - C) Only I and III
 - D) Only III
 - E) None of the above

Question 70: Which of the following person lives below Bira?

- A) John
- B) Mina
- C) Amit
- D) Nina
- E) None of the above

Question 71: In the following question the relationship between different elements are given in the statements followed by three conclusions I, II, and III. Read the statements carefully and mark your answer accordingly.

Statements: $Z \geq A \geq B = C > D, D > E = F \geq G < H \leq J$

Conclusions:

- I. $H > D$
 - II. $Z \geq C$
 - III. $G < B$
- A) Only conclusion I is true
 - B) Only conclusion II is true
 - C) Only conclusion III is true
 - D) Only conclusions II and III are true
 - E) Only conclusions I and III are true

Question 72: In the following question the relationship between different elements are given in the statements followed by three conclusions I, II, and III. Read the statements carefully and mark your answer accordingly.

Statements: $N < L = R \leq M; M < T < U > V \geq W$

Conclusions:

- I. $W < T$
 - II. $N > V$
 - III. $N < U$
- A) Only conclusion II is true
 - B) Only conclusion I is true
 - C) Only conclusions I and II are true
 - D) Only conclusions II and III are true

E) Only conclusion III is true

Question 73: In the following question the relationship between different elements are given in the statements followed by three conclusions I, II, and III. Read the statements carefully and mark your answer accordingly.

Statements: $Q < M \leq S = K$; $K = T \geq U = L$; $V < O = P < L$

Conclusions:

I. $L < S$

II. $L = S$

III. $Q < P$

A) Only conclusion I is true

B) Only conclusion II is true

C) Either conclusion I or II is true and conclusion III is false

D) Only conclusions I and II are true

E) Only conclusion III is true

Directions [Set of 5 Questions]: Answer the questions based on the information given below.

Ten persons (A, B, C, D, E, F, G, H, I, and J) went to Manali on two different dates (9th and 18th) of five different months (March, April, June, August, and September) of year 2021 after the roll back of Covid-19 travel restrictions, but not necessarily in the same order. Only the persons, who went on odd numbered dates, use different mobiles i.e., Sony, Lava, Apple, Spice, and Max.

E, who uses Lava, went on 9th of a month, which has only 30 days. J, who uses Sony, went exactly two months after E (both went on same date). Both D and A went in the same month, but after J. A doesn't went in August. H, who uses Apple and G went in the same month. A and H went on the same date of different months. F went immediately before I but not in the same month. B went before F but not in the same month. More than four persons went between B and D. I doesn't uses Max.

Question 74: Which of the following person went on 18th August?

A) A

B) D

C) C

D) G

E) H

Question 75: _____ and _____ went in June.

A) J, H

B) I, J

C) J, F

D) B, J

E) None of the above

Question 76: G went on _____.

A) 9th March

B) 18th March

C) 9th August

D) 9th September

E) 18th September

Question 77: _____ persons went between D and the person, who uses Spice.

A) One

B) None

C) Two

D) Three

E) None of the above

Question 78: _____ went exactly three months after J.

A) One, who uses Apple

B) One, who uses Lava

C) One, who uses Sony

- D) One, who uses Max
- E) None of the above

Directions [Set of 4 Questions]: Answer the questions based on the information given below.

In a certain code language,

- I. 'pure river vastly polluted' is coded as 'lbl, tut, mnm, qrq'
- II. 'polluted stream cause disease' is coded as 'cdc, aba, lbl, nkn'
- III. 'disease vastly spread everywhere' is coded as 'cdc, tut, hgh, jgj'
- IV. 'cause of disease spread' is coded as 'cdc, xlx, aba, jgj'

Question 79: _____ is coded as 'mnm' in the code language.

- A) pure
- B) river
- C) vastly
- D) polluted
- E) Cannot be determined

Question 80: What is the code for 'river spread stream'?

- A) qrq, nkn, hgh
- B) mnm, nkn, jgj
- C) xlx, mnm, nkn
- D) qrq, nkn, jgj
- E) Either 'b' or 'd'

Question 81: Which of the following word is coded as 'aba'?

- A) disease
- B) vastly
- C) cause
- D) polluted
- E) spread

Question 82: What can be the possible code for 'severe disease'?

- A) cdc, mnm
- B) qrq, aba
- C) cdc, geg
- D) xlx, cdc
- E) nkn, cdc

Directions [Set of 5 Questions]: Answer the questions based on the information given below.

Eight persons sit in two parallel rows. Four persons (A, B, C, and D) sit in row 1 facing north direction. Four persons (P, Q, R, and S) sit in row 2 facing south direction. Persons, who sit in row 1 face the persons, who sits in row 2 and vice-versa. Distance between any two adjacent persons is same. Each person has different age (in years) (40, 42, 43, 45, 48, 50, 51, and 55). P is elder than A, but younger than Q. One person sits between A and B. R faces D, who age is not 48 years old. The eldest person sits 2nd to the left of Q. The eldest person doesn't face the youngest person. B's age is a prime number. B, who doesn't sit at extreme end, sits immediate left of C, who is 3 years younger than D. Only S is elder than R.

Question 83: What is the age of the person, who faces C?

- A) 50 years
- B) 55 years
- C) 51 years
- D) 40 years
- E) None of the above

Question 84: What is the absolute difference between the age of A and P?

- A) 3 years
- B) 2 years
- C) 5 years

- D) 8 years
- E) None of the above

Question 85: Q is ____ years elder than the person, who faces S.

- A) 3 years
- B) 5 years
- C) 7 years
- D) 2 years
- E) None of the above

Question 86: ____ sits 2nd to the right of the person, who faces the person, whose age is 51 years.

- A) C
- B) B
- C) A
- D) P
- E) Q

Question 87: What is the position of A with respect to the person, whose age is 45 years?

- A) Immediate right
- B) 3rd to the left
- C) 3rd to the right
- D) Immediate left
- E) None of the above

Question 88: If even position letters of the word 'PERMUTATION' from the left end, are replaced by the consecutive vowels (A, E, I, O and U) starting from A, of the English alphabetical series in the same sequence, then there are ____ number of consonants in the word after replacement.

- A) None
- B) Two
- C) Three
- D) One
- E) More than three

Question 89: How many such pair(s) of digits is in the number "9452347" which has as many digits between them (both forward and backward) as in the number series?

- A) Five
- B) Four
- C) Six
- D) Seven
- E) None of the above

Directions [Set of 3 Questions]: Answer the questions based on the information given below.

Certain number of persons sits in a linear row facing towards the north direction. No seat is vacant. S sits in the middle of the row. M sits 4th to the left of Q. Two persons sit between S and M. T sits 7th to the left of M, who sits 2nd to the right of E. T sits 2nd from one of the extreme ends of row. L sits 4th from one of the extreme ends of row. More than two persons sit between E and L.

Question 90: How many persons sit in the row?

- A) 25
- B) 27
- C) 21
- D) 23
- E) None of the above

Question 91: ____ persons sit between L and Q.

- A) Five
- B) Six
- C) Three
- D) Nine

E) None of the above

Question 92: If N sits 2nd to the left of Q, then, what is the position of N with respect to E?

- A) 3rd to the left
- B) 3rd to the right
- C) 4th to the right
- D) 4th to the left
- E) None of the above

Question 93: In the question below some statements are given followed by three conclusions I, II and III. You have to take the given statements to be true even if they seem to be at variance with commonly known facts. Read all the conclusions and then decide which of the given conclusion definitely follows from the given statements, disregarding commonly known facts.

Statements:

Only Sigma are Beta
No Sigma are Pie
Only a few Pie are Lambda
All Alpha are Lambda

Conclusions:

- I. A few Alpha being Beta is a possibility
 - II. All Pie are Alpha
 - III. Some Lambda are not Beta
- A) Only conclusion III follows
 - B) Only conclusion I follows
 - C) Only conclusion II follows
 - D) Only conclusions I and II follow
 - E) Only conclusions II and III follow

Question 94: In the question below some statements are given followed by three conclusions I, II and III. You have to take the given statements to be true even if they seem to be at variance with commonly known facts. Read all the conclusions and then decide which of the given conclusion definitely follows from the given statements, disregarding commonly known facts.

Statements:

All Food are Cereal
A few Cereal are Grains
Only a few Grains are Pulses
Only Cereal are Wheat

Conclusions:

- I. At least some Food are Wheat
 - II. All Grains are not Wheat
 - III. Some Grains are definitely not Pulses
- A) Only conclusion III follows
 - B) Only conclusion I follows
 - C) Only conclusion II follows
 - D) Only conclusions I and II follow
 - E) Only conclusions II and III follow

Directions [Set of 4 Questions]: Answer the questions based on the information given below.

Eight persons (P, Q, R, S, T, U, V, and W) sit around a circular table equidistant from one another. Each person faces towards the center of the table.

Two persons sit between S and T (from either side of the table). One of the immediate neighbours of T, sits 2nd to the left of P. W sits 2nd to the right of R. U sits immediate right of P. Q doesn't sit adjacent to W. S doesn't sit adjacent to Q.

Question 95: _____ sits 3rd to the right of V.

- A) P
- B) R
- C) U
- D) W

E) None of the above

Question 96: How many persons sit between T and Q, when counted from left of T?

- A) Three
- B) Four
- C) Two
- D) One
- E) None of the above

Question 97: Four of the following five are alike in a certain way based on a group, which among the following does not belong to that group?

- A) U and W
- B) T and R
- C) V and Q
- D) W and Q
- E) P and S

Question 98: If all the persons sit in alphabetical order starting from P (In anti- clockwise direction), then, who will remain in its initial position after the rearrangement (except P)?

- A) S
- B) T
- C) U
- D) V
- E) W

Directions [Set of 2 Questions]: Answer the questions based on the information given below.

Seven persons (M, N, O, P, Q, R, and S) belong to a family of three generations. There are two married couples in the family. No single person in the family is a parent.

Q is only grandchild of S. O has three children and one of them is married. R is maternal uncle of Q. M and N are male members of the family. N is unmarried. Both O and P have one daughter.

Question 99: How is S related to N?

- A) Father
- B) Mother
- C) Brother-in-law
- D) Sister-in-law
- E) Cannot be determined

Question 100: _____ is father of niece of R.

- A) P
- B) M
- C) S
- D) O
- E) None of the above

निर्देश [5 प्रश्नों का सेट]: नीचे दी गई जानकारी के आधार पर प्रश्नों के उत्तर दें।

नीचे दी गई तालिका में 4 अलग-अलग बेकरियों द्वारा बेचे गए baked goods अर्थात् bread (brown + white) और biscuit के पैकेटों की संख्या का योग, बेचे गए baked goods के पैकेटों की कुल संख्या में से बेचे गए biscuit के पैकेटों की संख्या का प्रतिशत तथा बेचे गए brown bread के पैकेटों की संख्या और बेचे गए white bread के पैकेटों की संख्या के अनुपात दिखाया गया है।

Bakery	Total number of packets of baked goods sold	Number of biscuit packets sold as percentage of total number of packets	Ratio of number of brown bread packets sold to that of white

		of baked goods sold	bread packets sold
A	750	40%	5:4
B	800	35%	7:3
C	500	48%	6:7
D	600	45%	3:8

प्रश्न 31: बेकरी 'B' द्वारा white bread के कितने पैकेट बेचे गए?

A) 156180164172148

प्रश्न 32: बेकरी 'D' द्वारा बेचे गए biscuit के पैकेट और brown bread के पैकेटों की संख्या का योग कितना है?

- A) 350
B) 410
C) 360
D) 420
E) 320

प्रश्न 33: यदि बेकरी 'A' द्वारा बेचे गए brown bread पैकेटों की कुल संख्या का 32% वापस कर दिया गया था क्योंकि वे समाप्ति की तिथि को पार कर चुके थे, तो बेकरी 'A' द्वारा बेचे गए उन brown bread पैकेटों की संख्या कितनी है जिसे वापस कर दिया गया था क्योंकि वे समाप्ति की तिथि को पार कर चुके थे?

- A) 120
B) 96
C) 72
D) 80
E) 100

प्रश्न 34: यदि सभी बेकरी biscuits के प्रत्येक पैकेट को Rs. 15 में बेचा गया, तो बेकरी 'A' द्वारा biscuits बेचकर अर्जित की गई राशि, बेकरी 'B' द्वारा अर्जित की गई राशि से कितनी अधिक है?

A) Rs. 390Rs. 300Rs. 360Rs. 450Rs. 320

प्रश्न 35: यदि brown bread और white bread के प्रत्येक पैकेट का वजन क्रमशः 75 gram और 50 gram है, तो बेकरी 'C' द्वारा बेचे गए सभी bread पैकेटों का कुल वजन ज्ञात कीजिए।

A) 18 kg14.5 kg16 kg15 kg17.4 kg

प्रश्न 36: प्रश्नों में दो समीकरण I और II दिए गए हैं। आपको x और y के बीच सही संबंध स्थापित करने के लिए दोनों समीकरणों को हल करना है और सही विकल्प चुनना है।

I. $y^4 = 625$

II. $x^2 - 8x + 15 = 0$

- A) $x > y$
B) $x < y$
C) $x = y$ या सम्बन्ध स्थापित नहीं किया जा सकता
D) $x \geq y$
E) $x \leq y$

प्रश्न 37: प्रश्नों में दो समीकरण I और II दिए गए हैं। आपको x और y के बीच सही संबंध स्थापित करने के लिए दोनों समीकरणों को हल करना है और सही विकल्प चुनना है।

I. $(x + 5)^2 = 144$

II. $y^2 - 15y + 56 = 0$

A) $x > y$

B) $x < y$

C) $x = y$ या सम्बन्ध स्थापित नहीं किया जा सकता

D) $x \geq y$

E) $x \leq y$

प्रश्न 38: प्रश्नों में दो समीकरण I और II दिए गए हैं। आपको x और y के बीच सही संबंध स्थापित करने के लिए दोनों समीकरणों को हल करना है और सही विकल्प चुनना है।

I. $x^2 - 22x + 121 = 0$

II. $(y - 2) = (729)^{(1/3)}$

A) $x > y$

B) $x = y$ या सम्बन्ध स्थापित नहीं किया जा सकता

C) $x < y$

D) $x \geq y$

E) $x \leq y$

प्रश्न 39: प्रश्नों में दो समीकरण I और II दिए गए हैं। आपको x और y के बीच सही संबंध स्थापित करने के लिए दोनों समीकरणों को हल करना है और सही विकल्प चुनना है।

I. $2x^2 + 13x + 20 = 0$

II. $y^2 + 11y + 30 = 0$

A) $x > y$

B) $x < y$

C) $x = y$ या सम्बन्ध स्थापित नहीं किया जा सकता

D) $x \geq y$

E) $x \leq y$

प्रश्न 40: प्रश्नों में दो समीकरण I और II दिए गए हैं। आपको x और y के बीच सही संबंध स्थापित करने के लिए दोनों समीकरणों को हल करना है और सही विकल्प चुनना है।

I. $y^2 - 16y + 63 = 0$

II. $x^2 - 5x - 14 = 0$

A) $x > y$

B) $x < y$

C) $x = y$ या सम्बन्ध स्थापित नहीं किया जा सकता

D) $x \geq y$

E) $x \leq y$

निर्देश [5 प्रश्नों का सेट]: नीचे दी गई जानकारी के आधार पर प्रश्नों के उत्तर दें।

दुकान 'A' द्वारा बेचे गए ceiling fans और table fans की संख्या का अनुपात 7:8 है और उसी दुकान द्वारा बेचे गए fans की कुल संख्या 180 है। दुकान 'B' ने दुकान 'A' की तुलना में 25% अधिक ceiling fans और दुकान 'C' से 15 कम table fans बेचे। दुकान 'B' और 'C' द्वारा बेचे गए table fans की संख्या का अनुपात क्रमशः 5:6 है। दुकान 'C' और 'D' द्वारा

बेचे गए table fans की औसत संख्या 103 है। दुकान 'C' ने कुल 153 fans बेचे तथा दुकान 'C' और 'D' द्वारा बेचे गए ceiling fans की संख्या का योग 150 है।

नोट: दी गई प्रत्येक दुकान द्वारा बेचे गए fans की कुल संख्या = उस दुकान द्वारा बेचे गए ceiling fans और table fans की संख्या का योग।

प्रश्न 41: दुकान 'D' द्वारा बेचे गए fans की कुल संख्या कितनी है?

- A) 214
- B) 187
- C) 196
- D) 203
- E) 210

प्रश्न 42: दुकान 'C' द्वारा बेचे गए ceiling fans की संख्या, दुकान 'B' द्वारा बेचे गए table fans की संख्या का कितना प्रतिशत है?

- A) 76%84%70%80%82%

प्रश्न 43: दुकान 'A' और 'C' द्वारा बेचे गए table fans की संख्या के बीच क्रमशः अनुपात कितना है?

- A) 16:15
- B) 12:11
- C) 9:8
- D) 15:14
- E) 7:6

प्रश्न 44: दुकान 'A', 'B' और 'C' द्वारा बेचे गए ceiling fans की औसत संख्या कितनी है?

- A) 80
- B) 72
- C) 78
- D) 90
- E) 84

प्रश्न 45: यदि प्रत्येक ceiling fan और प्रत्येक table fan को क्रमशः Rs. 1000 और Rs. 500 में बेचा जाता है, तो दुकान 'C' द्वारा ceiling fans और table fans की बिक्री से प्राप्त राजस्व के बीच का अंतर कितना है:

- A) Rs. 21,000Rs. 16,500Rs. 18,000Rs. 19,500Rs. 15,800

प्रश्न 46: निम्नलिखित श्रृंखला में प्रश्नवाचक चिन्ह (?) के स्थान पर क्या आएगा?

10, 10.8, 12.6, 15.6, ?, 26

- A) 21.8
- B) 19.2
- C) 20
- D) 21
- E) 20.4

प्रश्न 47: निम्नलिखित श्रृंखला में प्रश्नवाचक चिन्ह (?) के स्थान पर क्या आएगा?

30, ?, 64, 93, 130, 175

- A) 43
- B) 41

- C) 45
D) 48
E) 42

प्रश्न 48: निम्नलिखित श्रृंखला में प्रश्नवाचक चिन्ह (?) के स्थान पर क्या आएगा?

84, 120, 71, 135, 54, ?

- A) 128
B) 154
C) 160
D) 175
E) 136

प्रश्न 49: निम्नलिखित श्रृंखला में प्रश्नवाचक चिन्ह (?) के स्थान पर क्या आएगा?

4, 6, ?, 14, 23, 40

- A) 1087129

प्रश्न 50: निम्नलिखित श्रृंखला में प्रश्नवाचक चिन्ह (?) के स्थान पर क्या आएगा?

154, 142, ?, 82, 34, -26

- A) 124
B) 118
C) 122
D) 130
E) 112

निर्देश [5 प्रश्नों का सेट]: नीचे दी गई जानकारी के आधार पर प्रश्नों के उत्तर दें।

नीचे दिया गया line graph 5 विभिन्न कार्यालयों में उपयोग किए गए CFL और LED bulbs की संख्या का औसत और उपयोग किए गए CFL bulbs की संख्या और उपयोग किए गए LED bulbs की संख्या के बीच अंतर को दर्शाता है।

नोट:- दिए गए सभी कार्यालयों में उपयोग किए गए LED bulbs की संख्या उपयोग किए गए CFL bulbs की संख्या से

अधिक है।

प्रश्न 51: कार्यालय 'E' में, उपयोग किये गये LED bulbs की संख्या और CFL bulbs की संख्या का अनुपात कितना है?

- A) 4:3
- B) 3:2
- C) 5:3
- D) 6:5
- E) 5:4

प्रश्न 52: यदि कार्यालय 'A' में, उपयोग किए गए सभी CFL bulbs या तो पीले या सफेद हैं और उपयोग किये गये पीले और सफेद रंग के CFL bulbs की संख्या का अनुपात क्रमशः 7:3 है, तो कार्यालय 'A' में उपयोग किए गये पीले CFL bulbs की संख्या ज्ञात कीजिए।

- A) 105
- B) 42
- C) 98
- D) 91
- E) 112

प्रश्न 53: कार्यालय 'B' में उपयोग किये गये LED bulbs की संख्या कार्यालय 'C' में उपयोग किये गये CFL और LED bulbs की संख्या के योग का कितना प्रतिशत है?

- A) 55%
- B) 47.5%
- C) 52.5%
- D) 50%
- E) 57.5%

प्रश्न 54: कार्यालय 'D' में उपयोग किये गये LED bulbs की संख्या कार्यालय 'B' में उपयोग किये गये CFL bulbs की संख्या से कितनी अधिक है?

- A) 30
- B) 75
- C) 60
- D) 40
- E) 50

प्रश्न 55: कार्यालय 'F' में, यदि उपयोग किए गए LED bulbs की संख्या कार्यालय 'C' में उपयोग किए गए LED bulbs की संख्या का 75% है और उपयोग किए गए CFL bulbs की संख्या कार्यालय 'D' में उपयोग किए जाने वाले CFL bulbs की संख्या से 20% अधिक है, तो कार्यालय 'F' में उपयोग किए जाने वाले LED और CFL bulbs की संख्या का योग ज्ञात कीजिए।

- A) 360
- B) 400
- C) 350
- D) 320
- E) 420

प्रश्न 56: एक वस्तु, जिसका क्रय मूल्य Rs. 250 है, को उसके क्रय मूल्य से 60% अधिक अंकित किया जाता है। 'A' 20% और Rs. 12 की दो क्रमिक छूट के बाद इस वस्तु को बेचने का प्रस्ताव करता है जबकि 'B' इसे 25% की एकल छूट के बाद बेचने का प्रस्ताव करता है। 'A' और 'B' द्वारा प्रस्तावित बिक्री मूल्य के बीच का अंतर कितना है?

- A) Rs. 20

- B) Rs. 8
- C) Rs. 15
- D) Rs. 12
- E) Rs. 10

प्रश्न 57: 'A' अकेले किसी काम के 60% को 18 दिनों में पूरा कर सकता है जबकि 'B' उसे पूरा करने में 'A' से 15 दिन अधिक लेता है। यदि 'B' और 'C' साथ में काम को 20 दिनों में पूरा कर सकते हैं, तो अकेले 'C' द्वारा समान काम को पूरा करने में लिया गया समय ज्ञात कीजिए।

- A) 36 दिन
- B) 40 दिन
- C) 32 दिन
- D) 24 दिन
- E) 30 दिन

प्रश्न 58: 'A' और 'B' ने मिलकर एक व्यवसाय शुरू किया जहां 'B' ने 'A' से Rs. 200 अधिक का निवेश किया। 6 महीने बाद, 'A' ने अपने निवेश में 50% की वृद्धि की। Rs. 2,900 के कुल वार्षिक लाभ में से यदि 'A' का लाभ हिस्सा 'B' से Rs. 100 अधिक है, तो प्रारंभ में 'A' द्वारा किया गया निवेश ज्ञात कीजिए।

- A) Rs. 1,400
- B) Rs. 1,120
- C) Rs. 1,000
- D) Rs. 1,200
- E) Rs. 1,080

प्रश्न 59: आनंद आमतौर पर शहर 'A' से 'B' तक 24 km/h की गति से यात्रा करता है। एक निश्चित दिन पर उसने 40% दूरी को अपनी सामान्य गति के 125% से और शेष दूरी को अपनी सामान्य गति के 75% से इस प्रकार तय किया कि वह सामान्य से 1.5 hours अधिक समय लेता है। शहर 'A' और 'B' के बीच की दूरी कितनी है?

- A) 300 km
- B) 360 km
- C) 315 km
- D) 280 km
- E) 400 km

प्रश्न 60: एक खेल के मैदान का क्षेत्रफल 16500 m^2 है। एक बेलनाकार रोलर की त्रिज्या और लंबाई क्रमशः 7 metres और 15 metres है। रोलर मैदान के पूरे क्षेत्र को एक बार कितने चक्करों में समतल करेगा?

- A) 28
- B) 20
- C) 22
- D) 30
- E) 25

प्रश्न 61: मिश्रण 'A' में केवल एसिड और पानी क्रमशः 11:4 के अनुपात में हैं। 100 litres मिश्रण 'B' (एसिड + पानी) में पानी से 30 litres अधिक एसिड होता है। यदि मिश्रण 'A' और 'B' को एक साथ मिलाया जाता है, तो एसिड परिणामी मिश्रण का 70% बनता है। मिश्रण 'A' में पानी की मात्रा ज्ञात कीजिए।

- A) 60 litres
- B) 36 litres
- C) 40 litres
- D) 48 litres
- E) 32 litres

प्रश्न 62: एक नाव धारा विरुद्ध में 77 km की यात्रा 165 मिनट में कर सकती है और धारा की गति शांत पानी में नाव की गति का 12.5% है। नाव द्वारा धारा अनुप्रवाह में 81 km की यात्रा करने में लिया गया समय ज्ञात कीजिए।

- A) 150 minutes
- B) 135 minutes
- C) 130 minutes
- D) 140 minutes
- E) 145 minutes

प्रश्न 63: Rs. 'Y' को 4 वर्ष के लिए 15% प्रति वर्ष के साधारण ब्याज पर निवेश करने पर अर्जित ब्याज Rs. (Y - 500) को 16% प्रति वर्ष के साधारण ब्याज पर 4 वर्षों के लिए निवेश करने पर अर्जित ब्याज से Rs. 160 अधिक है। 'Y' का मान ज्ञात कीजिए।

- A) 4800
- B) 4500
- C) 3800
- D) 4000
- E) 4200

प्रश्न 64: विवाह के समय, पति और पत्नी की आयु का अनुपात क्रमशः 6:7 था। विवाह के 6 वर्ष बाद, पति की आयु विवाह से 4 वर्ष पहले उसकी आयु से 50% अधिक थी। विवाह के समय पत्नी की आयु कितनी थी?

- A) 28 वर्ष
- B) 30 वर्ष
- C) 35 वर्ष
- D) 21 वर्ष
- E) 32 वर्ष

प्रश्न 65: मुकेश ने Rs. 25,000 की अपनी मासिक आय में से, किराए पर 32% खर्च किया, शेष का 52% अन्य चीजों पर खर्च किया और शेष को बचा लिया। उसकी मासिक बचत का 75% ज्ञात कीजिए।

- A) Rs. 7,120
- B) Rs. 6,600
- C) Rs. 6,480
- D) Rs. 7,200
- E) Rs. 6,120

निर्देश [5 प्रश्नों का सेट]: नीचे दी गई जानकारी के आधार पर प्रश्नों के उत्तर दें।

नौ व्यक्ति (Bina, Bira, Nina, Mina, John, Ali, Era, Amit, और Atul) एक नौ-तलीय इमारत के विभिन्न तल पर इस तरह रहते हैं कि सबसे नीचे की तल की संख्या 1 है और सबसे ऊपरी तल की संख्या 9 है। वह व्यक्ति, जिसके आद्याक्षर vowel से शुरू होते हैं, अभाज्य संख्या से अंकित तल पर रहते हैं। कुछ व्यक्ति अलग-अलग देश से सम्बंधित हैं।

Amit Ali से दो तल ऊपर रहता है। Era Atul के नीचे रहता है और Atul India से सम्बंधित है। Mina Amit के ऊपर रहती है। वह व्यक्ति, जो China से सम्बंधित है, Mina से एक तल ऊपर रहता है। Bina, जो Italy से सम्बंधित है, Bira से दो तल ऊपर रहती है। Nina Japan से सम्बंधित है। Atul और John के बीच एक से अधिक व्यक्ति रहते हैं।

प्रश्न 66: _____ China से सम्बंधित है।

- A) Bira
- B) Era
- C) John
- D) निर्धारित नहीं किया जा सकता
- E) Ali

प्रश्न 67: _____ Amit से एक तल नीचे रहता है।

- A) Bira
- B) Nina
- C) John
- D) Bina
- E) उपरोक्त में से कोई नहीं

प्रश्न 68: यदि वह व्यक्ति, जो Nina से एक तल ऊपर रहता है, Nepal से संबंधित है, तो Bina और उस व्यक्ति के बीच कितने व्यक्ति रहते हैं जो Nepal से संबंधित है?

- A) चार
- B) तीन
- C) दो
- D) एक
- E) उपरोक्त में से कोई नहीं

प्रश्न 69: निम्नलिखित में से कौन सा कथन निश्चित रूप से सत्य है?

- I. Nina नौवें तल पर रहती है
- II. Era दूसरे तल पर रहती है
- III. Mina आठवें तल पर रहती है

- A) केवल I और II
- B) केवल II और III
- C) केवल I और III
- D) केवल III
- E) उपरोक्त में से कोई नहीं

प्रश्न 70: निम्नलिखित में से कौन सा व्यक्ति Bira के नीचे रहता है?

- A) John
- B) Mina
- C) Amit

- D) Nina
E) उपरोक्त में से कोई नहीं

प्रश्न 71: निम्नलिखित प्रश्न में कथनों में विभिन्न तत्वों के बीच संबंध दिए गए हैं जिसके बाद तीन निष्कर्ष I, II और III दिए गए हैं। कथनों को ध्यानपूर्वक पढ़िए और तदनुसार अपना उत्तर अंकित कीजिए।

कथन: $Z \geq A \geq B = C > D, D > E = F \geq G < H \leq J$

निष्कर्ष:

- I. $H > D$
II. $Z \geq C$
III. $G < B$

- A) केवल निष्कर्ष I सही है केवल निष्कर्ष II सही है केवल निष्कर्ष III सही है
B) केवल II और III निष्कर्ष सत्य है
C) केवल I और III निष्कर्ष सत्य है

प्रश्न 72: निम्नलिखित प्रश्न में कथनों में विभिन्न तत्वों के बीच संबंध दिए गए हैं जिसके बाद तीन निष्कर्ष I, II और III दिए गए हैं। कथनों को ध्यानपूर्वक पढ़िए और तदनुसार अपना उत्तर अंकित कीजिए।

कथन: $N < L = R \leq M; M < T < U > V \geq W$

निष्कर्ष:

- I. $W < T$
II. $N > V$
III. $N < U$

- A) केवल निष्कर्ष II सत्य है
B) केवल निष्कर्ष I सत्य है
C) केवल निष्कर्ष I और II सत्य हैं
D) केवल निष्कर्ष II और III सत्य हैं
E) केवल निष्कर्ष III सत्य है

प्रश्न 73: निम्नलिखित प्रश्न में कथनों में विभिन्न तत्वों के बीच संबंध दिए गए हैं जिसके बाद तीन निष्कर्ष I, II और III दिए गए हैं। कथनों को ध्यानपूर्वक पढ़िए और तदनुसार अपना उत्तर अंकित कीजिए।

कथन: $Q < M \leq S = K; K = T \geq U = L; V < O = P < L$

निष्कर्ष:

- I. $L < S$
II. $L = S$
III. $Q < P$

- A) केवल निष्कर्ष I सत्य है
B) केवल निष्कर्ष II सत्य है
C) या तो निष्कर्ष I या II सत्य है और निष्कर्ष III गलत है
D) केवल निष्कर्ष I और II सत्य हैं

E) केवल निष्कर्ष III सत्य है

निर्देश [5 प्रश्नों का सेट]: नीचे दी गई जानकारी के आधार पर प्रश्नों के उत्तर दें।

दस व्यक्ति (A, B, C, D, E, F, G, H, I, और J) वर्ष 2021 के पांच अलग-अलग महीनों (March, April, June, August, और September) की दो अलग-अलग तारीखों (9th और 18th) को कोविड -19 यात्रा प्रतिबंधों के वापस लेने के बाद मनाली जाते हैं लेकिन जरूरी नहीं कि इसी क्रम में हो। केवल वह व्यक्ति, जो विषम संख्या की तिथियों पर जाते हैं, विभिन्न मोबाइलों अर्थात् Sony, Lava, Apple, Spice, और Max का उपयोग करते हैं।

E, जो Lava का उपयोग करते हैं, उस महीने के 9th को जाता है जिसमें केवल 30 दिन हैं। J, जो Sony का उपयोग करता है, E के ठीक दो महीने बाद जाता है (दोनों एक ही तारीख को जाते हैं)। दोनों D और A एक ही महीने में जाते हैं, पर J के बाद। A August में नहीं जाता है। H, जो Apple का उपयोग करता है, और G एक ही महीने में जाते हैं। A और H अलग-अलग महीने के एक ही तारीख को जाते हैं। F I के तत्काल पहले जाता है पर एक ही महीने में नहीं। B F के पहले जाता है पर एक ही महीने में नहीं। B और D के बीच चार से अधिक व्यक्ति जाते हैं। I Max का उपयोग नहीं करता है।

प्रश्न 74: निम्नलिखित में से कौन सा व्यक्ति 18th August को जाता है?

- A) A
- B) D
- C) C
- D) G
- E) H

प्रश्न 75: _____ और _____ June में जाते हैं।

- A) J, H
- B) I, J
- C) J, F
- D) B, J
- E) उपरोक्त में से कोई नहीं

प्रश्न 76: G _____ को जाता है।

- A) 9th March
- B) 18th March
- C) 9th August
- D) 9th September
- E) 18th September

प्रश्न 77: _____ व्यक्ति D और उस व्यक्ति के बीच जाते हैं जो Spice का उपयोग करता है।

- A) एक
- B) एक भी नहीं
- C) दो
- D) तीन
- E) उपरोक्त में से कोई नहीं

प्रश्न 78: _____ J के ठीक तीन महीने बाद जाता है।

- A) वह व्यक्ति, जो Apple का उपयोग करता है
- B) वह व्यक्ति, जो Lava का उपयोग करता है
- C) वह व्यक्ति, जो Sony का उपयोग करता है
- D) वह व्यक्ति, जो Max का उपयोग करता है
- E) उपरोक्त में से कोई नहीं

निर्देश [4 प्रश्नों का सेट]: नीचे दी गई जानकारी के आधार पर प्रश्नों के उत्तर दें।

एक कूट भाषा में,

- I. 'pure river vastly polluted' का कूट है 'lbl, tut, mnm, qrq'
- II. 'polluted stream cause disease' का कूट है 'cdc, aba, lbl, nkn'
- III. 'disease vastly spread everywhere' का कूट है 'cdc, tut, hgh, jgj'
- IV. 'cause of disease spread' का कूट है 'cdc, xlx, aba, jgj'

प्रश्न 79: दिए गए कूट भाषा में, _____ का कूट 'mnm' है।

- A) pure
- B) river
- C) vastly
- D) polluted
- E) निर्धारित नहीं किया जा सकता

प्रश्न 80: 'river spread stream' का कूट क्या होगा?

- A) qrq, nkn, hgh
- B) mnm, nkn, jgj
- C) xlx, mnm, nkn
- D) qrq, nkn, jgj
- E) Either 'b' or 'd'

प्रश्न 81: निम्नलिखित में से किस शब्द का कूट 'aba' है?

- A) disease
- B) vastly
- C) cause
- D) polluted
- E) spread

प्रश्न 82: 'severe disease' का संभावित कूट क्या हो सकता है?

- A) cdc, mnm
- B) qrq, aba
- C) cdc, geg
- D) xlx, cdc
- E) nkn, cdc

निर्देश [5 प्रश्नों का सेट]: नीचे दी गई जानकारी के आधार पर प्रश्नों के उत्तर दें।

आठ व्यक्ति दो सामानांतर पंक्ति में बैठे हैं। चार व्यक्ति (A, B, C, और D) पंक्ति 1 में उत्तर दिशा का सामना करते हुए बैठे हैं। चार व्यक्ति (P, Q, R, और S) पंक्ति 2 में दक्षिण दिशा का सामना करते हुए बैठे हैं। वह व्यक्ति, जो पंक्ति 1 में बैठे हैं, उन व्यक्तियों का सामना करते हैं, जो पंक्ति-2 में बैठे हैं और इसके उलट भी। साथ बैठे किसी भी दो व्यक्ति के बीच की दूरी समान है। प्रत्येक व्यक्ति की आयु अलग-अलग है (वर्षों में) (40, 42, 43, 45, 48, 50, 51, और 55)। P A से बड़ा है पर Q से छोटा है। A और B के बीच एक व्यक्ति बैठा है। R D का सामना करता है और D की आयु 48 वर्ष नहीं है। सबसे बड़ा व्यक्ति Q के बाएं से दूसरे स्थान पर बैठा है। सबसे बड़ा व्यक्ति सबसे छोटे व्यक्ति का सामना नहीं करता है। B की आयु एक अभाज्य संख्या है। B, जो अंतिम छोर पर नहीं बैठा है, C के तत्काल बाएं बैठा है और C D से 3 वर्ष छोटा है। केवल S R से बड़ा है।

प्रश्न 83: उस व्यक्ति की आयु कितनी है, जो C का सामना करता है?

- A) 50 वर्ष
- B) 55 वर्ष
- C) 51 वर्ष
- D) 40 वर्ष
- E) उपरोक्त में से कोई नहीं

प्रश्न 84: A और P की आयु के बीच का पूर्ण अंतर कितना है?

- A) 3 वर्ष
- B) 2 वर्ष
- C) 5 वर्ष
- D) 8 वर्ष
- E) उपरोक्त में से कोई नहीं

प्रश्न 85: Q उस व्यक्ति से _____ वर्ष बड़ा है, जो S का सामना करता है।

- A) 3 वर्ष
- B) 5 वर्ष
- C) 7 वर्ष
- D) 2 वर्ष
- E) उपरोक्त में से कोई नहीं

प्रश्न 86: _____ उस व्यक्ति के दाएँ से दूसरे स्थान पर बैठा है, जो उस व्यक्ति का सामना करता है, जिसकी आयु 51 वर्ष है।

- A) C
- B) B
- C) A
- D) P
- E) Q

प्रश्न 87: उस व्यक्ति के सन्दर्भ में A का क्या स्थान है, जिसकी आयु 45 वर्ष है?

- A) तत्काल दाएँ
- B) बाएँ से तीसरा
- C) दाएँ से तीसरा
- D) तत्काल बाएँ
- E) उपरोक्त में से कोई नहीं

प्रश्न 88: यदि शब्द 'PERMUTATION' में बाएँ छोर से सम संख्या के स्थान के अक्षरों को अंग्रेजी वर्णमाला श्रृंखला में A से शुरू होते हुए लगातार vowels (A, E, I, O और U) में समान क्रम में प्रतिस्थापित किया जाता है तो प्रतिस्थापन के बाद शब्द में consonants की संख्या _____ है।

- A) एक भी नहीं
- B) दो
- C) तीन
- D) एक
- E) तीन से अधिक

प्रश्न 89: संख्या "9452347" में अंकों के ऐसे कितने जोड़े हैं जिनके बीच (आगे और पीछे दोनों) उतने ही अंक हैं जितने कि संख्या श्रृंखला में हैं?

- A) पांच
- B) चार
- C) छह
- D) सात
- E) उपरोक्त में से कोई नहीं

निर्देश [3 प्रश्नों का सेट]: नीचे दी गई जानकारी के आधार पर प्रश्नों के उत्तर दें।

कुछ संख्या में व्यक्ति एक रैखिक पंक्ति में उत्तर दिशा का सामना करते हुए बैठे हैं। कोई भी सीट खाली नहीं है। S पंक्ति के मध्य में बैठा है। M Q के बाएँ से चौथे स्थान पर बैठा है। S और M के बीच दो व्यक्ति बैठे हैं। T M के बाएँ से सातवें स्थान पर बैठा है और M E के दाएँ से दूसरे स्थान पर बैठा है। T पंक्ति के किसी एक छोर से दूसरे स्थान पर बैठा है। L पंक्ति के किसी एक अंतिम छोर से चौथे स्थान पर बैठा है। E और L के बीच दो से अधिक व्यक्ति बैठे हैं।

प्रश्न 90: पंक्ति में कितने व्यक्ति बैठे हैं?

- A) 25
- B) 27
- C) 21
- D) 23
- E) उपरोक्त में से कोई नहीं

प्रश्न 91: _____ व्यक्ति L और Q के बीच बैठे हैं।

- A) पांच
- B) छह
- C) तीन
- D) नौ
- E) उपरोक्त में से कोई नहीं

प्रश्न 92: यदि N Q के बाएं से दूसरे स्थान पर बैठा है, तो E के सन्दर्भ में N का स्थान क्या है?

- A) बाएं से तीसरा
- B) दाएँ से तीसरा
- C) दाएँ से चौथा
- D) बाएँ से चौथा
- E) उपरोक्त में से कोई नहीं

प्रश्न 93: नीचे दिए गए प्रश्न में कुछ कथनों के बाद तीन निष्कर्ष I, II और III दिए गए हैं। आपको दिए गए कथनों को सत्य मानना है, भले ही वे सर्वज्ञात तथ्यों से भिन्न प्रतीत होते हों। सभी निष्कर्षों को पढ़ें और फिर तय करें कि दिए गए निष्कर्षों में से कौन सा निश्चित रूप से दिए गए कथनों का अनुसरण करता है, सर्वज्ञात तथ्यों की अवहेलना करते हुए।

कथन:

- केवल Sigma Beta है
- कोई भी Sigma Pie नहीं है
- केवल कुछ Pie Lambda है
- सभी Alpha Lambda है

निष्कर्ष:

- I. कुछ Alpha के Beta होने की एक संभावना है
- II. सभी Pie Alpha है
- III. कुछ Lambda Beta नहीं है
- A) केवल निष्कर्ष III अनुसरण करता है
- B) केवल निष्कर्ष I अनुसरण करता है
- C) केवल निष्कर्ष II अनुसरण करता है
- D) केवल निष्कर्ष I और II अनुसरण करते हैं
- E) केवल निष्कर्ष II और III अनुसरण करते हैं

प्रश्न 94: नीचे दिए गए प्रश्न में कुछ कथनों के बाद तीन निष्कर्ष I, II और III दिए गए हैं। आपको दिए गए कथनों को सत्य मानना है, भले ही वे सर्वज्ञात तथ्यों से भिन्न प्रतीत होते हों। सभी निष्कर्षों को पढ़ें और फिर तय करें कि दिए गए निष्कर्षों में से कौन सा निश्चित रूप से दिए गए कथनों का अनुसरण करता है, सर्वज्ञात तथ्यों की अवहेलना करते हुए।

कथन:

सभी Food Cereal है

कुछ Cereal Grains है

केवल कुछ Grains Pulses है

केवल Cereal Wheat है

निष्कर्ष:

I. कम से कम कुछ Food Wheat है

II. सभी Grains Wheat नहीं है

III. कुछ Grains निश्चित रूप से Pulses नहीं है

A) केवल निष्कर्ष III अनुसरण करता है

B) केवल निष्कर्ष I अनुसरण करता है

C) केवल निष्कर्ष II अनुसरण करता है

D) केवल निष्कर्ष I और II अनुसरण करते हैं

E) केवल निष्कर्ष II और III अनुसरण करते हैं

निर्देश [4 प्रश्नों का सेट]: नीचे दी गई जानकारी के आधार पर प्रश्नों के उत्तर दें।

आठ व्यक्ति (P, Q, R, S, T, U, V, और W) एक वृत्ताकार मेज़ पर एक दूसरे से बराबर दूरी पर बैठे हैं। प्रत्येक व्यक्ति मेज़ के केंद्र का सामना करते हैं।

दो व्यक्ति S और T (किसी एक ओर से) के बीच बैठे हैं। T के तत्काल पड़ोसियों में से एक, P के बाएं से दूसरे स्थान पर बैठा है। W R के दाएँ से दूसरे स्थान पर बैठा है। U P के तत्काल दाएँ बैठा है। Q W के बगल में नहीं बैठा है। S Q के बगल में नहीं बैठा है।

प्रश्न 95: _____ V के दाएँ से तीसरे स्थान पर बैठा है।

A) P

B) R

C) U

D) W

E) उपरोक्त में से कोई नहीं

प्रश्न 96: T के बाएं से गणना करने पर, T और Q के बीच कितने व्यक्ति बैठे हैं?

A) तीन

B) चार

C) दो

D) एक

E) उपरोक्त में से कोई नहीं

प्रश्न 97: निम्नलिखित पांच में से चार एक समूह के आधार पर एक निश्चित तरीके से समान हैं, निम्नलिखित में से कौन उस समूह से संबंधित नहीं है?

- A) U और W
- B) T और R
- C) V और Q
- D) W और Q
- E) P और S

प्रश्न 98: यदि सभी व्यक्ति P से शुरू होकर वर्णानुक्रम में बैठते हैं (घड़ी की विपरीत दिशा में), तो पुनर्व्यवस्था (P को छोड़कर) के बाद कौन अपनी प्रारंभिक स्थिति में रहेगा?

- A) S
- B) T
- C) U
- D) V
- E) W

निर्देश [2 प्रश्नों का सेट]: नीचे दी गई जानकारी के आधार पर प्रश्नों के उत्तर दें।

सात व्यक्ति (M, N, O, P, Q, R, और S) तीन पीढ़ी के एक परिवार से सम्बंधित हैं। परिवार में केवल दो विवाहित युगल हैं। परिवार में कोई अविवाहित व्यक्ति एक अभिवाक नहीं है।

Q S का इकलौता पोता/नाती/पोती/नवासी है। O के तीन बच्चे हैं और इनमें से केवल एक विवाहित है। R Q का मामा है। M और N परिवार के पुरुष सदस्य हैं। N अविवाहित है। दोनों O और P की एक पुत्री है।

प्रश्न 99: S N से कैसे सम्बंधित है?

- A) पिता
- B) माता
- C) देवर/साला/जीजा
- D) ननद/भाभी/साली
- E) निर्धारित नहीं किया जा सकता

प्रश्न 100: _____ R की भतीजी/भांजी का पिता है।

- A) P
- B) M
- C) S
- D) O
- E) उपरोक्त में से कोई नहीं

Solution 1: 2)

In B, replace the adverb WHERE with WHEN as the former is used to indicate location or position whereas the latter is used to indicate a certain period of time. Thus, B is the right answer.

Solution 2: 4)

In D, replace the preposition IN with FOR so that it is parallel in form to the preposition FOR (used after the verb KNOWN). The phrase KNOWN FOR means to be famous because of something. Here the sentence tells us how the king was famous for uniting Denmark and Norway. Thus, D is the right answer.

Solution 3: 1)

In A, replace the adverb WHEN with WHERE as the former means AT THE TIME THAT while the latter mean AT THE SITUATION OR CIRCUMSTANCE THAT; here the circumstance being the limitation of movie choices. Using WHEN here will turn the entire sentence into a past event, but here a contrast is being made between two different situations. Thus, A is the right answer.

Solution 4: 3)

In C, add BEEN before the verb LEFT; HAS BEEN should be used here as the sentence is in passive voice. Thus, C is the right answer.

Solution 5: 4)

In D, replace FAR OF with FAR OUT OF as the latter refers to a distance so long enough that it can't be reached. Thus, D is the right answer.

Solution 6: 1)

The sentence tells us how three decades back, the first group of humans communicated with a mixed reality of real and virtual objects by manually (using hands) performing tasks that needed to engage both physical and simulated (fake) objects. INTERSPERSED (scattered) is contextually inapt; it should be replaced with INTERACTED (communicated). Thus, A is the right answer.

Solution 7: 1)

The sentence tells us that the P'urhépechas were one of the only native groups in Mexico the Aztecs failed to conquer (defeat) but despite the feat (achievement), they nearly (almost) lost to history. A is incorrectly spelled; the correct spelling of the word is INDIGENOUS. Thus, A is the right answer.

Solution 8: 1)

Refer to the lines: "Today, I dream of heather, bramble, lakes in the middle of hidden mountains, creepy houses and stark moors, the isolated settings in nature, and kind friends to travel with, while I'm caught in a reality that is defined by its isolation and lack of exploration." The above lines imply that there is a contrast between the author's dreams and current reality. Thus, A is the right answer.

II is incorrect as it is not mentioned in the passage.

III is incorrect as it is actually the opposite, the author finds the lockdown similar to adventures found in Blyton's book.

IV is incorrect as it is not mentioned in the passage.

Solution 9: 4)

Refer to the lines: *"As we wage our battle against this invisible robber, the virus, my sometimes failing courage was soothed by reading about 12-year-old George sitting paralysed in one spot, hearing the ominous footsteps of the smugglers echo on the cold stone flags. Her determination to dodge or confront her would-be attackers, despite her fear, is something I remind myself of today."* From the above lines, we can infer that George did have her fears but she chose to fight them and confront the ones who were about to attack here. D perfectly sums up George's nature, which makes D the right answer.

A is incorrect as it mentions George's dauntless (unafraid) spirit, which is not true as per the passage.

Likewise for B.

C is incorrect as the author fighting his attackers is not mentioned in the passage.

Solution 10: 2)

Refer to the lines: *"This time, however, I considered how our current existence is similar to life on an isolated island."* III is explicitly stated in the above lines, which makes B the right answer.

I is incorrect as the author does not compare the lockdown with a hidden well.

III is incorrect as it is not mentioned in the passage.

Solution 11: 5)

E is the right answer. Refer to the lines: *"Making the best of an unexpected situation has been the hallmark of Blyton's mysteries and adventures, and they have taught me how to overcome them with what is at hand, to keep persevering despite all odds, to leap into uncertainty and trust that one will be delivered."* The above lines imply both I and II are correct. PERSEVERING means persisting in an unfavourable situation. The phrase IN A TIGHT SPOT indicates a difficult situation. Thus, III also can be inferred from the given lines.

Solution 12: 3)

C is the right answer. The author throws light on how the hardships of the characters found in Blyton's novel can inspire one to overcome one's inner fear and get going in difficult situations. The author discusses the fact today's reality seems different than what she expected to be and she found solace in Blyton's books. C best sums the idea, which makes it the right answer.

A is incorrect as influence on children of the current generation is not discussed in the passage.

B is incorrect as the passage does not focus on what to do during the lockdown.

D The author does discuss the similarities between Blyton's adventures and today's reality but that just forms the basis for the main idea, not the main idea of the passage. Thus, D is incorrect.

E is incorrect as this is not discussed throughout the passage.

Solution 13: 2)

The author discusses the influence of Blyton's books on her life and how one can draw inspiration from the characters to tackle real life situations. Hence, we can infer that it is most likely an essay taken from a literary magazine as a literary magazine is a periodical devoted to literature consisting of essays, short stories, poetry, etc. Thus, B is the right answer.

A is incorrect as the subject of the passage is comparison between children's fiction and the realities of today, and how we can take inspiration from them. However, it does not talk about children's diseases and their treatment.

C is incorrect as an editorial publishes an individual's opinion on current events and social issues, and does not contain personal experiences of the individual.

D is incorrect as a biography talks about life events, which is not the case here.

E is incorrect as a particular book is discussed in a book review but the author discusses Blyton's book as a whole.

Solution 14: 1)

ENTRANCED used in the passage is used to indicate the author being enchanted by Blyton's novel.

BEGUILED (charmed) will be its antonym. Thus, A is the right answer.

CHARRED - burnt

BORED - lost interest
INGESTED - absorbed
RAMIFIED - spread out

Solution 15: 1)

EMULATING means copying something. It is used in the passage to talk about copying the qualities of Blyton's protagonists. IMITATING will be its synonym. Thus, A is the right answer.

RATIFYING - approving
INSINUATING - suggesting
ACCENTUATING - emphasising
EXERTING - applying

Solution 16: 1)

(a) is the right answer. The correct pairs are AE, BF and CD.

AE - A talks about the surprisingly long life of swifts and E further builds on it by telling us this contradicts the fact that they spend a high amount of energy during flight. *"Swifts live a surprisingly long life of about 20 years despite their high energy expenditure during flight."*

BF - B talks about the strong muscles of the lower jaw of something (a squirrel) and F further builds on it by telling us that this helps the squirrel to break and chew hard food. *"Thanks to the strong muscles of the lower jaw, the animal breaks and chews hard food. In the back of the mouth are the molars."*

CD - C tells us that swifts are not able to fly from the ground. D provides the reason behind this - excessively long wings and short legs. *"Swifts are not even able to fly from the ground because their wings are too long and their legs are too short."*

Solution 17: 1)

(a) is the right answer. The correct pairs are AE, BD and CF.

AE - A tells us that the fuel UDMH rained down on grasslands. E further builds on it by talking about when it rained - on being spilled out of used first and second stages of Proton rockets. *"It's reported that the fuel UDMH rained down on the grasslands when it spilled out of the used first and second stages of Proton rockets and poisoned the soil for decades to come."*

BD - B talks about the efficiency of particles emitted by rockets. D further builds on it by telling us its result - an enhanced warming climate effect. *"Researchers found that particles emitted by rockets are almost 500 times more efficient at holding heat in the atmosphere than all other sources of soot combined, resulting in an enhanced warming climate effect."*

CF - C talks about the impact on ozone due to space launches being negligible. F further adds that space tourism launches may weaken the recovery in the ozone layer. *"While current loss of ozone due to space launches is small, the impact of space tourism launches may undermine the recovery in the ozone layer."*

Solution 18: 1)

(a) is the right answer. The correct pairs are AE, BD and CF.

AE - A talks about looking more closely at how social isolation affects brain regions. E further builds on it by elaborating on those regions - present in the outer layer of the brain and consisting of neurons. *"We wanted to look more closely at how social isolation affects brain regions in the outer layer of the brain, consisting of neurons."*

BD - B tells us how brain regions evolve. F follows with the verb stem and adds that they are strongly linked to networks that support cognition. *"Brain regions consistently involved in diverse social interactions are strongly linked to networks that support cognition."*

CF - C talks about the need for further examination of social isolation. D follows by telling us the reason behind the examination. *"Social isolation needs to be examined in more detail in future studies to determine the exact mechanisms behind its profound effects on our brains."*

Solution 19: 5)

(e) is the right answer. The correct pairs are AE, BF and CD.

AE - A talks about mice adapting well to urban areas. E further builds on it by telling us what they are known for. *"Mice adapt well to urban areas and are known for eating almost all types of food scraps."*

BF - B tells us that a mouse around a chunk of cheese looks comical. F further builds on it by telling us that artists use this picture to make others smile. *"A mouse with its paws around a huge chunk of cheese looks so comical that artists simply can't refuse to use a picture that makes millions of viewers smile."*

CD - C talks about cheese being the only food available to the mice and D adds that they have no choice but to eat the unloved product. *"It turns out that cheese was the only food available to the mice and they had no choice but to eat the unloved product."*

Solution 20: 4)

(d) is the right answer. The correct pairs are AF, BE and CD.

AF - A talks about how the populations of some types of bacteria increase or decrease depending on the food we choose to eat. F further builds on it by telling how they activate genes and absorb other nutrients. *"Choosing between a sandwich or a yogurt for lunch can increase the populations of some types of bacteria and diminish others and as their relative numbers change, they activate different genes and absorb different nutrients."*

BD - B tells us that a specific type of gut flora helps a host animal to detect which nutrients are missing in food. D further builds on it by telling us that they determine how much type of nutrient is required by the host. *"Neuroscientists have found that specific types of gut flora help a host animal detect which nutrients are missing in food and then finely measure how much of those nutrients the host really needs to eat."*

CE - C talks about our diet being influenced by gut microbes. E further builds on it by telling us that they affect anxiety, depression, hypertension and a variety of other conditions. *"Gut microbes have also been shown to influence diet and behaviour as well as anxiety, depression, hypertension and a variety of other conditions."*

Solution 21: 5)

E is the right answer. The sentence seeks to convey that people who talk loudly on their phones during meetings show little respect for their colleagues. II and III are correct as they agree with the plural subject and can replace the highlighted phrase to convey the requisite meaning.

The highlighted phrase is incorrect because the singular verb TALKS should be replaced with the plural verb TALK as the subject PEOPLE is plural.

I is incorrect as the noun RISE should be replaced with the verb RAISE as we need a noun here to agree with the subject PEOPLE.

Solution 22: 1)

A is the right answer. The sentence seeks to convey that when he was a child, he worked in a bookstore to earn his pocket money. The highlighted phrase is incorrect as WHILE BEING is usually used in passive voice to indicate the duration of time when something is happening to something else.

I is correct because AS A CHILD indicates the state of being a child; the sentence conveys the meaning that in his childhood stage, he worked in a bookstore. Thus, A is the right answer.

II is incorrect as the sentence conveys the meaning that because he was a child, he worked in the bookstore. AS should be replaced with WHILE.

III is incorrect as WHILE BEING IN CHILDHOOD conveys the meaning that he lived in childhood. WHILE is usually succeeded by a past continuous verb when referring to background events. WHILE BEING A CHILD would be the correct phrase.

The highlighted phrase is incorrect as the past participle form verb BEEN should be replaced with the present participle form verb BEING.

Solution 23: 5)

E is the right answer. The sentence talks about how they are happy as a result of having a comparatively higher number of chocolates.

I is correct as the sentence seeks to convey that they have the same number of chocolates as him.

II is correct as the sentence suggests that the number of chocolates with them is three times more than that of him.

III is correct as the sentence suggests that they at least have the same number of chocolates as him.

The highlighted phrase is incorrect as the use of MORE after the phrase THREE TIMES AS MANY is redundant and renders the phrase contextually incorrect.

Solution 24: 5)

The sentence tells us that she ate fruits to get her energy back as she was feeling weak. Likewise for I. Thus, E is the right answer.

The highlighted phrase is incorrect because it conveys the meaning that she had to eat fruits as a result of regaining energy.

Solution 25: 4)

The sentence seeks to convey that the flat bark beetle has acquired the features needed to survive in extremely cold conditions. I and III can replace the highlighted phrase to convey the requisite meaning. Thus, D is the right answer.

II is incorrect because of the use of the preposition IN after ADEPT. It should be replaced with AT. The highlighted phrase is incorrect because of the use of preposition IN which should be replaced with TO.

Solution 26: 2)

B is the right answer. Each year, millions of fearless hunters stalk the forests of North America carrying curved blades for dismembering and mesh bags for carrying their defenceless prey.

INTREPID - having no fear. Wielding - holding and using something.

In A, UTILISE is incorrect as it is a base form verb, while the sentence requires a continuous form verb to connect the two clauses.

In C, DAUNT is a verb, while the sentence requires an adjective to modify the noun HUNTERS.

In D, CARRIED is a past participle form verb, while the sentence needs a continuous form verb.

In E, PETRIFIED (scared) is incorrect because if the hunters were scared, they would not be stalking the forests hunting for prey.

Solution 27: 4)

D is the right answer. Much of modern civilization now relies on an ever-expanding corpus of open-source code because it attracts talent and makes a lot of work easier.

RELIES - depends. ENTICES - attracts.

In A, DISTRUSTS is incorrect because if the ever-expanding corpus of open-source code was not trusted by modern civilization, it would have made the work difficult, not easier.

In B, ATTRACTED is incorrect because it is a past participle form verb, while the sentence is in present tense and needs a singular verb to agree with the singular pronoun IT.

In C, DRAW (plural verb) is incorrect as we need a singular verb to agree with the singular subject IT.

In E, HINGED is incorrect because it is a past participle form verb, while the sentence is in simple present tense.

Solution 28: 3)

C is the right answer. Much of the world right is grappling with heat waves but in some parts of Asia, families have developed their own cooling rituals over generations.

In A, ADOPTS is incorrect because it is a singular verb, while the preceding word HAVE indicates that a past participle verb is required.

In B, LIBERATING is incorrect because if they were liberated from heat waves, they would not be required to form their own cooling rituals over generations.

In D, DEALT is incorrect because it is in past participle form, while the sentence requires a continuous form verb to fit in IS + VERB present continuous form construction.

In E, CREATING is incorrect because it is a continuous form verb but we need a past participle form to fit in the present perfect tense construction HAVE + VERB.

Solution 29: 4)

D is the right answer. Lawmakers in the US are considering ways to regulate crypto and crack down on money laundering and other illicit activities.

REGULATE - keep a check on. ILLICIT - unlawful.

In A, LAWFUL is incorrect because if the activities were lawful, the lawmakers would not need to crack down on them.

In B, EXPLICITLY is incorrect because it is an adverb, while the sentence requires an adjective to modify the noun ACTIVITIES.

In C, CONTROLLING is incorrect as a base form verb is needed to fit in the TO + VERB infinitive construction.

In E, CONSTRAINED is incorrect because it is in past participle form but the sentence needs a base form verb.

Solution 30: 5)

E is the right answer. There is little evidence to negate or to support the contention that there is a direct relationship between open shelf-life dating and the actual freshness of food.

Negate - to say that something is untrue. CONTENTION - an idea or argument that calls for discussion or debate.

In A, CONTEND is incorrect because it is a verb, while the sentence requires a noun.

In B, ASTUTE is incorrect as it is an adjective but the sentence requires a singular noun.

In C, REPUDIATING is incorrect because it is a continuous form verb, while a base form verb is needed to fit in TO + VERB infinitive construction.

In D, SPECULATE is incorrect because it is a verb, while the sentence needs a noun to be modified by the article THE.

Solution 31: 1)

In Bakery 'A',

Number of biscuit packets sold = $750 \times 0.40 = 300$

Number of bread packets sold = $750 - 300 = 450$

Number of brown bread packets sold = $450 \times (5/9) = 250$

Number of white bread packets sold = $450 - 250 = 200$

Similarly,

Bakery	Number of biscuit packets sold	Number of bread packets sold	Number of brown bread packets sold	Number of white bread packets sold
A	300	450	250	200
B	280	520	364	156
C	240	260	120	140
D	270	330	90	240

Number of packets of white bread sold by bakery 'B' = 156

Hence, option a.

Solution 32: 3)

In Bakery 'A',

Number of biscuit packets sold = $750 \times 0.40 = 300$

Number of bread packets sold = $750 - 300 = 450$

Number of brown bread packets sold = $450 \times (5/9) = 250$

Number of white bread packets sold = $450 - 250 = 200$

Similarly,

Bakery	Number of biscuit packets sold	Number of bread packets sold	Number of brown bread packets sold	Number of white bread packets sold
A	300	450	250	200
B	280	520	364	156
C	240	260	120	140
D	270	330	90	240

Required sum = $270 + 90 = 360$

Hence, option c.

Solution 33: 4)

In Bakery 'A',

Number of biscuit packets sold = $750 \times 0.40 = 300$

Number of bread packets sold = $750 - 300 = 450$

Number of brown bread packets sold = $450 \times (5/9) = 250$

Number of white bread packets sold = $450 - 250 = 200$

Similarly,

Bakery	Number of biscuit packets sold	Number of bread packets sold	Number of brown bread packets sold	Number of white bread packets sold
A	300	450	250	200
B	280	520	364	156
C	240	260	120	140
D	270	330	90	240

Number of brown bread packets sold by bakery 'A' that were returned = $250 \times 0.32 = 80$
Hence, option d.

Solution 34: 2)

In Bakery 'A',

Number of biscuit packets sold = $750 \times 0.40 = 300$

Number of bread packets sold = $750 - 300 = 450$

Number of brown bread packets sold = $450 \times (5/9) = 250$

Number of white bread packets sold = $450 - 250 = 200$

Similarly,

Bakery	Number of biscuit packets sold	Number of bread packets sold	Number of brown bread packets sold	Number of white bread packets sold
A	300	450	250	200
B	280	520	364	156
C	240	260	120	140
D	270	330	90	240

Amount earned by bakery 'A' by selling biscuits = $300 \times 15 = \text{Rs. } 4,500$

Amount earned by bakery 'B' by selling biscuits = $280 \times 15 = \text{Rs. } 4,200$

So, difference in amount earned = $4500 - 4200 = \text{Rs. } 300$

Hence, option b.

Solution 35: 3)

In Bakery 'A',

Number of biscuit packets sold = $750 \times 0.40 = 300$

Number of bread packets sold = $750 - 300 = 450$

Number of brown bread packets sold = $450 \times (5/9) = 250$

Number of white bread packets sold = $450 - 250 = 200$

Similarly,

Bakery	Number of biscuit packets sold	Number of bread packets sold	Number of brown bread packets sold	Number of white bread packets sold
A	300	450	250	200
B	280	520	364	156
C	240	260	120	140
D	270	330	90	240

Weight of all bread packets sold by bakery 'C' = $120 \times 75 + 140 \times 50 = 9000 + 7000$

Or, required weight = $16000 \text{ grams} = 16 \text{ kg}$

Hence, option c.

Solution 36: 3)

From I:

$$y^4 = 625$$

$$\text{Or, } y = \pm 5$$

From II:

$$x^2 - 8x + 15 = 0$$

$$\text{Or, } x^2 - 3x - 5x + 15 = 0$$

$$\text{Or, } x(x - 3) - 5(x - 3) = 0$$

$$\text{Or, } (x - 5)(x - 3) = 0$$

$$\text{So, } x = 5 \text{ or } 3$$

'x'	Relation	'y'
5	=	5
5	>	-5
3	<	5
3	>	-5

So, no relation can be established between 'x' and 'y'.

Hence, option c.

Solution 37: 5)

From I:

$$(x + 5)^2 = 144$$

$$\text{Or, } x + 5 = \pm 12$$

$$\text{So, } x = 7 \text{ or } -17$$

From II:

$$y^2 - 15y + 56 = 0$$

$$\text{Or, } y^2 - 8y - 7y + 56 = 0$$

$$\text{Or, } y(y - 8) - 7(y - 8) = 0$$

$$\text{Or, } (y - 7)(y - 8) = 0$$

$$\text{So, } y = 7 \text{ or } 8$$

'x'	Relation	'y'
7	=	7
7	<	8
-17	<	7
-17	<	8

So, $x \leq y$

Hence, option e.

Solution 38: 2)

From I:

$$x^2 - 22x + 121 = 0$$

$$\text{Or, } x^2 - 11x - 11x + 121 = 0$$

$$\text{Or, } x(x - 11) - 11(x - 11) = 0$$

$$\text{Or, } (x - 11)(x - 11) = 0$$

$$\text{So, } x = 11$$

From II:

$$(y - 2) = (729)^{(1/3)}$$

$$\text{Or, } (y - 2) = (9^3)^{1/3}$$

$$\text{Or, } y - 2 = 9$$

$$\text{So, } y = 9 + 2 = 11$$

'x'	Relation	'y'
11	=	11

So, $x = y$
Hence, option b.

Solution 39: 1)

From I:

$$2x^2 + 13x + 20 = 0$$

$$\text{Or, } 2x^2 + 8x + 5x + 20 = 0$$

$$\text{Or, } 2x(x + 4) + 5(x + 4) = 0$$

$$\text{Or, } (2x + 5)(x + 4) = 0$$

$$\text{So, } x = -(5/2) \text{ or } -4$$

From II:

$$y^2 + 11y + 30 = 0$$

$$\text{Or, } y^2 + 5y + 6y + 30 = 0$$

$$\text{Or, } y(y + 5) + 6(y + 5) = 0$$

$$\text{Or, } (y + 6)(y + 5) = 0$$

$$\text{So, } y = -6 \text{ or } -5$$

'x'	Relation	'y'
-5/2	>	-6
-5/2	>	-5
-4	>	-6
-4	>	-5

So, $x > y$
Hence, option a.

Solution 40: 5)

From I:

$$y^2 - 16y + 63 = 0$$

$$\text{Or, } y^2 - 7y - 9y + 63 = 0$$

$$\text{Or, } y(y - 7) - 9(y - 7) = 0$$

$$\text{Or, } (y - 9)(y - 7) = 0$$

$$\text{So, } y = 9 \text{ or } 7$$

From II:

$$x^2 - 5x - 14 = 0$$

$$\text{Or, } x^2 + 2x - 7x - 14 = 0$$

$$\text{Or, } x(x + 2) - 7(x + 2) = 0$$

$$\text{Or, } (x - 7)(x + 2) = 0$$

$$\text{So, } x = 7 \text{ or } -2$$

'x'	Relation	'y'
7	<	9
7	=	7
-2	<	9
-2	<	7

So, $x \leq y$
Hence, option e.

Solution 41: 4)

$$\text{Number of ceiling fans sold by shop 'A' } = 180 \times (7/15) = 84$$

$$\text{Number of table fans sold by shop 'A' } = 180 - 84 = 96$$

$$\text{Number of ceiling fans sold by shop 'B' } = 84 \times 1.25 = 105$$

$$\text{Let the number of table fans sold by shop 'B' } = '5y'$$

$$\text{Then, number of table fans sold by shop 'C' } = (6/5) \times 5y = 6y$$

According to the data,

$$6y - 5y = 15$$

$$\text{Or, } y = 15$$

So, number of table fans sold by shops 'B' and 'C' is 75 and 90, respectively.

$$\text{Number of ceiling fans sold by shop 'C'} = 153 - 90 = 63$$

$$\text{Sum of number of table fans sold by shops 'C' and 'D'} = 103 \times 2 = 206$$

$$\text{Number of table fans sold by shop 'D'} = 206 - 90 = 116$$

$$\text{Number of ceiling fans sold by shop 'D'} = 150 - 63 = 87$$

Shop	Number of ceiling fans sold	Number of table fans sold
A	84	96
B	105	75
C	63	90
D	87	116

$$\text{Total number of fans sold by shop 'D'} = 87 + 116 = 203$$

Hence, option d.

Solution 42: 2)

$$\text{Number of ceiling fans sold by shop 'A'} = 180 \times (7/15) = 84$$

$$\text{Number of table fans sold by shop 'A'} = 180 - 84 = 96$$

$$\text{Number of ceiling fans sold by shop 'B'} = 84 \times 1.25 = 105$$

$$\text{Let the number of table fans sold by shop 'B'} = '5y'$$

$$\text{Then, number of table fans sold by shop 'C'} = (6/5) \times 5y = 6y$$

According to the data,

$$6y - 5y = 15$$

$$\text{Or, } y = 15$$

So, number of table fans sold by shops 'B' and 'C' is 75 and 90, respectively.

$$\text{Number of ceiling fans sold by shop 'C'} = 153 - 90 = 63$$

$$\text{Sum of number of table fans sold by shops 'C' and 'D'} = 103 \times 2 = 206$$

$$\text{Number of table fans sold by shop 'D'} = 206 - 90 = 116$$

$$\text{Number of ceiling fans sold by shop 'D'} = 150 - 63 = 87$$

Shop	Number of ceiling fans sold	Number of table fans sold
A	84	96
B	105	75
C	63	90
D	87	116

$$\text{Required percentage} = (63/75) \times 100 = 84\%$$

Hence, option b.

Solution 43: 1)

$$\text{Number of ceiling fans sold by shop 'A'} = 180 \times (7/15) = 84$$

$$\text{Number of table fans sold by shop 'A'} = 180 - 84 = 96$$

$$\text{Number of ceiling fans sold by shop 'B'} = 84 \times 1.25 = 105$$

$$\text{Let the number of table fans sold by shop 'B'} = '5y'$$

$$\text{Then, number of table fans sold by shop 'C'} = (6/5) \times 5y = 6y$$

According to the data,

$$6y - 5y = 15$$

$$\text{Or, } y = 15$$

So, number of table fans sold by shops 'B' and 'C' is 75 and 90, respectively.

$$\text{Number of ceiling fans sold by shop 'C'} = 153 - 90 = 63$$

$$\text{Sum of number of table fans sold by shops 'C' and 'D'} = 103 \times 2 = 206$$

$$\text{Number of table fans sold by shop 'D'} = 206 - 90 = 116$$

Number of ceiling fans sold by shop 'D' = $150 - 63 = 87$

Shop	Number of ceiling fans sold	Number of table fans sold
A	84	96
B	105	75
C	63	90
D	87	116

Required ratio = $96:90 = 16:15$

Hence, option a.

Solution 44: 5)

Number of ceiling fans sold by shop 'A' = $180 \times (7/15) = 84$

Number of table fans sold by shop 'A' = $180 - 84 = 96$

Number of ceiling fans sold by shop 'B' = $84 \times 1.25 = 105$

Let the number of table fans sold by shop 'B' = '5y'

Then, number of table fans sold by shop 'C' = $(6/5) \times 5y = 6y$

According to the data,

$$6y - 5y = 15$$

$$\text{Or, } y = 15$$

So, number of table fans sold by shops 'B' and 'C' is 75 and 90, respectively.

Number of ceiling fans sold by shop 'C' = $153 - 90 = 63$

Sum of number of table fans sold by shops 'C' and 'D' = $103 \times 2 = 206$

Number of table fans sold by shop 'D' = $206 - 90 = 116$

Number of ceiling fans sold by shop 'D' = $150 - 63 = 87$

Shop	Number of ceiling fans sold	Number of table fans sold
A	84	96
B	105	75
C	63	90
D	87	116

Required average = $(84 + 105 + 63) \div 3 = 84$

Hence, option e.

Solution 45: 3)

Number of ceiling fans sold by shop 'A' = $180 \times (7/15) = 84$

Number of table fans sold by shop 'A' = $180 - 84 = 96$

Number of ceiling fans sold by shop 'B' = $84 \times 1.25 = 105$

Let the number of table fans sold by shop 'B' = '5y'

Then, number of table fans sold by shop 'C' = $(6/5) \times 5y = 6y$

According to the data,

$$6y - 5y = 15$$

$$\text{Or, } y = 15$$

So, number of table fans sold by shops 'B' and 'C' is 75 and 90, respectively.

Number of ceiling fans sold by shop 'C' = $153 - 90 = 63$

Sum of number of table fans sold by shops 'C' and 'D' = $103 \times 2 = 206$

Number of table fans sold by shop 'D' = $206 - 90 = 116$

Number of ceiling fans sold by shop 'D' = $150 - 63 = 87$

Shop	Number of ceiling fans sold	Number of table fans sold
A	84	96

B	105	75
C	63	90
D	87	116

Revenue generated by shop 'C' by selling ceiling fans = $63 \times 1000 = \text{Rs. } 63,000$

Revenue generated by shop 'C' by selling table fans = $90 \times 500 = \text{Rs. } 45,000$

So, required amount = $63000 - 45000 = \text{Rs. } 18,000$

Hence, option c.

Solution 46: 3)

$$10 + 0.8 \times 1 = 10.8$$

$$10.8 + 0.9 \times 2 = 12.6$$

$$12.6 + 1.0 \times 3 = 15.6$$

$$15.6 + 1.1 \times 4 = 20$$

$$20 + 1.2 \times 5 = 26$$

Hence, option c.

Solution 47: 1)

Hence, option a.

Solution 48: 2)

The series follows the pattern of alternate addition and subtraction of consecutive squares starting with 6^2 .

$$84 + 6^2 = 120$$

$$120 - 7^2 = 71$$

$$71 + 8^2 = 135$$

$$135 - 9^2 = 54$$

$$54 + 10^2 = 154$$

Hence, option b.

Solution 49: 5)

Hence, option e.

Solution 50: 2)

$$154 - 12 \times 1 = 142$$

$$142 - 12 \times 2 = 118$$

$$118 - 12 \times 3 = 82$$

$$82 - 12 \times 4 = 34$$

$$34 - 12 \times 5 = -26$$

Hence, option b.

Solution 51: 2)

In office 'A',

Average of number of CFL and LED bulbs used = 170

Difference between number of CFL and LED bulbs used = 60

Sum of number of CFL and LED bulbs used = $170 \times 2 = 340$

Let the number of CFL bulbs used = 'y'

Then, number of LED bulbs used = $(y + 60)$

According to the data,

$$y + y + 60 = 2y + 60 = 340$$

$$\text{So, } y = (340 - 60) \div 2 = 140$$

So, number of CFL and LED bulbs used is 140 and 200, respectively.

Similarly,

Office	Number of LED bulbs used	Number of CFL bulbs used
A	200	140
B	210	170
C	240	160
D	220	150
E	270	180

Required ratio = $270:180 = 3:2$

Hence, option b.

Solution 52: 3)

In office 'A',

Average of number of CFL and LED bulbs used = 170

Difference between number of CFL and LED bulbs used = 60

Sum of number of CFL and LED bulbs used = $170 \times 2 = 340$

Let the number of CFL bulbs used = 'y'

Then, number of LED bulbs used = $(y + 60)$

According to the data,

$$y + y + 60 = 2y + 60 = 340$$

$$\text{So, } y = (340 - 60) \div 2 = 140$$

So, number of CFL and LED bulbs used is 140 and 200, respectively.

Similarly,

Office	Number of LED bulbs used	Number of CFL bulbs used
A	200	140
B	210	170
C	240	160
D	220	150
E	270	180

Number of yellow CFL bulbs used in office 'A' = $140 \times (7/10) = 98$

Hence, option c.

Solution 53: 3)

In office 'A',

Average of number of CFL and LED bulbs used = 170

Difference between number of CFL and LED bulbs used = 60

Sum of number of CFL and LED bulbs used = $170 \times 2 = 340$

Let the number of CFL bulbs used = 'y'

Then, number of LED bulbs used = $(y + 60)$

According to the data,

$$y + y + 60 = 2y + 60 = 340$$

$$\text{So, } y = (340 - 60) \div 2 = 140$$

So, number of CFL and LED bulbs used is 140 and 200, respectively.

Similarly,

Office	Number of LED bulbs used	Number of CFL bulbs used
A	200	140
B	210	170
C	240	160
D	220	150
E	270	180

$$\text{Required percentage} = (210/400) \times 100 = 52.5\%$$

Hence, option c.

Solution 54: 5)

In office 'A',

$$\text{Average of number of CFL and LED bulbs used} = 170$$

$$\text{Difference between number of CFL and LED bulbs used} = 60$$

$$\text{Sum of number of CFL and LED bulbs used} = 170 \times 2 = 340$$

$$\text{Let the number of CFL bulbs used} = 'y'$$

$$\text{Then, number of LED bulbs used} = (y + 60)$$

According to the data,

$$y + y + 60 = 2y + 60 = 340$$

$$\text{So, } y = (340 - 60) \div 2 = 140$$

So, number of CFL and LED bulbs used is 140 and 200, respectively.

Similarly,

Office	Number of LED bulbs used	Number of CFL bulbs used
A	200	140
B	210	170
C	240	160
D	220	150
E	270	180

$$\text{Required difference} = 220 - 170 = 50$$

Hence, option e.

Solution 55: 1)

In office 'A',

$$\text{Average of number of CFL and LED bulbs used} = 170$$

$$\text{Difference between number of CFL and LED bulbs used} = 60$$

$$\text{Sum of number of CFL and LED bulbs used} = 170 \times 2 = 340$$

$$\text{Let the number of CFL bulbs used} = 'y'$$

$$\text{Then, number of LED bulbs used} = (y + 60)$$

According to the data,

$$y + y + 60 = 2y + 60 = 340$$

$$\text{So, } y = (340 - 60) \div 2 = 140$$

So, number of CFL and LED bulbs used is 140 and 200, respectively.

Similarly,

Office	Number of LED bulbs used	Number of CFL bulbs used
--------	--------------------------	--------------------------

A	200	140
B	210	170
C	240	160
D	220	150
E	270	180

Number of LED bulbs used in office 'F' = $240 \times 0.75 = 180$

Number of CFL bulbs used in office 'F' = $150 \times 1.20 = 180$

So, sum of number of LED and CFL bulbs used in office 'F' = $180 + 180 = 360$

Hence, option a.

Solution 56: 2)

Marked price of the article = $250 \times 1.60 = \text{Rs. } 400$

Selling price proposed by 'A' = $400 \times 0.80 - 12 = 320 - 12 = \text{Rs. } 308$

Selling price proposed by 'B' = $400 \times 0.75 = \text{Rs. } 300$

So, required difference = $308 - 300 = \text{Rs. } 8$

Hence, option b.

Solution 57: 1)

Time taken by 'A' alone to complete the entire work = $18 \div 0.6 = 30$ days

Time taken by 'B' alone to complete the entire work = $30 + 15 = 45$ days

Let the total work = L.C.M of 30, 45 and 20 = 180 units

Then, efficiency of 'B' = $(180/45) = 4$ units/day

Combined efficiency of 'B' and 'C' = $(180/20) = 9$ units/day

So, efficiency of 'C' alone = $9 - 4 = 5$ units/day

So, time taken by 'C' alone to complete the entire work = $(180/5) = 36$ days

Hence, option a.

Solution 58: 4)

Let the amount invested by 'A', initially = Rs. 'Y'

Then, amount invested by 'B', initially = Rs. $(Y + 200)$

Let the annual profit share of 'B' = Rs. 'K'

Then, annual profit share of 'A' = Rs. $(K + 100)$

According to the question,

$$K + K + 100 = 2900$$

$$\text{Or, } 2K + 100 = 2900$$

$$\text{So, } K = (2900 - 100) \div 2 = 1400$$

$$\text{So, ratio of profit shares of 'A' and 'B' respectively} = (1400 + 100):(1400) = 15:14$$

$$\text{Also, ratio of profit shares of 'A' and 'B' respectively} = (Y \times 6 + Y \times 1.5 \times 6): \{(Y + 200) \times 12\}$$

$$\text{So, } \{15Y:(12Y + 2400)\} = (15:14)$$

$$\text{Or, } 210Y = 180Y + 36000$$

$$\text{So, } Y = 36000 \div 30 = 1200$$

Hence, option d.

Solution 59: 1)

Let the distance between city 'A' and 'B' be = '10d' km

According to the question,

$$\{(10d \times 0.40) \div (1.25 \times 24)\} + \{(10d \times 0.60) \div (0.75 \times 24)\} - (10d \div 24) = 1.5$$

$$\text{Or, } (4d/30) + (6d/18) - (10d/24) = 1.5$$

$$\text{Or, } (0.8d + 2d - 2.5d) \div 6 = 1.5$$

$$\text{Or, } 0.3d = 9$$

$$\text{So, } d = 9 \div 0.3 = 30$$

$$\text{So, total distance travelled by Anand} = 10 \times 30 = 300 \text{ km}$$

Hence, option a.

Solution 60: 5)

Area levelled by the roller in one revolutions = curved surface area of the roller = $2 \times \pi \times \text{radius} \times \text{length}$
 $= 2 \times (22/7) \times 7 \times 15 = 660 \text{ m}^2$

So, number of revolutions needs to level the area of the entire ground = $16500 \div 660 = 25$

Hence, option e.

Solution 61: 3)

Let the quantity of acid in mixture 'A' = '11y' litres

Then, quantity of water in mixture 'A' = $(4/11) \times 11y = '4y'$ litres

Let the quantity of water and acid in mixture 'B' be 'x' litres and $(x + 30)$ litres, respectively.

So, $x + x + 30 = 100$

Or, $2x + 30 = 100$

Or, $x = (100 - 30) \div 2 = 35$

So, quantity of water and acid in mixture 'B' is 35 litres and 65 litres, respectively.

According to the question,

$(11y + 35 + 30) \div (11y + 35 + 30 + 4y + 35) = 0.7$

Or, $(11y + 65) = (15y + 100) \times 0.7$

Or, $11y + 65 = 10.5y + 75$

Or, $0.5y = 5$

So, $y = 5 \div 0.5 = 10$

So, quantity of water in mixture 'A' = $4 \times 10 = 40$ litres

Hence, option c.

Solution 62: 2)

Let the speed of the boat in still water = '8x' km/h

Then, speed of the stream = $8x \times 0.125 = 'x'$ km/h

So, upstream speed of the boat = $8x - x = '7x'$ km/h

So, $7x = 77 \div (165 \div 60)$

Or, $7x = 77 \div 2.75$

Or, $7x = 28$

Or, $x = 28 \div 7 = 4$

So, downstream speed of the boat = $8x + x = 9x = 9 \times 4 = 36$ km/h

So, time taken by the boat to travel 81 km downstream = $81 \div 36 = 2.25$ hours = $2.25 \times 60 = 135$ minutes

Hence, option b.

Solution 63: 4)

Simple interest earned on investing Rs. 'Y' = $(Y \times 4 \times 15 \div 100 = \text{Rs. } '0.6Y')$

Simple interest earned on investing Rs. $(Y - 500) = (Y - 500) \times 4 \times 16 \div 100 = \text{Rs. } '0.64Y - 320'$

According to the question,

$0.6Y = 0.64Y - 320 + 160$

Or, $0.04Y = 160$

So, $Y = 160 \div 0.04 = 4000$

Hence, option d.

Solution 64: 1)

Let the age of the husband at the time of marriage = '6y' years

Then, age of the wife at the time of marriage = '7y' years

According to the question,

$(6y + 6) = (6y - 4) \times 1.50$

Or, $6y + 6 = 9y - 6$

Or, $y = 12 \div 3 = 4$

So, age of wife at the time of marriage = $7 \times 4 = 28$ years

Hence, option a.

Solution 65: 5)

Amount spent by Mukesh on Rent = $25000 \times 0.32 = \text{Rs. } 8,000$

Remaining amount = $(25000 - 8000) = \text{Rs. } 17,000$

Amount saved by Mukesh per month = $17000 \times (1 - 0.52) = 17000 \times 0.48 = \text{Rs. } 8,160$

Required amount = $8160 \times 0.75 = \text{Rs. } 6,120$

Hence, option e.

Solution 66: 3)

Starting Point: Start with placing Amit, Ali, and Mina to form least number of cases initially.

Clues:

1 Amit lives two floors above Ali.

2 Era lives below Atul, who belongs to India.

Inferences:

From clue 1, we get Ali lives either on 3rd or 5th floor. Amit lives either on 5th or 7th floor.

From clue 2, we get Era lives on 2nd floor. Atul lives either on 7th or 3rd floor.

Case I: When Ali lives on 3rd floor.

Floors	Persons	Countries
9 th		
8 th		
7 th	Atul	India
6 th		
5 th	Amit	
4 th		
3 rd	Ali	
2 nd	Era	
1 st		

Case II: When Ali lives on 5th floor.

Floors	Persons	Countries
9 th		
8 th		
7 th	Amit	
6 th		
5 th	Ali	
4 th		
3 rd	Atul	India
2 nd	Era	
1 st		

Clues:

1 Mina lives above Amit.

2 The person, who belongs to China, lives one floor above Mina.

3 Bina, who belongs to Italy, lives two floors above Bira.

Inferences:

From clue 1 and clue 2, we get the person, who lives on 9th floor belongs to China. Mina lives on 8th floor.

From clue 3, we get Bina lives on 6th floor. Bira lives on 4th floor.

Case I:

Floors	Persons	Countries
9 th		China
8 th	Mina	

7 th	Atul	India
6 th	Bina	Italy
5 th	Amit	
4 th	Bira	
3 rd	Ali	
2 nd	Era	
1 st		

Case II:

Floors	Persons	Countries
9 th		China
8 th	Mina	
7 th	Amit	
6 th	Bina	Italy
5 th	Ali	
4 th	Bira	
3 rd	Atul	India
2 nd	Era	
1 st		

Clues:

1 Nina belongs to Japan.

2 More than one person lives between Atul and John.

Inferences:

From clue 1, we get Nina lives on 1st floor.

From clue 2, we reject Case I as we can't place John. John lives on 9th floor.

The final arrangement is as follows:

Floors	Persons	Countries
9 th	John	China
8 th	Mina	-----
7 th	Amit	-----
6 th	Bina	Italy
5 th	Ali	-----
4 th	Bira	-----
3 rd	Atul	India
2 nd	Era	-----
1 st	Nina	Japan

John belongs to China.

Hence, option c.

Solution 67: 4)

Starting Point: Start with placing Amit, Ali, and Mina to form least number of cases initially.

Clues:

- 1 Amit lives two floors above Ali.
 2 Era lives below Atul, who belongs to India.

Inferences:

From clue 1, we get Ali lives either on 3rd or 5th floor. Amit lives either on 5th or 7th floor.
 From clue 2, we get Era lives on 2nd floor. Atul lives either on 7th or 3rd floor.

Case I: When Ali lives on 3rd floor.

Floors	Persons	Countries
9 th		
8 th		
7 th	Atul	India
6 th		
5 th	Amit	
4 th		
3 rd	Ali	
2 nd	Era	
1 st		

Case II: When Ali lives on 5th floor.

Floors	Persons	Countries
9 th		
8 th		
7 th	Amit	
6 th		
5 th	Ali	
4 th		
3 rd	Atul	India
2 nd	Era	
1 st		

Clues:

- 1 Mina lives above Amit.
 2 The person, who belongs to China, lives one floor above Mina.
 3 Bina, who belongs to Italy, lives two floors above Bira.

Inferences:

From clue 1 and clue 2, we get the person, who lives on 9th floor belongs to China. Mina lives on 8th floor.
 From clue 3, we get Bina lives on 6th floor. Bira lives on 4th floor.

Case I:

Floors	Persons	Countries
9 th		China
8 th	Mina	
7 th	Atul	India
6 th	Bina	Italy

5 th	Amit	
4 th	Bira	
3 rd	Ali	
2 nd	Era	
1 st		

Case II:

Floors	Persons	Countries
9 th		China
8 th	Mina

6 th	Bina	Italy
5 th	Ali	
4 th	Bira	
3 rd	Atul	India
2 nd	Era	
1 st		

Clues:

1 Nina belongs to Japan.

2 More than one person lives between Atul and John.

Inferences:

From clue 1, we get Nina lives on 1st floor.

From clue 2, we reject Case I as we can't place John. John lives on 9th floor.

The final arrangement is as follows:

Floors	Persons	Countries
9 th	John	China
8 th	Mina	-----
7 th	Amit	-----
6 th	Bina	Italy
5 th	Ali	-----
4 th	Bira	-----
3 rd	Atul	India
2 nd	Era	-----
1 st	Nina	Japan

Bina lives one floor below Amit.

Hence, option d.

Solution 68: 2)

Starting Point: Start with placing Amit, Ali, and Mina to form least number of cases initially.

Clues:

1 Amit lives two floors above Ali.

2 Era lives below Atul, who belongs to India.

Inferences:

From clue 1, we get Ali lives either on 3rd or 5th floor. Amit lives either on 5th or 7th floor.

From clue 2, we get Era lives on 2nd floor. Atul lives either on 7th or 3rd floor.

Case I: When Ali lives on 3rd floor.

Floors	Persons	Countries
9 th		
8 th		
7 th	Atul	India
6 th		
5 th	Amit	
4 th		
3 rd	Ali	
2 nd	Era	
1 st		

Case II: When Ali lives on 5th floor.

Floors	Persons	Countries
9 th

8 th	Mina	
7 th	Amit	
6 th	Bina	Italy
5 th	Ali	
4 th	Bira	
3 rd	Atul	India
2 nd	Era	
1 st		

Clues:

1 Nina belongs to Japan.

2 More than one person lives between Atul and John.

Inferences:From clue 1, we get Nina lives on 1st floor.From clue 2, we reject Case I as we can't place John. John lives on 9th floor.

The final arrangement is as follows:

Floors	Persons	Countries
9 th	John	China
8 th	Mina	-----
7 th	Amit	-----
6 th	Bina	Italy
5 th	Ali	-----
4 th	Bira	-----
3 rd	Atul	India
2 nd	Era	-----
1 st	Nina	Japan

If the person, who lives one floor above Nina, belongs to Nepal, then

Floors	Persons	Countries
9 th	John	China
8 th	Mina	-----
7 th	Amit	-----
6 th	Bina	Italy
5 th	Ali	-----
4 th	Bira	-----

3 rd	Atul	India
2 nd	Era	Nepal
1 st	Nina	Japan

Era belongs to Nepal.

Three persons live between Era and Bina.

Hence, option b.

Solution 69: 2)

Starting Point: Start with placing Amit, Ali, and Mina to form least number of cases initially.

Clues:

1 Amit lives two floors above Ali.

2 Era lives below Atul, who belongs to India.

Inferences:

From clue 1, we get Ali lives either on 3rd or 5th floor. Amit lives either on 5th or 7th floor.

From clue 2, we get Era lives on 2nd floor. Atul lives either on 7th or 3rd floor.

Case I: When Ali lives on 3rd floor.

Floors	Persons	Countries
9 th		
8 th		
7 th	Atul	India
6 th		
5 th	Amit	
4 th		
3 rd	Ali	
2 nd	Era	
1 st		

Case II: When Ali lives on 5th floor.

Floors	Persons	Countries
9 th		
8 th		
7 th	Amit	
6 th		
5 th	Ali	
4 th		
3 rd	Atul	India
2 nd	Era	
1 st		

Clues:

1 Mina lives above Amit.

2 The person, who belongs to China, lives one floor above Mina.

3 Bina, who belongs to Italy, lives two floors above Bira.

Inferences:

From clue 1 and clue 2, we get the person, who lives on 9th floor belongs to China. Mina lives on 8th floor.

From clue 3, we get Bina lives on 6th floor. Bira lives on 4th floor.

Case I:

Floors	Persons	Countries
9 th		China
8 th	Mina	
7 th	Atul	India
6 th	Bina	Italy
5 th	Amit	
4 th	Bira	
3 rd	Ali	
2 nd	Era	
1 st		

Case II:

Floors	Persons	Countries
9 th		China
8 th	Mina

6 th	Bina	Italy
5 th	Ali	
4 th	Bira	
3 rd	Atul	India
2 nd	Era	
1 st		

Clues:

1 Nina belongs to Japan.

2 More than one person lives between Atul and John.

Inferences:

From clue 1, we get Nina lives on 1st floor.

From clue 2, we reject Case I as we can't place John. John lives on 9th floor.

The final arrangement is as follows:

Floors	Persons	Countries
9 th	John	China
8 th	Mina	-----
7 th	Amit	-----
6 th	Bina	Italy
5 th	Ali	-----
4 th	Bira	-----
3 rd	Atul	India
2 nd	Era	-----

1 st	Nina	Japan
-----------------	------	-------

Only statements II and III are correct.
Hence, option b.

Solution 70: 4)

Starting Point: Start with placing Amit, Ali, and Mina to form least number of cases initially.

Clues:

- 1 Amit lives two floors above Ali.
- 2 Era lives below Atul, who belongs to India.

Inferences:

From clue 1, we get Ali lives either on 3rd or 5th floor. Amit lives either on 5th or 7th floor.

From clue 2, we get Era lives on 2nd floor. Atul lives either on 7th or 3rd floor.

Case I: When Ali lives on 3rd floor.

Floors	Persons	Countries
9 th		
8 th		
7 th	Atul	India
6 th		
5 th	Amit	
4 th		
3 rd	Ali	
2 nd	Era	
1 st		

Case II: When Ali lives on 5th floor.

Floors	Persons	Countries
9 th		
8 th		
7 th	Amit	
6 th		
5 th	Ali	
4 th		
3 rd	Atul	India
2 nd	Era	
1 st		

Clues:

- 1 Mina lives above Amit.
- 2 The person, who belongs to China, lives one floor above Mina.
- 3 Bina, who belongs to Italy, lives two floors above Bira.

Inferences:

From clue 1 and clue 2, we get the person, who lives on 9th floor belongs to China. Mina lives on 8th floor.

From clue 3, we get Bina lives on 6th floor. Bira lives on 4th floor.

Case I:

Floors	Persons	Countries
--------	---------	-----------

9 th		China
8 th	Mina	
7 th	Atul	India
6 th	Bina	Italy
5 th	Amit	
4 th	Bira	
3 rd	Ali	
2 nd	Era	
1 st		

Case II:

Floors	Persons	Countries
9 th		China
8 th	Mina	
7 th	Amit	
6 th	Bina	Italy
5 th	Ali	
4 th	Bira	
3 rd	Atul	India
2 nd	Era	
1 st		

Clues:

1 Nina belongs to Japan.

2 More than one person lives between Atul and John.

Inferences:From clue 1, we get Nina lives on 1st floor.From clue 2, we reject Case I as we can't place John. John lives on 9th floor.

The final arrangement is as follows:

Floors	Persons	Countries
9 th	John	China
8 th	Mina	-----
7 th	Amit	-----
6 th	Bina	Italy
5 th	Ali	-----
4 th	Bira	-----
3 rd	Atul	India
2 nd	Era	-----
1 st	Nina	Japan

Nina lives below Bira.

Hence, option d.

Solution 71: 4)

Given statements: $Z \geq A \geq B = C > D$, $D > E = F \geq G < H \leq J$

On combining the given statements, we get:

$Z \geq A \geq B = C > D > E = F \geq G < H \leq J$

Conclusions:

I. $H > D$: False, (As, $D > E = F \geq G < H$, so the relationship between H and D can't be determined).

II. $Z \geq C$: True, (As, $Z \geq A \geq B = C$, so $Z \geq C$).

III. $G < B$: True, (As, $B = C > D > E = F \geq G$, so $G < B$).

Therefore, only conclusions II and III are true.

Hence, option d.

Solution 72: 5)

Given statements: $N < L = R \leq M$, $M < T < U > V \geq W$

On combining the given statements, we get:

$N < L = R \leq M < T < U > V \geq W$

Conclusions:

I. $W < T$: False, (As, $T < U > V \geq W$, so the relationship between W and T can't be determined).

II. $N > V$: False, (As, $N < L = R \leq M < T < U > V$, so the relationship between N and V can't be determined).

III. $N < U$: True, (As, $N < L = R \leq M < T < U$, so $N < U$).

Therefore, only conclusion III is true.

Hence, option e.

Solution 73: 3)

Given statements: $Q < M \leq S = K$, $K = T \geq U = L$, $V < O = P < L$

On combining the given statements, we get:

$Q < M \leq S = K = T \geq U = L > P = O > V$

Conclusions:

I. $L < S$: False, (As, $S = K = T \geq U = L$, so $S \geq L$).

II. $L = S$: False, (As, $S = K = T \geq U = L$, so $S \geq L$).

But they make a complimentary pair, so either $(L < S)$ or $(L = S)$ is true.

III. $Q < P$: False, (As, $Q < M \leq S = K = T \geq U = L > P$, so the relationship between Q and P can't be determined).

Therefore, either conclusion I or II is true and conclusion III is false.

Hence, option c.

Solution 74: 3)

Starting Point: Start with placing E, J, D and A to form least number of cases initially.

Clues:

1 E, who uses Lava went on 9th of a month, which has only 30 days.

2 J, who uses Sony, went exactly two months after E (both went on same date).

3 D and A went in the same month but after J. A doesn't went in August.

Inferences:

From clue 1, we get E went on 9th April or 9th June or 9th September.

From clue 2, we get J went either on 9th June or 9th August. E went either on 9th April or 9th June.

From clue 3, we get D and A went in September.

Case I: When E went on 9th April.

Dates/Months	Persons	Mobiles
9 th March		
18 th March		-----
9 th April	E	Lava
18 th April		-----
9 th June	J	Sony

18 th June		-----
9 th Aug		
18 th Aug		-----
9 th Sept	A/D	
18 th Sept	D/A	-----

Case II: When E went on 9th June.

Dates/Months	Persons	Mobiles
9 th March		
18 th March		-----
9 th April		
18 th April		-----
9 th June	E	Lava
18 th June		-----
9 th Aug	J	Sony
18 th Aug		-----
9 th Sept	A/D	
18 th Sept	D/A	-----

Clues:

1 F went immediately before I, but not in the same month.

2 B went before F but not in the same month.

3 More than four persons went between B and D.

Inferences:

From clue 1, we F went either on 18th June or 18th March. I went either on 9th August or 9th April.

From clue 2, we reject Case II as we can't place F.

From clue 3, we get B went on 9th March or 18th March or 18th April. D went either on 9th September or 18th September.

Case I:

Dates/Months	Persons	Mobiles
9 th March	B/	
18 th March	B/	-----
9 th April	E	Lava
18 th April	B/	-----
9 th June	J	Sony
18 th June	F	-----
9 th Aug	I	
18 th Aug		-----
9 th Sept	A/D	
18 th Sept	D/A	-----

Clues:

1 H, who uses Apple and G went in the same month.

2 A and H went on the same date of different months. I doesn't uses Max.

Inferences:

From clue 1 and clue 2, we get B must went on 18th April. A went on 9th September. D went 18th September. H went on 9th March. G went on 18th March. C went on 18th August. I uses Spice. A uses Max.

The final arrangement is as follows:

Dates/Months	Persons	Mobiles
9 th March	H	Apple
18 th March	G	-----
9 th April	E	Lava
18 th April	B	-----
9 th June	J	Sony
18 th June	F	-----
9 th Aug	I	Spice
18 th Aug	C	-----
9 th Sept	A	Max
18 th Sept	D	-----

C went on 18th August.

Hence, option c.

Solution 75: 3)

Starting Point: Start with placing E, J, D and A to form least number of cases initially.

Clues:

1 E, who uses Lava went on 9th of a month, which has only 30 days.

2 J, who uses Sony, went exactly two months after E (both went on same date).

3 D and A went in the same month but after J. A doesn't went in August.

Inferences:

From clue 1, we get E went on 9th April or 9th June or 9th September.

From clue 2, we get J went either on 9th June or 9th August. E went either on 9th April or 9th June.

From clue 3, we get D and A went in September.

Case I: When E went on 9th April.

Dates/Months	Persons	Mobiles
9 th March		
18 th March		-----
9 th April	E	Lava
18 th April		-----
9 th June	J	Sony
18 th June		-----
9 th Aug		
18 th Aug		-----
9 th Sept	A/D	
18 th Sept	D/A	-----

Case II: When E went on 9th June.

Dates/Months	Persons	Mobiles
9 th March		
18 th March		-----
9 th April		
18 th April		-----
9 th June	E	Lava
18 th June		-----
9 th Aug	J	Sony
18 th Aug		-----
9 th Sept	A/D	
18 th Sept	D/A	-----

Clues:

1 F went immediately before I, but not in the same month.

2 B went before F but not in the same month.

3 More than four persons went between B and D.

Inferences:

From clue 1, we F went either on 18th June or 18th March. I went either on 9th August or 9th April.

From clue 2, we reject Case II as we can't place F.

From clue 3, we get B went on 9th March or 18th March or 18th April. D went either on 9th September or 18th September.

Case I:

Dates/Months	Persons	Mobiles
9 th March	B/	
18 th March	B/	-----
9 th April	E	Lava
18 th April	B/	-----
9 th June	J	Sony
18 th June	F	-----
9 th Aug	I	
18 th Aug		-----
9 th Sept	A/D	
18 th Sept	D/A	-----

Clues:

1 H, who uses Apple and G went in the same month.

2 A and H went on the same date of different months. I doesn't uses Max.

Inferences:

From clue 1 and clue 2, we get B must went on 18th April. A went on 9th September. D went 18th September. H went on 9th March. G went on 18th March. C went on 18th August. I uses Spice. A uses Max.

The final arrangement is as follows:

Dates/Months	Persons	Mobiles
9 th March	H	Apple

18 th March	G	-----
9 th April	E	Lava
18 th April	B	-----
9 th June	J	Sony
18 th June	F	-----
9 th Aug	I	Spice
18 th Aug	C	-----
9 th Sept	A	Max
18 th Sept	D	-----

J and F went in June.
Hence, option c.

Solution 76: 2)

Starting Point: Start with placing E, J, D and A to form least number of cases initially.

Clues:

- 1 E, who uses Lava went on 9th of a month, which has only 30 days.
- 2 J, who uses Sony, went exactly two months after E (both went on same date).
- 3 D and A went in the same month but after J. A doesn't went in August.

Inferences:

From clue 1, we get E went on 9th April or 9th June or 9th September.

From clue 2, we get J went either on 9th June or 9th August. E went either on 9th April or 9th June.

From clue 3, we get D and A went in September.

Case I: When E went on 9th April.

Dates/Months	Persons	Mobiles
9 th March		
18 th March		-----
9 th April	E	Lava
18 th April		-----
9 th June	J	Sony
18 th June		-----
9 th Aug		
18 th Aug		-----
9 th Sept	A/D	
18 th Sept	D/A	-----

Case II: When E went on 9th June.

Dates/Months	Persons	Mobiles
9 th March		
18 th March		-----
9 th April		
18 th April		-----
9 th June	E	Lava

18 th June		-----
9 th Aug	J	Sony
18 th Aug		-----
9 th Sept	A/D	
18 th Sept	D/A	-----

Clues:

1 F went immediately before I, but not in the same month.

2 B went before F but not in the same month.

3 More than four persons went between B and D.

Inferences:

From clue 1, we F went either on 18th June or 18th March. I went either on 9th August or 9th April.

From clue 2, we reject Case II as we can't place F.

From clue 3, we get B went on 9th March or 18th March or 18th April. D went either on 9th September or 18th September.

Case I:

Dates/Months	Persons	Mobiles
9 th March	B/	
18 th March	B/	-----
9 th April	E	Lava
18 th April	B/	-----
9 th June	J	Sony
18 th June	F	-----
9 th Aug	I	
18 th Aug		-----
9 th Sept	A/D	
18 th Sept	D/A	-----

Clues:

1 H, who uses Apple and G went in the same month.

2 A and H went on the same date of different months. I doesn't uses Max.

Inferences:

From clue 1 and clue 2, we get B must went on 18th April. A went on 9th September. D went

18th September. H went on 9th March. G went on 18th March. C went on 18th August. I uses Spice. A uses Max.

The final arrangement is as follows:

Dates/Months	Persons	Mobiles
9 th March	H	Apple
18 th March	G	-----
9 th April	E	Lava
18 th April	B	-----
9 th June	J	Sony
18 th June	F	-----
9 th Aug	I	Spice

18 th Aug	C	-----
9 th Sept	A	Max
18 th Sept	D	-----

G went on 18th March.
Hence, option b.

Solution 77: 3)

Starting Point: Start with placing E, J, D and A to form least number of cases initially.

Clues:

- 1 E, who uses Lava went on 9th of a month, which has only 30 days.
- 2 J, who uses Sony, went exactly two months after E (both went on same date).
- 3 D and A went in the same month but after J. A doesn't went in August.

Inferences:

From clue 1, we get E went on 9th April or 9th June or 9th September.

From clue 2, we get J went either on 9th June or 9th August. E went either on 9th April or 9th June.

From clue 3, we get D and A went in September.

Case I: When E went on 9th April.

Dates/Months	Persons	Mobiles
9 th March		
18 th March		-----
9 th April	E	Lava
18 th April		-----
9 th June	J	Sony
18 th June		-----
9 th Aug		
18 th Aug		-----
9 th Sept	A/D	
18 th Sept	D/A	-----

Case II: When E went on 9th June.

Dates/Months	Persons	Mobiles
9 th March		
18 th March		-----
9 th April		
18 th April		-----
9 th June	E	Lava
18 th June		-----
9 th Aug	J	Sony
18 th Aug		-----
9 th Sept	A/D	
18 th Sept	D/A	-----

Clues:

- 1 F went immediately before I, but not in the same month.

- 2 B went before F but not in the same month.
 3 More than four persons went between B and D.

Inferences:

From clue 1, we F went either on 18th June or 18th March. I went either on 9th August or 9th April.

From clue 2, we reject Case II as we can't place F.

From clue 3, we get B went on 9th March or 18th March or 18th April. D went either on 9th September or 18th September.

Case I:

Dates/Months	Persons	Mobiles
9 th March	B/	
18 th March	B/	-----
9 th April	E	Lava
18 th April	B/	-----
9 th June	J	Sony
18 th June	F	-----
9 th Aug	I	
18 th Aug		-----
9 th Sept	A/D	
18 th Sept	D/A	-----

Clues:

- 1 H, who uses Apple and G went in the same month.
 2 A and H went on the same date of different months. I doesn't uses Max.

Inferences:

From clue 1 and clue 2, we get B must went on 18th April. A went on 9th September. D went 18th September. H went on 9th March. G went on 18th March. C went on 18th August. I uses Spice. A uses Max.

The final arrangement is as follows:

Dates/Months	Persons	Mobiles
9 th March	H	Apple
18 th March	G	-----
9 th April	E	Lava
18 th April	B	-----
9 th June	J	Sony
18 th June	F	-----
9 th Aug	I	Spice
18 th Aug	C	-----
9 th Sept	A	Max
18 th Sept	D	-----

Two persons went between D and I, who uses Spice.
 Hence, option c.

Solution 78: 4)

Starting Point: Start with placing E, J, D and A to form least number of cases initially.

Clues:

- 1 E, who uses Lava went on 9th of a month, which has only 30 days.
 2 J, who uses Sony, went exactly two months after E (both went on same date).
 3 D and A went in the same month but after J. A doesn't went in August.

Inferences:

From clue 1, we get E went on 9th April or 9th June or 9th September.

From clue 2, we get J went either on 9th June or 9th August. E went either on 9th April or 9th June.

From clue 3, we get D and A went in September.

Case I: When E went on 9th April.

Dates/Months	Persons	Mobiles
9 th March		
18 th March		-----
9 th April	E	Lava
18 th April		-----
9 th June	J	Sony
18 th June		-----
9 th Aug		
18 th Aug		-----
9 th Sept	A/D	
18 th Sept	D/A	-----

Case II: When E went on 9th June.

Dates/Months	Persons	Mobiles
9 th March		
18 th March		-----
9 th April		
18 th April		-----
9 th June	E	Lava
18 th June		-----
9 th Aug	J	Sony
18 th Aug		-----
9 th Sept	A/D	
18 th Sept	D/A	-----

Clues:

- 1 F went immediately before I, but not in the same month.
 2 B went before F but not in the same month.
 3 More than four persons went between B and D.

Inferences:

From clue 1, we F went either on 18th June or 18th March. I went either on 9th August or 9th April.

From clue 2, we reject Case II as we can't place F.

From clue 3, we get B went on 9th March or 18th March or 18th April. D went either on 9th September or 18th September.

Case I:

Dates/Months	Persons	Mobiles
--------------	---------	---------

9 th March	B/	
18 th March	B/	-----
9 th April	E	Lava
18 th April	B/	-----
9 th June	J	Sony
18 th June	F	-----
9 th Aug	I	
18 th Aug		-----
9 th Sept	A/D	
18 th Sept	D/A	-----

Clues:

1 H, who uses Apple and G went in the same month.

2 A and H went on the same date of different months. I doesn't uses Max.

Inferences:

From clue 1 and clue 2, we get B must went on 18th April. A went on 9th September. D went 18th September. H went on 9th March. G went on 18th March. C went on 18th August. I uses Spice. A uses Max.

The final arrangement is as follows:

Dates/Months	Persons	Mobiles
9 th March	H	Apple
18 th March	G	-----
9 th April	E	Lava
18 th April	B	-----
9 th June	J	Sony
18 th June	F	-----
9 th Aug	I	Spice
18 th Aug	C	-----
9 th Sept	A	Max
18 th Sept	D	-----

One who uses Max went exactly three months after J.

Hence, option d.

Solution 79: 5)

From statement II, III, and IV we get the code for 'disease' as 'cdc'.

From statement II and IV we get the code for 'cause' as 'aba'.

From statement I and II we get the code for 'polluted' as 'lbi'.

From statement I and III we get the code for 'vastly' as 'tut'.

From statement III and IV we get the code for 'spread' as 'jgj'.

From statement II alone, the code for 'stream' is 'nkn'.

From statement III alone, the code for 'everywhere' is 'hgh'.

From statement IV alone, the code for 'of' is 'xlx'.

From statement I alone, the code for 'pure' or 'river' is either 'qrq' or 'mnm'.

The following table shows the words and their codes:

Words	pure	river	vastly	polluted	stream	cause	disease	spread	everywhere	of
-------	------	-------	--------	----------	--------	-------	---------	--------	------------	----

Codes	qrq/mnm	mnm/qrq	tut	lbl	nkn	aba	cdc	jgj	hgh	xlx
--------------	---------	---------	-----	-----	-----	-----	-----	-----	-----	-----

The code for either 'pure' or 'river' is 'mnm'.

Hence, option e.

Solution 80: 5)

From statement II, III, and IV we get the code for 'disease' as 'cdc'.

From statement II and IV we get the code for 'cause' as 'aba'.

From statement I and II we get the code for 'polluted' as 'lbl'.

From statement I and III we get the code for 'vastly' as 'tut'.

From statement III and IV we get the code for 'spread' as 'jgj'.

From statement II alone, the code for 'stream' is 'nkn'.

From statement III alone, the code for 'everywhere' is 'hgh'.

From statement IV alone, the code for 'of' is 'xlx'.

From statement I alone, the code for 'pure' or 'river' is either 'qrq' or 'mnm'.

The following table shows the words and their codes:

Words	pure	river	vastly	polluted	stream	cause	disease	spread	everywhere	of
Codes	qrq/mnm	mnm/qrq	tut	lbl	nkn	aba	cdc	jgj	hgh	xlx

The code for 'river spread stream' is either 'mnm, nkn, jgj' or 'qrq, nkn, jgj'.

Hence, option e.

Solution 81: 3)

From statement II, III, and IV we get the code for 'disease' as 'cdc'.

From statement II and IV we get the code for 'cause' as 'aba'.

From statement I and II we get the code for 'polluted' as 'lbl'.

From statement I and III we get the code for 'vastly' as 'tut'.

From statement III and IV we get the code for 'spread' as 'jgj'.

From statement II alone, the code for 'stream' is 'nkn'.

From statement III alone, the code for 'everywhere' is 'hgh'.

From statement IV alone, the code for 'of' is 'xlx'.

From statement I alone, the code for 'pure' or 'river' is either 'qrq' or 'mnm'.

The following table shows the words and their codes:

Words	pure	river	vastly	polluted	stream	cause	disease	spread	everywhere	of
Codes	qrq/mnm	mnm/qrq	tut	lbl	nkn	aba	cdc	jgj	hgh	xlx

The code for 'cause' is 'aba'.

Hence, option c.

Solution 82: 3)

From statement II, III, and IV we get the code for 'disease' as 'cdc'.

From statement II and IV we get the code for 'cause' as 'aba'.

From statement I and II we get the code for 'polluted' as 'lbl'.

From statement I and III we get the code for 'vastly' as 'tut'.

From statement III and IV we get the code for 'spread' as 'jgj'.

From statement II alone, the code for 'stream' is 'nkn'.

From statement III alone, the code for 'everywhere' is 'hgh'.

From statement IV alone, the code for 'of' is 'xlx'.

From statement I alone, the code for 'pure' or 'river' is either 'qrq' or 'mnm'.

The following table shows the words and their codes:

Words	pure	river	vastly	polluted	stream	cause	disease	spread	everywhere	of
Codes	qrq/mnm	mnm/qrq	tut	lbl	nkn	aba	cdc	jgj	hgh	xlx

The possible code for 'severe disease' is 'cdc, geg'.

Hence, option c.

Solution 83: 5)

Starting Point: First try to determine the age of persons, then proceed on seating arrangement.

Clues:

- 1 Only S is elder than R.
- 2 B's age is a prime number.
- 3 C is 3 years younger than D. D's age is not 48 years old.
- 4 P is elder than A, but younger than Q.

Inferences:

From clue 1, we get S's age is 55 years. R's age is 51 years.

From clue 2, we get B's age is 43 years.

From clue 3, we get C's age is 42 years. D's age is 45 years.

From clue 4, we get Q's age is 50 years. P's age is 48 years. A's age is 40 years.

Persons	S	R	Q	P	D	B	C	A
Ages	55	51	50	48	45	43	42	40

Clues:

1 B, who doesn't sit at extreme end, sits immediate left of C.

2 One person sits between A and B. R faces D.

Inferences:

From clue 1 and clue 2, we get

Case I: When C sits at extreme right end.

Row 2		R (51)		
Row 1	A (40)	D (45)	B (43)	C (42)

Case II: When C sits 2nd from extreme right end.

Row 2	R (51)			
Row 1	D (45)	B (43)	C (42)	A (40)

Clues:

1 The eldest person sits 2nd to the left of Q.

2 The eldest person doesn't face the youngest person.

Inferences:

From clue 1 and clue 2, we reject Case II as we can't place S. S faces B. Q faces A. C faces P.

The final arrangement is as follows:

Row 2	Q (50)	R (51)	S (55)	P (48)
Row 1	A (40)	D (45)	B (43)	C (42)

P faces C.

P's age is 48 years.

Hence, option e.

Solution 84: 4)

Starting Point: First try to determine the age of persons, then proceed on seating arrangement.

Clues:

- 1 Only S is elder than R.
- 2 B's age is a prime number.
- 3 C is 3 years younger than D. D's age is not 48 years old.
- 4 P is elder than A, but younger than Q.

Inferences:

From clue 1, we get S's age is 55 years. R's age is 51 years.

From clue 2, we get B's age is 43 years.

From clue 3, we get C's age is 42 years. D's age is 45 years.

From clue 4, we get Q's age is 50 years. P's age is 48 years. A's age is 40 years.

Persons	S	R	Q	P	D	B	C	A
Ages	55	51	50	48	45	43	42	40

Clues:

1 B, who doesn't sit at extreme end, sits immediate left of C.

2 One person sits between A and B. R faces D.

Inferences:

From clue 1 and clue 2, we get

Case I: When C sits at extreme right end.

Row 2		R (51)		
Row 1	A (40)	D (45)	B (43)	C (42)

Case II: When C sits 2nd from extreme right end.

Row 2	R (51)			
Row 1	D (45)	B (43)	C (42)	A (40)

Clues:

1 The eldest person sits 2nd to the left of Q.

2 The eldest person doesn't face the youngest person.

Inferences:

From clue 1 and clue 2, we reject Case II as we can't place S. S faces B. Q faces A. C faces P.

The final arrangement is as follows:

Row 2	Q (50)	R (51)	S (55)	P (48)
Row 1	A (40)	D (45)	B (43)	C (42)

A's age is 40 years. P's age is 48 years.

Absolute difference = $(48 - 40) = 8$ years.

Hence, option d.

Solution 85: 3)

Starting Point: First try to determine the age of persons, then proceed on seating arrangement.

Clues:

1 Only S is elder than R.

2 B's age is a prime number.

3 C is 3 years younger than D. D's age is not 48 years old.

4 P is elder than A, but younger than Q.

Inferences:

From clue 1, we get S's age is 55 years. R's age is 51 years.

From clue 2, we get B's age is 43 years.

From clue 3, we get C's age is 42 years. D's age is 45 years.

From clue 4, we get Q's age is 50 years. P's age is 48 years. A's age is 40 years.

Persons	S	R	Q	P	D	B	C	A
Ages	55	51	50	48	45	43	42	40

Clues:

1 B, who doesn't sit at extreme end, sits immediate left of C.

2 One person sits between A and B. R faces D.

Inferences:

From clue 1 and clue 2, we get

Case I: When C sits at extreme right end.

Row 2		R (51)		
Row 1	A (40)	D (45)	B (43)	C (42)

Case II: When C sits 2nd from extreme right end.

Row 2	R (51)			
Row 1	D (45)	B (43)	C (42)	A (40)

Clues:

1 The eldest person sits 2nd to the left of Q.

2 The eldest person doesn't face the youngest person.

Inferences:

From clue 1 and clue 2, we reject Case II as we can't place S. S faces B. Q faces A. C faces P.

The final arrangement is as follows:

Row 2	Q (50)	R (51)	S (55)	P (48)
Row 1	A (40)	D (45)	B (43)	C (42)

B faces S.

B's age is 43 years.

Q's age is 50 years.

Q is 7 years elder than B.

Hence, option c.

Solution 86: 1)

Starting Point: First try to determine the age of persons, then proceed on seating arrangement.

Clues:

1 Only S is elder than R.

2 B's age is a prime number.

3 C is 3 years younger than D. D's age is not 48 years old.

4 P is elder than A, but younger than Q.

Inferences:

From clue 1, we get S's age is 55 years. R's age is 51 years.

From clue 2, we get B's age is 43 years.

From clue 3, we get C's age is 42 years. D's age is 45 years.

From clue 4, we get Q's age is 50 years. P's age is 48 years. A's age is 40 years.

Persons	S	R	Q	P	D	B	C	A
Ages	55	51	50	48	45	43	42	40

Clues:

1 B, who doesn't sit at extreme end, sits immediate left of C.

2 One person sits between A and B. R faces D.

Inferences:

From clue 1 and clue 2, we get

Case I: When C sits at extreme right end.

Row 2		R (51)		
Row 1	A (40)	D (45)	B (43)	C (42)

Case II: When C sits 2nd from extreme right end.

Row 2	R (51)			
Row 1	D (45)	B (43)	C (42)	A (40)

Clues:

1 The eldest person sits 2nd to the left of Q.

2 The eldest person doesn't face the youngest person.

Inferences:

From clue 1 and clue 2, we reject Case II as we can't place S. S faces B. Q faces A. C faces P.

The final arrangement is as follows:

Row 2	Q (50)	R (51)	S (55)	P (48)
Row 1	A (40)	D (45)	B (43)	C (42)

R's age is 51 years.

D faces R.

C sits 2nd to the right of D.

Hence, option a.

Solution 87: 4)

Starting Point: First try to determine the age of persons, then proceed on seating arrangement.

Clues:

1 Only S is elder than R.

2 B's age is a prime number.

3 C is 3 years younger than D. D's age is not 48 years old.

4 P is elder than A, but younger than Q.

Inferences:

From clue 1, we get S's age is 55 years. R's age is 51 years.

From clue 2, we get B's age is 43 years.

From clue 3, we get C's age is 42 years. D's age is 45 years.

From clue 4, we get Q's age is 50 years. P's age is 48 years. A's age is 40 years.

Persons	S	R	Q	P	D	B	C	A
Ages	55	51	50	48	45	43	42	40

Clues:

1 B, who doesn't sit at extreme end, sits immediate left of C.

2 One person sits between A and B. R faces D.

Inferences:

From clue 1 and clue 2, we get

Case I: When C sits at extreme right end.

Row 2		R (51)		
Row 1	A (40)	D (45)	B (43)	C (42)

Case II: When C sits 2nd from extreme right end.

Row 2	R (51)			
Row 1	D (45)	B (43)	C (42)	A (40)

Clues:

1 The eldest person sits 2nd to the left of Q.

2 The eldest person doesn't face the youngest person.

Inferences:

From clue 1 and clue 2, we reject Case II as we can't place S. S faces B. Q faces A. C faces P.

The final arrangement is as follows:

Row 2	Q (50)	R (51)	S (55)	P (48)
Row 1	A (40)	D (45)	B (43)	C (42)

D's age is 45 years.

A sits immediate left of D.

Hence, option d.

Solution 88: 3)

Given word:

PERMUTATION

The even position letters from the left end are E, M, T, T and O

After replacement with consecutive vowels, we get:

PAREUIAOIU

There are three consonants in the word after replacement.

Hence, option c.

Solution 89: 4)

Given number:

9452347

There are seven such pairs of numbers (4,9), (4,5), (4,2), (5,3), (2,4), (3,4), and (2,3), which have as many digits between them (both forward and backward) as in the number series.

Hence, option d.

Solution 90: 4)

Clues:

1 S sits in the middle of the row.

2 M sits 4th to the left of Q.

3 Two persons sit between S and M.

Inferences:

From clue 1, we get odd number of persons sit in the row.

From clue 2 and clue 3, we get M sits either right or left of S.

Case I: When M sits to the right of S.

							S			M				Q
--	--	--	--	--	--	--	---	--	--	---	--	--	--	---

Case II: When M sits to the left of S.

M					S		Q							
---	--	--	--	--	---	--	---	--	--	--	--	--	--	--

Clues:

1 T sits 7th to the left of M, who sits 2nd to the right of E.

2 T sits 2nd from one of the extreme ends of row.

3 L sits 4th from one of the extreme ends of row.

4 More than two persons sit between E and L.

Inferences:

From clue 1 and clue 2, we reject Case I as we can't place T. 23 persons sit in the row.

From clue 3 and clue 4, we get six persons sit between Q and L, who sits to the right of Q.

The final arrangement is as follows:

	T					E		M			S	Q						L			
--	---	--	--	--	--	---	--	---	--	--	---	---	--	--	--	--	--	---	--	--	--

23 persons sit in the row.

Hence, option d.

Solution 91: 2)**Clues:**

1 S sits in the middle of the row.

2 M sits 4th to the left of Q.

3 Two persons sit between S and M.

Inferences:

From clue 1, we get odd number of persons sit in the row.

From clue 2 and clue 3, we get M sits either right or left of S.

Case I: When M sits to the right of S.

							S			M					Q
--	--	--	--	--	--	--	---	--	--	---	--	--	--	--	---

Case II: When M sits to the left of S.

M					S		Q							
---	--	--	--	--	---	--	---	--	--	--	--	--	--	--

Clues:

1 T sits 7th to the left of M, who sits 2nd to the right of E.

2 T sits 2nd from one of the extreme ends of row.

3 L sits 4th from one of the extreme ends of row.

4 More than two persons sit between E and L.

Inferences:

From clue 1 and clue 2, we reject Case I as we can't place T. 23 persons sit in the row.

From clue 3 and clue 4, we get six persons sit between Q and L, who sits to the right of Q.

The final arrangement is as follows:

	T					E		M			S	Q						L			
--	---	--	--	--	--	---	--	---	--	--	---	---	--	--	--	--	--	---	--	--	--

Six persons sit between L and Q.

Hence, option b.

Solution 92: 3)**Clues:**

1 S sits in the middle of the row.

2 M sits 4th to the left of Q.

3 Two persons sit between S and M.

Inferences:

From clue 1, we get odd number of persons sit in the row.

From clue 2 and clue 3, we get M sits either right or left of S.

Case I: When M sits to the right of S.

							S			M				Q
--	--	--	--	--	--	--	---	--	--	---	--	--	--	---

Case II: When M sits to the left of S.

M				S		Q				
---	--	--	--	---	--	---	--	--	--	--

Clues:

- 1 T sits 7th to the left of M, who sits 2nd to the right of E.
- 2 T sits 2nd from one of the extreme ends of row.
- 3 L sits 4th from one of the extreme ends of row.
- 4 More than two persons sit between E and L.

Inferences:

From clue 1 and clue 2, we reject Case I as we can't place T. 23 persons sit in the row.

From clue 3 and clue 4, we get six persons sit between Q and L, who sits to the right of Q.

The final arrangement is as follows:

	T				E		M			S	Q						L		
--	---	--	--	--	---	--	---	--	--	---	---	--	--	--	--	--	---	--	--

If N sits 2nd to the left of Q, then,

	T				E		M		N	S	Q						L		
--	---	--	--	--	---	--	---	--	---	---	---	--	--	--	--	--	---	--	--

N sits 4th to the right of E.

Hence, option c.

Solution 93: 1)

Following figure can be formed:

From the figure, only conclusion III follows.

Hence, option a.

Solution 94: 5)

Following figure can be formed:

From the figure, only conclusions II and III follow.

Hence, option e.

Solution 95: 3)

Starting Point: Start with placing S, T, P, and U to form least number of cases initially.

Clues:

- 1 Two persons sit between S and T (from either side of the table).
- 2 One of the immediate neighbours of T, sits 2nd to the left of P.
- 3 U sits immediate right of P.

Inferences:

From clue 1, we get T sits either 3rd to the right or 3rd to the left of T.

From clue 2 and clue 3, we get U sits either immediate left or 3rd to the left of S.

Case I: When T sits 3rd to the right of S.

Case I(a): When U sits 3rd to the left of S.

Case I(b): When U sits immediate left of S.

Case II: When T sits 3rd to the left of S.

Clues:

- 1 W sits 2nd to the right of R.
- 2 Q doesn't sit adjacent to W.
- 3 S doesn't sit adjacent to Q.

Inferences:

From clue 1, clue 2, and clue 3, we reject Case I(b) and Case II place V and Q. W sits immediate right of S. R sits immediate left of S. Q sits immediate left of R. V sits immediate left of T.

The final arrangement is as follows:

U sits 3rd to the right of V.
Hence, option c.

Solution 96: 2)

Starting Point: Start with placing S, T, P, and U to form least number of cases initially.

Clues:

- 1 Two persons sit between S and T (from either side of the table).
- 2 One of the immediate neighbours of T, sits 2nd to the left of P.
- 3 U sits immediate right of P.

Inferences:

From clue 1, we get T sits either 3rd to the right or 3rd to the left of S.

From clue 2 and clue 3, we get U sits either immediate left or 3rd to the left of S.

Case I: When T sits 3rd to the right of S.

Case I(a): When U sits 3rd to the left of S.

Case I(b): When U sits immediate left of S.

Case II: When T sits 3rd to the left of S.

Clues:

- 1 W sits 2nd to the right of R.
- 2 Q doesn't sit adjacent to W.
- 3 S doesn't sit adjacent to Q.

Inferences:

From clue 1, clue 2, and clue 3, we reject Case I(b) and Case II place V and Q. W sits immediate right of S. R sits immediate left of S. Q sits immediate left of R. V sits immediate left of T. The final arrangement is as follows:

Four persons sit between T and Q, when counted from left of T.
Hence, option b.

Solution 97: 4)

Starting Point: Start with placing S, T, P, and U to form least number of cases initially.

Clues:

- 1 Two persons sit between S and T (from either side of the table).
- 2 One of the immediate neighbours of T, sits 2nd to the left of P.
- 3 U sits immediate right of P.

Inferences:

From clue 1, we get T sits either 3rd to the right or 3rd to the left of T.

From clue 2 and clue 3, we get U sits either immediate left or 3rd to the left of S.

Case I: When T sits 3rd to the right of S.

Case I(a): When U sits 3rd to the left of S.

Case I(b): When U sits immediate left of S.

Case II: When T sits 3rd to the left of S.

Clues:

- 1 W sits 2nd to the right of R.
- 2 Q doesn't sit adjacent to W.
- 3 S doesn't sit adjacent to Q.

Inferences:

From clue 1, clue 2, and clue 3, we reject Case I(b) and Case II place V and Q. W sits immediate right of S. R sits immediate left of S. Q sits immediate left of R. V sits immediate left of T.

The final arrangement is as follows:

Three persons sit between each combination of persons from either side of the table, except for W and Q. Hence, option d.

Solution 98: 4)

Starting Point: Start with placing S, T, P, and U to form least number of cases initially.

Clues:

- 1 Two persons sit between S and T (from either side of the table).
- 2 One of the immediate neighbours of T, sits 2nd to the left of P.
- 3 U sits immediate right of P.

Inferences:

From clue 1, we get T sits either 3rd to the right or 3rd to the left of S.

From clue 2 and clue 3, we get U sits either immediate left or 3rd to the left of S.

Case I: When T sits 3rd to the right of S.

Case I(a): When U sits 3rd to the left of S.

Case I(b): When U sits immediate left of S.

Case II: When T sits 3rd to the left of S.

Clues:

1 W sits 2nd to the right of R.

2 Q doesn't sit adjacent to W.

3 S doesn't sit adjacent to Q.

Inferences:

From clue 1, clue 2, and clue 3, we reject Case I(b) and Case II place V and Q. W sits immediate right of S. R sits immediate left of S. Q sits immediate left of R. V sits immediate left of T.

The final arrangement is as follows:

If all the persons sit in alphabetical order starting from P (In anti- clockwise direction), then,

V will remain in its initial position after the rearrangement.
Hence, option d.

Solution 99: 5)

Clues:

- 1 O has three children and one of them is married.
- 2 Q is only grandchild of S.
- 3 R is maternal uncle of Q.
- 4 M and N are male members of the family.

5 N is unmarried. Both O and P have one daughter.

Inferences:

From clue 1 and clue 2, we get S is married to O.

From clue 3, we get R is son of S and O.

From clue 4 and clue 5, we get N is brother of P, who is married to M. Q is daughter of M and P.

The final family tree is as follows:

S is either father or mother of N.
Hence, option e.

Solution 100: 2)

Clues:

- 1 O has three children and one of them is married.
- 2 Q is only grandchild of S.
- 3 R is maternal uncle of Q.
- 4 M and N are male members of the family.
- 5 N is unmarried. Both O and P have one daughter.

Inferences:

From clue 1 and clue 2, we get S is married to O.

From clue 3, we get R is son of S and O.

From clue 4 and clue 5, we get N is brother of P, who is married to M. Q is daughter of M and P.

The final family tree is as follows:

Q is niece of R.
M is father of Q.
Hence, option b.
