

IBPS RRB Prelims 2023

68 questions

Study the following information carefully and answer the questions given below: Eight persons P, Q, R, S, T, U, V and W were born in different years viz. 1994, 1996, 1998, 1999, 2001, 2002, 2004 and 2005 but not necessarily in the same order. Base year is counted as 2021. At most one person is older to P. Two persons were born between P and V. Q was born just before V in the odd numbered year. R is 4 years older to T. W is older to U and just younger to S. P, Q, R, S, T, U, V W - 1994, 1996, 1998, 1999, 2001, 2002, 2004 2005 2021 P P V Q V R, T 4 W, U S

1. Who was born in the year 1998? 1998 ?

- (a) P
- (b) Q
- (c) R
- (d) T
- (e) U

2. In which year S was born?

- (a) 2002
- (b) 1999
- (c) 2001
- (d) 1998
- (e) 2005

3. Which of the following statements is true?

- (a) P was born in 1994./ P 1994
- (b) V was born in 1996./ V 1996
- (c) T is the oldest among all./ T
- (d) U was born in 2002./ U 2002
- (e) R is older than P./ R, P

4. How many persons were born between W and T?

- (a) 1
- (b) 2
- (c) 3
- (d) 4
- (e) Cannot be determined

5. Who is the oldest person among them?

- (a) P
- (b) Q
- (c) R
- (d) S
- (e) V

In each of the questions below some statements are given followed by two conclusions. You have to take the given statements to be true even if they seem to be at variance with commonly known facts. Read all the conclusions and then decide which of the given conclusions logically follows from the given statements disregarding commonly known facts.

6. Statements: All flowers are plants. Only a few plants are fruits. No fruits is vegetables. : Conclusion I: Some flowers are fruits. I: Conclusion II: Some plants are not vegetables. II:

- (a) If only conclusion I follows./ I
 - (b) If only conclusion II follows./ II
 - (c) If either conclusion I or II follows./ I II
 - (d) If neither conclusion I nor II follows./ I II
 - (e) If both conclusions I and II follow./ I II
-

7. Statements: All mammals are bird. All birds are eggs. No eggs are reptiles. : Conclusion I: Some mammals are eggs. I: Conclusion II: Some reptiles can be birds. II:

- (a) If only conclusion I follows./ I
 - (b) If only conclusion II follows./ II
 - (c) If either conclusion I or II follows./ I II
 - (d) If neither conclusion I nor II follows./ I II
 - (e) If both conclusions I and II follow./ I II
-

8. Statements: Only a few apples are oranges. All oranges are bananas. Only bananas are grapes. : Conclusion I: Some apples are bananas. I: Conclusion II: Some grapes are not oranges. II:

- (a) If only conclusion I follows./ I
 - (b) If only conclusion II follows./ II
 - (c) If either conclusion I or II follows./ I II
 - (d) If neither conclusion I nor II follows./ I II
 - (e) If both conclusions I and II follow./ I II 2
-

Study the following information carefully and answer the questions given below: Nine boxes are arranged one above the other. More than four boxes are placed below the box G. Three boxes are placed between box G and box H. The numbers of boxes placed above box H is same as the numbers of boxes placed below box C. Box A is placed two places above the box E which is placed just above the box I. Box F and box H are not placed adjacent to each other. Box B is placed above the box D but placed below box E. G G H H , C E, I , A F H - B D E

9. Which box is placed exactly in the middle of the arrangement?

- (a) A
 - (b) E
 - (c) C
 - (d) D
 - (e) None of these
-

10. How many boxes are placed between boxes A and I?

- (a) Two
 - (b) Three
 - (c) One
 - (d) More than four
 - (e) None of these
-

11. If box F is placed immediately below box D, how many boxes are there between boxes F and G?

- (a) Two
- (b) Three
- (c) One
- (d) Four

(e) None of these

12. The numbers of boxes are placed between box G and box H is same as the numbers of boxes are placed between box ____ and box _____. G H _____

- (a) C, H
- (b) F, G
- (c) G, A
- (d) H, B
- (e) I, C

13. Which of the following statement is true? - ? I. Box F is placed above the box E F E II. More than two boxes are placed between box A and box I A I III. No box is placed below the box H H 3

- (a) Both II and III/ II III
- (b) Only I/ I
- (c) Both I and II/ I II
- (d) Only II/ II
- (e) All I, II and III/ I, II III

Study the following information carefully and answer the questions given below: Certain numbers of persons sit in a row and face north. A sits 3rd to the left of F. Three persons sit between F and R. R sits 2nd to the left of C who sits just left of V. One person sits between U and V. U sits right of C. B sits 2nd to the left of N and 3rd to the right of U. Q sits 3rd to the left of D who sits just right to A. The numbers of persons sit between Q and R is one more than the numbers of persons sit to the right of N. No one sits left of Q. A, F F R C, V, R U V U, C B, N U D, A, Q Q R, N Q 4

17. How many persons are there between D and Q?

- (a) 1
- (b) 2
- (c) 3
- (d) 4
- (e) 5

18. Which of the following statements is true?

- (a) B sits to the immediate right of N./ B N
- (b) U sits at one of the ends of the row./ U
- (c) A sits to the immediate left of F./ A, F
- (d) V sits at one of the ends of the row./ V
- (e) C sits second to the right of R./ C, R

19. How many persons sit in the row?

- (a) 19
- (b) 21
- (c) 27
- (d) 17
- (e) 18

20. How many persons sit between V and B?

- (a) 9
- (b) 2

- (c) 4
- (d) 7
- (e) 8

21. In the number '479486553', if odd digits are subtracted by 1 and even digits are subtracted by 2. Then, what will be the sum of the digits which are 2nd, 4th and 6th from the left end in the new number formed after rearrangement? '479486553', 1 2 , , ?

- (a) 13
- (b) 14
- (c) 12
- (d) 16
- (e) None of these

Study the following information carefully and answer the questions given below: In a certain code:/ : "Shuffle new word" is coded as "xf bf go" "Shuffle new word" "xf bf go" "New word towards corner" is coded as "xf bf hu hh" "New word towards corner" "xf bf hu hh" "Towards chapter word table" is coded as "hu qt bf dm" "Towards chapter word table" "hu qt bf dm" "Table around towards" is coded as "dm ch hu" "Table around towards" "dm ch hu" 5

22. What is the code for the word "Towards"? "Towards" ?

- (a) bf
- (b) hu
- (c) qt
- (d) dm
- (e) None of the above

23. What is the code for the word "chapter"? "chapter" ?

- (a) bf
- (b) hu
- (c) qt
- (d) dm
- (e) None of the above

24. Which of the following word is coded as "ch"?

- (a) New
- (b) Word
- (c) Towards
- (d) Around
- (e) None of the above

25. What is the code for the word "Table new corner"? "Table new corner" ?

- (a) bf go hh
- (b) hu hh dm
- (c) qt ch hu
- (d) dm hh xf
- (e) None of the above

26. Which of the following word is coded as "xf"?

- (a) New

- (b) Word
- (c) Towards
- (d) Chapter
- (e) None of the above

Study the following information carefully and answer the questions given below: Seven persons from M-S live in seven storey building and belongs to different countries viz. Italy, Canada, Germany, China, Spain, India and Brazil but not necessarily in the same order. The bottom most floor is numbered as 1 and so on till the topmost floor is numbered as 7. S lives two floors above the one who belongs to Brazil and live on prime numbered floor. More than two floors gap between S and the one who belongs to Canada. N belong to Spain and lives three floors below the one who belongs to Canada. O lives just above the one who belongs to Italy. The numbers of persons live below M as same as live above R who lives just below P. The one who belongs to China lives just above the one who belongs to India. M S , , , , 1 7 6 S, S N O M , P R

27. Who lives on the 5th floor?

- (a) Q
- (b) S
- (c) The one who belongs to Italy
- (d) R
- (e) Both

28. Which country does O belong to?

- (a) India
- (b) None of these
- (c) Brazil
- (d) China
- (e) Germany

29. How many floors are there between P and the person from Canada?

- (a) 1
- (b) 2
- (c) 3
- (d) 4
- (e) Cannot be determined

30. Which country does the person on the 3rd floor belong to?

- (a) Germany
- (b) Brazil
- (c) Italy
- (d) China
- (e) Canada

31. If all the persons live in alphabetical order from top to bottom then how many persons remain at the same position (Excluding M)? ? (M)

- (a) One
- (b) None
- (c) Two
- (d) Three
- (e) More than three

Study the following information and answer the questions given below: W walks 8m towards west from point P to reach point Q. He takes a left turn from point Q and walks 10m to reach point R. He takes a right turn from point R and walks 12m to reach point S. He takes another right turn from point S and walks 6m to reach point T. He takes a left turn from point T and walks 8m to reach his home. 7 Q W P 8 Q R 10 R S 12 S T 6 T 8

32. In which direction is point T with respect to point to Q?

- (a) North
- (b) South
- (c) South-east
- (d) South-west
- (e) North-east

33. What is the shortest distance between point S and W's home?

- (a) 22m/22
- (b) 10m/10
- (c) 12m/12
- (d) 26m/26
- (e) None of these

34. What is the total distance travelled by W?

- (a) 47m/47
- (b) 40m/40
- (c) 44m/44
- (d) 41m/41
- (e) 36m/36

35. Find the odd one out?

- (a) UPR
- (b) RMO
- (c) LGI
- (d) GBE
- (e) YTV

Study the following information and answer the questions given below: Eight persons sit around a circular table in which some of them face inside and some of them face outside. H sits 3rd to the right of K and both face the same direction. I sits opposite K but both face opposite direction. L sits 2nd to the right of I. F sits opposite D who sits 2nd to the left of E. Immediate neighbor of E face opposite direction as E faces. G sits 3rd to the right of D and not an immediate neighbor of I and K. L and E face inside. G and F face the same direction. , H, K I, K L, I D, E , F E E G, D I K L E G F 8

36. Who sits 3rd to the left of F?

- (a) H
- (b) L
- (c) I
- (d) G
- (e) None of these

37. Who sits opposite the one who sits just right of G?

- (a) L

- (b) I
 - (c) H
 - (d) None of these
 - (e) F
-

38. How many persons sit between E and I when counted from the right of I?

- (a) Four
 - (b) Three
 - (c) One
 - (d) None
 - (e) Two
-

39. Which of the following is true?

- (a) G sits 2nd to the left of I / G, I
 - (b) H and F face the same direction / H F
 - (c) L and D are immediate neighbors / L D
 - (d) E and G face opposite direction to each other / E G
 - (e) All are true
-

40. Who are the immediate neighbors of E?

- (a) K and F / K F
 - (b) L and D / L D
 - (c) G and K / G K
 - (d) I and H / I H
 - (e) D and G / D G
-

41. A and B entered into a partnership business with investment of Rs. 1300 & Rs. 500 respectively. After six months, C joined them with investment of Rs. 1800. At the end of a year, the profit share of C is Rs. 360. Find the difference between profit share of A and B. A B 1300 500 , 1800 C , C 360 A B

- (a) 480 Rs./ 480
 - (b) 280 Rs./ 280
 - (c) 400 Rs./ 400
 - (d) 320 Rs./ 320
 - (e) 180 Rs./ 180
-

42. Five years ago, the average age of A and B was 15 years. The ratio of present age of A and C is 6 : 5 respectively. If B is four years younger than C, then find the sum of present age of B and C (in years). , A B 15 A C 6:5 B, C , B C ()

- (a) 34 years/34
 - (b) 32 years/32
 - (c) 36 years/36
 - (d) 24 years/24
 - (e) 40 years/40
-

43. The average weight of eight people is X kg. Two new people joined them with total weight of 151 kg and average weight of all people increased by $\frac{3}{2}$ kg. If the weight of lightest people out of two people joined is X-5 kg, then find the difference between weight these two people who joined later. X 151 $\frac{3}{2}$ X-5

- (a) 27 kg/27

- (b) 21 kg/21
 - (c) 15 kg/15
 - (d) 25 kg/25
 - (e) 22 kg/22
-

44. A gets 40% marks in an exam and he received 40 less marks than passing marks. B gets 70% marks in same exam and received 20 more marks than passing marks. If C gets 65% marks in the same exam, then find the difference between marks received by A and C in the exam. A 40% 40 B 70% 20 C 65% , A C

- (a) 30
 - (b) 60
 - (c) 40
 - (d) 25
 - (e) 50
-

45. A man invested Rs. P in scheme A on compound interest at rate of 10% p.a. for two years and he invested Rs. (P + 500) in scheme B on simple interest at rate of 12% p.a. for same period of time. If the interest received by man from scheme A is Rs. 150 less than that of from scheme B, then find amount invested in scheme B. A 10% P 12% B (P + 500) A , B 150 , B

- (a) 1250 Rs./ 1250
 - (b) 1000 Rs./ 1000
 - (c) 1500 Rs. /1500
 - (d) 2000 Rs./ 2000
 - (e) 2500 Rs./ 2500
-

Find the wrong number in the given number series. 10

46. 6400, 400, 50, 12.5, 6.25, 3, 12.5

- (a) 400
 - (b) 12.5
 - (c) 6.25
 - (d) 3
 - (e) 50
-

47. 34, 32, 36, 30, 38, 48, 40

- (a) 34
 - (b) 32
 - (c) 48
 - (d) 36
 - (e) 30
-

48. 43, 47, 56, 72, 108, 133, 182

- (a) 72
 - (b) 56
 - (c) 43
 - (d) 47
 - (e) 108
-

49. 12, 28, 60, 108, 172, 256, 348

- (a) 12
 - (b) 28
 - (c) 60
 - (d) 256
 - (e) 108
-

50. 3, 7, 27, 112, 565, 3396, 23779

- (a) 7
 - (b) 3
 - (c) 27
 - (d) 565
 - (e) 23779
-

The table given below shows the total number of rooms available in the five different hotels (A, B, C, D and E). It also shows the number of vacant rooms in these five hotels. Read the data carefully and answer the following questions given below. - (A, B, C, D E) Note: Total number of rooms available in a hotel = Vacant rooms + Occupied rooms : = + 11

51. Find the average number of occupied rooms in hotel B, C and E together. B, C E

- (a) 130
 - (b) 120
 - (c) 140
 - (d) 150
 - (e) 110
-

52. In hotel F, total number of rooms available is 25% more than that of C and the number of rooms occupied is 40% more than the rooms vacant in hotel E. Find the total number of rooms vacant in the hotel F. F , C 25% , E 40% F

- (a) 184
 - (b) 180
 - (c) 176
 - (d) 182
 - (e) 178
-

53. The cost of a room in hotel A is Rs. X and the cost of a room in hotel C is Rs. Y. If the revenue generated from the hotel A is Rs. 55000 and the ratio of revenue generated from C to A is 10: 11, then find the sum of X and Y. A X C Y A 55000 C A 10:11 , X Y

- (a) 2000
 - (b) 4000
 - (c) 5000
 - (d) 3000
 - (e) 1000
-

54. Find the number of rooms vacant in D is what percent of the total number of rooms in the hotel B. D , B ?

- (a) 55%
 - (b) 52%
 - (c) 58%
 - (d) 60%
 - (e) 62%
-

55. Find the number of rooms occupied in hotel A and D together are how many more/less than the number of rooms occupied in hotel E and B together. A D , E B / ?

- (a) 60
- (b) 80
- (c) 50
- (d) 20
- (e) 70

What approximate value should come in the place of question (?) mark in the following questions. (?) ?

56. 12

- (a) 2
- (b) 4
- (c) 6
- (d) 8
- (e) 12

61. In a mixture, the quantity of milk is x liters and water are 8 liters. Five liters pure milk and six liters of water added in the mixture so that milk becomes 75% of resultant mixture. If 10 liters of resultant mixture is removed, then find the remaining quantity of mixture (in liters). x 8 75% 10 , ()

- (a) 48
- (b) 42
- (c) 56
- (d) 46
- (e) 37

62. In a right-angled triangle hypotenuse is $8\sqrt{10}$ cm and based is half of the height. If height and based of the triangle are equal to height & radius of a cylinder, then find curved surface area of cylinder. $8\sqrt{10}$

- (a) $512\pi \text{ cm}^2 / 512\pi^2$
- (b) $256 \pi \text{ cm}^2 / 256 \pi^2$
- (c) $128 \pi \text{ cm}^2 / 128 \pi^2$
- (d) $556 \pi \text{ cm}^2 / 556 \pi^2$
- (e) None of these

63. The ratio of speed of P to speed of Q is 5:8, P covers D km distance in 3 hours and Q covers (D + 40) km in 2.5 hours. If P increases his speed by 25%, then find the time taken by P to cover (D + 180) km distance. (in hours) P Q 5:8 , P, D 3 Q (D + 40) 2.5 P 25% , P (D + 180) ()

- (a) 6
- (b) 5
- (c) 8
- (d) 7.5
- (e) 4.5

64. The sum of five consecutive multiples of four is 200. Find the smallest multiple. 200

- (a) 28
- (b) 44
- (c) 36
- (d) 32

(e) 40

65. The speed of boat A in still water is 4 times the speed of stream and covers 24 km upstream in 8 hours. If the speed of boat B in still water is 2 kmph more than the speed of boat A in downstream, then find the time (in minutes) taken by boat B to cover the same distance in upstream. A , 4 8 24 B , A 2 , B ()

- (a) 210
- (b) 180
- (c) 240
- (d) 300
- (e) 360

The bar graph given below shows total number of people (Vegetarian + non-Vegetarian) visited in five (A, B, C, D and E) different restaurants daily. Read the bar graph carefully and answer the questions. (A, B, C, D E) (+) 14

66. Total vegetarian people visited in F are $\frac{7}{5}$ th of total non-vegetarian people visited A and total non-vegetarian people visited in F are 50% more than total vegetarian people visited in B. Find total people visited in F are how much more than total non-vegetarian people visited in D. F , A $\frac{7}{5}$ F , B 50% F , D ?

- (a) 210
- (b) 240
- (c) 260
- (d) 200
- (e) 180

67. Total non-vegetarian people visited in C and D together are what percent (approx.) more or less than total people visited in B. C D , B () ?

- (a) 83%
- (b) 67%
- (c) 44%
- (d) 71%
- (e) 69%

68. If daily same number of vegetarian and non-vegetarian people visited in restaurant D, then find total number of people visited in a week in restaurant D. D , D

- (a) 1290
- (b) 1330
- (c) 1310
- (d) 1320
- (e) 1270

69. Find the ratio of total people visited in E to that in A. E A

- (a) 23 : 21
- (b) 25 : 27
- (c) 23 : 25
- (d) 23 : 27
- (e) 28 : 27

70. Total vegetarian people visited in A are what percent more than average number of non-vegetarian people visited in B and D together. A , B D ?

- (a) 25%
- (b) 5%
- (c) 10%
- (d) 20%
- (e) 30

71. Average of present age A, B and C is 14 years, while four years ago, average age of B, C and D was 15 years. If the sum of present of A and D is 27 years, then find the age of D five years hence will be (in years). A, B C 14 , B, C D 15 A D 27 , D ()

- (a) 21
- (b) 26
- (c) 17
- (d) 27
- (e) 29

72. A seller has 230 kg of mangoes which he purchases at rate of Rs. 10 per kg. 20% of total mangoes were rotten in packaging and thrown away. If seller sold half of the remaining mangoes at the rate of Rs. 20 per kg, then at what price (per kg) should seller sell the remaining mangoes to gain a total profit of 15% on the total quantity seller had initially (in Rs. /kg)? 230 10 20% 20 , () 15% ? (/)

- (a) 8.75
- (b) 8.25
- (c) 8.5
- (d) 9.25
- (e) 9.75

73. 30 women working 9 hours in a day can pack 1000 parcels in 10 days. If the efficiency of woman is 100/3% more than that of a man, then find how many men will pack 1500 parcel working 5 hours a day for 10 days. 30 9 10 1000 , 100/3% , 10 5 1500 ?

- (a) 52
- (b) 42
- (c) 48
- (d) 108
- (e) 50

Given below in each question there are two statements (I) and (II). You must determine; which statement is enough to give the answer of question. Also, there are five alternatives given, you have to choose one alternative as your answer of the questions: (I) (II) - ?

74. Find out the length of train X given that speed of train X is 20 m/sec. X , X 20 / I. Train X crosses another train Y moving in opposite direction in 6 sec and the speed of train Y is 50% more than the speed of train X. X Y 6 Y X 50% II. Length of train Y is 50% less than length of train X. Y X 50%

- (a) Both I and II together/ I II
- (b) Only statement I/ I
- (c) Only statement II/ II
- (d) Both I and II together are not sufficient/ I II
- (e) Either I or II alone/ I II

75. Side of square is 3.5 cm more than radius of circle. What will be area of square? 3.5 ? I. Difference between circumference and diameter of circle is 45 cm. 45 II. Radius of circle is 50% more than breadth of rectangle whose length is 15 cm. Ratio of circumference of circle & perimeter of rectangle is 3 : 2. , 15 50% 3:2

- (a) Only statement II is sufficient II
 - (b) Either statement I or Statement II alone is sufficient I II
 - (c) Statement I and II both together is sufficient I II
 - (d) Only statement I is sufficient I
 - (e) Neither statement I nor statement II is sufficient I II
-
