

Flagged for repair - Set 2

101 questions held back from set 2

DIRECTIONS (Q. 1-3)

Given below are two pie-charts which shows the percentage distribution of employees in the publishing house who travel to their office in Gurgoan by two different means i.e. by metro and by cab on different days of week. First pie chart shows data for Metro and second pie chart shows data for Cab Saturday Monday 15% 20% Friday (50/3)% Tuesday (70/3)% Thursday Wed. 10% 15% A publishing house 24

1. If number of employees travelling on Sunday by cab decreases by 'Y' with respect to employees travelling on Friday by cab and number of employees travelling on Sunday by metro is twice than that of travelling on Friday by metro . Then find value of 'Y'?(Given that total employees on Sunday is 75% of total employees on wed.)
(a) 1280
(b) None of these
(c) 1385
(d) 1415
(e) 1255
FLAGGED - asks about a graph/table that has no usable image
2. What is the difference of number of employees travelling by metro on Wednesday and Thursday together and number of employees travelling by cab on same days together?
(a) 50
(b) 20
(c) None of these
(d) 40
(e) 60
FLAGGED - asks about a graph/table that has no usable image
3. If total fare per person travelling by metro & cab are Rs.120, then ratio of total amount spent on Thursday by all employees travelling by cab to total amount spent by all employees on same day travelling by metro? (given that ratio of fare per person travelling by metro to by cab is 5 : 7)
(a) 21 : 23
(b) 56 : 73
(c) None of these
(d) 56 : 75
(e) 53 : 73
FLAGGED - asks about a graph/table that has no usable image

DIRECTIONS (Q. 4-8)

Table given below shows number of students appeared in preliminary examination of an exam 'ASK' in six different cities and percentage of students failed in preliminary, mains and in only reasoning. Those students who cleared the Preliminary examination can give the Mains examination. In Mains examination of ASK, there are only two subjects i.e. Reasoning and Quant. Student has to clear both the subjects to pass in Mains examination of 'ASK'.

4. Total number of students who failed only in Quant in City 'A' is three times of total number of students passed the mains exams in city 'B' while total number of students who failed in both subjects in City 'B' is 3000 less than total number of students who failed in both subjects in city 'A'. Find number of students who failed only in Quant in city 'A' is what percent more than number of students who failed in Reasoning in city 'B'?
(a) 250%
(b) 50%
(c) 150%

- (d) 200%
- (e) 100%

FLAGGED - asks about a graph/table that has no usable image

5. In city D, total number of students who failed in Reasoning is 'x' more than total number of students who failed in only Quant. If total number of students who passed in mains exam in city D is 'x' then find the ratio between total number of students who failed in Reasoning to total number of students who failed in only Quant in city 'D'.

- (a) 1 : 3
- (b) 3 : 1
- (c) 1 : 1
- (d) 1 : 2
- (e) 2 : 1

FLAGGED - asks about a graph/table that has no usable image

6. Total number of students who failed in Quant in city E is how much more than total number of students who failed in Quant in city F?

- (a) 3000
- (b) 6000
- (c) 9000
- (d) 12000
- (e) 15000

FLAGGED - asks about a graph/table that has no usable image

7. Ratio between total number of students who failed in Quant in city 'B' to total number of students who failed in at most one subject in city 'C' is 30 : 91. Find what percent of students failed in both subject in city 'C' in mains exam?

- (a) 25%
- (b) 15.5%
- (c) 17.5%
- (d) 19.5%
- (e) 30%

FLAGGED - asks about a graph/table that has no usable image

8. Total number of students who failed in at most one subjects in city F is 24000 less than total number of students who failed in at least one subject in city A. Find total number of students who failed in both subjects in city 'F' is how much less than total number of students who failed in only reasoning in city 'A'.

- (a) 3000
- (b) 6000
- (c) 9000
- (d) 12000
- (e) 15000

FLAGGED - asks about a graph/table that has no usable image

DIRECTIONS (Q. 9-12)

- A school has four hostels in which there are two sections one for boys and one for girls. Line chart given below shows increase/decrease in total number of students in 2013 in these hostels as compare to 2012(previous year). Table given below shows ratio between number of boys to number of girls in these hostels in 2013. Study the data carefully and answer the following questions 300 250 2... 200 150 100 50 Aravali Nilgiri Udaygiri Shiv

9. Number of students is increases and decreases in Aravali and Nilgiri in 2013 respectively as compare to 2012. Number of girls who left Aravali joins Nilgiri (No other change in Number of girls) such that ratio between increase and decreases in Number of boys in Aravali and Nilgiri in 2013 as compare to 2012 is 16 : 15, then find the change in Number of boys in Nilgiri?

- (a) 350
- (b) 320
- (d) 420
- (e) 400
- (c) 500 Publications@

FLAGGED - asks about a graph/table that has no usable image

10. In 2012, Number of boys in Udaygiri and Shivalik are equal and Number of girls in Shivalik is 540 more than the Number of girls in Udaygiri. If in 2013, Number of boys in both hostels are equal then find the Number of total student in Shivalik, If In 2013 strength of both hostels increases as compare to previous year

- (a) 1650
- (b) 1200
- (c) 960
- (d) 1500
- (e) 900

FLAGGED - asks about a graph/table that has no usable image

11. In 2012 and in 2013 ratio of total strength of Udaygiri to that of Nilgiri is 4 : 5 and 5 : 8 respectively. Find the strength of Nilgiri in 2012 if strength of Udaygiri decreases

- (a) 1600
- (b) 1200
- (c) 1250
- (d) 1400
- (e) 1750

FLAGGED - asks about a graph/table that has no usable image

12. In2013, strength of all hostels increases as compare to 2012. If total strength of hostels in 2012 is 1030, then find the Number of boys in Aravali in 2013 is how much more than the Number of boys in Udaygiri in 2013, given that ratio of strength of Aravali, Nilgiri, Udaygiri and Shivalik is 2 : 3 : 2 : 3 respectively

- (a) 80
- (b) 100
- (c) 120
- (d) 90
- (e) 10

FLAGGED - asks about a graph/table that has no usable image

DIRECTIONS (Q. 13)

Given below bar graph shows number of hours taken by six person to complete a task individually. Read the data carefully and answer the questions: 50 40 30 20 10 0 Neeraj Aniket Saurabh

13. Veer and Sameer started working together on another task, where Sameer work with 25% less efficiency. Veer and Sameer work for y hours and remaining work complete by Aniket in $(y + 1)$ hours, if ratio of work done by Veer and Sameer together and by Aniket alone is 2 : 1, then in how many hours Neeraj will complete same task alone? 1
- (a) 15 2 hours
 (b) 13 1 1
 (d) 11 2 hours
 (e) 9 2 hours
 (c) 12 4 hours 1 4 hours 1 1 2 hours 2 hours Publications@

FLAGGED - asks about a graph/table that has no usable image

DIRECTIONS (Q. 14)

The given bar-graph shows the number of marbels of different colors which are contained by two different bags X and Y. Read the data carefully and answered the following questions.

14. If two marbels are picked at random from bag X then what is probability that either both are black or both are blue in color? 1 4 9
- (a) 15
 (b) 105
 (c) 115 3 1
 (d) 37
 (e) 17

FLAGGED - asks about a graph/table that has no usable image

DIRECTIONS (Q. 15-19)

Given below pie chart (I) shows percentage distribution of total filled quantity of water in seven tanks. Line graph shows time (minutes) taken by seven pipe A, B, C, D, E, F and G in filling tanks P, Q, R, S, T, U and V respectively. Give the answer of the question according to given data : 8 A publishing house

15. A man has a tank which has quantity of water equal to the quantity of water in P and T together. He opened pipe B and D together for filling his tank. After X minutes man closed both pipes and opened pipe C and E for filling remaining tank. If tank filled in next $(x + 15)$ minutes then find how many liter of water filled by B and D together ?
- (a) 160 l
 (b) 180 l
 (d) 120l
 (e) 144 l
 (c) 150l Publications@

FLAGGED - asks about a graph/table that has no usable image

16. For filling tank S, man opened pipe D which fills the tank with 20% more efficiently. After X minutes man close the pipe D and opened pipe C and G together. Pipe C fills the tank with 25% more efficiently. If pipe C and G fills remaining tank in 15 minutes then find the value of X ?
- (a) 12 minutes
 (b) 10 minutes
 (c) 15 minutes
 (d) 8 minutes
 (e) 18 minutes

FLAGGED - asks about a graph/table that has no usable image

17. Quantity of another tank K is 120% of total quantity of all seven tank. For filling the bigger tank man opened pipes alternatively in such a way that three pipe B, D and G together for first minute, pipe A alone for second minute and pipe F and C together for third minutes. Find the total time required in filling the tank alternatively? 7 minutes

- (a) 151 minutes
- (b) 141
- (c) 151 minutes 9 9
- (d) 150 minutes
- (e) 170 minutes

FLAGGED - asks about a graph/table that has no usable image

18. A man have a tank M, which has equal quantity of water as tank S and U together . For filling tank M man opened pipe A, C and G together for 17 some minutes man thought tank will be fully filled, but it takes 7 19 minutes more because of a leak. Find in what time leak will empty the fully filled tank?

- (a) 3hr
- (b) 3 2
- (c) 2 1 hr hr 3 6 1
- (d) 3 1
- (e) 4 3 hr hr

FLAGGED - asks about a graph/table that has no usable image

19. A man have a tank of 570 liter. Man opened three pipes B, D and C together for filling the tank but pipe C fills the tank at 175% of its initial Efficiency. There is a leak at a height of $\frac{2}{3}$ from the bottom of tank ,which empty the tank with half of the efficiency of what B, D and C filling the tank. Man noticed the leak after 32 minutes and closed all pipes and leak. Find how many liter of tank remain unfilled?

- (a) 90l
- (b) 76l
- (c) 78l
- (d) 85l
- (e) 96l

FLAGGED - asks about a graph/table that has no usable image

20. Q started a business with his investment, after some month S came to joined with him and invest his amount in business. At the end of 3 year, the ratio of profit of Q to S is 3 : 2. Find after how many month S joined the business ?

- (a) 4 months
- (b) 6 months
- (c) 3 months
- (d) 5 months
- (e) 6 months

FLAGGED - two or more options are identical after cleaning

DIRECTIONS (Q. 21-25)

- Table given below shows details of 3 types of item of a garment shop MRP, discount% (on MRP) and certain offer. Shopkeeper have shoes, Jeans & T-Shirts in 2 types of each. S_1 , S_2 ; J_1 , J_2 ; and T_1 , T_2 represents the types of two types of shoes, jeans and T-shirts respectively. Shoes Items Types S_1 S_2 MRP (Rs) 1200 1647 1 11 9 % Discount 0% • • Shop offer Note: Shop offer:

21. If a person wants to buy T-shirts, what is minimum average price/t- shirts he could get?
- Rs. 400
 - Rs. 360
 - Rs. 300
 - Rs.600
 - Rs. 500
- FLAGGED - a stacked fraction collapsed into loose digits; asks about a graph/table that has no usable image**
22. If cost price of J_2 for shopkeeper is Rs. 1000. Find MRP of J_2 if he earns a profit of 20% on selling a single piece.
- Rs. 1600
 - Rs. 1800
 - Rs. 1500
 - Rs. 1700
 - None of these
- FLAGGED - a stacked fraction collapsed into loose digits; asks about a graph/table that has no usable image**
23. Find the cost price of S_2 if he earns a profit of 14 7% on C.P.
- Rs. 1464
 - Rs. 1098
 - Rs. 1281
 - Rs. 1379
 - None of these
- FLAGGED - a stacked fraction collapsed into loose digits; asks about a graph/table that has no usable image**
24. A boy buys 5 pieces of T_2 , 4 pieces of J_1 , & 1 piece of S_1 including offer. Find the amount paid by him (in Rs.)
- 6000
 - 7200

DIRECTIONS (Q. 27-30)

The following line graph shows principal amount(in 10000) submitted by 5 persons in a scheme which offers simple interest and table shows the rate of interest (ROI) per annum obtained by these persons, time (in years) for which they invested their amount and third column shows ratio of amount obtained after they withdraw their money to that of interest obtained. Some figures shown are missing. Calculate them according to question. 12 11 10 9 8 7 6 5 4 3 A B Persons ROI A — B 16% C — D 8% E 15%

27. If the ratio of amount obtained by A to that of C is 4: 3. Find the ROI obtained by C.

- (a) 8%
- (b) 12%
- (d) 10%
- (e) 12.5%
- (c) 64 Publications@

FLAGGED - asks about a graph/table that has no usable image

28. If a new person Vikas deposit half of the money invested by A, for 3 more years than C, calculate his ROI, if SI obtained by him is same as SI obtained by D. 1 1 1

- (a) 11 9 %
- (b) 9 11 %
- (c) 12 3 %
- (d) 14 7 %
- (e) None of these

FLAGGED - a stacked fraction collapsed into loose digits; asks about a graph/table that has no usable image

29. What is the ratio of time period for which E invested to that of B?

- (a) 1 : 3
- (b) 7 : 2
- (c) 5 : 4
- (d) 4 : 5
- (e) 3 : 4

FLAGGED - asks about a graph/table that has no usable image

30. If after drawing his whole money, D invested 50% of this amount in CI for 2 years at ROI/annum of 10% and remaining of the money he kept with him. Calculate total money with him after 2 years.

- (a) Rs. 169400
- (b) Rs. 84700
- (c) Rs. 154700
- (d) Rs. 167400
- (e) Can't be determined

FLAGGED - asks about a graph/table that has no usable image

DIRECTIONS (Q. 31)

Bar-graph shows the percentage distribution of distance covered in upstream and downstream by Rahul on different dates. Upstream distance=6000 km Downstream distance=2000 km 32 28 24 20 16 12 8 4 0 1st Aug. 2nd Aug. 3rd Aug. 4th Aug. 5th Aug. 18 A publishing house

31. If ratio of speed of current on 2nd August to 4th August is 2 : 3 & speed of Rahul on both days are same and time in upstream on 4th August. is 24 times the time taken in downstream on 2th August then find the speed of Rahul in still water if speed of current on 3rd August is 50% of speed of current on 2nd Aug.(approximately)?

- (a) 21 km/h
- (b) 23km/h

- (d) 25km/h
- (e) 20km/h
- (c) 25 km/hr 2 3% more 2 3 hr Publications@

FLAGGED - a stacked fraction collapsed into loose digits; asks about a graph/table that has no usable image

DIRECTIONS (Q. 32-35)

The following bar-graph shows the ratio of speed of three different trains Rajdhani exp., Shatabadi exp. and Duranto exp. on five different days of a week. And line graph shows the number of coaches attached to Rajdhani express on different days of week. Length of each train is the sum of the length of all coaches and length of engine. Rajdhani Exp Shatabadi Exp Duranto Exp 7 6 5 4 3 2 1 0 Monday Tuesday Wednesday Friday Sunday 30 25 20 15 10 Monday Tuesday Wednesday Friday Sunday Length of each coaches for every train = 15 m And length of engine for every train = 20 m 20 A publishing house

- 32.** On Tuesday, Rajdhani exp. crosses a tunnel of some length in 12.5 sec while Duranto express having length 25% more than that of Rajdhani exp. crosses the same tunnel on the same day in 11.9 sec. Then find the time taken by Rajdhani exp. and Shatabadi exp. on the same day to cross each other if they are running in opposite direction and the length of Shatabadi exp. is 10 m less than that of Rajdhani exp.

- (a) 8 sec
- (b) 9 sec
- (c) 10sec
- (d) 11 sec
- (e) 12 sec

FLAGGED - asks about a graph/table that has no usable image

- 33.** On Sunday, Duranto exp. having length 110 m less than that of Rajdhani 8 exp. crosses Rajdhani exp. travelling in opposite direction in 8 9 sec then find the approximate time taken by Shatabadi exp. to cross Duranto exp. on the same day when both are running in the same direction and length of the Shatabadi exp. is 20% less than that of Rajdhani exp.

- (a) 79 sec
- (b) 81 sec
- (c) 75 sec
- (d) 84 sec
- (e) 72 sec

FLAGGED - asks about a graph/table that has no usable image

- 34.** On Friday, the speed of Rajdhani exp. was 90 km/hr and on the same day, Shatabadi exp. started from station P and going to Q while Duranto started from station Q and going to P. If speed of Shatabadi is increased by 10% after first hour and 20% after second hour whereas the speed of Duranto is increased by 20% after first hour and 25% after second hour then they meet in 3 hours. Find the distance between P and Q.

- (a) 947 km
- (b) 952 km
- (c) 955 km
- (d) 957 km
- (e) 960 km

FLAGGED - asks about a graph/table that has no usable image

- 35.** Duranto exp. having length 28% more than that of Rajdhani exp. on Monday crosses a platform of same length in 12.8 sec. Then find the difference between average speed of shatabadi and Rajdhani and the speed of Duranto exp. on Monday.(in km/hr)

- (a) 32.8
- (b) 59.4
- (c) 42.6

- (d) 54.2
- (e) 58.8 21

FLAGGED - asks about a graph/table that has no usable image

DIRECTIONS (Q. 36-40)

Pie chart given below shows length of six different trains and table given below shows ratio between speed of six trains on three different days. Study the data carefully and answer the following questions. Total length = 1600m
 F, 8% E, 22% D, 12% Train Speed on : Monday A 2 : B 3 : C 4 : D 4 : E 6 : F 4 :

- 36.** On Wednesday, train 'B' crosses train 'D' coming from opposite direction in 6 seconds. If speed of train 'B' on Monday is 97.2 km/hour then in how much time train 'F' can cross train 'D' on Monday if train 'D' is coming from opposite direction and speed of train 'F' on Monday is 20 m/sec. (2 Marks)
- (a) 6 seconds

FLAGGED - a stacked fraction collapsed into loose digits; asks about a graph/table that has no usable image

46. Car P and Car Q start from Delhi for city A. Car Q first reaches at city A and meets car P in between the way, 200 km from city 'A'. Find after how much time they will meet second time after first time meeting if they continue their to and fro motion.

(a) 24 hours
(b) 15 hours
(c) 16 hours
(d) 25 hours
(e) 20 hours

FLAGGED - a stacked fraction collapsed into loose digits; asks about a graph/table that has no usable image

DIRECTIONS (Q. 47-51)

- Line chart given below shows time taken by five different persons to complete a work 'M' alone. Ratio of efficiency of all five persons remain same throughout any work. Study the data carefully and answer the following questions. 70 60 50 40 30 20 10 0 Abhi Bhavya Neeraj Satish Veer

47. All five starts working together to complete work 'X'. 'Veer' left after 8 days. Work done by 'Bhavya' is same as work done by 'Neeraj' while 'Abhi' and 'Neeraj' worked for same time. 'Satish' worked for 'y' days. If 'Bhavya', 'Neeraj' and 'Satish' together can complete work 'X' in 24 days then find the value of 'y' if Bhavya worked for starting 10 days.

(a) 7 days
(b) 9 days
(c) 11 days
(d) 13 days
(e) 15 days

FLAGGED - asks about a graph/table that has no usable image

48. Abhi and Neeraj together can complete work 'Z' in $(A + 42)$ days while Bhavya and Satish together can complete work 'Z' in $(A + 15)$ days. All start the work Z such that ratio between work done by Abhi, Bhavya and Veer is 1 : 2 : 3, while ratio between days, Neeraj, Satish and Veer worked is 2 : 2 : 1. Find how many days 'Bhavya' worked.

(a) 10 days
(b) 15 days
(c) 20 days

- (d) 30 days
- (e) 40 days

FLAGGED - asks about a graph/table that has no usable image

49. All five persons started together to complete work 'Y'. Veer worked for starting 6 days and left the work. After 3 days more both Bhavya and Satish left too. Remaining 40% work should be completed by Abhi and Neeraj together but 'Abhi' left after 'x' days. Remaining work is completed by 'Neeraj' in 'z' days. If $z - x = 3$, then number of days for which 'Neeraj' worked is what percent more than number of days for which 'Abhi' worked. 1 2
- (a) 33 3 %
 - (b) 50%
 - (c) 66 3 %
 - (d) 75%
 - (e) 100%

FLAGGED - a stacked fraction collapsed into loose digits; asks about a graph/table that has no usable image

50. Abhi, Bhavya and Neeraj together starts to do work 'M'. After 7 days 'Neeraj' left and after 3 days more 'Abhi' and 'Bhavya' left. Remaining work is completed by Satish and Veer working alternatively in 'y' days. If 'y' is integer then find 'Veer' worked for how many days?
- (a) 3 days
 - (b) 4 days
 - (c) 5 days
 - (d) 6 days
 - (e) Cannot be determined

FLAGGED - asks about a graph/table that has no usable image

51. Abhi, Bhavya and Satish starts working together to complete work 'M'. After 5 days, Bhavya and Satish replaced by Neeraj and Veer. After 5 more days Abhi left the work. After 1 more day Veer left too. Neeraj worked for total 'x' days. In other case Abhi and Bhavya starts working together to complete 'M'. After 4 days both are replaced by Veer. Veer worked for 5 days and replaced by Satish who worked for 8 days. Remaining work is completed by Neeraj in 'y' days. Find $(y - x)^2$?
- (a) 25
 - (b) 36
 - (c) 49
 - (d) 64
 - (e) 81 28

FLAGGED - asks about a graph/table that has no usable image

DIRECTIONS (Q. 52)

The following questions are accompanied by three statements A, B and C. You have to determine which statement(s) is/are necessary/sufficient to answer the question. 18 A publishing house

52. What is cost price of the article? A. On selling the article at 119 Rs. shopkeeper earn profit % equal to cost price of article. 2 B. If 14 7 % discount is given on the mark price, then its selling price will be 102 Rs. C. If article sold on profit percent half of the mark price, then profit is 41.65 Rs.
- (a) Either A and B or B and C are sufficient to answer the question
 - (b) Either A and B or A and C are sufficient to answer the question
 - (c) Either A and C or B and C are sufficient to answer the question
 - (d) A, B and C together are sufficient to answer the question
 - (e) Either only A or B and C together are sufficient to answer the question

FLAGGED - a stacked fraction collapsed into loose digits

DIRECTIONS (Q. 53-57)

Given below is the data about students appeared in two exams i.e., A and B in six different years i.e., 2011 to 2016. Total students appeared in both exam in 2016 is 8000 while in 2013 it is 5800. Average number of students appeared in exam B in 2011 and 2013 is 3100 and is in the ratio 18 : 13. Students appeared in exam A in year 2015 is 133.3 % more than students appeared in exam B in same year. Total students appeared in 2016 is 25% more than total students appeared in 2011. 5 A publishing house

53. In which year total students appeared in both exam is 3rd highest?

- (a) 2012
- (b) 2014
- (c) 2016
- (d) 2011
- (e) Other than the given options

FLAGGED - a stacked fraction collapsed into loose digits

54. What is the respective ratio between students appeared in exam A in year 2011, 2012 and 2014 together to the students appeared in exam B in year 2013, 2014 and 2016 together?

- (a) 95 : 97
- (b) 99 : 97
- (c) 98 : 97
- (d) 99 : 95
- (e) None of these

FLAGGED - a stacked fraction collapsed into loose digits

55. Find the difference between average number of students appeared in exam A and average of students appeared in exam B in starting four years?

- (a) 250
- (b) 225
- (c) 215
- (d) 200
- (e) None of these

FLAGGED - a stacked fraction collapsed into loose digits

56. Students appeared in exam A in 2013 is how much less than students appeared in exam B in 2012?

- (a) 1400
- (b) 1000
- (c) 1100
- (d) 1200
- (e) 1300

FLAGGED - a stacked fraction collapsed into loose digits

57. Total number of students appeared in both exam in 2012 is what percent more than total number of students appeared in both exam in 2011?

- (a) 25.25%
- (b) 28.25%
- (c) 31.25%
- (d) 34.25%
- (e) 37.25%

FLAGGED - a stacked fraction collapsed into loose digits

DIRECTIONS (Q. 58)

Number of songs recorded by Sonu Nigam in 2008 is 300. And number of songs recorded by Sandeep and Arijit Singh in 2010 are in ratio 5 : 4. Total number of songs recorded in 2009 is 250% more than songs recorded by Arijit Singh in 2009. Total songs recorded by Sandeep in 7 A publishing house

58. Number of songs recorded by Arijit Singh in all years is what percent more/less than total songs recorded in 2008 ? 2 7 2
- (a) 12 4 %
 - (b) 17 9 %
 - (c) 21 3 %
 - (d) 27 5 %
 - (e) None of these

 - (d) 960
 - (e) 970 13

FLAGGED - a stacked fraction collapsed into loose digits

DIRECTIONS (Q. 62-66)

Given below statistical data of top five wheat producer states of India in the three successive years. Read the data carefully and answer the question given below. Year 2015– Uttar Pradesh and Punjab together produced 15860 thousand ton, while Punjab production was 1180 ton less than that of Uttar Pradesh. Madhya Pradesh produced 25% less than Uttar Pradesh, Haryana produced 690 thousand ton less than that of Madhya Pradesh. Production of Rajasthan was 70% of total production of Haryana Year 2016– Production of Punjab decreased by 20% compare to previous year, while production of Haryana increased by 800 thousand ton compare 1 to previous year. Madhya Pradesh produced 33 3 % more than previous year, while Rajasthan produced 2390 thousand ton more wheat than previous year. All five states produced total 36612 thousand ton wheat in 2016. Year 2017– Uttar Pradesh and Haryana together produced 16520 thousand ton, while Uttar Pradesh production was 2840 ton more than that of Haryana. Punjab produced 628 thousand ton more wheat than previous year and Madhya Pradesh produced 360 thousand ton more wheat than previous year. All five states produced total 38200 thousand ton wheat in 2017.

- 62.** Total wheat produced by Uttar Pradesh is how much more than total wheat produced by Madhya Pradesh in the all three given years?

(a) 3550 thousand ton
(b) 3750 thousand ton
(c) 3650 thousand ton
(d) 3250 thousand ton
(e) 3150 thousand ton

FLAGGED - a stacked fraction collapsed into loose digits

- 63.** Total wheat produced by Madhya Pradesh in the year 2016 & 2017 together is what percent more than total wheat produced by Haryana in the year 2015 & 2016 together? 38 38 38

(a) 40 61%
(b) 44 61 %
(c) 36 61 % 38 38
(d) 42 61 %
(e) 48 61 %

FLAGGED - a stacked fraction collapsed into loose digits

- 64.** Find the difference between average quantity of wheat produced by Uttar Pradesh, Madhya Pradesh and Haryana in the year 2015 and average quantity of wheat produced by Madhya Pradesh, Haryana and Rajasthan in the year 2017?

(a) 360 thousand ton
(b) 400 thousand ton
(c) 420 thousand ton
(d) 450 thousand ton
(e) 470 thousand ton

FLAGGED - a stacked fraction collapsed into loose digits

- 65.** Find the ratio between total wheat produced by Rajasthan & Punjab together in the year 2017 to total wheat produced by Haryana & Rajasthan together in the year 2016?

(a) 160 : 161

DIRECTIONS (Q. 71)

- Data about speed and length of six different trains is given below. Study the data carefully and answer the following question. Speed of six trains A, B, C, D, E and F are a, b, c, d, e and f respectively while time taken by six trains to cross a pole is PA, Pb, Pc, Pd, Pe and Pf respectively. Length of six trains A, B, C, D, E and F are la, lb, lc, ld, le and lf respectively → Train C can cross a pole in double time in which train E can cross a pole. Time taken by train D to cross a platform of 180 m length is twice than that time taken by same train to cross a pole. Train F can cross a platform double of its length in 36 seconds. Speed of train 'E' is 20% more than speed of train 'C'. Train 'A' can cross a platform of 100 m length in same time in which train 'F' can cross a pole. → Train 'B' can cross two poles 60 m apart from each other in 24 seconds. Train 'B' can cross train 'C' in 10 seconds if they move towards each other. Time taken by train 'D' to cross a platform of 300 m length is same time in which train 'C' can cross a pole. Given that $a : b \rightarrow 5 : 3 \Rightarrow d : f \rightarrow 4 : 3$ PA: Pb $\rightarrow 2 : 5 \Rightarrow$ ld: le $\rightarrow 1 : 2$ 18 A publishing house

71. Time taken by train 'A' to cross a platform of length 250 m length is what percent less than time taken by train 'D' to overtake train 'F' when they move in same direction?
- (a) 37.5%
 (b) 62.5%
 (c) 50% 2 2
 (d) 166 3%
 (e) 266 3%

DIRECTIONS (Q. 80)

Read the given passage to answer the following questions The hydrological cycle is expected to _____ with global warming, which likely increases the intensity of extreme precipitation events and the risk of flooding. The changes, however, often differ from the theorized expectation of increases in water-holding capacity of the atmosphere in the warmer conditions, especially when water availability is limited. Results show an intensification of extreme precipitation and flood events over all climate regions which increases as water availability increases from dry to wet regions. Similarly, there is an increase in the intensification of extreme precipitation and flood with the seasonal cycle of water availability. The connection between extreme precipitation and flood intensity changes and spatial and seasonal water availability becomes stronger as events become less extreme. Extreme precipitation is expected to intensify with global warming over large parts of the globe as the concentration of atmospheric water vapor which supplies the water for precipitation increases in proportion to the saturation concentrations at a rate of about 6–7% per degree rise in temperature accor

- 80.** What is the significance of understanding the relationship between extreme events and water availability for future-proofed planning for global change?
- (a) It is irrelevant to future planning, as the impact of global change is too unpredictable to plan for
 - (b) It is important for planning for global change only in wet regions, where extreme precipitation events and floods are more common
 - (c) It is important for planning for global change in all regions, as extreme precipitation have significant socio-economic impacts
 - (d) It is important for planning for global change only in dry regions, where water availability is more limited and extreme precipitation events are less common
 - (e) None of these

FLAGGED - option text still carries the next question

DIRECTIONS (Q. 81)

Read the given passage to answer the following questions A long-held view of the history of the English colonies that became the United States has been that England's policy toward these colonies before 1763 was dictated by commercial interests and that a change to a more imperial policy, dominated by expansionist militarist objectives, generated the tensions that ultimately led to the American Revolution. In a recent study, Stephen Saunders Webb has presented a formidable challenge to this view. According to Webb, England already had a military imperial policy for more than a century before the American Revolution. He sees Charles II, the English monarch between 1660 and 1685, as the proper successor of the Tudor monarchs of the sixteenth century and of Oliver Cromwell, all of whom were bent on extending centralized executive power over England's possessions through the use of what Webb calls "garrison government." Garrison government allowed the colonists a legislative assembly, but real authority, in Webb's view, belonged to the colonial governor, who was appointed by the king and supported by the "garrison," that is, by the local contingent of English troops under the colonial

- 81.** What was the purpose of garrison government, and how did it relate to the interests of the colonial upper classes in America?
- (a) The purpose was to provide military support for a royal policy designed to increase the power of the colonial upper classes in America
 - (b) It aimed to offer military assistance to a monarchic strategy intended to restrict the influence of the wealthy classes in the American colonies
 - (c) It allowed the colonial upper classes to have more control over legislative affairs in America
 - (d) The purpose was to establish a democratic system of government in the colonies
 - (e) None of these

DIRECTIONS (Q. 83)

Read the given information carefully and answer the questions related to it: Eight persons A, B, D, K, L, S, T and N live (not necessarily in the same order as given) in two flats P and Q in a building of four floors where floors are numbered as 1 to 4 from bottom to top. Each person lives in one flat also they play different sports. Flat P is in west of flat Q. K lives two floors above T and both live in different flats. The one who likes hockey does not live just above and just below of K's floor. The one who likes baseball live just north-east of the one who likes hockey. The one who likes cricket lives east of N whose floor is above K's floor. L and D live on same floor but below S's floor who does not like cricket. The one who likes archery lives north of the one who likes boxing. More than one floor gap between the floors of the one who likes snooker and the one who likes archery. D and B live in same flat. B lives just above the flat of the one who likes judo. A and the one who likes tennis lives on adjacent floors but not in different flats. 13

83. The one who likes boxing lives in flat ___ on floor ____.

- (a) Flat Q, floor
- (b) Flat P, floor
- (c) Flat Q, floor
- (d) None of these
- (e) Flat P, floor

FLAGGED - two or more options are identical after cleaning

DIRECTIONS (Q. 84)

Maharashtra home minister Anil Deshmukh resigned on Monday, hours after the Bombay high court ordered a federal probe by CBI into allegations of extortion against him to extort Rs 100 crore from bars and restaurants. After resigning, Deshmukh took a flight to Delhi where he met Congress leader and prominent lawyer Abhishek Singhvi. He was also likely to meet Kapil Sibal, another top legal counsel, and discuss the merits of approaching the Supreme Court against the HC decision.

84. Which of the following can be hypothesized from the above statement?

- (a) Mr. kapil Sibal and Abhishek Singhvi is a hotshot lawyer who had fight high profile cases and succeed in it
- (b) Supreme court will announce life imprisonment to Mr. Deshmukh after investigation by CBI
- (c) There will be political attack by opposition demanding to quit Chief Minister of Maharashtra
- (d) Both
- (e) Both

DIRECTIONS (Q. 85-89)

The following questions are accompanied by two statements (I) and statement (II). You have to determine which statements(s) is/are sufficient/necessary to answer the questions.

- 85.** Ratio of present age of P and Q is 6: 7 and present age of S is five years more than R. Find the present age of R? Statement I: Sum of the age of Q and R is 34 years. Statement II: Sum of the age of P, Q, R and S is 71. Age of R is 6 years more than Q.

- (a) Neither statement (I) nor statement (II) by itself is sufficient to answer the question
- (b) Statement (II) alone is sufficient to answer the question but statement (I) alone is not sufficient to answer the question
- (c) Either statement (I) or statement (II) by itself is sufficient to answer the question
- (d) Both the statements taken together are necessary to answer the questions, but neither of the statements alone is sufficient to answer the question
- (e) Statement (I) alone is sufficient to answer the question but statement (II) alone is not sufficient to answer the questions

- 86.** The marked price of articles A and B are in the ratio of 4: 3. The discount percentage given on these two articles are 10% and 20% respectively. What is the cost price of A? Statement I: Discount percentage given on article A would have been 20%, then cost price of article A is Rs.50 more than that of article B. 24

- (a) Neither statement (I) nor statement (II) by itself is sufficient to answer the question
- (b) Statement (II) alone is sufficient to answer the question but statement (I) alone is not sufficient to answer the question
- (c) Either statement (I) or statement (II) by itself is sufficient to answer the question
- (d) Both the statements taken together are necessary to answer the questions, but neither of the statements alone is sufficient to answer the question
- (e) Statement (I) alone is sufficient to answer the question but statement (II) alone is not sufficient to answer the questions

FLAGGED - option text still carries the next question

- 87.** The average marks of Hindi, English, Mathematics and Science is 35 and maximum marks a student can obtain in each subject is 50. What is the marks obtained by the student in science? Statement I: The ratio of average marks of Hindi and English together and Mathematics and science together is 2:1. Statement II: The total marks of English, mathematics and Science is $\frac{2}{3}$ of total maximum marks obtained in these 3 subjects.

- (a) Neither statement (I) nor statement (II) by itself is sufficient to answer the question
- (b) Statement (II) alone is sufficient to answer the question but statement (I) alone is not sufficient to answer the question
- (c) Either statement (I) or statement (II) by itself is sufficient to answer the question
- (d) Both the statements taken together are necessary to answer the questions, but neither of the statements alone is sufficient to answer the question
- (e) Statement (I) alone is sufficient to answer the question but statement (II) alone is not sufficient to answer the questions

- 88.** Ratio of present age of P and Q is 6: 7 and present age of S is five years more than R. Find the present age of R? Statement I: Sum of the age of Q and R is 34 years. Statement II: Sum of the age of P, Q, R and S is

- (a) Neither statement (I) nor statement (II) by itself is sufficient to answer the question
- (b) Statement (II) alone is sufficient to answer the question but statement (I) alone is not sufficient to answer the question
- (c) Either statement (I) or statement (II) by itself is sufficient to answer the question
- (d) Both the statements taken together are necessary to answer the questions, but neither of the statements alone is sufficient to answer the question

(e) Statement (I) alone is sufficient to answer the question but statement (II) alone is not sufficient to answer the questions

FLAGGED - option text still carries the next question

89. The average marks of Hindi, English, Mathematics and Science is 35 and maximum marks a student can obtain in each subject is

- (a) Neither statement (I) nor statement (II) by itself is sufficient to answer the question
- (b) Statement (II) alone is sufficient to answer the question but statement (I) alone is not sufficient to answer the question
- (c) Either statement (I) or statement (II) by itself is sufficient to answer the question
- (d) Both the statements taken together are necessary to answer the questions, but neither of the statements alone is sufficient to answer the question
- (e) Statement (I) alone is sufficient to answer the question but statement (II) alone is not sufficient to answer the questions

DIRECTIONS (Q. 90)

The pie chart given below shows the percentage distribution of students present in different sections of 5th class of a school on Monday (No section has full attendance). Read the pie chart carefully and answer the questions. Note: 1. Difference between the number of students present in A and B is 4 2. In each of sections A, B, C, D and E the total number of students (Present + absent) is less than 51. 25

90. If the value of absent students in Section C is greater than 7 and the total students (Present + absent) in school C is a square number, then find the absent students in section C.

- (a) 15
- (b) 18
- (c) 11
- (d) 19
- (e) 21 26

93. If a boat travels P km upstream in 44 minutes and 2P km downstream in 1 hour 6 minutes. Find speed of boat in still water is what percentage of the speed of stream?
- (a) 700%
 - (b) 350%
 - (c) 70%
 - (d) 35%
 - (e) 200%
- Solutions S1. Ans.(b) Sol. Refer to the first paragraph, "Extreme precipitation is expected to intensify with global warming over large parts of the globe as the concentration of atmospheric water vapor which supplies the water for precipitation increases in proportion to the saturation concentrations at a rate of about 6–7% per degree rise in temperature according to the thermodynamic Clausius–Clapeyron relationship" S2. Ans.(c) Sol. . Refer to the first paragraph, "The hydrological cycle is expected to intensify with global warming, which likely increases the intensity of extreme precip

97. A shopkeeper marks up price of LED 60% above its cost price and gives three successive discounts of 12%, $d\%$ and 25%. If shopkeeper made a loss 16% on LED. Find the second discount allowed by shop?
- (a) 15%
 - (b) 20%
 - (c) 25%
 - (d) $16\frac{2}{3}\%$
 - (e) 17.5%

FLAGGED - a stacked fraction collapsed into loose digits

98. A shopkeeper marked up a shirt 50% above the cost price and allows successive discounts of $11\frac{1}{9}\%$ and 10% on it. If the difference between profit earned and
- (a) Rs. 2100
 - (b) Rs. 3000
 - (c) Rs. 2400
 - (d) Rs. 3600
 - (e) Rs. 3300

FLAGGED - stem ends mid-sentence

99. Retailer sold one article at $33\frac{3}{4}\%$ profit and another at 100% profit. Find his overall profit percentage if the selling price of both the article is same?
- (a) 60%
 - (b) 55%
 - (c) $66\frac{3}{4}\%$
 - (d) 75%
 - (e) $56\frac{3}{4}\%$

FLAGGED - a stacked fraction collapsed into loose digits

100. A person sold an article for Rs 802. If it is sold for Rs 38 more, then selling price would be 20% more than cost price. What is the profit percent when article is sold at actual selling price?
- (a) 18.75%
 - (b) 16.67%
 - (c) $20\frac{1}{4}\%$
 - (d) $11\frac{9}{10}\%$
 - (e) $14\frac{7}{10}\%$

FLAGGED - a stacked fraction collapsed into loose digits

101. Cost price of article A is Rs 600 more than that of B and selling price of A is Rs 1200 more than that of B. If difference between profit earned on selling these 1 two articles is $13\frac{3}{4}\%$ of the cost price of A then find profit earned on B if profit % earned on A is $33\frac{3}{4}\%$?
- (a) Rs 800
 - (b) Rs 900
 - (c) Rs 840
 - (d) Rs 960
 - (e) Rs 1000
